Earl De Grey and Ripon then directed the statue to be unveiled, and, the signal having been given by a bugle, the uncovering was immediately accomplished, amidst the repeated and enthusiastic cheers of the vast assembly, the military bands at the same time playing the National Anthem. A Royal salute was then fired by the Artillery, followed by a *feu de joie* by the Rifles, and, his Lordship and the Corporation having walked round the inclosure and inspected the statue, the ceremony terminated.

The statue was presented by the Mayor (Mr. W. H. Moss); the park being the gift of Mr. Z. C. Pearson, the late Mayor (in 1860), whose difficulties, arising from his speculative and blockade-running transactions with the Southern Confederacy, were, curiously enough, undergoing examination in the London Bankruptcy Court at the very time that the park which he had given to the town was formally opened, and the statue of the Queen (due to his suggestion) was uncovered. The park, which is about twenty acres in extent, has been tastefully laid out at the expense of the town, and for some time past has been open as a place of resort and recreation to the inhabitants, but the official opening, for various reasons, has been deferred until the present occasion. The statue was designed and executed by Mr. Thomas Earle, of London, a native of Hull, the cost being 1000 guineas. It is of Carrara marble (the block weighing twelve tons), and represents her Majesty seated in her State robes, the height of the figure being eight feet. An intellectual expression has been produced, and the drapery and accessories, are elegant and graceful. Upon the pedestal is the inscription, explanatory of the circumstances which led to the erection:—"This statue of her Majesty Queen Victoria, designed to commemorate her visit to Hull on the 13th of October, 1854, was presented to the people of this town by William Henry Moss, May, 1863." Mr. Earle is also executing a statue of the late Prince Consort for the park. The statue of the Queen has received the approval of several members of the Royal family.

M. Nadar, who is fast recovering from his contusions, has stated his intention of exhibiting "Le Géant," and the car in its actual condition after the accident, in the course of a few days, at the Crystal Palace, Sydenham.

The International Congress held at Geneva has been discussing regulations for the better care of the wounded on battle-fields, and has proposed that a convention be arranged, according to which a committee should be formed in every country to carry out this laudable object.

The *Cologne Gazette* states that one of the keepers of the wild beasts in the Zoological Gardens of that city, fancying that he had obtained complete mastery over the bears, invited a number of his acquaintances the other day to see him enter the bear-pit and take his breakfast along with its occupants. He began his performance by advancing towards a bear, commanding him to come and take a piece of bread which he held between his teeth. The bread happened to fall on the ground, and when the keeper attempted to prevent the bear from picking it up, the animal sprang forward, seized him by the neck, and strangled him in a moment.

At a fête given to the Volhynian peasants at Zytomir, on the anniversary of the coronation, by the Governor, Prince Drucki Sokolnicki, the Prince thus addressed his guests:—"The Czar is grateful to you for your conduct, and rewards you with the lands on which you have hitherto worked. You are now landowners. But the benefits the Czar prepared for you do not end here; you must now assist him by crushing the nobles who have risen in insurrection, and must be exterminated. When the Polish nobles are rooted out of the country you will have no more rent to pay." The peasants heard this speech in silence, and the Russian Bishop of Zytomir protested against it.

Next Session is likely to be very prolific in railway and other projects. The Parliamentary agents are busily engaged in reference work and in the preparation of notices, which, with the advertisements in the newspapers, must be published during the present month. The plans and descriptions of the intended operations of railways must be deposited with the clerk of the peace, and in Scotland with the Sheriffs, on or before the 30th of November, and also with the Board of Trade, and on or before that day the plans and sections must be left at the Private Bill Office of the House of Commons. On or before the 23rd of December printed copies of bills are to be deposited at the Board of Trade, &c., and on or before the end of the month a list of the owners and occupiers of the property required for the various undertakings must be lodged at the Private Bill Office.

A Board of Trade inquiry was commenced on Friday in Liverpool, before Mr. Raffles, the stipendiary magistrate, and Captains Baker and Harris, nautical assessors, into the loss of the screw-steamer Pactolus, which took place on the 8th of September last, on the rocks near Little Hope Island (near Nova Scotia). The vessel was under command of Captain Johnson, and was owned by Messrs. Lamport and Holt, W. S. Lindsay, and others. The inquiry was continued on Saturday, and, after hearing the evidence, the following judgment was given:—"The Court has carefully considered this case and given every attention to the statement of the captain, which agrees with the evidence of the witnesses. The Court is compelled to pronounce the master in default, in that, in very foggy weather, on a dangerous coast, he entirely neglected the use of his lead, when he had no other means of ascertaining whether he was making his course good, or whether the current was setting him in shore. Having, in consequence, got his vessel into danger, and aware, as he must have been, that the land was on his port side after he had reversed his engines and brought her head round to north-west, the Court is of opinion that he did not exercise a sound and seaman-like judgment in attempting to wear round over the same ground to port, whereby he brought himself a second time upon the very danger which he had just escaped. Taking into consideration the strenuous exertions made by the master, which resulted in the saving of all the lives on board and the greater part of the cargo undamaged, and also bearing in mind the high character given to him by his owners, the Court is not disposed to pass a very severe sentence. The sentence of the Court is that the certificate of Mr. Edward Johnson be and it is hereby suspended for nine calendar months from this date."

THE FRENCH EXPENSES AT THE EXHIBITION OF 1862.—The *Moniteur* publishes the following report from Prince Napoleon, as head of the Imperial Commission:—"Sire,—In the name of the Imperial Commission charged with the organisation of the French department in the Universal Exhibition of London, I come to lay before your Majesty the financial results of our operations. Your Majesty will be pleased to learn that our expenditure has been far below the credit voted. The Commission took as the basis of their expenditure the 634,000f. (£25,360) which was appropriated in 1851 for the installation in London of 1700 exhibitors, the transport of 750 tons of packages, and the remuneration of thirty juries. They foresaw that they might have to install 3000 exhibitors to remunerate thirty-six juries, and to transport 2000 tons of packages, which would require a proportionate expense of 1,400,000f. (£56,000). Hoping to be able to effect a considerable saving, they limited themselves to a demand of 1,200,000f. (£48,000), which was voted by the Corps Législatif on July 2, 1861. Our anticipations were exceeded in consequence of the efforts of our artists and manufacturers. The number of exhibitors was 5779, the weight of packages 2219 tons, and the English Commissioners increased the number of juries to sixty-five. The Imperial Commission shrank from no expense which could contribute to the splendour of the Exhibition; they struck, with the name of the receiver in relief, 800 gold, silver, and bronze medals, which they presented to their coadjutors; they spared nothing in the discharge of the duty imposed on every nation by those international competitors; and, for the first time—thanks to the devotion of their agents and the zeal of the principal exhibitors—a French exhibition was ready at the day fixed. We have effected a set-off to these causes of increased expenditure by the strict order observed in the details of the operations and by the care we took not to employ more hands than were strictly necessary for the execution of the work as it proceeded. The expense was, moreover, diminished by many of the exhibitors, who generously contributed by their products to the decoration of the Kensington Palace and the residence of the Imperial Commission in London. If the expenses of the Exhibition of 1862 exceeded those of 1851 in the ratio of the number of exhibitors and of the weight of goods, they would have amounted to about 2,000,000f. (£80,000). They only amount to 975,000f. (£39,000). This sum consists of 951,125f. paid away, and 23,875f., the estimate of the amount which remains to be paid. The Ministers of Agriculture, Commerce, and Public Works, and the Minister of Finance are informed that the sum of 225,000f. (£9000), the balance of the credit granted to the Imperial Commission, remains at the disposal of the State. Accept, Sire, the homage of the deep and respectful attachment with which I am your Majesty's most devoted cousin, The Prince President of the Imperial Commission—NAPOLEON (JEROME)."

LAYING THE FOUNDATION-STONE OF THE WEDGWOOD INSTITUTE, AT BURSLEM.

On Monday week, as briefly noticed in our last Number, the Chancellor of the Exchequer laid, at Burslem, Staffordshire, the foundation-stone of the Wedgwood Institute, a public building designed to embrace a school of art, a museum, and a free library, to be erected by the inhabitants of the Potteries as a memorial, in his native town and first place of business, in honour of Josiah Wedgwood, whose name and genius are intimately associated with the enterprise and art-manufacture of the district.

Our last Impression contained an Engraving of the intended building, and we now give an Illustration of Mr. Gladstone delivering his address at the laying of the foundation-stone.

The ceremony excited the greatest interest in the neighbourhood, and the day was kept as a holiday throughout the whole of the district. The printed request of the Chief Bailiff to the inhabitants to close their shops and exhibit flags was very generally complied with. There was a triumphal arch across the main street, and the tent erected over the stone was also decorated with banners, evergreens, and inscriptions. At one o'clock the Chancellor of the Exchequer entered the tent under which the ceremony was to take place, and was received with enthusiastic cheering. There were present, among others, Earl Granville, the Bishop of Lichfield, Viscount Ingestre; Mr. Lowe, M.P.; Mr. Adderley, M.P.; Sir James Duke, M.P.; Mr. Grenfell, M.P.; Mr. Ewart, M.P.; and Mrs. and Miss Gladstone.

The proceedings commenced with the presentation of two addresses to Mr. Gladstone—one by the Chief Bailiff and members of the local government of the district of Burslem, on behalf of the inhabitants, and the other by the working men.

Both addresses complimented Mr. Gladstone for the share he had had in the recent fiscal measures which had contributed so much to the prosperity of the country; and the address of the working men also dwelt on the kindly conduct now so commonly evinced by the wealthier portions of the community to assist in the physical and moral improvement of the working classes, acknowledging that the well-being of the toiling masses is now generally admitted to be an essential to the national weal. They particularly thanked Mr. Gladstone for his exertions in striking the shackles off industry, and so benefiting the working man.

Mr. Gladstone, in reply, said that he and his colleagues had received ample reward in the acknowledgments of the people and the spectacle of the prosperity ascribed to their measures. "With respect, he said, in particular to the address so beautifully composed and inscribed which I have just had the satisfaction of hearing read by Mr. Bowers, I say that it is a happy thing for Old England, and it is a good example for the nations of the world, when the sons of toil, as they justly and honourably term themselves, are found to express themselves in terms of warmth and attachment, which other classes may rival but no class can possibly excel, with respect to the Throne, to the laws, and to the institutions of the country."

The foundation-stone was then laid with the usual ceremonies, prayer having first been offered by the Bishop of Lichfield; and Mr. Gladstone proceeded to deliver his address:—

WHY HE ACCEPTED THE INVITATION.

In the course of his introductory remarks, Mr. Gladstone explained that it was his practice to decline all invitations to ceremonials of a purely local character, unless such as he had some personal connection with; but he considered the present one as really national, "because the manufacture of earthenware, in its varied and innumerable branches, is fast becoming, or has indeed become, one of our great and distinguishing British manufactures; and because there are certain principles applicable to manufacture, by the observance or neglect of which its products are rendered good or bad. These principles were applied by Wedgwood, with a consistency and tenacity that cannot too closely be observed, to industrial production. These principles, being his and being true, were also in no small degree peculiar to his practice, and deserve to be, in the permanent annals of art, especially associated with his name." Mr. Gladstone then, noticing that his speaking appeared as if the learner was teaching those who could teach, said that he submitted his opinion with all deference; but he was anxious, having formed a high estimate of Wedgwood in his relation to the general laws of industrial production, to have that estimate fully and fairly brought to the trial of public judgment. Again: "In the office which I hold as a servant of the Crown, and which places me in incessant contact with the industry of the country in its several branches, I am anxious, from the deep interest I feel in its welfare, to bear my testimony to the principles of which Wedgwood was, so to speak, an apostle; and, moreover, to give to that testimony any little weight which such an office and such a deep interest and near relation established by it, may be likely, in the absence of higher personal qualifications, to impart. Thirty years ago it would probably have been held by many, and it may still be the thought of some, that the matters of which I have now to speak are matters which may well be left to regulate themselves. To vindicate for trade in all its branches the principle and power of self-regulation has been for nearly a quarter of a century a principal function of the British Parliament. But the very same stage in our political and social existence which has taught us the true and beneficial application of the laws of political economy has likewise disclosed to us the just limits of the science and of the field of its practical application. The very same age which has seen the State strike off the fetters of industry has also seen it interpose with boldness for the protection of labour. The same spirit of policy which has taken from the producer the enjoyment of preferences paralysing to him and most costly to the community at large, has offered him the aids of knowledge and instruction by whatever means, either of precept or example, public authority could command."

BEAUTY.

Mr. Gladstone then, noticing the excellence of British manufactures in useful productions, spoke of the necessity of associating beauty with convenience, and said, "Beauty is not an accident of things; it pertains to their essence; it pervades the wide range of creation, and, wherever it is impaired or banished, we have in this fact the proof of the moral disorder which disturbs the world. Reject, therefore, the false philosophy of those who will ask, 'What does it matter, provided a thing be useful, whether it be beautiful or not?' and say, in reply, that we will take our lesson from Almighty God, who in His works hath shown us, and in His Word also hath told us, that 'He hath made everything,' not one thing or another thing, but everything 'beautiful in His time.' Among all the devices of creation there is not one more wonderful, whether it be the movement of the heavenly bodies, or the succession of the seasons and the years, or the adaptation of the world and its phenomena to the conditions of human life, or the structure of the eye or hand or any part of the frame of man—not one of these is more wonderful than the profuseness with which the mighty Maker has shed over the works of His hand an endless and boundless beauty. And to this constitution of things outward, the constitution and mind of man, deranged though they be, still answer from within. Down to the humblest condition of life, down to the lowest and most backward grade of civilisation, the nature of man craves and seems as it were even to cry aloud for something, some sign or token, at the least, of what is beautiful in some of the many spheres of mind or sense. It is that which makes the Spitalfields weaver, amid the murky streets of London, train canaries and bullfinches to sing to him at his work; that fills with flowerpots the windows of the poor; that leads the peasant of Pembrokeshire to paint the outside of his cottage in lively colours; that prompts in the humble class of women a desire for some little personal ornament, certainly not without its dangers (for what sort of indulgence can ever be without them?), yet sometimes, perhaps, too sternly repressed from the high and luxurious places of society. We trace the operation of this principle yet more conspicuously in a loftier region—in that instinct of natural and Christian piety which taught the early masters of the fine arts to clothe the noblest objects of our faith, and especially the idea of the sacred person of our Lord, in the noblest forms of beauty that their minds could conceive or their hands could execute. It is, in short, difficult for human beings to harden themselves at all points against the impressions and the charm of beauty."

MERITS OF WEDGWOOD.

Mr. Gladstone then pointed out the danger of artists neglecting beauty in their manufactures, as it was an element of expense, and their rule was cheapness; and he also pointed out that the cheapest at first was not cheapest in the long run. Mankind were willing to pay a price for beauty, and the neglect of beauty was revenged by the demand for embellishment of some kind, and the manufacturers, unable to supply beautiful embellishment, substituted strength for flavour, quantity for quality, and ended by producing incongruous excrescences, or even hideous malformations, at a greater cost than would have sufficed for the nourishment among us of chaste and virgin art. As to the peculiar character of their hero, "his most signal and characteristic merit lay, as I have said, in the fineness and fulness of his perception of the true law of what we term industrial art, or, in other words, of the application of the higher art to industry—the law which teaches us to aim, first, at giving to every object the greatest possible degree of fitness and convenience for its purpose, and next at making it the vehicle of the highest degree of beauty with compatibility with that fitness and convenience which it will bear; it does not substitute the secondary for the primary end, but recognises as part of its business the study to harmonise the two. To have a strong grasp of this principle, and to work it out to its results in the details of a vast and varied manufacture, is a praise high enough for any man, at any time, and in any place. But it was higher and more peculiar, as I think, in the case of Wedgwood than in almost any other case it could be. For that truth of art which he saw so clearly, and which lies at the root of excellence, was one of which England, his country, has not usually had a perception at all corresponding with her other rare endowments. She has long taken a lead among the nations of Europe for the cheapness of her

manufactures: not so for their beauty. And if the day shall ever come when she shall be as eminent in taste as she is now in economy of production, my belief is that that result will probably be due to no other single man in so great a degree as to Wedgwood."

CAUSE OF ENGLISH WANT OF TASTE.

Enlarging on this topic, Mr. Gladstone said that it was no natural unfitness which in former times had given us a reputation for ugliness in manufacture. "It has not, I think, been sufficiently considered what immense disadvantages were brought upon the country as respects the application of fine art to industry by the great revolutionary war. Not only was the engrossing character of a deadly struggle unfavourable to all such purposes, but our communion with the civilised world was placed under restraint, and we were in great measure excluded from resort to those cities and countries which possess in the greatest abundance the examples bequeathed by former excellence. Nor could it be expected that kings and governments, absorbed in a conflict of life and death, and dependant for the means of sustaining it on enormous and constant loans, could spare either thought or money from war and its imperious demands for these the most pacific among all the purposes of peace. At any rate, I take it to be nearly certain that the period of the war was a period of general and progressive depression, and even degradation, in almost every branch of industrial art; that the fabrics of your own manufacture, for example, were, in point of beauty, much inferior to what they had been at a former time; that the older factories had in some cases died out, in others—such as Worcester, for instance—they declined; and that, whereas Wedgwood is said to have exported five sixths of what he made, we not only had lost any hold such as he had gained upon the foreign market, but we owed the loss, in part at least, to our marked declension in excellence and taste."

WEDGWOOD'S PRODUCTIONS.

Mr. Gladstone then noticed the principal features in Wedgwood's life, remarking that what he considered a great omission—the want of a biography—was, he believed, about to be supplied, and dwelt especially upon his ability in associating with himself such men as Flaxman, though he (Mr. Gladstone) considered that Wedgwood's own share in designing was greater than was supposed. He selected the cheaper productions to show how Wedgwood applied his principles. "Commerce did for him what the King of France did for Sèvres and the Duke of Cumberland for Chelsea. And I would venture to say that the lower works of Wedgwood are as much distinguished by the fineness and accuracy of their adaptation to their uses as his higher ones by their successful exhibition of the finest art. Take, for instance, his common plates, of the value of a few pence each. They fit one another as closely as the cards in a pack. At least I, for one, have never seen plates that fit like the plates of Wedgwood and become one solid mass. This accuracy of form must, I apprehend, render them much more safe in carriage. Of the excellence of these plates we take it for a proof that they were largely exported to France, if not elsewhere; that they were there printed or painted with buildings or scenes belonging to the country, and then sent out again as national manufactures. Again, take such a jug as he would manufacture for the washhand-table of a garret. I have seen these made, apparently, of the commonest material used in the trade. But, instead of being built up, like many fashionable jugs of more modern manufacture, in such a shape that a crane could not easily get his neck to bend into them, and that the water can hardly be poured out without risk of straining the wrist, they are constructed in a simple capacious form of flowing curves, broad at the top, and so poised that a slight and easy movement of the hand discharges the water. A round cheeseholder or dish generally presents, in its upper parts, a flat space surrounded by a carved rim; but a cheeseholder of Wedgwood's will make itself known by this, that the flat is so dead a flat, and its curve so marked and bold a curve; thus at once furnishing the eye with a line agreeable and well defined, and affording the utmost available space for the cheese. I feel persuaded that a Wiltshire cheese, if it could speak, would declare itself more comfortable in a dish of Wedgwood's than in any other dish. Again, there are certain circular inkstands by Wedgwood, which are described in the twenty-first section of the catalogue. Great care has been bestowed upon the mechanical arrangement, with a view to the preservation of the pen, and the economical and cleanly use of the ink. The prices are from sixpence to eight shillings, according to size and finish. I have one of these, not, however, black, like those mentioned in the catalogue, but of his creamy white ware. I should guess that it must have been published at the price of a shilling, or less. It carries a slightly recessed rectilinear ornament, which agreeably relieves a form otherwise somewhat monotonous. But the ornament does not push this inkstand out of its own homely order. It is so tasteful that it would not disgrace a cabinet, so plain that it would suit a counting-house. Mr. Gladstone, after noticing in a similar manner Mr. Wedgwood's intermediate productions, alluded to the restraint and sobriety of his colouring, and suggested as the reason—not mere imitation, but the classical severity of his forms. "I hope it will not be thought presumptuous to give utterance to an opinion that the forms of many among the most costly and splendid vases which were produced at Chelsea, and even at Sèvres, in the last century, were unsatisfactory; sometimes fantastic, often heavy and ungainly, rarely successful in harmonising the handles with the vessel, and, upon the whole, neither conformable to any strict law of art, nor worthy of the material, the fine colouring, drawing, composition, and gilding there and elsewhere so often exhibited in the decoration. On comparing the forms of these vases with those of Wedgwood, although these doubtless have suffered, as to their finer proportions, from shrinking in the fire, I think it is impossible to avoid being struck with his superiority, and feeling that his lifetime constitutes in fictile manufacture nothing less than a new era as to form. It is hard to avoid conjecturing that his eye must have noticed, and must in this respect have condemned, the prevailing fashion, and that he must have formed a deliberate resolution to do what I think unquestionably he did—viz., to exhibit to the world in this vital particular a much higher standard of excellence."

The right hon. gentleman concluded his speech by praises of the personal character of the man whom they honoured, and adverting to the prosperity which his inventions had brought to the district. He concluded amid loud cheers.

A déjeûner was immediately afterwards served in the Townhall, Earl Granville presiding, there being present Mr. Gladstone and Mr. Lowe, M.P. Covers were laid for 300.

The Cotton Supply.—Mr. John Cheetham writes to the *Times*, taking a less favourable view of the prospects of the cotton supply than that taken in the recent report to the Lancashire Relief Committee. He estimates the imports for next year at 2,445,000 bales, being an increase of 585,000 bales, or 31 per cent upon 1863. A consumption, he says, of four days per week, based upon the data of 1860, would require 32,400 bales, and, allowing an additional export of 2000 bales weekly over the present year, we have a weekly demand of 46,400, or a total for the year of 2,412,000, to meet which is the above estimated import of 2,445,000 bales. The report to the committee, it will be remembered, estimated that there would be a supply for four and a half days per week.

A Royal Baptism at Lisbon.—A letter from Lisbon thus describes the splendid ceremony with which the baptism of the infant heir to the Portuguese crown was attended:—"At an early hour the troops formed along the streets marked out for the progress of the procession. The balconies and windows soon began to be peopled with gaily-dressed ladies, and the thoroughfares were crowded, thousands of people having flocked to Lisbon from the neighbouring townships to witness the show. At about eleven a.m. the procession left the Ajuda, and took the way along the Belem-road to Lisbon. The cortége was opened by a strong detachment of the Lancers; they were followed by the canebearers, the kings-at-arms, the heralds, and pursuivants. Behind came the gorgeous antique coaches of the Royal household, which are never brought out except upon high State occasions, carrying many high officials and ladies and gentlemen of the Court. In the most magnificent of the State coaches, which is ornamented with exquisite relievos in the first style of art, appeared the King, Dom Fernando, and the Infant Dom Augustus. This coach was drawn by eight horses and surrounded by the officials of the master of the horse, the beefeaters, and attendants of the bedchamber. A picket of cavalry closed the procession. The Royal infant was brought in a close carriage, after the grand procession, not to be delayed on the way; he was accompanied by his governess and nurse. At the door of the church of San Domingos the Royal Prince was carried by the Marquis de Fronteira, and was received under the pallium, and then placed in the magnificent bed prepared for the purpose, near the principal entrance. The bed was a beautiful pavilion, with very rich curtains covering the cradle. When the procession reached the temple the King and Dom Fernando were met in the portico by the Councillors of State, both active and honorary, the members of the Municipal Chamber, the high law officers, and other dignitaries, and were accompanied to a throne, set up on the Gospel side of the high altar; they afterwards, however, took their places on another throne erected in the body of the church, in front of the Royal infant's cradle. The Prince Amadeus, uncle of the Prince, and Prince Eugene de Carignan, sat with their suite in the Royal tribune, near the throne. The vast interior of the church was brilliantly decorated and illuminated. Magnificent candelabra were arranged in rows, and from one to the other there hung garlands of flowers. When the infant was brought forward for baptism between a multitude of gazers of both sexes—the ladies in elegant toilets and many of the gentlemen glittering with the insignia of different orders—the *coup-d'œil* was truly splendid. Eager faces were on all sides bent forward to catch a glimpse of the young scion of Braganza; and, for my own part, I must indorse the verdict of the ubiquitous Mrs. Grundy, that he is a very fine boy, and, I may add, very like his papa. The child gave mouth most lustily, and the King and his Royal father seemed happy and contented, and were moved to merriment by many incidents of the day. Baptism was administered by the Cardinal Patriarch of Lisbon with all the ceremonial of the Roman ritual. The sponsors were Dom Fernando and Princess Clotilde, the Duchess of Terceira being proxy for the Princess. At the commencement and end of the ceremony the ships in harbour and the fortifications fired salutes, and merry peals were rung from the church bells. The full names of the infant Prince are Carlos Fernando Luiz Maria Victor Miguel Rafael Gabriel, Gonzaga Xavier Francisco de Assis José Simao de Braganza Savoy Bourbon Saxe Coburg Gotha. The Cavalier Roveda, Aide-de-camp to Victor Emmanuel, has arrived with presents for the Queen and Prince to the value of £3000."

NAVAL AND MILITARY INTELLIGENCE.

At Tynemouth, on Monday week, Mr. William Fry died, at the age of eighty-seven. He accompanied the British fleet under the command of Nelson to Ostend and Copenhagen, and was wounded in the hand.

Her Majesty's screw gun-vessel Ranger, 5, Commander Henry E. Wratislaw, from the west coast of Africa, on Monday returned to Woolwich, to be paid out of commission. During her last commission, three years and a half, she captured two full slavers, which will entitle the officers and crew to good prize-money.

The third battery of the 13th Brigade Royal Artillery, commanded by Major Govan, returned to head-quarters on Saturday from China, having disembarked from the freight-ship Silver Eagle. The battery consists of 157 men, with the following officers, viz.:—Second Captain Leacock, Lieutenants Harris and Yeatcock, and Surgeon Dr. Gulland. The Silver Eagle sailed from China on June 27, and fifteen deaths occurred on the voyage.

The newly-erected church on Woolwich-common, for the use of the garrison, was consecrated on Monday by the Lord Bishop of London, in the presence of his Royal Highness the Duke of Cambridge, the Field Marshal Commanding-in-Chief; the Right Hon. Earl De Grey and Ripon, Secretary of State for War; Viscount Sydney, and other distinguished visitors, who arrived at a quarter to eleven o'clock, amidst a salute of nineteen guns from the Green-hill Battery. A guard of honour was stationed in front of the church, and the Lord Bishop of London was received at the principal door of the edifice by his chaplains, registrar, the Revs. G. R. Gleig, M.A., Chaplain-General of the Forces; W. Hare, M.A., garrison chaplain at Woolwich; W. M. Wright, garrison chaplain at Chatham, and clergy of the diocese. After the services, which occupied upwards of two hours, the Bishop, with the Duke of Cambridge, the Secretary of State for War, Viscount Sydney, &c., proceeded to the officers' messroom at the Royal Artillery barracks to partake of refreshments, and returned to London about three o'clock. The new church, which is named St. George's, is a noble structure, in the Byzantine style of architecture, from the design of Messrs. Wyatt, and is built on the same plan as the celebrated church erected by the late Lord Herbert at Wilton. The officers of the garrison have subscribed nearly £1000 for its elaborate interior decorations, and an organ, &c. It contains a beautiful stone pulpit, coloured glass windows embodying the most marked events in the life of our Saviour, and the ceilings and galleries are highly finished and decorated. Messrs. Bevington and Sons are the builders of the organ.

The Prince Consort.—The iron-clad frigate Prince Consort, which was ordered round from Plymouth to the Mersey last week, was obliged to put into Kingstown Roads on Sunday. She encountered a severe gale in the Channel, sprang a leak, and was half full of water. Some of her crew received serious injuries. An eye-witness gives an account of what took place on board the Prince Consort during the late gale, which, he says, gradually arose from the north-west on Thursday, while the vessel was proceeding up the Irish Channel:—"By five p.m., when within twenty-five miles off Holyhead, the gale was furious and the sea very high. Under these circumstances it would have been running a fearful risk for an immense vessel like the Prince Consort to have been run for a small harbour like Holyhead. The sails were therefore furled, and the frigate put head to sea and towards Ireland. For the last three hours she had been labouring, and, although battened down, taking in much water. With her head to sea, the ship's magnificent engines were very thoroughly tested; and they drove this enormous mass of matter six knots at first, and eight knots afterwards, an hour, in the face of a very strong gale. At six p.m. it was reported that the water was within a few inches of the fire. All the pumps, including the steam-pump, were immediately set to work, but the water continued slowly but gradually to increase. Every effort was made to discover the leak, but without success. About midnight, when the men, who had been six hours at the pumps and nearly twenty-four hours at work, and without food from noon, began to show signs of exhaustion, Howth Lights were made, and at 12.30 the ship was anchored. The men had then a glass of grog served them, went at the pumps again with a will, and continued there until two p.m. In the meantime the steam-pump was taken to pieces, put to rights, and set to work again, and at two the ship's company were allowed a rest of two hours. By five a.m. the steam-pump had reduced the water eighteen inches, and all immediate anxiety was removed. The vessel was then taken to an anchorage off Kingstown. At the time of writing (Sunday afternoon) she has only the usual quantity of water in her that may in ordinary circumstances be expected in a ship of her description. All the stories of her having her guns, boats, &c., adrift are totally untrue. The water that the ship took in over all and by leakage through the ports was very great, but this can hardly account for the vast mass of water that was in her, and as yet the cause is not known, but it will not long remain a mystery." The *Freeman's Journal* of Monday says:—"We are happy to learn that this noble ship was entirely freed from water on Saturday, and we understand that the leak, if it exists at all, cannot be ascertained. Her efficient state has been reported to the Admiralty, and, when the weather permits, she will leave for Devonport for a general overhauling of bottom. A large number of people were at Kingstown yesterday to view the 'big ship.' Her Majesty the Queen, we are informed, forwarded a message to the officers and crew on Saturday. The telegram was dated from Windsor; and she specially thanks the captain, officers, and crew for their exertions in saving the ship named after her dear husband. Yesterday experienced divers went down to look for her port anchor, which got adrift on Friday when she arrived at the roadstead."

New Class of Ironclads.—The building of the new iron war-frigate Bellerophon, which has just been commenced at Chatham Dockyard, will inaugurate a new era in iron shipbuilding, the Lords of the Admiralty having for the first time admitted the importance of having the vessels of our future iron fleet constructed on what is termed the double-bottom or unsinkable principle. Unlike a wooden vessel of war, the bottom of an iron ship is so weak in comparison with its other parts, and so liable to injury, that unless the ship is divided internally into numerous independent compartments or chambers, a comparatively slight touch of a rock, or other such injury below water, would expose her to the risk of almost instant destruction. It has, therefore, hitherto been found necessary to divide the Warrior, the Achilles, and our other iron-cased ships into short lengths or sections, by means of water-tight bulkheads, running across them internally, the number of these in the Achilles being nearly twenty, extending from the bottom up to the deck on which the guns are placed. In addition to these transverse bulkheads there are many others in various parts of the ship, so that the whole interior is divided into some scores of separate compartments, into any of which the sea may be admitted, by accident or design, without affecting to any great extent the floating properties of the ship. The value of this system of construction as a means of security is obvious; but, on the other hand, it is attended by enormous disadvantages, the chief of which, undoubtedly, consists in the division of an iron ship into a number of isolated tanks or air-tight wells, in which there is little or no ventilation. In the new iron-cased ship Bellerophon, which is now in hand at Chatham, the grave defects adverted to will, if not absolutely removed, be reduced to a minimum. Throughout the entire central portion of the Bellerophon, in which the engines, boilers, magazines, &c., are placed, the bottom of the ship will be double, the inner and outer bottoms or hulls being placed from three to four feet apart, in order that there may be ample space between for cleaning and painting both as often as may be desirable. As this space between the two bottoms will not be required for use, it will be divided into numerous water-tight compartments in the usual manner, and will consequently form a series of buoyant cells, any one or more of which may be injured without the sea being admitted to the others or to the ship. Beyond the central portion of the vessel, at each end, the lower deck will be used as an interior bottom, and the space below it made available for stowage by means of iron water-tight trunks, rising above the water-line. It is this combination of water-tight trunks with water-tight decks—the former being intended as a means for entering below the latter—which constitutes what is known as "Lungley's unsinkable principle," by aid of which not only is the division of the vessel into water-tight compartments accomplished without obstructing ventilation, but the vertical trunks themselves form ventilating apparatus of the best possible kind. In addition to what has been already described, the Bellerophon will be constructed with water-tight internal walls, completing the double bottom, and thus will, in fact, be made a double ship from end to end.—*Times.*

THE VOLUNTEER MOVEMENT.

A competition took place yesterday week amongst the members of the Victorias for three silver cups, two of which were presented by Mr. T. E. Thrupp, and one by Mr. J. Parnell, both gentlemen having been officers of the corps. The first prize was won by Private J. O. Dawe, the second by Sergeant Thornbury, and the third by Lieutenant Gruaz.

The two challenge vases of the Central London were shot for on Tuesday week by the representative squads of five members per company. The inhabitants' vase was contended for the second year, and wrested from the present holders, C company, by D Company. Lady Scarlett's vase was won by B company. Four prizes given by the inhabitants were won by the following members—Private Wilson, Bugler Wilton, Captain Woods. The tie for the fourth was shot off. Sergeant Jones, Colour-Sergeant Hall, and Sergeant Burch each made 27 marks.

The annual presentation of prizes and dinner of the 2nd City of London took place last Saturday evening at the Whittington Club; Major Spottiswoode in the chair.

On Thursday week most interesting ceremony took place in connection with the presentation to the winners of the prizes given by the patrons, friends, and officers of the 4th Tower Hamlets. The proceedings took place at St. Thomas's Hall, South Hackney, a large and handsome room, capable of holding about a thousand persons. In addition to the 4th Tower Hamlets Volunteers and their friends, there were present, by invitation, Sir Henry De Hoghton, Bart., Honorary Colonel; Lieutenant-Colonel Money, Major Thompson, and a considerable number of the officers and members of the 6th Tower Hamlets, which regiment is united to the 4th for the purpose of drill. The proceedings of the evening were presided over by Major De la Rue, of the 4th Tower Hamlets, in the absence of C. S. Butler, Esq., M.P. The programme of the entertainment consisted of a vocal and instrumental concert in two parts. Between the first and second parts of the concert the ceremony of the presentation of prizes took place.

The annual inspection of the London Artillery Brigade by Colonel Bowie, R.A., took place last Saturday afternoon at the Wellington Barracks, in standing gun drill, and in the evening, in Westminster Hall, in battalion drill. At the conclusion of the inspection Colonel Bowie said that the standing gun drill was very efficiently done, and he was perfectly satisfied with it. As regarded the battalion drill, he considered it was very well done indeed. The marching past both in slow and quick time could not, he thought, have been better. The formations were very well performed, as well as the manual exercise, which was very steady, and the battalion was well handled, as the officers knew their duty. Their platoon exercise was susceptible of improvement; that would come in time.

The fifth competition for the challenge cup of the D company of the West Middlesex Rifles took place at Wormwood Scrubbs yesterday week. Captain Dear was the winner, Private Edmonds being the next highest.

On the 22nd ult. the Post Office (B and C companies) division of the Civil Service regiment competed for prizes at the ranges of the 11th Surrey Rifle Corps. The annual prize presented by the effective to the honorary members was won by Mr. Wills. A sweepstakes was subscribed for by the competitors, and divided in the proportion of two thirds and one third. Mr. Pearson Hill took the first share, and Mr. Ed. Page (the inspector-general of mails) the second. A silver salver, presented by one of the officers, was won by Colour-Sergeant Cardin. A second prize was won by Mr. Gould.

The annual prize meeting of the 6th Tower Hamlets (North-east London) took place at the ranges, High Beech, Loughton, on the 19th and the 26th ult., in combination on the latter day with the 4th Tower Hamlets, for some prizes presented for competition by the two regiments. The shooting exhibited a marked improvement upon that of last year.

Last Saturday evening the official inspection by Colonel Morris of the 48th Middlesex (Havelock) Volunteers took place in the quadrangle of Somerset House. The muster of effectives was two companies, about eighty of all ranks, a third company being made up of cadets. Lieutenant-Colonel Cruickshank was in command. After performing various evolutions under the Adjutant, Colonel Morris said he should have had great pleasure in inspecting the 48th Middlesex by daylight; but, as he could not see very well what they had been doing, he hardly knew what sort of a report he should make to the War Office. He supposed, however, under the circumstances, he must give them the benefit of the doubt.

A return match took place on Thursday week between the second battalion of the London Rifle Brigade and the 1st Surrey, at the practice-ranges of the former corps, Plaistow, resulting, as on the former occasion, in the 1st Surrey becoming the victors.

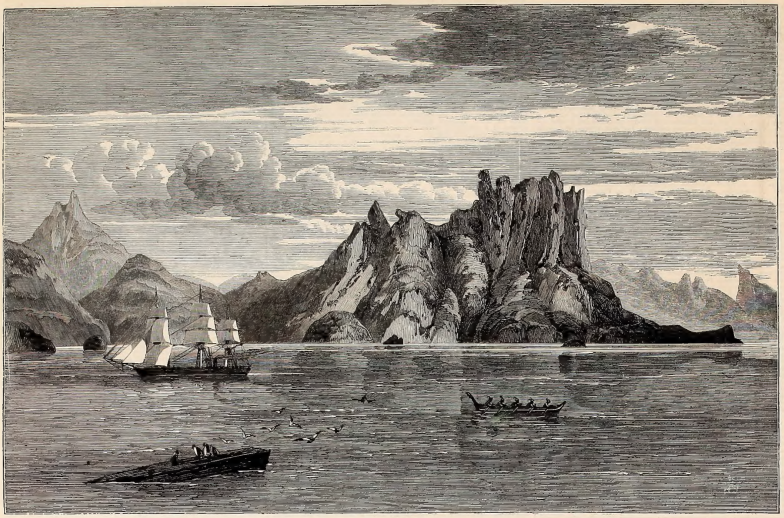
On Saturday week the presentation of prizes to the successful competitors in rifle-shooting in the 7th Surrey took place, in the presence of a considerable number of ladies and gentlemen, at its head-quarters, Hall-place, Kennington. Mr. J. E. Johnson, chairman of the Surrey Quarter Sessions, presided, and was supported by Major Beresford, the commandant, and other officers of the regiment. The commanding officer's (Major Beresford) challenge cup was won by Private Rosenburg, as was also the first prize given by the officers, and a gold watch by Private Watkins. The silver medal was won by Sergeant Hyett, and a timepiece by Paymaster Collins. The treasurer's prizes were won—the first by Private Mann and the second by Sergeant Hyett. For the all-comers' prizes, the first was won by Private Rosenburg, the second by Private Westcott, and the third by Private Watkins. There were several silver cups and other company prizes presented.—The monthly contest of this corps for a telescope, given by Corporal Fisk, of No. 4 company, took place on Tuesday at Wimbledon. It was won at the previous meeting by Private Collins. After an exciting contest, Sergeant Hyett proved the winner.

The numerous prizes competed for by the 19th Kent (Rochester) at their recent prize meeting at Gravesend were distributed on Thursday week at the Corn Exchange of that town by the Mayor, Mr. Henry Everest. There was a full muster of the members of the corps, and the ceremony was likewise attended by many of the gentry and tradespeople of the locality. In handing the prizes to the successful competitors, the Mayor in each case made a few suitable remarks, and the recipients were warmly cheered by their comrades. Other prizes, consisting of two challenge cups, presented by Sergeants Fletcher and Wyles, were afterwards presented, having been shot for the same day at the company's range, and both won by Private Hewitt. Five cups of equal value were presented by the officers of the company to the same number of members who had been most regular in their attendance at drill during the present year. It was found that there were eight who had attended every drill, and it was therefore necessary to cast lots to decide to whom the prizes should be given. This was accordingly done.

On Thursday week a contest took place at Cranbrooke Park, Ilford, between ten members of Captain Ibbitson's company (2nd Essex) and ten members of Captain Hill's (3rd Essex) Brentwood corps. The Ilford corps were the winners.

The corps forming the 1st Bucks battalion assembled for the first time for battalion drill at Aylesbury, on Wednesday week, and were inspected by Colonel Ibbetson. The movements, which were in the majority of instances executed with remarkable precision and rapidity, closed with a general salute; after which the volunteers were drawn up, and Colonel Ibbetson addressed them as follows:—"I am sure, Colonel Pratt, that you who have to-day so ably handled the battalion will agree with me that when now, for the first time, the volunteer corps of Buckinghamshire have assembled together for battalion drill, it has been so well performed as to reflect the greatest credit on all. I have always impressed upon you the necessity of drilling in companies as if in battalions, and I am very glad to find that the attention which has been paid to this advice has produced such excellent results to-day; but in volley firing I would recommend that you should be a little slower, so that not a single shot may be thrown away. No man should pull a trigger without covering his object. On the whole, I consider that great commendation is due to the various corps of the county, and I shall make generally a very favourable report of them."

On the 15th ult. the annual contest for prizes presented to the 21st Hants (Alton) took place at the butts at Holybourne, when the first prize, a silver cup, presented by Edward Knight, Esq., of Chawton House, was won by Ensign William Trimmer. Lance-Sergeant Gerald Hall was the successful competitor for the second prize, presented by the Captain of the corps, J. Batten Coulthard, Esq.



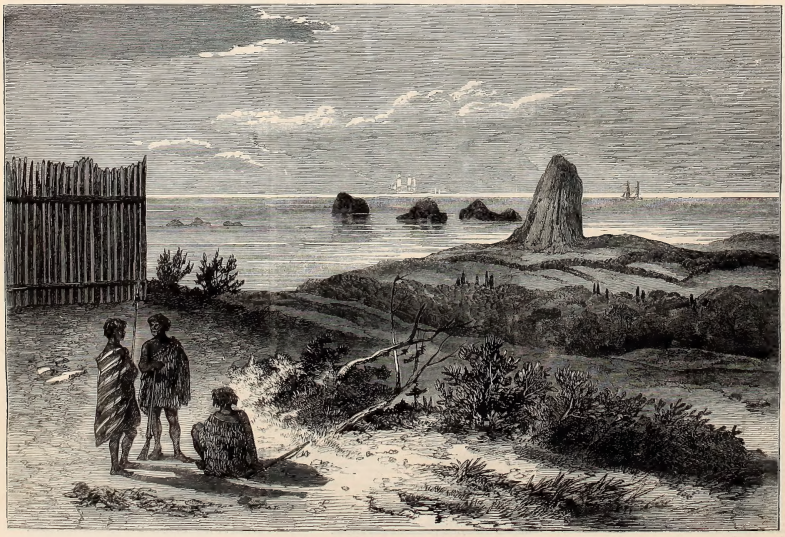
The 1st, or Duke of Manchester's, Light Horse Volunteers and the 1st Hunts Rifles had a grand field-day on the 21st ult. at Croxton Park, Cambridgeshire, the seat of Captain G. O. Newton. There were present the Duke of Manchester, the Earl of Hardwicke (Lord Lieutenant of the county of Cambridge), the Hon. Colonel Duncombe, and a large number of spectators belonging to that and the adjacent counties.

The second annual prize meeting of the 5th Cheshire battalion came off on Saturday week, at Batherton, near Nantwich. The prizes were a silver cup, value £15; a medal, with £5 added; a small-bore rifle, given by Lieutenant-Colonel Sir Charles Shakerley; and £5, by Adjutant Swetenham. The cup to be won twice successively by the same volunteer before becoming his property. The first prize was won by Corporal A. Johnson, Sandbach; the second by Sergeant Snelus, Macclesfield; and the third by Private Jeffery, Wilmslow corps.——Mr. John Laird, M.P., presided on Saturday week at the distribution of prizes for rifle and artillery shooting, competed for on the 17th of September by the volunteers of Birkenhead, and in doing so delivered an address on the defences of the country.

The marksmen of the 33rd Lancashire (Ardwick) assembled at the range of the corps at Astley, on Saturday week, to compete for a large telescope, presented by Captain Buxton. Sergeant Hartley and Private R. Hall tied. On shooting off, Hartley won.——A cup, value £15, given by the officers of the corps, was competed for by the members of the 1st Manchester, on Saturday week, at the range of the regiment, Barton Moss. Private A. Shaw, third company, won the cup.——The members of the 2nd Manchester (or 28th Lancashire) mustered on their ground at Astley, on Saturday week, to contest for the challenge cup of the regiment. Major Scott, who won the cup on the last occasion, was again the winner. Subsequently, four regimental prizes, presented by Lieutenant-Colonel Deakin, were shot for. Sergeant J. Dolphin won the first prize, Private J. Lees the second, Private T. Wilkinson the third, and Corporal B. Redfern the fourth. A challenge cup, value twenty-five guineas, given by Mr. Hinde, late Captain of No. 8 company of the 1st Manchester regiment, to be contested for annually by the above company alone until won three times by a member, and a silver medal, value three guineas given by the present Captain of the company, Mr. Phillips, was competed for on Saturday at Barton Moss. Private Canfield was the winner of the cup and medal last year. This year it was won by Sergeant Ridge, after tying with Private Harrison, with 18 points.

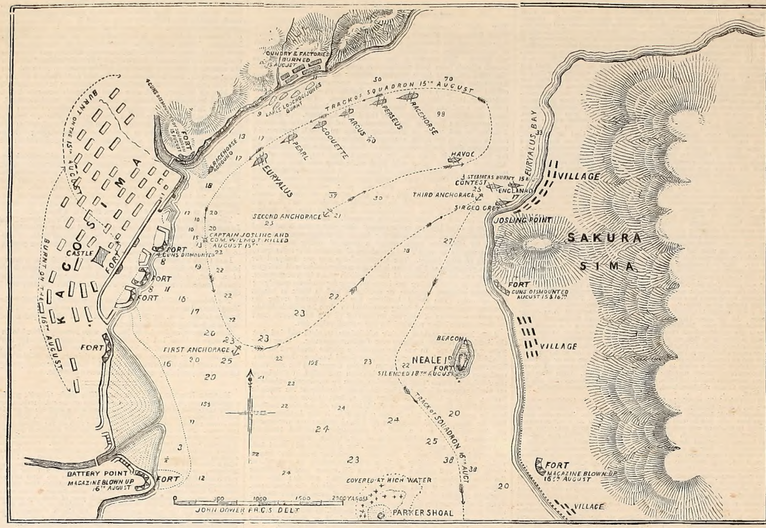
The annual prize-shooting of the 3rd North York corps was closed on the 21st ult. upon the range in Castle Howard Park, Yorkshire. His Excellency the Earl of Carlisle, who arrived on a visit from Ireland a few days before, was present at the contest, which was for a twelve-guinea silver cup, presented by Mr. Thomas Preston, of Malton. The noble Lord, although the weather was most unfavourable, took up his old position of marker, and remained to the close. The results of the various contests in the order of shooting were as follow:—Prizes for the Castle Howard company: Sergeant G. Sutherland, 1st; Corporal J. Bedale, 2nd; Private T. Hick, 3rd. The prizes for the Amotherby squad were won by Private J. Dobson, 1st; Private T. Baker, 2nd; Private J. Botterill, 3rd. Captain Worsley's prizes were won by Private Mitchell and Private Kirby. The next contest was the grand feature of the meeting, for the splendid cup given by Mr. Thomas Preston, of Malton. In addition to the cup, four money prizes were given. After a very close contest, the cup fell to Corporal J. Bedale (Castle Howard); Sergeant Sutherland winning the first money prize, Private Stead (Welburn) the second, Private Armstrong (Hovingham) the third, and Ensign Legard (Easthorpe) the fourth. The cup was presented to the winner by the donor in a complimentary manner; and Lord Carlisle also addressed a few words of encouragement to the winners and to the volunteers generally. Ale was then sent from the castle, and the healths of the Earl of Carlisle and the donors of the prizes were enthusiastically drunk, although the rain fell in torrents.

VIEWS IN NEW ZEALAND.



BREAM HEAD, ON THE NORTH-EAST COAST.

(Continued from page 469.)



racteristics of the Maories in peace and war. It includes also information for emigrants proceeding to the "Britain of the South." Sir James commanded for six months the outposts on the Waikato to keep the Maories in check whilst the military road was being formed.

Mr. Kinder's photographic views and map were accompanied by some explanatory notes, which we give nearly entire. His communication is dated Auckland, July 31, 1863 :—

Events have recently taken place here which are likely to increase the interest felt at home in this country. The crisis in native affairs which has been long impending has at last begun, and we are engaged in earnest in a war which must have the most important consequences for the colony. At present we are only at the beginning of the struggle, and it is not easy to foresee how long it may last or what dimensions it may assume before it is brought to a close. Everything, however, seems to portend that it will be most serious, and that most if not all the tribes of the northern island will be

THE SUGAR-LOAF ISLANDS, FROM WAIREKA HILL.

THE HARBOUR OF KAGOSIMA, JAPAN.—SEE PAGE 481.

MAP OF THE COUNTRY BETWEEN AUCKLAND AND THE RIVER WAIKATO, NEW ZEALAND, ILLUSTRATING THE WAR WITH THE NATIVES.

drawn into it. The result in the end will no doubt be the destruction of a great part of the Maori race, and the throwing open large tracts of land to colonisation; but this will not be purchased except at the cost of much blood and money to the colony, much public loss and private suffering. Already many of our settlers have been obliged to abandon their homes, and have lost their all, or the greater part of their property. Already several families among us have had to mourn the loss of relatives cruelly cut off by the natives now in arms against us, who make no distinction between the armed soldier or militia-man and the unarmed settler peaceably at work upon his own farm—who make no prisoners, and tomahawk the wounded when the fight is over. Hitherto in Auckland we have been free from those sad scenes of blood and devastation which have been too common in the adjacent province of Taranaki; but it was hardly possible we could continue to be so when our next neighbours of the Maori race are the natives of Waikato, the strongest and the most warlike of the Maori tribes, the very heart of the King movement, and the centre from which the former war at Taranaki drew the support and strength that made it at all formidable. It was, in fact, inevitable that we must, sooner or later, have been brought into collision with these tribes. They have (as a body) all along resisted the introduction among them of Sir George Grey's system of native Government. No sooner had he re-entered upon possession of the Tataraimaka land at Taranaki, which was indisputably ours by right of purchase, than they began to show signs of hostile feeling. The Government Commissioner, Mr. Gorst, resident at Otawhao, near the Waipa, was unceremoniously expelled though living on land secured by a Crown grant. The Government Industrial School, for native lads, which had been established at great expense, was broken up, and the printing-press belonging to it forcibly removed. Two of the missionaries—one of the Church of England, the other a Wesleyan—were forced to leave their stations; and all the white men in the district (many of whom had married native women) were driven from their homes, while their wives and children were claimed by the natives and taken from them unless able to effect their escape. On the 4th of May, Dr. Hope and Lieutenant Traggett, with six or eight soldiers, were murderously shot down on the Taranaki beach at Oakura in a time of supposed peace. This was the fearful mode adopted of declaring war; and it has since been learnt that the act was instigated by Waikato and perpetrated in accordance with instructions received from that place. When the Governor sent a despatch to Ngaruawahia, on the Waikato, calling upon the Maori King and chiefs to condemn the act, they justified it on the ground that it was, according to native custom, not murder, but war. Nor is it surprising that they should have done so, when they were apparently meditating a similar course.

At the beginning of July the troops were withdrawn from Tartaraimaka (but not until they had inflicted severe punishment on the natives at the Kaitakė Pa), and brought up to Auckland, with the exception of the 57th Regiment, which went into winter quarters at Taranaki. Tartaraimaka being distant twelve miles from the town of New Plymouth, without any made road, it was impossible to send supplies to the troops stationed there during winter. At the same time the Government received intimations of an intended attack upon Auckland, which made the presence of a considerable force in the neighbourhood absolutely necessary. The danger to the town seemed so threatening that, on the 9th of July, the Government issued a proclamation to all natives living in their villages near Auckland that they must either swear allegiance to the Queen and give up their arms, or else leave the place and go beyond Waikato. But few chose to do either one or the other, and withdrew into the woods in the neighbourhood of Papakura and Drury, in the rear of our troops, carrying their arms with them. From these it is almost impossible to dislodge them, and they constantly threaten, not only the outsettlers in the neighbourhood, but also to cut off communication with the front.

On the 14th of this month the first victims of the war in Auckland were an old man, named Meredith, and his son, a mere lad, who were at work at Shepherd's Bush, between Drury and the river Waikato. Since then three others have been shot in cold blood; and on the 17th an escort conveying supplies to the front was attacked by an ambuscade, when four men were shot down and ten wounded. It will be seen by a glance at the map that the road between Drury and the river (twelve miles in length) passes during a great part of this distance over a high range of densely-wooded hills. It has been one of the most useful works of the present Governor to have this road widened and metalled throughout, and in many parts new made. But though thus made available for the heavy traffic now required upon it, the trees and underwood are so near the sides of the road as to afford thorough concealment to an ambuscade and a secure retreat for the party forming it. Since the attack on the escort on the 17th parties have been engaged to fell the wood on each side of the road to a width of 21 chains, and in the meanwhile pickets are posted at intervals. On the same day that the escort was waylaid General Cameron made an attack on the natives, who had taken up a threatening position in front of his redoubt at Koheroa, on the Waikato. This was thoroughly successful, and the enemy were dislodged with a loss of at least fifty men (probably more), while on our side only two were killed and ten wounded. Since then the natives have kept out of the way, but they are evidently mustering their forces to strike a blow somewhere. Where this will be we cannot tell, as they have the advantage of being able to choose their own point of attack, and their movements are concealed by the thick bush. The General, on the other hand, is obliged to weaken his force by establishing posts along the whole line between the Wairoa river and the Waikato. In addition to the regular troops at his command, he has now 2000 militia and volunteers on active service, besides about 2500 performing garrison duty in town. A small steamer, the Avon, has been sent to the Waikato to co-operate with the troops, and another, especially built and armed for the service, is expected from Sydney very soon.

I inclose photographs of two scenes in the bush between Drury and the river—one taken near the scene of the murder of the old man Meredith and his son, mentioned above, and also of the attack on the escort July 17; they will show the character of the road to the front in this part of it. The third view is the Waikato river, near Mangatawhiri. The hills on the left hand, near the island, are occupied by the redoubt of Koheroa, which forms the General's most advanced position. It was here that the engagement of the 17th, mentioned above, took place.

P.S. Aug 1.—Since writing the above, a vessel has arrived from Tauranga, on the Bay of Plenty, about 150 miles from Auckland to the eastward, bringing in the families of Archdeacon Brown, the missionary stationed there, of two other clergymen engaged in the native school, and of all the other settlers. They have left in consequence of a letter received from William Thompson, whose portrait I sent you, who lives on the Thames, about forty miles from Tauranga, on the road to the Waikato. In this letter he declared his intention of joining in the war against the pakeha (white man), and of attacking the town, and that he would spare neither the unarmed nor their property. This was altogether unlooked for from him, as he has never before joined in any of the wars either between native tribes or with our troops at Taranaki. On the contrary, he has always most strongly dissuaded his countrymen from war, and has expressed his disapprobation of the course pursued by them. But he is a stanch supporter of the King movement, and the step which he has now taken is a proof how widely the hostile feeling is spreading among the natives. The announcement which he makes of his determination not to spare the unarmed shows the sanguinary nature of the struggle in which we are engaged. It will be a war of extermination on both sides. It is sad to see a fine race, of which such hopes have been entertained both of its preservation and social improvement, rushing headlong to its own destruction. It is possible that they may be so infatuated as to believe that they can successfully cope with the power of England and rid the island of the pakeha, but it seems more reasonable to suppose that, dreading instinctively the encroachment of the white man, and believing that they are doomed to extinction as a race, the owners of the soil, they are resolved, in one desperate attempt, to inflict as heavy a blow as possible upon the white man, and to die in fighting for their land.

According to the new Constitution of Venezuela slavery is for ever abolished in that State; every slave who places his feet upon her soil will be considered free and taken under the protection of the Republic.

There is a great rush to the gold mines in the county of Beauce, about thirty-five miles from Quebec. There are about a thousand persons at the "diggings," which are said to be exceedingly rich. The gold district extends over a distance of above fifty miles, part of it running through the suburbs of Quebec.

The bones of Robespierre, St. Just, and Lebas have been found by some masons who were laying the foundation-stone of a house at the corner of the Rue de Rocher, in the Batignolles, Paris. It was there the remains of these men, who performed so remarkable a part in the first Revolution, were deposited, the churchyard of the Madeleine being too full at the time of their execution to receive any more corpses. Public balls were held for many years at the place where the skeletons were discovered.

THE FRENCH IN COCHIN-CHINA.—The *Moniteur de l'Armée* contains a letter from Saigon, of the 6th of September, giving some interesting details of the treaty concluded by Rear-Admiral de la Grandière with the King of Cambodia:—"That document comprises two principal clauses. The first recognises the suzerainty of France as replacing that of the Court of Hué. The King of Siam pretends to have rights to the protectorate of Cambodia; but it appears from documents which cannot be disputed that his claims are not so ancient as those of the King of Hué, now represented by France. The second grants to France the right of forming an establishment in Cambodia, on the Mei-Kong, at the spot called Nam-Van, or the Four Arms; that is to say, at the point where the four branches of the river join. This establishment, placed in an excellent strategical position, will render the French masters of the course of that large river, which, after watering the principal provinces of Lower Cochin-China, now occupied by us, falls into the sea by four mouths. The distance between Nam-Van and Mytho is about 175 miles, and is nearly 250 miles between the former place and Saigon. The treaty also confers on France important commercial advantages, and contains very liberal stipulations in favour of the Catholic religion, which is highly appreciated and much professed in Cambodia. There are a bishopric and a flourishing French mission at Pignalu, forty-seven miles above Nam-Van, and well-attended Catholic schools at Oudon, the capital of the country. The treaty just concluded is in every respect an advantageous arrangement. It consolidates the domination of France over Lower Cochin-China, and renders us masters of a vast and rich region, which, by governing itself, relieves us from the difficulties always attendant on the necessity of ruling with foreign elements a country conquered by arms."

FINE ARTS.

THE NEW ART-TRAINING SCHOOLS.

THE admirably-constructed new National Art-Training Schools, South Kensington Museum, are now open for public inspection every Saturday, and are deserving a visit from all interested in the diffusion of art-knowledge, on account of the surprise and gratification they will afford. The success of the system upon which these and the branch schools have been conducted is apparent, not only in the fact that there are some three hundred scholars on the books for South Kensington alone, but doubtless also—as represented in the French official report upon our International Exhibition—in the generally-improving taste displayed in our manufactures. This success may, moreover, we think, afford lessons which would be of use in the proposed remodelling of the schools of the Royal Academy. In drawing any comparison between the management of the schools at South Kensington and those in Trafalgar-square we would, however, in simple justice to the latter, caution the public against the too common assumption that the circumstances of both are quite analogous. In the first place, it must not be expected that the schools of the Academy will ever be so well filled while they continue to retain something of the same relation to those of the Department of Science and Art that Oxford and Cambridge Universities bear to the schools that feed them. For our part, we should like to see the schools of fine art and the schools of design amalgamated; for they would be mutually beneficial, and fine art is unquestionably the fountain-head of all the arts of design. But this has not yet been definitely proposed. Meanwhile, it should be borne in mind that up to the present time every tyro is admitted into the schools of the department; but at Trafalgar-square a candidate for admission must present a proof of ability beyond the point probably at which the departmental schools leave the great majority of their pupils. The schools of the one are designed for artisans primarily, and in them is taught mechanical as well as figure drawing and the application of the principles of art to manufactures. The schools of the other are intended only for students qualifying to become painters, sculptors, or architects, and in them is taught fine art only. The Royal Academy has also laboured under the immense disadvantage of being compelled to close its schools during the best six months of the year, on account of the apartments used by the students being required for the annual exhibition.

After, however, making all fair admissions, we shall still find that the Academy schools compare very disadvantageously. They sadly want "waking up," to use the expressive phrase employed by Mr. David Roberts in his evidence before the Royal Academy Commission. The modicum of instruction given by the keeper and the visitors is doubtless miserably inefficient. It is often pretended, in defence of the Academy system, that instruction given to advanced students of art would repress originality; but this is not found to be the result in France. It may be said that there the student is free to enter the studio of that particular master which his taste at the time inclines him to prefer. And this is true; but still, if the Academy had, like the departmental schools, a paid head master (not necessarily an Academician) and a staff of thoroughly qualified teachers, a thousand of the technicalities of art, which, when unassisted in youth, every artist goes on discovering till sight and hand fail, might be taught without in the least interfering with that genius which, wherever existing, it is almost impossible to control, or "crib, cabin, and confine." We have not space here to indicate the many reforms needed in the Academy schools; but the system which has worked so well in the schools of the department might be adopted with assured advantage, and even carried further. Space is of course the first requisite, and then the lectures should be more practical, a chemical laboratory should be attached to the Academy, and no copying by the students of old or modern pictures should be allowed except under the surveillance of the master.

The school now at South Kensington has, it should be remembered, suffered under every disadvantage in respect of space, light, and other convenience, first at Somerset House, then at Marlborough House, and, lastly, at Kensington, up to the erection of the present classrooms, &c., yet the number of pupils has constantly increased. The new schools, with the large courts of the museum—completed last year—form part of the very extensive building designed by Captain Fowke, but still far from completion from want of funds; another large structure, with its proper façade, having yet to take the place of the notorious "Boilers." The new schools are disposed on two floors, the male pupils occupying the upper, the female the ground, floor. The several classrooms or studios are lofty and admirably lighted and ventilated; most of them measure 30 ft. by 20 ft., the lecture-room being 40 ft. by 30 ft. Each room is occupied by separate branches, such as elementary drawing, drawing from casts of the figure and ornament, architectural drawing, engineering, modelling, painting from flowers, fruit, draperies, landscape, and the living model, costumed and nude. The whole building was erected in less than four months. Two scholarships for female students are announced for competition. These have been founded by the sum contributed by the public when the wedding presents to the Princess of Wales were exhibited in the museum.

The statue which for thirty years has surmounted the column in the Place Vendôme, Paris, is, as we intimated last week, in course of removal. The statue of Napoleon I., in that military costume familiar to the world set up by King Louis Philippe, is to be removed to Courbevoie, and to be replaced by a statue of the first Emperor in the classico-heroic garb, similar to that first placed on the column. In making this change, the *Moniteur* says the Emperor Napoleon III., faithful to the reminiscences of the first Empire, wished that the effigy of the founder of the dynasty should be re-established on conditions in conformity with tradition. But it may well be doubted whether the change will be agreeable to the mass of the French people; and the heroic statue will certainly violate one of the canons of art, and perpetuate a most absurd anachronism, as well as be, after all, not strictly in conformity with the precedent of Trajan's Column at Rome—which is specially referred to. The bronze column of the Place Vendôme was, we all know, made of the Austrian and Russian cannon taken in the campaign which terminated at Austerlitz. The spiral of the shaft represents, by a continuous series of basreliefs, the principal actions in that campaign corresponding to the spiral of its marble original, the Trajan Column, which gives the successive events of the Dacian Wars; but in both cases there are in the basreliefs no attempts at allegorical representation. In regard, therefore, simply to the rules of art, there was no excuse for placing an heroic statue on such a column, whether ancient or modern. Nothing, on the contrary, would, in the case of the *triumphal* column, Place Vendôme, seem more natural than the placing on it of a statue of Napoleon I., in his military "redingote," "petit chapeau," and jack-boots, the costume so intimately identified with the representations beneath, and still so much more popular among all classes of the French than his portraits in Imperial robes. It is true, the Emperor Trajan was represented heroically, but it seems to be forgotten that the column to Trajan proved to be a *funereal* monument. The Roman Emperor never saw the column erected to him, for he did not live to return from the wars it commemorated; and his statue was made to hold a globe containing, it is believed, his ashes. The "apotheosis" of which the *Moniteur* speaks in reference to the first statue to Napoleon could not be understood in the same sense. And, although the obsequious Senate and degenerate Romans might still have given their illustrious Emperor an heroic costume (which, indeed, in his case, differed little from his ordinary robes) during his lifetime, the dissimilar circumstances fairly relieved the French, however fanatic their pro-classical tastes, from, as we have said, the absurd anachronism of elevating their Emperor as a pagan god or demi-god.

Efforts are being made to introduce into this country a new style of mural decoration called "marble tarsia,"—from *tarsia*, or the art of inlaying woods, stained or of different natural colours, so as to represent architecture, landscapes, and various ornamental objects—an art much employed in Italy in the seventeenth century, and imitated in French marqueterie. The specimens of marble tarsia we have seen bear, however, a great analogy to the ancient process of marble chiaro-scuro, and the remarkable pavement by Beccafumi of the Duomo, or Cathedral of Siena, which exhibits large and elaborate historical compositions in light, half-tint and shadow by means of three different-coloured marbles. The first specimen of this art was sent to the International Exhibition. The design represented "The Salutation," and the lines of the composition, with the principal shadows, were incised in a large slab of statuary marble, and filled in with a black marble, the half-tints being added in a similar manner with grey Sicilian marble. The piece was purchased by the department of Science and Art, and is now exhibited at the South Kensington Museum. The artist is Baron Henri de Triqueti, the sculptor of the reliefs on the bronze doors of the Madeleine, at Paris, and the successful competitor for the mosaic design of the "Transfiguration," which, when the necessary funds are subscribed, will be placed in the semi-dome of the apse of St. Paul's Cathedral. The late Lord Herbert of Lea was the first to adopt the new style of ornamentation in the church built by him at Wilton; and now Lord Herbert's example has been followed by another resident in the immediate neighbourhood, Mr. Fane De Salis having recently embellished Teffont Church with a work in marble tarsia by Baron De Triqueti. The site selected is the space above the east window in the Manor chapel, which adjoins the chancel. The subject is a choir of angels singing "Gloria in excelsis," grouped round a scroll on which is engraved, in golden letters, "Hallelujah, Hallelujah."

The Chancellor of the Exchequer, in his very able speech on the occasion of laying the foundation-stone of the Wedgwood Institution at Burslem, last week, remarked that a life of the great potter, Josiah Wedgwood, was much desiderated, and said that he was glad to know that the want was about to be supplied. Mr. Gladstone alluded, we understand, to a life of Wedgwood, from his private correspondence and family papers, in preparation by Elizabeth Meteyard, to be published by Messrs. Hurst and Blackett.

The collection of drawings which formed the Water-Colour Painters' Lancashire Relief Fund has been distributed among subscribers. The sum subscribed hardly reached half the estimated value of the collection, yet by this means no less than £1904 16s. has been contributed to the charitable purpose intended.

Lord Clyde's townsmen at Paisley have resolved that a memorial-bust of his Lordship shall be purchased for the town, and a duplicate of a bust, by Mr. Ewing (engraved in our pages a few weeks since), presented to the city of Glasgow by Mr. Dalglish has been chosen.

The decoration of the vacant spaces above the altar of Christ Church, Marylebone, have been intrusted to Mr. W. Cave Thomas. The large lunette (about 25 ft. by 12 ft.) is to be filled with a picture of the angels appearing to the shepherds.

Two pictures, said to be by Murillo, were recently offered to be sold by auction at Paris, but no bidder came forward, although the auctioneer was instructed to knock them down for 1200f. Not many days later they were verified as real originals, the painter's signature having been discovered on them by the restorer employed by the Government, and they are said to be worth 200,000f.

NATIVE REFORMERS IN INDIA.—The *Oude Gazette* publishes a curious report, in Indo-English, of a meeting of the "Anjumun Akbar," a native association of Shahjehanpore to promote the abolition of certain evil social customs among Hindoos and Mohammedans. The Hon. R. A. Drummond, the Judge, presided, and special reports were read on the subject by native gentlemen. Pundit Bany Ram reported that the evil practice of paying large sums to the bridegroom with his bride prevails among the Kanoujeas, or people of Kanouj, who are the most respectable in the district. The community is divided into three classes. A bridegroom of the first class gets 400 rupees with a wife of the same class, 500 rupees with one of the second class, and 1000 rupees with a wife of the lowest class, and so on through all the grades proportionately. Moreover, the husband may marry again—"nay, over and over ten times, notwithstanding his first wife or subsequent wives are alive and exempt from any chronic disease or other legal disabilities, and then leave them to the charge of their parents to provide for them." Some women, in poor and proud families, remain unmarried up to the fiftieth year of their age, and even for their whole life, "and this circumstance is productive of such evil consequences as are not worth mentioning." All this is "repugnant to the dictates of the Hindoo Shastras." One Moonshee Shu Shahai reported quaintly that the custom of giving money on the occasion of marriage is also prevalent amongst the Kayuts, and that "through avarice of money no notice is taken of the beauty or deformity of the bride by some." As to the Mohammedans, Moulvee Mahomed Kramutwoollah Moonshiff reported against the ruinous custom of relatives feasting for forty days at the expense of the house in which some one had died, and against the social prohibition of the re-marriage of Mussulman widows in imitation of the Hindoos. Rules were adopted to induce families to oppose these practices. Cazee Surfrarz Ally, "than whom a more learned scholar in the Persian, &c., is rare, and who is also a very respectable gentleman in his community," was appointed to compile a "good and easy" Dustoor at Amul for the instruction of the Purdanasheen females.

COTTON IN THE FRENCH COLONIES.—On this subject Captain Poulain, of the French Engineers, who has long resided in Senegal, has published a pamphlet, which, in the present scarcity of cotton, cannot but attract attention. He proposes a plan which, while it requires the co-operation of the State, leaves free scope to private enterprise. According to this plan, all the exiles and fugitives from the Southern States—men who, born in a warm climate, are best able to bear that of Africa, and who, besides, understand the cultivation of cotton—are to be invited to settle in the French possessions in Africa. Land is to be allotted to them in the immediate neighbourhood of the fortified posts, where they may in all security devote themselves to the cultivation of the precious plant, and thus gradually form agricultural centres, which will in time extend their influence further inland. An agricultural office established at the Ministry of the Marine is to direct and second their efforts. In the country itself a small number of agents are to be appointed to visit the farms, direct the public works, and survey the country. This is an outline of the general organisation, after which the author passes under review the various countries which he considers favourable to the growth of cotton. Provence, Corsica, Naples, Greece, Turkey, and Spain, he thinks, can do but little. In Algeria labour is too dear, and consequently offers but little profit; moreover, the sudden changes of temperature so frequent in that climate are unfavourable to the growth of cotton. But in the Soudan, a vast territory of Central Africa inhabited by the negro race, the cotton-tree grows spontaneously; and although the inhabitants are devoid of activity and enterprise, and therefore unlikely to export much cotton, they could send excellent seed. Next comes Senegal, which the author has inhabited for several years. It borders on the Soudan, has the same climate, and is rich in cotton. There labour is cheap; the article can be conveyed on the backs of camels, asses, or horses; and although the construction of roads would be impossible there in many places, owing to the sands, there are the Senegal and Casamanco, the Sann and Saloum, which traverse the country, and are protected by numerous fortified posts. Then, on the American continent, the author mentions the three Guianas, one of which is French, is well watered, and has a tropical temperature, with its usual accompaniment, a rich vegetation. Here cotton might be profitably cultivated, as it is already in Dutch Guiana. In the French West India islands the sugar cane is being abandoned, because it cannot bear up against the competition of beetroot sugar; and the author is of opinion that the cultivation of cotton would restore those islands to their former prosperity. Lastly, he mentions Madagascar as a very favourable country for the growth of cotton.—*Galignani.*

WARSAW BY NIGHT.—The only amusement I could devise was to smoke my cigar on the steps of the hotel, which looked out on the great Place de Saxe, where there was not a soul to be seen except the Russian sentries. Every half hour a patrol of soldiers marched by with a dull, heavy tramp, and about as often some belated passenger stole stealthily along, holding up his lantern before his face, and looking around him at every moment. But in half an hour's time the city appeared to have gone to sleep. After ten o'clock no human being is allowed to be about the streets except on public duty, and, as soon as it grows dark, every one is obliged, under heavy penalties, to carry a lantern with him. The effect of this custom is very peculiar and picturesque. The whole street, in the earlier part of the evening, appears to be alive with gigantic fireflies. As the gas burns very dimly at the best, and as everybody is in black, you hardly see the walkers themselves, and the lamps appear to flicker up and down as if they were carried by some monster moth. In fact, at night, the main streets of the city bear something of the look of a Venetian carnival on the stage. Then, and then only, is there anything cheerful in the aspect of Warsaw. The universality of the mourning attire is in itself depressing. Man, woman, and child are dressed in black. Every now and then you see some very poverty-stricken looking peasant in coloured clothes, but even then there is almost always some black ribbon about his dress to mark the mourning. The very women who walk the streets of Warsaw are dressed in black. In fact, I doubt whether anybody, with whom poverty was not an absolute excuse, could walk safely about the town in light colours. If you dine out you have to leave the table at nine, in order to be safely housed before the prohibited hours; and, in fact, as soon as the night comes on a gloom seems to sink over the whole city, the patrols come out in force, and the little lamps are lit, as the passengers hurry homewards. For my own part, I always found it impossible to divest my mind of the idea that, when I carried my lamp about, I looked exactly like a stage conspirator. Moreover, there is an art in using a lantern, as in most things; and I found that my candle had a way of guttering down and going out suddenly, from which lamps in the hands of Poles appeared to be wonderfully free. I recollect my lantern getting blown out suddenly in the centre of a long, dark street, which I was coming down alone. I had no matches, and there was nothing for it but to make for a light which I could see flickering in a distant shop-window at the end of the street. Happily, I arrived there before any Russian patrol came up; but, after that, I always took the precaution of carrying matches with me. However, even the novelty of being obliged to carry a lantern palls upon you after a time, and, with this exception, there is no amusement in Warsaw.—*Macmillan's Magazine.*

MUSIC.

At the Royal Gallery of Illustration Mr. German Reed has brought out a musical entertainment of a novel form, which promises to be attended with success. He calls it an "Opera di Camera"—an opera, that is to say, so simple in construction and so easy to be got up on a small scale as to be capable of representation in a private drawing-room or chamber. It is entitled "Jessy Lea," the characters are only four in number, and the voices are accompanied only by the pianoforte. The libretto is from the pen of Mr. John Oxenford, and the music is composed by Mr. G. A. Macfarren. The subject of the piece (which is in two acts) is taken from Donizetti's charming opera buffa, "L'Elisir d'Amore," the characters and incidents being considerably altered. Jessy Lea is a country beauty, a little coquette, who, like her Italian prototype, has two lovers; the one a rustic youth, the other a gallant man of war. The rustic lover, Gilbert Ashford, is an exact counterpart of Memorino; the martial swain, Hugh Tempest, is not a soldier, but a sailor, the skipper of a small vessel. The dashing sailor enjoys the fair one's smiles, while the poor country lad is treated with scorn. The disconsolate youth falls in with a young gipsy, Elspeth by name, who offers to tell his fortune, and (like our old friend, Doctor Dulcamara) sells him a love-potion—a bottle of wine, of course. Gilbert, under the influence of his elixir, treats his sweetheart very cavalierly the next time he sees her, to her surprise and mortification; for it is he, after all, whom she prefers. Meanwhile Elspeth, the gipsy—having accidentally discovered a circumstance unknown as yet to her rustic lover himself, that he has just inherited a farm through the death of an uncle—tries to get him to herself; but Gilbert is proof against her arts and remains faithful to his disdainful sweetheart. In despair he engages himself to go to sea with Captain Tempest; but Jessy has now found out the real state of her heart, and the dénouement is the same with that of the "Elisir d'Amore"—the good-natured sailor abandons his suit to Jessy, releases Gilbert from his engagement, and takes his departure, and leaves the lovers happy in the prospect of their union. This little drama is written by Mr. Oxenford with his usual felicity. The dialogue is gay and spirited, and the lyrical portions are elegant and well adapted for musical treatment. Mr. Macfarren's music will support his high reputation. The concerted pieces are masterly in construction and rich in harmony; and the songs and duets are melodious, graceful, and expressive. In short, the whole is calculated to give great pleasure not only on the stage but in the concert-room or the chamber. The performers, with the exception of that well-known favourite of the public, Miss Poole, are débutants new to the stage, and, this being considered, acquitted themselves surprisingly well. Miss Edith Wynne, who personated the heroine, is the young Welsh lady who has recently distinguished herself by the simplicity and feeling with which she sings the melodies of her native mountains. Though not as yet quite at home on the stage, she will soon be an excellent actress, for she has grace, intelligence, and feeling. Her singing is already admirable. Mr. Whiffin, who played the rustic lover, is good-looking, has a sweet tenor voice, and his unaffected deportment is very pleasing. Mr. Wilkinson, who sustained the part of the sailor, acted with considerable animation and freedom, and his fine baritone voice made a favourable impression. As to Miss Poole, her impersonation of the gipsy girl was a piece of consummate histrionic art, while her rich, mellow, mezzo-soprano voice, and her pure, simple, English style were as charming as ever. The first performance, on Monday evening, drew a crowded audience, and was received with every demonstration of favour. Not only the performers, but the gifted composer, were loudly called for, and applauded to the echo.

The Monday Popular Concerts have been resumed. The first performance of this (the sixth) season took place at St. James's Hall on Monday evening, under the able direction of Mr. Arthur Chappell. It would be idle at this time of day to describe or eulogise an entertainment so well known and so firmly established as the Monday Popular Concerts. It is sufficient to say that there is no appearance of any falling-off either in their excellence or their success. The programme of Monday evening included two of the finest quartets of Beethoven and Spohr, which were exquisitely played, Herr Lotto being the first violin and Signor Piatti the violoncello. Mr. Charles Hallé performed sonatas of Mozart and Mendelssohn; and favourite vocal pieces were sung by Miss Banks and Mdlle. Parepa.

THE THEATRES.

Lyceum.—The success of Mr. Fechter's first season of management at the Lyceum Theatre naturally excited public curiosity at the announcement of the opening of his second. Accordingly, such was the crowd at the doors of the theatre on Saturday that it was next to impossible to secure admission. The drama, too, intended for production had been so advertised on the walls as to excite much inquiry, and many actually applied at the libraries for the new romance of "Bel Demonio." The romance, it turns out, was a drama, and designed for the great and leading attraction at the house having the advantage of being under the liberal conduct of Mr. Fechter. Another source of curiosity existed in the fact that the stage mechanism of the theatre had undergone great alteration, and that many of the inventions, for which we are indebted to the ingenuity of French mechanists, would be applied to the use of the stage. In this the public was not disappointed. The improvements indicated (some of which are patented) were introduced. The stage, for instance, is constructed in separate pieces, removable when required, and serving on occasion for traps and openings. Slits, above and below, are substituted for grooves, through which the scenery is worked by means of upright poles and cranes running upon iron tramways. The "float" is no longer visible, the gaslights being underneath the stage, which slopes towards the orchestra. Other improvements might also be specified; these, however, will suffice with the intelligent to symbolise the whole. As last year, two pieces were put up for the night of inauguration, evidently meant to continue during the whole season; and, accordingly, the "Bel Demonio" drama was preceded by a slight farce. This was entitled "Uncle Baby," and proceeds from the pen of Mr. Gilbert. The burden of it rested on the shoulders of poor Mr. Widdicomb, who, as Uncle John, tried to make a weak-minded old gentleman a funny character. Much praise, also, was due to him for the degree of success which he contrived to attain, and to Miss Carlotta Leclercq, Miss P. Leclercq, Mr. J. G. Shore, and to Mr. F. Charles, for their efforts in favour of the drama, which, on the first night, was in considerable danger. Perhaps the manifestation of displeasure was owing to the impatience of the audience, anxious to witness "Bel Demonio," which did not commence until a quarter to nine, a circumstance which threatened late hours, a threat, unfortunately, that was but too faithfully kept. On the second night "Uncle Baby" was more successful; it was not only patiently listened to, but applauded. "Bel Demonio; a Love Story," is not altogether new to the stage; much of the plot relating to the ruse practised by Felix Peretti, afterwards Pope Sixtus V., to obtain the pontificate—that of affecting a stooping posture and extreme ill-health for the purpose of leading to an anticipation of his early death; but, immediately on his election, he is stated to have assumed an upright attitude, and to have entered on power with vigour and decision. The incident, it is true, is a fable, and the event never took place beyond the fact that Montalto, as he is called, was elected Pontiff. Mr. Brougham, who has had the arrangement of the present drama, affects to have taken his materials from Stendhal's "Italian Chronicles," though its more obvious source seems to have been "L'Abbaye de Castro," a French drama, already used up by Mr. Boucicault, who was assisted in the feat by Mr. Bridgman. The portion of the plot relating to the Cardinal, afterwards Pope, is only incidental to the story of the present drama, which turns on romantic adventures adroitly associated with historical reminiscences. And these romantic turns of fortune are set off with twelve tableaux and scenes, which are rather architectural sets than paintings. The effect of these is almost magical. First we have some picturesque abbey ruins, near Rome, where we meet with Mr. Fechter as Angelo, an artist, over fond of painting the features of Lena (Miss Kate Terry), the daughter of Count Campireali (Mr. G. Jordan). We have next Mr. Emery as an old soldier, one Ranuccio, from whom he learns that he is of noble birth, Angelo being the son of a nobleman assassinated by the haughty Orsini. Angelo, both emboldened and enraged, demands the hand of Lena from her father and brother, who, in refusing their consent, add insult to injury. An attempt, indeed, is made at his assassination, but Ranuccio watches over him like his guardian angel. Lena is ultimately compelled to take the veil, but not before she has been married by the aid of a mysterious monk, who tears her away from the ceremony before she can utter the vow of seclusion. Brought back by violence to the convent, she is condemned to be immured alive for the attempted sacrilege. Angelo, by means of a secret passage, obtains admission to her chamber, and, awaiting her revival, is ready to resist the onslaught of the Colonna faction. Angelo, who is, as the reader may have guessed, Bel Demonio, and a leader of bandits, is soon assisted by his followers, who break through the walls, is enabled to make good his ground until the appearance of Cardinal Montalto (now Sixtus V.), who commands the obedience of all, and pronounces a benediction on the lovers. He, too, was the mysterious monk by whom they had been married. We should add that the Cardinal is supported by Mr. Brougham, and is by far the most showy character in the piece. The defect of the drama is indicated by the fact we have just mentioned. The principal character is made accessory to the plot, instead of being the central figure. The part of Angelo, which takes that position, is one well calculated to display Mr. Fechter's various talents, but its dramatic importance is not equal to its personal interest; hence the triumph of the piece rather falls to the share of Mr. Brougham than to Mr. Fechter. On the other hand, the whole of the drama is so well acted, and the general getting-up so magnificent, that, however inferior the drama itself may be to "The Duke's Motto," there can be no doubt that it will have a long run, and, it may be, succeed in occupying an entire season. We may regard the manner in which the Lyceum has been reopened under Mr. Fechter's management as a step in progress, and one that encourages hope for the future of the drama, and well calculated to inspire energy into the advocates of the cause.

Drury Lane.—After "Manfred" on Monday, a new farce was produced, written by Mr. John Oxenford, in which Mr. G. C. Neville made his début, as well as in the old farce of "John Dobbs," in which he sustained the principal character with effect. The new piece is called "Beauty or the Beast," and is taken from a comic nondescript French drama, entitled "Ma Nièce et Mon Ours." The action is almost pantomimic, and quite as extravagant as anything that takes place in pantomime. The scene commences in the neighbourhood of the International Exhibition, where Mr. Wadding (Mr. Barrett) has opened a *table d'hôte*, not very profitably, it would seem, as his guests are limited to three; but these three are a curious set of people. These are Higgins, the manufacturer of lay figures (Mr. Neville); Wiggins, the maker of glass eyes (Mr. Spencer); and Figgins, a vender of stuffing-wool (Mr. Weston). Their trade characteristics enter, of course, into the plot, and form some basis for the tissue of absurdities of which it is composed. Wadding has a niece, with whom these three oddities are in love. She is named Hetty (Rose Leclercq), and Wadding has intended her for himself. His three guests resort to stratagem to defeat him. Higgins persuades Hetty to travel by railway in a large box as a lay figure; from which, after being nearly stifled, she is delivered by Figgins. A stuffed bear is afterwards substituted for her as the occupant of the box. The bear is the property of Wadding, who is almost frantic at its supposed loss, his money having been deposited in the stuffing. From this point the characters are all at cross purposes, and rush about in pursuit of each other, and perplexing the audience to the utmost, until Wadding recovers his bear and Hetty becomes the wife of Higgins. Mr. Neville achieved a fair success, and is an actor of whom much hope may be entertained.

The Shakspeare Tercentenary.—The following address has been issued by the Stratford-on-Avon Tercentenary Committee:—"As the town in which Shakspeare was born, bred, and educated, which he chose for his home in the decline of life, and in which he died and was buried, Stratford-on-Avon is assuredly the most appropriate spot for a tercentenary celebration in his honour. The festival will be extended over four or five days. On Saturday, the 23rd of April, there will be a banquet for ladies and gentlemen, at which the Earl of Carlisle will preside and deliver an address. He will be supported on the occasion by many members of both Houses of Parliament, and others eminent in the walks of art, literature, and science. On other days there will be excursions to various places in the vicinity of Stratford-on-Avon illustrative of incidents in Shakspeare's life, under the guidance of gentlemen well qualified for the task; critical analyses of Shakspeare's plays; a grand oratorio (to which many of our leading vocalists have already consented to contribute their services), and a miscellaneous concert. The comedy of 'As You Like It' and one of Shakspeare's tragedies will be represented by a combination of metropolitan and provincial talent. There will also be a Shakspearean fancy ball. One day will be devoted exclusively to popular amusements. Each day's proceedings will be fully specified in a subsequent prospectus. The substantial objects to which the pecuniary results of the festival will be devoted are—first, the endowment of one or more scholarships to the English Universities, open to the competition of those who have received their education at the same school at which Shakspeare received his, viz.—the Free Grammar School founded by King Edward VI.; second, the erection of a monumental memorial at Stratford-on-Avon. While they reserve to themselves the privilege of expanding or modifying their programme according to circumstances, they beg to assure you that the larger the funds with which they may be entrusted the more energetic will be their efforts to render the occasion august and memorable."

Mr. James Jackson Jarves writes as follows in the *Fine Arts Quarterly Review* for October of the progress of art in America:—"The citizens of New York have just given upwards of 100,000 dols. to provide a building for the Academy of Design, with its long-needed life-school. Under the auspices of the Historical Society, a sum of 500,000 dols., more or less, is being raised to improve the noble donation to them of land in Central Park, by a series of buildings to receive their collections of objects of art and antiquity, on the plan of the British South Kensington Museum, free to the public. The project, like the park itself, is placed in the hands of public-spirited men of taste and knowledge, who have no objects to further besides the promotion of art and science in America, and making New York the foremost city in these respects. Baltimore has a similar institution, begun by a gift of 500,000 dols., with as much more promised. Boston is not far behindhand. A generous sum has been raised by public subscription for the Institute of Technology, the organisation of which, carefully studied from the experience of Europe, is the most scientifically complete of any yet established here. It embraces a department of art, to include galleries of all branches, epochs, and schools. Numerous smaller organisations are forming in other cities—Buffalo, Rochester, and Chicago, for instance—on a limited scale; yet proving that the war, so far from stifling the growth of institutions of a high order of art, has the effect of stimulating them, because it convinces Americans that the only security of the Republic lies in the enlarged culture of all classes of citizens. Without rating too highly what has been done, we feel warranted in stating that the present period of civil war has proved the most auspicious for art and artists that America has seen, and justifies the hope that, under the influence of that activity which characterises the American mind whenever excited by topics of general utility, she will eventually possess schools of art and galleries that shall be commensurate with her mental growth in other directions."

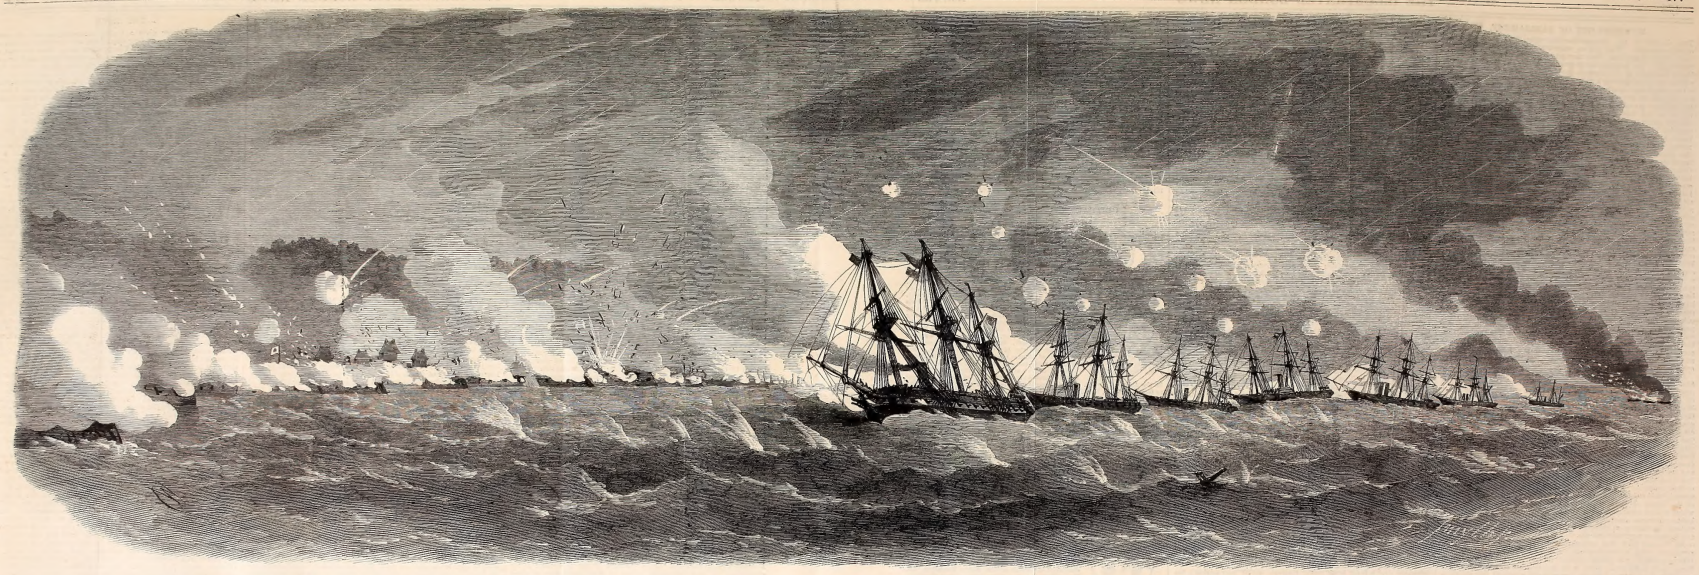
The Registrar-General's quarterly return, comprising the births and deaths in the quarter ended Sept. 30, and the marriages in the quarter ending June 30, shows some important changes:—"After a season of depression which extended over two years, the marriage rate rallied in the first quarter of the current year, and rose decidedly above the average in the subsequent quarter. The improvement indicates increased confidence in the minds of the people in respect to their ability to earn a sufficient and comfortable subsistence. The births were more numerous than they had ever been in the summer quarter before; and the proportion they bore to the population in which they occurred was higher than usual. But, while the aspect of the returns is favourable as regards marriages and births, a tale of deaths, which is heavier than that of any summer quarter since the year of epidemic cholera (1854), shows that the public health was far from being in a satisfactory state. The death rate was considerably higher than it had been in any of the corresponding quarters that have intervened since 1854. Epidemic diseases spread with destructive force amongst the young; and apparently the season was less salubrious than it usually is to older persons. The number of persons married in the June quarter was 88,116; they were married at an annual rate of 1·72 to 100 persons in the population. The average rate for the same quarter is 1·69 per cent. In the two corresponding quarters of 1861-2 the rates were 1·68 and 1·61. A certain number of the prospective alliances of those two years, deferred in expectation of better times, would doubtless attain their consummation in the present year.

According to a despatch received from Lloyd's agent at Havannah a dreadful catastrophe has befallen the Spanish steamer Mejico, about forty miles off Cape St. Antonia, the entrance to the western point of the island of Cuba. It is stated that the vessel was on a voyage from Texel to Havannah, when she took fire and was totally destroyed, and out of all on board only thirteen of the crew and three passengers were saved; the remainder, numbering about sixty, it is feared were lost.

THE FARM.

The *Scottish Farmer* gives a highly interesting account of some experiments in double-cropping which have been tried on the farm of Mr. Rintoul, at East Craigie. The potatoes sown about the end of February were manured with 40 tons of farmyard dung and 5 cwt. of Peruvian guano to the Scotch acre, and raised in June. About the beginning of July the same amount of guano was applied per acre and sown with turnips. As a proof of how little this practice exhausts the land, Mr. Rintoul took 12 qrs. of barley per Scotch acre from a field which in the previous year had been cropped with potatoes and turnips and fed off with sheep, and the only extra manuring it received was a top-dressing of 1 cwt. of nitrate per acre when the braird was hoed. This year Mr. Rintoul has made further experiments on one acre, as a beginning; and, by pursuing the same system, has had two crops of potatoes within the year. The weather was very dry for six weeks after the second crop was planted, but still it has been very successful, and produced 25 bolls to the acre. The *Banffshire Journal* remarks that the farmers in its district, instead of being anxious to double-crop, hardly know what to do with their large yield. It seems to think that there is no great hope for them, unless a second Joseph arises to buy up their produce and garner it for years of scarcity.

A very important controversy has been going on between Mr. M'Combie, of Tillyfour, and the Scottish Central Railway Company. In a letter from that gentleman to the *North British Agriculturist*, he complained of the very great carelessness of this and other railways in the transit of cattle from Aberdeen to London, and the delays to which cattle were subjected on their road to the shows. The company, through their secretary, attempted to pooh-pooh the statement in quite a grand, Parliamentary style. Mr. M'Combie was not, however, to be got rid of in that way. Armed with four letters, two from Smithfield salesmen and "tyers up," and two from owners who had suffered like himself, he returned to the charge. The Smithfield letters proved that, so far from the cattle doing the journey in thirty-six hours, they were generally three or four hours, and at times as much as eleven hours, late; and that even when the beasts did arrive the manifest was sometimes not sent with them, and they were kept at the station for several hours extra. Nothing, as Mr. M'Combie points out, can be more irregular than the whole of the cattle service on nearly every railway. The trucks are uncovered, and very seldom cleaned out; the beasts don't get a drop of water; the train is shunted, on every pretext, at sidings, while the trains pass or the engine has a by-hour or two among other trucks at a station; the shunting is so carelessly done that cattle lose condition and often drop down, and, in fact, the whole subject is one which the Society for the Prevention of Cruelty to Animals should take up in earnest. Again, nothing can be worse than the treatment to which the owners of prize cattle are exposed. The railways gain so much by the large shows that they take the cattle for one fare, charging full for owner and attendants; and, on the strength of this, they consider themselves entitled to carry the cattle back just as they like. Mr. M'Combie shows that his own were once exactly two nights and a day between Edinburgh and Perth. From the Worcester Royal some of the shorthorns were carried home, about two hundred miles, at the average rate of four miles per hour, and at some shows we have known them kept waiting from six to ten hours in the station-yard, after the time they were ordered to come, before they could be trucked. One railway not so long since lost a cow altogether for five days, and there she stood in a remote corner of a large yard in her truck till she was almost too weak to low any longer. The servants of a company, not so long since, deliberately tore off the ticket from another company's truck, and charged demurrage in the teeth of it. Many owners are so disgusted that they declare they will send to shows no longer; and others declare that their only chance is to direct their servants to fee the goods managers, who have the opportunity of showing a little brief authority over the cattle-trains, and do not fail to improve it. Some curious instances have reached us as to the potency of half a crown, or even a shilling, in taming these haughty officials; and it is high time that their little game should be put a stop to, and cattle have as much justice done to them, comparatively speaking, as passengers.



While some Corporations are raising every absurd objection against corn exchanges and covered markets, Doncaster, which is the centre of a very large agricultural district, has moved well with the times. Not so many years ago the farmers' wives sat with their butter and eggs at the ancient butter-cross, which could barely shelter a dozen of them. Hence it was thought quite an act of gallantry to present "an unprotected female" with a wisp of straw to stand upon, while the men got wisps for themselves and covered their shoulders with a sack. At a rather later date only 50,000 stones of wool were pitched, and 1½d. per stone charged for weighing; and within the memory of Sir Charles Wood, who was the chairman at the recent wool-market dinner to the Corporation, the market contained "no sheep, and only a few long-legged cattle and arch-backed sheep." Now the wives and daughters of the dairy farmers are duly glazed over, the cattle are counted by hundreds, and the sheep by thousands, and the wool market, at which an average of about £30,000 worth is pitched annually during the season, has now a handsome covered area of its own. It was built out of the rich borough fund, at an expense of £1500, and, although the fee for the weighing is reduced to a halfpenny, the supply pitched has increased to 170,000 stone. Now that the agricultural interest of the neighbourhood has been so well cared for, it is to be hoped that the pressing question of the enlargement of the Grand Stand (by far the best milch cow that the Corporation possess) will receive due attention. Judging from the crush of two years past, charging a guinea for a sight of the races from its roof will soon become a sort of pious fraud.

The sales for the season are all over, with the exception of the Brawith one, which Mr. Wetherell has announced for Wednesday next. The females are good, and, up to the 12th of September last, none of them had tasted cake or corn. There are three nice tribes among the thirty-five—that from Certainty by Sir Walter (2639), with a double Sir Walter and Roseberry cross in them; that from Lady Jane by Robinson's Bull (16,845) from a Walter Buchan (7692) cow; and that from Eardrop by Emperor (6973), dam by Prince George (5024), granddam Foggathorpe by Marlborough (1189). Both Eardrop and her yearling and calf Eardrop 2nd and Orange Girl are very capital lots. There are twelve bulls, and Mr. Wilson's system has been to bring them up on clover and porridge in preference to milk. Mr. Wilson is an old breeder, and many are still found to say that his Lady of Brawith, which won seventeen first prizes (including the Royal Agricultural Challenge Cup in Ireland two years running), is one of the best they ever saw. His Brawith Bud, which he sold to Mr. Grant Duff, has been quite a mother in Israel about Aberdeen.

The official correspondence respecting Sir James Hudson's retirement from Turin has been published. It appears that Sir James and Earl Russell are at issue on a matter of fact. Sir James says that when he declined the offered change of position last year he bound himself to resign altogether as soon as he was entitled to a pension. Earl Russell, on the other hand, denies there was any binding in the matter; he offered Sir James Hudson promotion last year, which Sir James declined, and there was, so far as he was concerned, an end of the matter.

Captain Kirkham, of the barque Edwin and Lizzie, which has recently arrived in the Mersey, gives particulars of one of those rare instances of a whale striking a vessel direct on the stem, and which, in the case of his ship, nearly caused her to founder. The Edwin and Lizzie left Prince Edward Island with a cargo of timber, and on the 12th of October, in lat. 45 1 north, long. 27 8 west, at half-past one in the afternoon, was struck by a large whale. Part of her cutwater was carried away, and the main stem cut right through to the wooden ends. So rapidly did the vessel leak that the pumps were instantly manned, and kept going night and day without intermission. Fortunately they were equal to the emergency, and, though the Edwin and Lizzie (a new vessel) had seven feet of water in her hold, she was brought safely to the Mersey and docked.

A volume of 600 folio pages has been issued among the Parliamentary papers, setting forth the area and population of the several unions in England and Wales, and of the parishes and townships of which the unions consist. The largest area included in any union is 235,861 acres, forming the union of Bellingham, in Northumberland, but the population is only 7080. Of the parishes, there are Liverpool, with a population of 269,742; and St. Pancras, with 198,788. Seven London parishes—St. Pancras, St. Marylebone, Islington, Shoreditch, Bethnal-green, Lambeth, and St. George's, Hanover-square, contain an aggregate population of more than 1,000,000. On the other hand, there are sixty parishes in England, not one of which has so many as ten inhabitants.

MEMBERS OUT OF PARLIAMENT.

The electors of the metropolitan boroughs seem to be confirmed experimentalists. They are so whimsical, not to say grotesque, in their choice of members, that they may be said to exercise a "fancy franchise." The borough of Greenwich has of late years been peculiarly fantastic in its electoral proceedings. At one time it was within an ace of electing a notorious adventurer, whose only capital—a very large one—was brass, who sought to enter Parliament in order to prevent his enforced entrance into another place; and who really would have got into the Legislature if he could have managed to appear on the hustings. Disappointed in that singular freak, the electors seized on a respectable tradesman in the town, whose business required his constant personal supervision, pitchforked him, almost before he was aware of it, into the house, and in one Session he was ruined, and made an ignominious exit—at once from Parliament and the country. Nobody ever exactly knew what its electioneering impulses were, and it was not bad tact in Alderman Salomons to choose Greenwich as the constituency with which to aid in fighting the battle of the Jews for admission to Parliament. The constituency stood very manfully by him, and when the time came they elected him readily and heartily, and thus perhaps took one of the wisest steps they ever did; for it is to be understood that the Alderman is a man of no small administrative ability—managing, for instance, almost single-handed, an immense bank—is just the kind of member to make himself felt in Committees where he has a purpose, and makes little pithy speeches in the house occasionally just at the right time and with the right point in them. He has a capital presence, and an easy, though slightly volatile manner; and, in his personal appearance and the tones of his voice, is singularly like the late William Farren, the actor, when that artist was playing in high comedy as an English gentleman of a certain age, but preserving in a remarkable degree his good looks. When Mr. Salomons meets the Greenwich electors, as he did the other day, there must be an excellent understanding between them. He must feel that they have assisted him to obtain a great political end, of which he is a special representative; and they must be conscious that all their electoral vagaries have past, and that they settled down into the possession of, perhaps, the very best metropolitan representation; for neither Mr. Salomons nor his colleague, Mr. Angerstein, can be put into the odd category within which it is customary to include metropolitan members as a body. When there is a sneer or a joke, as is common, at that oddly-selected band, the present members for Greenwich are specially excepted.

In one of his historical plays, which deals of the Wars of the Roses, Shakspeare causes one of the characters to make a ghastly joke when directing the Duke of York's head to be placed on the gates of York, so that "York might overlook the town of York!" Was it by some such affinity of ideas that Mr. Guildford Onslow came to represent the town of Guildford. In the hurry of a general election—he was first elected in that of 1858—when any claptrap helps to get a candidate along with a constituency, one can just imagine such a device being used in favour of Mr. Onslow as might be caught from his name. However that may be, although, as becomes a newish member, he has been hitherto quiet in the house; though as a steady and consistent Liberal, doing his votes manfully and systematically, he showed in a speech made to his constituents last week that he has stuff in him, and that he can enunciate as well as hold opinions. He is one of those who are content to assist in forming that capital concrete of memberdom on which the strength of the House of Commons is based, and so render silently service which is only appreciated when now and then these men come out before provincial assemblies and suggest how much of patience and forbearance they must exercise in discharging the unheeded duties of the Parliamentary rank and file.

Mr. Ferrand is, in fact and physically, a robust, broad-shouldered gentleman, with a capacious chest and a corresponding voice; but, metaphysically and metaphorically, he is the "skeleton in the house"—of Commons. That is to say, it is his chosen part to give a terrible, not to say a hideous, aspect to the affairs of this country; to strip off the flowers with which optimists are wont just now to decorate our social and political fabric; and to endeavour to present to the eye of the infatuated people of this country its real bareness and its tottering condition. This virtuously indignant member seems to have taken as his type the mad prophet who used to go about London just before the Great Plague, with a pot of coals on his head, and utter loud—nay, blatant—denunciations on the land, and predict woe and sorrow unutterable to its inhabitants. However wild and irrational the source of his vaticinations might have been, they were in the main fulfilled; and therefore we specially desire that the suggestion of the parallel between him and Mr. Ferrand may be taken only to extend to the immediate personal—or, rather, characteristic—resemblance between them which we have imagined. Last Session the House very good-naturedly gave Mr. Ferrand the best part of an evening very nearly literally to himself, in order that he might declare the true state of the country; and he certainly did draw a most awful picture of wrongs done and endured; and hearers whose experience did not go back twenty years really thought that he was describing an existing state of things which, by some curious process of the black art, had been effectually concealed from the general eye. But there were present persons who remembered Mr. Ferrand in the Sessions between 1841 and 1846, and they wondered from another point of view. They could not but think that, with perverted industry, he had taken up "Hansard" for that date, and had carefully got by heart all the speeches he delivered in that period and rolled them into one. Of course, so simple a device was shown up in a moment or two, after a reply to him was commenced; and, on the whole, he remained quiet enough during the remainder of the Session. He has, however, been giving the electors of Devonport a taste of his quality; and he has been essentially true to himself on that occasion. A talent for circumambient criticism of the coarsest kind, that is, an abusing and an accusing of every person and system that can be brought into the compass of a speech intended to be popular is not charming in itself; and it is not so much a faculty in itself that any ordinary person could not with a little practice develop it. This kind of style has been always, and still is, in regular use at the Old Bailey; and it is essential to the conduct of that kind of advocacy which is called upon peremptorily to deal with "no case." It has altogether gone out in the House of Commons. Even the Irish members—Mr. Whiteside himself—have practically abandoned it, and only venture upon it under circumstances of great temptation. To its successful development in the house a crowd and a certain boisterousness of debate is indispensable. Now Mr. Ferrand, being evidently and palpably ten years behind the sensational sympathies of the present Parliament, makes no impression—he does not rouse or stimulate; all he says seems aimless, purposeless abuse, which hits nothing and nobody in existence. He is not comprehended, and, as his voice is harsh and demeanour half savage, he is not pleasant to listen to; and so nobody does listen, and everybody that possibly can goes away. At Devonport, where there is a talk of reform in the dockyards—which, of course, in the minds of the persons employed there, can take but one shape, that of retrenchment—such an orator as Mr. Ferrand may, even in these days, exercise an influence—such as is acquired by stirring up discontent. He may there, and in such circumstances, in some degree carry out his mission, which is, apparently, to persuade people that they are never so happy as when they are utterly miserable; but even then we suspect that the shrewdness of the working classes, of whom he professes to be the special champion and defender, will prevent their being carried away by mere noisy talk, which is next door to raving; for that class, at least in this country, requires to be spoken to in a way that they can comprehend; and it is not by speaking to them in language which they do not understand that an effect is produced on them. As to Mr. Ferrand's career in the house, that, we venture to predict, is settled. He is in, but not of, the present Parliament. When he reappeared in the Legislature some curiosity was excited about him; he had been, in a manner, exhumed; he was a kind of Parliamentary mummy which had been resuscitated, and he drew for a night. But if Cheops had discoursed for three hours on Egyptian politics, he could not have received a more unsympathising hearing.

The Rev. H. Ward Beecher sailed last Saturday from Liverpool for America, in the Cunard steam-ship Asia.

ECHOES OF THE WEEK.

The great and apparently capricious disproportion between the sentences at our criminal courts—more especially at the Middlesex Sessions—has of late attracted a good deal of public attention. As a rule, we hold it to be both perilous and invidious to censure or carpingly criticise the sentences pronounced by the Judges of the criminal tribunals. In nine instances out of ten the functionary on the bench, who has heard the case and seen the prisoner, knows infinitely more about the merits and demerits of both than the outside public, who have only heard the story at secondhand, can ever know. Besides, we have the remedy for a possible maladministration of justice in our own hands. Only codify the law, and then every offence will have its proper quantum of punishment meted out to it, and nobody will have a right to complain. We have certainly heard, on the other hand, that the much-vaunted criminal sections of the Code Napoléon do not give universal satisfaction in the countries where the code is adopted, and that foreign Judges not unfrequently express a wish that a little equitable discretion in punishment were allowed them, in lieu of being bound inflexibly to inflict the penalty provided by article one hundred and one or nine hundred and ninety-nine of the code.

At the same time, it is difficult to deny that, of late, a tendency has been manifested by those whose duty it is to administer the behests of the law to punish crimes against property with exaggerated severity and crimes against the person with excessive leniency. For a fine of a few pounds or a few weeks' imprisonment, you may half-murder a man or woman against whom you have a spite. There is a moderate tariff for biting off noses, and an accommodating scale of charges for breaking heads, with a reduction on breaking a quantity. But woe betide you if you abstract a sixpence from a letter, or obtain a barrel of flour under false pretences! Long-protracted slavery at Portland or Dartmoor will assuredly be your doom.

Nor, again, would it seem that a proper discrimination is exercised in punishing offences against property. Two cases occurred in juxtaposition at the Middlesex Sessions on Tuesday which will illustrate our meaning. A half-crazy impostor, with half a dozen aristocratic aliases, who is a deserter from the Dragoons and has been going about swindling tradesmen, was arraigned for obtaining by false pretences a porte-monnaie, a shirt, and other articles from West-end shopkeepers, fatuous enough to trust him on the mere assumption of a patrician name. There was no doubt about the man being an impudent rascal, to whom a couple of years at the treadmill, with possibly a little flogging, would prove very salutary; but the Assistant Judge sentenced him to be kept in penal servitude for three years on each indictment. There were two; and this miserable Jeremy Diddler will be a convict for the next six years. The next case was that of a woman who had stolen a pewter pot from a public-house in Westminster. "While the landlord's attention was drawn to two men who were creating a disturbance the prisoner took a pot from a shelf and concealed it in the pocket of her apron, but was observed and given into custody. The landlord said he had lost many pots lately." The Assistant Judge sentenced her to be imprisoned for *six months, remarking that stolen pots were made into spurious coin.*

Now, we do not hesitate to express our opinion that the woman pot-stealer was a more dangerous foe to society than the vapouring swindler, and that had he received the six months' sentence and she the six years' one the requirements of justice would have been better met. Although there is something ludicrous in the name, the crime of pot-stealing is one of the most mischievous of the present day. By his apt remark the Assistant Judge plainly showed that he was aware of the fact that purloiners of publicans' pewter are often connected with coiners. The two men who were creating a disturbance were evidently confederates of the female thief, and women are systematically put forward to commit the overt act of robbery because the leniency shown to women by criminal Judges is notorious. It is vain, however, to expect undeviating impartiality in justice until Governor Sancho Panza comes home from Barataria.

A person unskilled in the adjustment of lenses once defined a telescope as "a long brass thing through which you couldn't see anything." By a parity of reasoning the majority of auction-rooms may be described as "places where you can't buy anything." There is a long-established and most atrocious system called "knocking-out," by means of which the public are virtually excluded from the commercial benefits of a sale by auction. The brokers and dealers, who are habitués of the place, form a league among themselves to bid against every outsider. You find it, in the long run, impossible (unless you half ruin yourself) to obtain the article you covet; and, when you have retired in disgust from the auction-mart, the brokers adjourn to a neighbouring tavern and have a "knock-out" sale, when the difference between the aggregate amount of what the article has fetched at the first sale and what it now fetches at the second (be it profit or loss) is apportioned between the "knockers-out." Add to this a great deal of terrorism and a very little honesty, and a slight idea of the "knocking-out" system may be obtained. A searching exposure of the entire practice has just taken place, and it is to be hoped that legislative steps may be adopted to protect the public against a long-existing but intolerable régime of tyranny and imposition. The "knocking-out" gentry would be very very much surprised if they found themselves indicted for conspiracy.

Albert Smith used to tell a story of a Yankee, emulative of the fame of Barnum, who made a bid "right away" for the purchase of the shrine of the Three Kings of Cologne, intending to exhibit it in the States. He was told that the shrine was not for sale, whereupon he consoled himself with the remark that he could get a "bogus," or imitation one, made for half the money, and which would do just as well. There is nothing out of which mankind will not make money. In a morning paper of Wednesday a "Gentleman" advertises, under the head of "Miracle," that, "free from any sectarian prejudices," he is "in possession of the Winking Madonna, with the remarkable phenomena which created such an extraordinary sensation in Italy." The curious are invited to apply, in the first instance, to an address in the N. district. The perusal of this advertisement recalls a well-known passage in Jeremy Taylor's dedication of his greatest work to the Earl of Carbery:—"I have lived, my Lord, to see Religion painted upon Banners, and thrust out of Churches, and the Temple turned into a Tabernacle, and that Tabernacle made ambulatory, and covered with skins of beasts and torn curtains."

Charles Mackay, who for twenty months has been residing in the United States as Special Correspondent of the *Times*, returned by the last Cunard steamer on temporary leave of absence. That the Doctor should have remained so long unmolested and undenounced in the Northern States is rather complimentary to the impartiality and love of fair play of the Federals, whose peculiarities he has painted in vigorous but certainly not in rosy colours. It seems, indeed, to be the opinion of that accomplished Anglo-Italian, Mr. Antonio Gallenga (who has been likewise "specialling" for the *Times* in the West), that the Americans like to be abused. "Lash them daily, lash them duly," as Mrs. Trollope did, and they will kiss the rod. Speak civilly of them, as Mr. Anthony Trollope did, and they will turn a cold shoulder to you. We remember a curious instance related to us by an American friend, proving the sensitive appreciation on the part of the American people of Mrs. Trollope's outspoken animadversions. One of the lady's strictures was on the inelegant transatlantic custom of visitors to a theatre lolling back in their seats, with their feet on the ledge of the dress circle. Not more than ten years since our friend was at a first-rate New York theatre, and in the dress circle there was one solitary individual who exhibited the soles of his boots at an angle of forty-five degrees (more or less) to a non-admiring audience. An indignant shout of "Trollope! Trollope!" arose from the pit, and the obnoxious individual, covered by public clamour, had to take his boots down. Mr. Antonio Gallenga, by-the-way, is, or was lately, a member of the Italian Parliament. Rumour has it that he has replaced Dr. Mackay during the absence of the latter in Europe. But how will the Italian Legislature do without the versatile author of "Country Life in Piedmont."

We once heard of a very old gentleman who declared that the pleasantest time he had ever passed in the course of a varied life was in Paris, during the height of the Reign of Terror. All day long he occupied himself with bird-stuffing, and at night he recreated himself by going to the play. The Committee of Public Safety kept eighteen theatres open. But, for the cultivation of comfort and contentment under difficulties, we should decidedly advise a residence at the present moment in Warsaw. If you happen to appear in the streets with any other headgear than the "cylinder of civilisation," or stove-pipe hat, you are liable to be ridden down by a Cossack, and flogged within an inch of your life with the barbarian's trenchant whip. If it be your fate to reside in an hotel containing, in addition to yourself, say five hundred inmates, and a pistol shot be fired from one of the windows at a passing Russian General, you will very probably be dragged down into the street, robbed, beaten, handcuffed, marched off to the citadel, stripped to the skin, and flung into a damp cell, or left to die of the cold in a high-walled yard. You must not go out at night without a lantern, like an amateur Guy Fawkes. You must not remain more than fifteen minutes over your dinner in an eating-house. You must not wear mourning. Your washerwoman is a spy and your droschky-driver a provocative agent. That dreadful Cossack, with his knout, is always waiting for you round one corner, and a "National gendarme," with the assassin's dagger or revolver, lurks round the other. *A la guerre comme à la guerre*; and civil war is the most intolerable of all. We have had our share. We remember seeing an old playbill of the time of the Irish rebellion, announcing the performance of Master Betty, in which it was stated that, in consequence of the attractions of the Infant Roscius, the town Mayor had kindly consented to allow the gates to remain open until nine o'clock at night. The town was in a state of siege.

OBITUARY OF EMINENT PERSONS.

SIR HUGH J. NUGENT, BART.

Sir Hugh Joseph Nugent, fourth Baronet, of Ballinlough Castle, in the county of Westmeath, and a Count of the Holy Roman Empire, lost his life through a sad occurrence, which took place in the parish of Stoke-by-Nayland, on the 23rd ult. Sir Hugh, who was a pupil of Mr. Wordsworth of Gifford's Hall, Stoke-by-Nayland, Suffolk, and who was only in his eighteenth year, went out with another of Mr. Wordsworth's pupils, a young Spaniard, named Jauregui. Nugent, in crossing a ditch, was handing his gun to Jauregui, holding it by the muzzle, when one of the barrels exploded and the charge entered his side, inflicting a mortal wound, of which he died as he was being carried home. An inquest was held at Mr. Wordsworth's house on the following day, before Mr. J. Greene, Deputy Coroner. The jury returned a verdict of accidental death. Sir Hugh Joseph Nugent was the eldest son (by his wife, Letitia Mary, eldest daughter of Charles Whyte Roche, Esq., descended from the noble house of Fermoy) of Sir John Nugent, the third Baronet, a Count of the Holy Roman Empire, Chamberlain to the Emperor of Austria, and a Major in the Austrian service. He was born Dec. 29, 1845, and succeeded his father, as fourth Baronet, Feb. 16, 1859; and now, by his own melancholy demise, the baronetcy passes to his next brother, a youth thirteen years of age, who becomes Sir Charles Nugent, the fifth Baronet. This family derives maternally from the ancient Irish Milesian sept of O'Reilly, Princes of Lower Brefney, and maternally from the noble house of Nugent, Marquises and Earls of Westmeath. Sir Hugh O'Reilly, the first Baronet, so created July 22, 1795, assumed the surname solely of Nugent, that of his mother, Barbara Nugent, granddaughter of Thomas, Earl of Westmeath. This Sir Hugh was grandfather of the unfortunate Baronet just deceased.

HENRY RAIKES, ESQ., F.R.G.S., &c.

Henry Raikes, Esq., of Llwynegrin Hall, Flintshire, was the eldest son (by his wife, Augusta, daughter of J. J. Whittington, Esq., of Yoxford, Sussex) of the late Rev. Henry Raikes, Chancellor of the diocese of Chester, and grandson of Thomas Raikes, Esq., an eminent London merchant, and twice Governor of the Bank of England. Through his mother, the only one of the family of Whittington who left issue surviving her, Mr. Henry Raikes was the representative of that ancient house which traces its descent from the collateral relatives of the celebrated Sir Richard Whittington, temp. Henry V. Mr. Henry Raikes was born in 1811, and educated at Corpus Christi College, Cambridge, where he graduated B.A. (senior optime and second class in classics) in 1833. He was called to the Bar at the Middle Temple in 1836. He married, in the same year, Lucy Charlotte, youngest daughter of the late Ven. Archdeacon Wrangham, by whom he leaves numerous issue. In 1837 he was appointed Registrar of Chester, which office he continued to hold until the passing of the Testamentary Jurisdiction Act, in 1858. Throughout the period of his office he was the active friend and counsellor of all the clergy of that extensive diocese; and so close and cordial had this connection become that when he retired from his appointment, in 1858, he established a fund for the assistance of the Church in populous districts of Lancashire and Cheshire, to which he subscribed annually no less a sum than £1100. Mr. Raikes was a magistrate, both for the city of Chester and the county of Flint, for which last-named county he served as High Sheriff in 1854. He twice unsuccessfully contested Derby (in 1847 and 1859). For many years he has been a Fellow of the Geographical, Ethnological, and Philological Societies, and leaves behind him many incomplete essays on scientific subjects, besides a well-known treatise on the English Constitution, published in 1852. Mr. Raikes died at his seat, Llwyneyrin Hall, on the 25th ult.

LIEUTENANT-GENERAL JOHNSON.

Lieutenant-General William Augustus Johnson died at his residence at Wytham-on-the-Hill, near Bourn, Lincolnshire, on the 26th ult., his death being accelerated by an accident which happened to him on the evening of the 9th ult., when he fell in his study and injured one of his hips. Lieutenant-General Johnson was the eldest son of the late Rev. Robert Augustus Johnson, Rector of Wistanstow, Salop, and Hamstall Redware, Staffordshire. He was born Oct. 15, 1777. He entered the British Army early in life, and shared in the glory of many of the important military achievements of the beginning of the present century. He was in most of the Peninsular campaigns. He rose through the various grades, and became a Lieutenant-General in 1841. He had, in 1814, inherited the great estates in Lincolnshire of his uncle, George William Johnson, Esq. Lieutenant-General Johnson was a magistrate and Deputy Lieutenant for the counties of Lincoln and Northampton. He filled the office of High Sheriff of Lincolnshire in 1830; and he was, in the Liberal interest, M.P. for Boston from 1821 to 1826, and for Oldham from 1837 to 1847. He was for thirty-two years Chairman of the Kesteven Quarter Sessions, held at Bourn. He married, on the 17th of February, 1835, Lucy, eldest daughter of the Rev. H. Foster, Rector of Dowsby, in the county of Lincoln, by whom he had issue three sons and six daughters. His second, and eldest surviving, son, Augustus Charles Johnson, Esq., succeeds to the estates. Lieutenant-General Johnson, as a country gentleman and landlord, was deservedly held in the highest esteem. He was at all times accessible and courteous, and lived upon the best of terms with his neighbours, whether of high or low degree. He showed himself on the bench to be an upright, experienced, and efficient magistrate and chairman. His demise is much lamented.

WILLIAM CUBITT, ESQ., M.P.

William Cubitt, Esq., of Penton Lodge, Hants, M.P. for Andover, and President of St. Bartholomew's Hospital, was the second son of Jonathan Cubitt, Esq., of Buxton, in Norfolk, where he was born, in 1791. His elder brother, Thomas Cubitt, Esq., was the celebrated builder of an extensive area of squares and streets in Pimlico, who acquired a vast fortune, and purchased the magnificent estate of Denbies, near Dorking, from the executors of Mr. W. J. Denison, Esq., M.P. for West Surrey. Mr. Thomas Cubitt's eldest son, George Cubitt, Esq., was returned M.P. for West Surrey in March, 1860. Mr. William Cubitt was born in 1791. He was for a short time in the Navy, but retired from that, and was placed under his brother, who was much older than himself, and had by that time obtained a good position as a builder. For many years he and his brother carried on the business of builders and contractors on the highest scale. Their vast engagements, great wealth, and liberal treatment of their workmen are of public notoriety. Mr. William Cubitt retired from the firm some years ago. He was, on the 24th of June, 1847, while a member of the Fishmongers' Company, named Sheriff of London, and a month afterwards he was elected M.P. for Andover, which place, a short interval excepted, he continued to represent till his death. He was chosen Alderman of Langbourn Ward in 1851. He unsuccessfully contested the representation of the city of London, July, 1861. Mr. Cubitt was a Conservative. He was greatly respected by all parties in the House of Commons. In 1860 Mr. Cubitt was elected, for the first time, Lord Mayor of London; and for his ability and his munificence during that mayoralty he was proposed and re-elected Lord Mayor for 1861-2. The two years of Mr. Cubitt's mayoralty were noteworthy for his liberality in general, and for the splendid hospitality he showed to the foreign exhibitors and the members of the Royal commission who visited this country in 1862. He opened the subscriptions for the sufferers by the Hartley Colliery explosion and for the Lancashire operatives. He was one of the leading members of the committee for the national memorial to the Prince Consort, and in that capacity received the approval of the Queen for his zeal and activity. Mr. Cubitt was elected, as an Alderman, governor or president of St. Bartholomew's Hospital. When he recently, from ill-health, resigned his aldermanic gown, he resigned that presidentship also. Mr. Cubitt married, in 1814, Elizabeth, second daughter of William Scarlett, Esq., and by her (who died in 1854) he leaves four daughters, two of whom are married—viz., Mrs. Humphery, and Laura, Lady Olliffe, wife of Sir Joseph Olliffe, M.D. These two ladies were in turn Lady Mayoresses during their father's occupancy of the office. Sir Joseph Olliffe, the husband of the younger, is Physician to the British Embassy in Paris, and ranks among the leading medical practitioners there. Mr. William Cubitt died at his seat, Penton Lodge, on the 28th ult.]

SPORTING NOTES AND SPORTS.

TUESDAY and Mr. Ten Broeck wound up a Houghton meeting to which fog and frost have lent remarkable interest. Beyond bringing Scottish Chief (a most unlikely-looking Derby horse) again, and hardening the belief in Lord Glasgow's lot, which seems strong in Theophilides, the meeting was not productive of much Derby speculation. Ely was not fast enough up the Criterion hill, but ran gamely and well, and second last third victory was scored on the Wednesday after a tremendous finish with Beatrix. Lord Stamford's resignation has not exactly taken anyone by surprise, as his Lordship has always been rather too sensitive on the subject of attacks. Leading Turfites, like great statesmen, must expect to have their conduct and their motives criticised (and often misrepresented), and trying to crush comment with a high hand, as his Lordship did last May, was simply a wise proceeding. We trust that he may not be exposed to the mortification of selling a Derby or St. Leger winner in his lot—a step which a sense of determination to sell must entail. Surplice, Kingston, Summerside, and Wild Dayrell all earned up trumps the year after they were sold off, and Lord Exeter tried hard to get rid of Stockwell and all his horses in training. His Lordship has had a short though brilliant career; but perhaps the continued taunts to Edwards may be an omen that "the man in the black belt" may not quite fade from sight. It would never do to "leave half told the story of Camberwell Belle." The stud will be sold at Newmarket in the early part of December, and great will be the lamentation among the breeders of blood stock and, in short, every one connected with the turf.

The All-England Eleven played in 26 matches last season, out of which they won 15, lost 4, and drew 7. The United Eleven exhibits the position which they took up by defeating the All England, as, out of 18 matches, they only won 3 and drew 5. Owing, however, to the constant engagement of several of their leading players at the Oval, they often played very weak elevens. Jupp the Surrey colt, a great accession to the team, made his début, and got against the Northumberland Twenty-two—in fact, more than a third of the whole score on his side. The united match which was played this year has been very great: and the season, on the whole, owing to the Parr v. Surrey Secretary disagreement, and the very great independence shown by some of the leading professionals (who ought to let no man put the screw on them so as to keep them from the Oval), has been very successful. Mr. E. M. Grace has scored and bowled well; and even the old schools only fall faith with him for his supernaturalism. Shrewsbury and Carpenter have not batted quite so brilliantly as usual, but Tarrant's batting has progressed amazingly, and Jupp's bowling has been wonderfully good. Morlock has made very great scores, and Tom Hearne has shown that there is much more in him than cricketers supposed. Grace has on only very rarely as yet been seen to the inside for his own country 100 runs only three less than Kent made in Lords ground. Among the twelve 50's in the Gentlemen v. Players Mr. Grace's average is the best—30 per innings in seventy-nine matches, with 161 as his highest score, and 1,000 in total. Hearne has 1,011 in fifty-five matches, 112 as his highest score, and 1149 his total; while Carpenter stands at 19 2-5 in fifty-six matches. After these men there is a great gap, and Caffyn is on the Players' side, his average for sixty-one matches, and 70 his highest score.

The Caledonian Club began its season very gallantly at the Scottish National Club, where Skelsdelfer by Canaradoo won the Burgar Stakes and Cheshire and Silver Nuts. The Metropolitan Club, divided the Caledonian Stakes. The Douglas Cup brought on several of the senior cracks, and little Spider was beaten in her first course by Governess of the Caledonian Scotland's Pride, by her own brother Corcoran in the second ties, and eventually divided the Cup with her own brother, Lucifer. The Annandale Handicap Effort blood was quite as victorious in the south, and at Ashdown it scored both Derby and Oaks, with Geoffrie Chisholm and Pastil. Twenty Efforts and twelve Davids ran in these two stakes. Son of Lock (brother to Stockdaller) by Canadaco ran up for the Derby, and Loose Box by David ran home. Mr. Hall Dare's Village Belle went in great style for the Craven Cup, and led the very fast Sailer from the Corner in the deciding course. The Ashdown Park Stakes was in the slips during the week, but did nothing. The Border Club St. Leger went to Dr. Richardson's Governess, another of the Canadaces. Bloom from Baffle ran better than any of his blood at Market Weighton, where Rapture, one of the last of the Riots, won a Stakes.

The Wiltshire Champion Meeting was remarkable for the success of the David blood. Bindweed was second to Mr. Bowes's Buonaventure for the Great Western Cup, Bird-Seton's Sackbut won the Druid Cup, Lilinah ran to Mrs Smith's nomination Swortlake for the Ladies' Plate; Mr. Jefferson's Imperatrice, from old Acis, won the Challenge Cup; the brother and sister Leah and Luke, from Cactus, the Beacon Hill and Wood Stakes; and Bindweed, by the Admiralty Lord Lurgan's Lady Ava, own sister to Imperatrice, was the winner of the Shoreham Stakes, in which Coolbawn by Bird-Seton from Lady Browning Daisy by Judge won the Sixteen-dog Cup; and it was a little remarkable that the first ties two Neals's Arbs, own brother and sister, and two Seagulls, also brother and sister, should have been drawn against each other. Sweepe, another of the Seagull and Sowerbutt litter, won the Rottingdean Bridge Stakes, Sackbut the next week are Coquettish Club, Tatelow (Southport), Marham, Tadcaster (O. Kinsey) Club, Chesterfield, and Mansfield Stakes winner.

Sir A. G. Cumming, of Altyre, killed five deer a few days ago, in the Forest Pottal, Scotland. He got close to a herd and brought down two right and left, loaded again and brought down two more, and then re-loaded and wound up with "one more." So much for the advantage of a double-barrel.

The *Field* opens the annual season with its capital annual list of the packs of staghounds, foxhounds, and harriers in the United Kingdom. Mr. Davis is still fresh and well at the head of her Majesty's pack, but there are five other packs of staghounds in England, 108 of foxhounds, and 64 of harriers. In Scotland there are eight packs of foxhounds and two of harriers; and in Ireland one pack of staghounds, 20 of foxhounds, and 13 of harriers. Mr. Badminton, the Burton, and the Hambleton are the only packs which breed their own sires, and Mr. Ellis, and Mr. Goodall couples to do it with. Forty-two packs of staghounds and foxhounds are kept at their masters. John Treadwell is now with his old master, Mr. Greaves, at the Old Berkeley. The Cambridgeshire has had a bad season, and Mr. Selby Lowndes has given up the Bicester country, after having hunted during the past year but three days per week. Mr. Hall Dare's Belvoir is a most uniform monthly payment for a member, and is very select. In addition to which, it is worthy of remark, that several members were entitled to a pension, or, in other words, an annuity, to secure which their contributions were inadequate. Most of them were let at public-houses, and a monthly contribution was required to be spent in beer. Numerous complaints have been made to the Registrar of these fraudulent charges of the management of friendly societies, particularly of those who have extensive operations, and he has pointed out that he could not exceed a considerable number of letters, addressed to him in his official capacity, with reference to the unhappy condition of the system. A great number of these letters quoted in the report, the major portion of the writers protesting against charges for drink, as a consequence of which they were compelled to hold aloof from them. Some, however, are of a special character, and question the legal right of funds being used for purposes not in accordance of his Majesty's Consul the Prince of Wales.

The number of accounts in savings banks, including the friendly societies investing direct with the commissioners, in the United Kingdom, was, on Nov. 20, 1862, 1,662,000, and the amount of deposits £32,232,292.

The operations of the Post Office savings banks commenced in September, 1861, and the progress of the business from that time, and especially during the past year, has been highly satisfactory, about 180,000 depositors having opened accounts in them during the year. The total number of depositors at Post Office savings banks were opened in England and Wales, 980 in Ireland, and 191 in Scotland, including all the Channel Islands and Monmouthshire belonging Islands. The whole number of Post Office saving banks at the end of 1862 was, therefore, 1,171, of which 1,000 were in England and Wales, 100 in Ireland, and 271 in Scotland. Many of these banks have attracted a large number of depositors, and 76 only of the whole number have failed to attract the public confidence; and that the advantages which they offer appear to be understood and appreciated throughout the country is evident from the beginning of the present year 151 additional banks have been opened, making 2864 banks in all, and the gross amount of deposits, including interest, on Nov. 20, 1863, was £3,736,689 out of £3,592,296.

Much use has been made of savings banks by friendly, provident, and charitable societies, and by the managers of penny banks, as shown by the valuable number of returns which have been collected by the Registrar for the year 1862: provident and charitable societies, 621; penny banks, 85. One important advantage of these banks is that they give any person who has the power of making a deposit or taking out money in any part of the country in which he may happen at the time to be, and the transaction is in no manner his account was originally opened. This power is largely used. Last year there were 1,000,000 deposits and 1,000,000 withdrawals (1,942 withdrawals).

According to official returns, the quantity of cotton grown in Italy this year amounts to 73,000 bales of 100 kilos each. The greater part was produced in Sicily and the Neapolitan provinces of Locca and Salerno.

Mdlle. de Rothschild, the youngest Miss Rothschild, was led to the wall on Tuesday week, in the Chapel of the Dames de Sacré Cœur at Gonesse. The Duke of Malakoff officiated.

Lord Leitrim has written an angry letter to the *Observer*, in which he declares that, although "the myrmidons of disloyal power" have done all they can to injure him, they have failed in their object, and that "it will be for his mortal and conscious foe" to meet him in the House of Lords, where "right and justice must prevail, though all the blood of all the Howards essayed to beat it down."

THE HALL OF LIBERATION, KELHEIM, BAVARIA.

On Sunday, the 18th of October, the fiftieth anniversary of the battle of Leipsic, the Hall of Liberation, near Kelheim, one of the grandest and noblest monuments erected by that great lover and patron of art, King Louis I. of Bavaria, was solemnly inaugurated by his Majesty, surrounded by some of the representatives of that memorable time period. No worthier monument of a war which, at Leipsic, ended in freeing the great German nation from the yoke of Napoleon I. could have been conceived or carried out. Situated on the summit of Michel's Mount, 470 feet above the Danube, which flows in the waters of the Danube at the end of that celebrated pass of Weltenberg, unrolling in grandeur and picturesque beauty even the romantic Lorley of the Rhine, the Temple of Liberty forms an majestic pendant above the surface of the rock.

The temple is a colossal rotunda, in the Greco-Roman style. Its substructure is 236 feet, in diameter; its height, 204 ft. Ascending a flight of steps, 55 ft. broad, we come to the principal terrace, 87 ft. broad, surrounding the base of the temple, and forming a polygon of eighteen angles. At the external angles of the terrace are placed eighteen colossal statues, 18 ft. high; and at the eighteen angles round the exterior eighteen buttresses, surmounted by colossal Victories, 20 ft. high, and holding shields, on which are inscribed the German races who fought and conquered at Leipsic—namely, the Austrians, Bavarians, Tyrolese, Bohemians, Franconians, Suabians, Rhenans, Thuringians, Hessians, Saxons, Brunswickers, Hanoverians, Brandenburgers, Silesians, Saxons, Moravians, Hanoverians, and Prussians. A double colonnade, 18 ft. broad, contains a flight of 40 ft. in circumference, and adorned with fifty-four columns, 16 ft. high and all monolithic, and surmounted by a cornice. Over this is another ballustrade, from which a magnificent view of the surrounding country, the valleys of the Danube and the Altmuehl, and in clear weather even the Bavarian Alps, can be seen in the distance. Above this the temple rises still, and another circle of smaller steps or battlement of eighteen columns of military trophies and Victories, conclude the whole. The roof is of iron, and the lantern at the summit of iron and glass.

On the terrace, at the head of the steps, is the entrance, over which are the following words in bronze: zinc: "Den Teutschen Befreiungskampfern. Ludwig I. König von Bayern. MDCCCLVIII." (To the German warriors of the War of Liberation, Louis I., King of Bavaria, 1858). The doors, of massive oak, incased in bronze and weighing five tons, we enter into the hall, 100 ft. in diameter, and are immediately struck by the magnificent proportions, admirably especially lighted up from the lantern above. It consists of many coloured marble slabs, and in the centre is inlaid, in large Roman letters, the following sentence:—"Monumentum Victoriarum vergenses anno MDCCCXIII. Befreiungskampf nothwendig machte und wodurch sie gesiegt" ("May the German nation ever remember what the War of Liberation necessary, and how they conquered in it."). Eighteen semicircular niches, painted red and separated by columns, surround the hall, and contain the interior. Before these niches, and on a common plinth 5 ft. high, thirty-four colossal Victories, of white Carrara marble, winged, and crowned with oak-wreaths, 10 ft. high. They represent the thirty-four German States. Their hands are interjoined, and they stand between them seventeen German shields, on which are names of the battles which occured during the war are embossed. Above these niches, along the wall, covered with Sienna marble, are placed eighteen tablets of Carrara marble, on which are inscribed, in letters of gilt marble, the names of eighteen of the most celebrated German commanders of the period—namely, Prince Schwarzenberg, Field Marshal, Austria; Prince Blucher, Prussia; Prince Wrede, Bavaria; Count Bubna, Austria; Count Wallmoden, Hanover; Count Gneisenau, Prussia; Willalmi, Crown Prince of Wirtemberg (the present King); William, Duke of Brunswick; Hereditary Prince of Hessia-Homburg, Austria; Count York, Prussia; Count Klenau, Austria, Count Bülow, Prussia; Count Gyulai, Austria; Count Kleist, Prussia

INDOOR AMUSEMENTS.

POPE JOAN—PIQUET.

AMONG other games which were once very popular with our great grandfathers and grandmothers, and which are still kept up in old-fashioned country-houses, may be mentioned pope joan and piquet. With respect to the former game, it has been fabulously asserted that in the ninth century a pope named Joan, enamoured of a violent passion for a young monk, named Felix, and, in order to be admitted to his confessional, assumed the male habit. At the death of her lover she entered on the duties of professor, and, being very learned, was elected Pope on the demise of Leo IV., who died in 855. This tale, absurd as it is, was not only believed without offence, but believed until the period of the Reformation. We find the following announcement in the old almanacs:—"A female Pope, a Protestant and a Papist manifestly proving that a woman called Joan was Pope of Rome, and against the supremacy of the same was to be contrary by Robert Bellarmine and Cæsar Baronius, Cardinals; Florimondus Raesmondus, M.D., and other Popish writers, impudently denied; and by Platina, Antoninus, Archbishop of Florence, John Haviland for William Garrart: and are to be sold at his shop in St. Paul's churchyard, at the sign of the Bull's Head, 1675. Quarto. Containing one hundred and forty pages." Another allusion is made to the subject in Rabelais's work. De la Facine the Noble Breton et Femmes," published in France, and which is to be found in the Bibliothèque Royale de Paris. There, may be seen an illumination representing a religious procession, in which La Papesse Jean appears in her pontifical attire, accompanied by two Cardinals, a Bishop, and a Monk, mounted on a Monk, chanting the service of the Roman Catholic Church. The Pope wears her treble crown, the Cardinals their peculiar hats, the Bishop his mitre, and the monks and priests are distinguished by their "shaven and shorn heads"; and here it is worthy of remark to the antiquarian that the crossbearer of the procession wears a cross three times as large as those have it), instead of the double or treble cross or crucifix of more modern times. The game of pope joan is played with a board, on which has created so much satirical criticisms from lighter authors, and such severe diatribes from polemical writers, in a most scandalous manner.

Piquet was the first known game upon the cards, and is generally supposed to have been invented by Cardinal Richelieu, minister of Charles VI. of France. Unfortunately, like many other games, it has been perverted to the worst purposes, and is now a gambling game,—to serve the object of the gamester, and thousands of pounds have changed hands at a party of piquet. Sad is the reflection that numerous families have been ruined by play with cards, estates have been sold, estates mortgaged, to meet what have been termed debts of honour; duelling, and loss of life, have been the consequence of the gambler's fate. Backer, as reported in the "Harleian Miscellany," has the following remarks:

"I know not one person of an hundred, or of many hundreds, that needeth any game at all; there are such variety of better exercises at hand to recreate and refresh the body, as no man can want, unless he can better improve.

"Besides, I confess my own nature was as much addicted to games of sport as most, and therefore I speak of this recreation as is needful to my health and labour, and no more; but, for all that, I find no need of any game to recreate me. When my mind wants comfort, I find it in my study, among my books, my writings, and business to do: that when my body needeth not it, the hardest bowler, fowler, or fisher, or the most expert gamester, at all manner of games and sports, as profitable to my body, and more to my mind. I am alone, and have no temptation: I am not subject to vain oaths. I may improve it in profitable cheerful conference. I condemn not all sports and games in others, but I find none of them all to be best for myself, . . . I have no need, and I have many disadvantages in shooting, bowling, and such more healthful games, to say nothing of the waste of precious time, which in these recreations attended there is somewhat in it that nature itself hath some suspicion of. That prudent Lord Verulam, in one of his essays, saith, that gaming hath a carnal, empty mind: if religion, books, and friends cannot suffice for this, there is some disease in it that should rather be cured than pleased. . . . I speak not this to condemn all games, but to condemn profits in."

In an old work entitled "The Nicker Nicked; or, the Cheats of Gaming Discovered" (printed 1660), play is thus described:—"Gaming is an enchanting witchery begot betwixt idleness and avarice, which has thrill pregnancy of all sorts of mischiefs—there is nothing it is incapable of prosecuting any serious action, and makes him unsatisfied with his own condition, he is either lifted up to the top of mirth and joy with success or plunged to the bottom of despair by misfortune; always in a storm, and never in a calm."

Hannibal said of Marcellus, that "Nec bonum, nec malum, fere potest"—i.e., "He could be quiet, neither conqueror nor conquered." Satan (well he knew the ploy) proposed to Jehovah that Job being cast satisfied: if they win, they think to win more; if they lose, they will play on.

One propounded this question—whether men in ships at sea were to be accounted amongst the living or the dead, because there were but few inches betwixt them and drowning? It is the same case with the most of great gamesters, though their estates be never so considerable, whether they are to be accounted poor or rich, because they are but at a indirect betwixt a person of fortune (in that circumstance) and a beggar.

Most gamesters, as the old writer says, "are like Indians, when money or estates hold out, they rise to great sums; some have 'played over-first, all their money; then their rings, coach and horses, even their wearing-clothes and shirts, and have gone home, and, at last, perhaps, a lordship. You may read in our histories of Edward VI. that Sir Anthony Denny, Sir Edward Wotton, and Sir Henry Vill. for Jesus-bells (so called), which were the greatest in England, and the like is said of Sir Miles Partridge, playing, as it is said, for a deal horse, did, by happy fortune, recover it again, then gave over, and played no more."

If a man has a competent estate of his own, and plays whether it himself or another for him, he has it is extremely folly; if his estate be small, then to hazard the loss even of that and reduce himself to absolute beggary, is direct madness. Besides, it has been generally observed that he who is given to gaming proves, by that, more prejudice in disquieting your mind than the gain of two hundred pounds and a half will be a recompense for it.

Consider also your loss of time, which is invaluable, and remember what Seneca says:

Nulla major est jactura quam tempora amisisse.
The greatest loss is the loss of time.

Evelyn too, on mean authority, thus censures gaming. We quote from his "Miscellaneous Letters":—"Here is a fine walk and a piazza for the market. Here, especially, is such a concourse of people, Turks, Jews, Armenians, Christians, of all nations and conditions is prodigious; some buying, others selling, others drinking, others playing; some working; others sleeping, fighting, singing, whipping: and every several company seeming to be in as full employ where any idle fellow might stake his liberty against a few crowns at dice, or other games, as the richest. . . . Here he was presently chained and led away to the galleys, where he was to serve a term of years, but from whence they seldom returned. Many estates perished in a drunken bravado would try their fortune in this way."

In describing the Carnival, he thus proceeds:—"Venice, 1645.—They also have a barbarous custom of hunting bulls about the streets and piazzas, which is very dangerous, the passages being generally so narrow; and, on the Thursday, he was to have a most stately chase."

Again we find:—"January 6th, 1661.—This evening, according to custom, his Majesty opened the revels of that night by throwing the dice himself in the privy chamber, where was a table set on purpose, and lost his £100. (The year before he won £1500.) The Ladies also played very deep. I came away when the Duke of Ormond had won about £1000, and left them still at passage, cards, &c. At other tables, both there and at the groom-porter's, observing the wicked folly and monstrous excess of passion amongst some losers: sorry am I that such a wretched custom as play to that excess should be countenanced in a Court, which ought to be an example to the rest of the kingdom."

"1667, 8th January.—I saw deep and prodigious gaming at the groom-porter's, vast heaps of gold squandered away in a vain and prodigious manner. Thus I looked on as a horrid vice, and unsuitable in a Christian Court."

FRIENDLY SOCIETIES IN ENGLAND.

MR. Tidd Pratt, Registrar of Friendly Societies, has just issued his report for the last year, pursuant to the provisions of the 13 and 14 Vict., c. 115, sec. 1 and 2. During the year 1862 the Registrar examined and certified the rules of 1,171 friendly societies, and also the alterations of the rules of 177 societies; making a total of 2354 certificates. Nineteen societies deposited their rules with the Registrar under the 18 and 19 Vict., c. 63, sec. 44. Notice of dissolution were received from 137 friendly societies during the year ending Nov. 31, 1861, of which number 47 were advertised in the *London Gazette*, pursuant to 18 and 24 Vict., c. 58, sec. 3. During the year 1861 the sum of £1614 5s. 7d. in the Bank of England on account of such societies was transferred by the Registrar into the names of trustees appointed by friendly societies, in the places of others removed, absent, &c., pursuant to 18 and 19 Vict., c. 63, sec. 36. Since the last report, no Act of Parliament has passed relating to friendly societies, except the Act 25 and 26 Vict., c. 87, which enacted during the past year that the Registrar may, in his actuary, but adopted a uniform monthly payment for a member, and not for a week, as heretofore. In addition to which, after a certain number of years members were entitled to a pension, or, in other words, an annuity, to secure which their contributions were inadequate. Most of them were let at public-houses, and a monthly contribution was required to be spent in beer. Numerous complaints have been made to the Registrar of these fraudulent charges of the management of friendly societies, particularly of those who have extensive operations, and he has pointed out that he could not exceed a considerable number of letters, addressed to him in his official capacity, with reference to the unhappy condition of the system. A great number of these letters quoted in the report, the major portion of the writers protesting against charges for drink, as a consequence of which they were compelled to hold aloof from them. Some, however, are of a special character, and question the legal right of funds being used for purposes not in accordance of his Majesty's Consul the Prince of Wales.

The number of accounts in savings banks, including the friendly societies investing direct with the commissioners, in the United Kingdom, was, on Nov. 20, 1862, 1,662,000, and the amount of deposits £32,232,292.

The operations of the Post Office savings banks commenced in September, 1861, and the progress of the business from that time, and especially during the past year, has been highly satisfactory, about 180,000 depositors having opened accounts in them during the year. The total number of depositors at Post Office savings banks were opened in England and Wales, 980 in Ireland, and 191 in Scotland, including all the Channel Islands and Monmouthshire belonging Islands. The whole number of Post Office saving banks at the end of 1862 was, therefore, 1,171, of which 1,000 were in England and Wales, 100 in Ireland, and 271 in Scotland. Many of these banks have attracted a large number of depositors, and 76 only of the whole number have failed to attract the public confidence; and that the advantages which they offer appear to be understood and appreciated throughout the country is evident from the beginning of the present year 151 additional banks have been opened, making 2864 banks in all, and the gross amount of deposits, including interest, on Nov. 20, 1863, was £3,736,689 out of £3,592,296.

Much use has been made of savings banks by friendly, provident, and charitable societies, and by the managers of penny banks, as shown by the valuable number of returns which have been collected by the Registrar for the year 1862: provident and charitable societies, 621; penny banks, 85. One important advantage of these banks is that they give any person who has the power of making a deposit or taking out money in any part of the country in which he may happen at the time to be, and the transaction is in no manner his account was originally opened. This power is largely used. Last year there were 1,000,000 deposits and 1,000,000 withdrawals (1,942 withdrawals).

The following communication has been transmitted to Earl Russell, by her Majesty's agent and Consul-General in Tunis, respecting the appearance of a small island on the Chotts' Basin, supposed to have been raised by the Vine-Central at Goletta:—" Goletta, Oct. 6. Mr. Consul-General Cyprien Bourgade has just been, of the help of Vansour, of Tunis, and Mr. Dupuy, having announced to me that he has discovered a new island from the coast, and Mr. Dupuy, between in length, about 30 min. E., and 15 min. S., and 20 deg. 0 min. N., exactly on the Chotts Basin, I found the duty of meeting known to you this discovery.

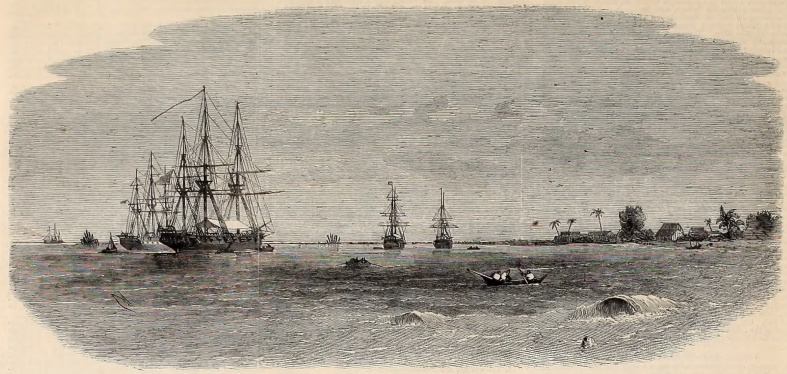
ABBOTTABAD, ONE OF OUR SANITARIUMS IN THE HIMALAYAS.

Count Colloredo, Austria; Count Von Wittenberg, Prussia; Von Ziethen, Prussia; Count Bubna, Austria. Above these, at the corners of the angles, are consoles or supporters, adorned with lions' heads and open capitals, almost imperceptibly intermediating the change from the polygon into the perfect circle.

The second division now begins with the balustrade of the columned gallery, consisting of four layers of white Carrara marble, with ornamented cornices. Above this balustrade is an open Doric gallery, 12 ft. wide, composed of seventy-two monoliths of granite, 21 ft. high. The inner wall is cased with marble from Fichtelberg. Above this gallery (385 ft. in circumference) is the principal cornice, with the architrave. On the latter, which is of white marble, are inscribed in letters of gilt-marble, the names of eighteen of the principal fortresses taken by the Germans during the war. Above the cornice are the attica, made of stucco-marble, with gilt mouldings.

The ingeniously-constructed cupola, 101 ft. in diameter, and divided into 252 compartments adorned with different martial emblems, such as wreaths of oak, trophies of victory, thunderbolts, &c., crowns the whole. A richly-gilt wreath of oak-leaves forms the finishing-point of the cupola, and, being of openwork, admits the light from the lantern above, which is 26 ft. in diameter. The height from the pavement to the top of the lantern is 184 ft. Over the entrance-door is the following inscription, in letters of white marble:—"The architect of this building was Leo Von Klenze."

The foundations of this gigantic building are a masterpiece of durability and beauty. In many parts, owing to the nature of the chalk formation on which the temple stands, they extend to a depth of from 60 ft. to 80 ft. The first stone was laid on the 19th of October, 1842, by King Louis, the day after his Majesty had inaugurated the Walhalla at Donaustauf, near Ratisbon, who had shared in the dangers and glories of the War of Liberation to meet him on the 18th of October to inaugurate the temple at Kelheim. Of the eighteen Generals, whose names are inscribed within the temple, but one is still living—the veteran King of Wirtemberg.



King Louis arrived at Kelheim on Saturday, the 17th ult., and closely inspected the building in every part. In the evening there were fireworks and an illumination on the Mount, the temple being lighted up with blue and red fire. On Sunday, at one p.m., the invited Generals—his Royal Highness Prince Charles of Bavaria, Field Marshals Hess and Wrangel, General Prince Thurn and Taxis, the Wirtemberg Minister of War, General Miller, and the Hanoverian Minister of War, Von Brandes, Captain-General Von Hohenhausen, General Flotow, Major-General Kratzeisen, and Lieutenant-Generals Roppel, Schlaithein, Bosch, and Maged assembled on the terrace with their aides-de-camp, and were thus addressed by the King:—"Welcome! ye valiant warriors of the War of Liberation; welcome, all of you. It was Germany's most glorious period. Let us think well on it. All I can say is what I have here had inscribed in the Hall of Liberation, 'May the Germans never forget what rendered the War of Liberation necessary, and how they conquered in it.'" After this address the gigantic portals were thrown open, and the King introduced the Generals into the interior, explaining the whole to them. General Wrangel then said a few words, ending with "Long live the builder of this temple," which was most cordially responded to by all present. The whole of the Royal party then inscribed their names in the strangers' book, left the temple, and returned to Kelheim, where a banquet with patriotic toasts among others one in which Field Marshal Hess, in the name of the Emperor of Austria, proposed the health and drank to the long life of the noble King Louis the Bavarian, terminated the proceedings. This splendid building was erected entirely at the expense of King Louis.

ABBOTTABAD,

IN a small flat valley in the Himalayas, three thousand feet above the level of the sea, to the north of Murree, engraved in our last Number, is situated Abbottabad. Two regiments of the Punjaub Irregular Force are usually quartered there, besides a mountain train battery. Abbottabad is remarkably healthy for Europeans; but, owing to the want of an hotel or other accommodation, is not much resorted to by invalids. The summer is much warmer than that of Murree, but the winter is equal in severity to fan English one.

The View of Abbottabad, with that of Murree, which appeared in our last Number, and the Branch Lawrence Asylum in the preceding one, were taken, by permission, from a series of photographic views in India, in course of publication by Messrs. M'Lean and Co., of the Haymarket, for Robert T. Hickey, Esq., Captain 101st Foot.

SKETCHES FROM MADAGASCAR.

TOWN AND HARBOUR OF TAMATAVE, ON THE EAST COAST.

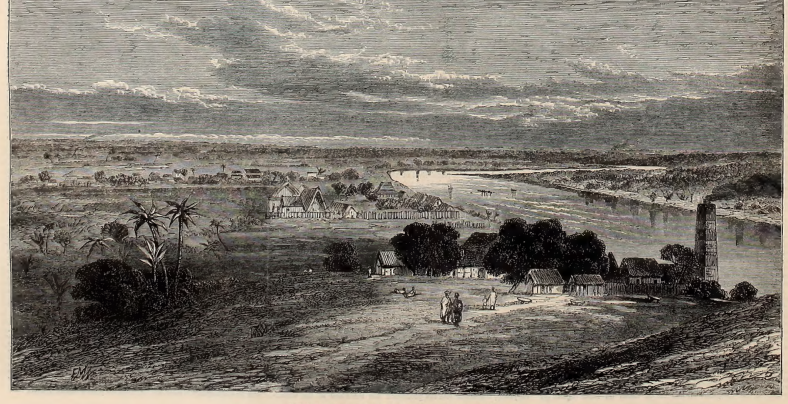
TAMATAVE, on the east coast of Madagascar, derives its importance from its being the nearest seaport to Antananarivo, as well as the most easy of access from it, and is the point of disembarkation for foreigners approaching that capital.

Although Madagascar possesses some of the finest harbours in the world—amongst which may be enumerated those of Boyanna and Benhatooka on the west coast, and British Sound on the north-east—it still labours under the disadvantage of offering but few sheltered anchorages in proportion to its very extensive seaboard. This defect is particularly marked on the east coast, on which Tamatave presents the only considerable harbour for some hundreds of miles of coast. It is formed, like many harbours in the Indian seas, by coral reefs, which inclose the bay between the mainland and the northern part of a sandy tongue, on which the town of Tamatave is situated. The latter is a long, straggling place, the straight and narrow main street—if such it can be called—of which is of sand, into which you sink above the ankles: it is flanked on both sides by tall palings, some little distance at the back of which lie the dignified huts of the principal merchants, creoles of Mauritius and Bourbon. The native's huts are scattered about elsewhere, with but little regard to streets, every three or four inclosed by a palisading 6 ft. or 8 ft. high. The fort, from which the British and French were repulsed in 1845, lies on the land side of the town, entirely surrounded by palisading, but destitute of ditch, with a command of about 18 ft. to 20 ft. over the country.

A dense jungle conceals it from the harbour, from which it is distant from 150 to 200 yards. The Governor and principal hovas reside in the fort, which within the last few years has been thrown open to the inspection of foreigners, who, to gain access, are marched along a narrow lane, closed at intervals by wickets, at each of which stand two stewart Malagasays, armed with muskets with bayonets crossed, to forbid your entrance until satisfied of its legality by the native officer. The market partakes much of the character of an Indian bazaar. Amongst the articles exposed for sale are lambas (native mantles), rude iron implements of native workmanship, coarse pottery, and locusts.

But the great trade of Tamatave lies in cattle, which are driven daily in great numbers from the higher pastures inland into the town, to supply the "bullockers" of Bourbon and Mauritius. It is a pretty sight to see a drove swimming the rivers on the track, the native herdsmen goading on the laggards with hard knocks, and yelling most vociferously, amid the beautiful repose of the tropics. These rivers are mostly to be found within a short distance of Tamatave. That shown in the Engraving falls into the sea some eight or nine miles from it—entrance at the mouth, as in all the principal streams of Madagascar, being impracticable.

THE ATTACK ON KAGOSIMA.



THIRTEEN pages of last Friday's *Gazette* were filled with correspondence relating to our difficulty with Japan. The first despatch from Earl Russell, dated December, 1862, instructs Colonel Neale, the English Chargé d'Affaires in Japan, to demand reparation for the murder of Mr. Richardson. Colonel Neale's despatches contain an account of his interviews with the Japanese authorities. The results not being satisfactory, Admiral Kuper received instruction to commence the bombardment of Kagosima. The remainder of these despatches refer to this attack, which terminated in laying the capital of Prince Satsuma in ashes.

The fleet, consisting of the Euryalus (35), Admiral Kuper's flagship; Pearl (21), Argus (6), Perseus (17), Coquette (4), Racehorse (4), Havoc (2), which left Yokohama on the 6th, entered Kagosima Bay on the afternoon of Tuesday, the 11th of August. The bay is described as forming a very splendid harbour, and as being surrounded by lofty, picturesque scenery. The fleet was anchored some distance from Kagosima, a city of vast extent, said to contain 180,000 inhabitants, and having factories and warehouses on a most extensive scale. On the 12th the fleet moved up and anchored opposite the town, in twenty fathoms water, about 1200 yards from the batteries, which extend along the whole of the town front—say about two miles, from the extreme south to the extreme north. The action was a very gallant one, being fought in the midst of a typhoon; and both Colonel Neale and Admiral Kuper express their opinion that the squadron did not withdraw until they had accomplished every purpose of retribution which so small a force would venture to exact.

Our Special Artist and Correspondent in Japan has forwarded to us sketches of the Attack on Kagosima and of the Harbour, both of which are engraved in this week's Impression. He has also forwarded to us the accompanying descriptions of the fight:—

"YOKOHAMA, Aug. 28.

"The fleet, consisting of seven vessels, anchored in Kagosima Bay on the 11th of August. On the following day a Japanese officer, with forty retainers, came off to the Euryalus with a long letter; but before it was delivered a boat, bearing a large white flag, was

VIEW ON THE RIVER WUNDOROO, NEAR TAMATAVE.

observed coming off at great speed, and the officer having charge of the white flag objected to the perusal of the letter, stating that is required alteration. The next day another and longer letter was delivered ; and it reached upon the murder of Richardson, and went on to say that it was no doubt very wrong to murder men, and murderers ought to be brought to justice ; that they had heard we had a treaty with the Tycoon, and the blame was due to him for not informing us that the Japanese law allowed no one to cross the path of a daimio during a procession without being cut down, and more to the same effect. They were silent about the indemnity, and accompanied Admiral Kuper beyond them and he would not send and keep Satsuma's three steamers until he paid the money. The vessels were sent accordingly. Now, Mr. Reed, three steamers ! The Princess more than treble the indemnity money.

"On the 11th of August, at twelve o'clock, the Japanese forts opened fire on our squadron. The Perseus, Captain Kingston, was nearly three hours engaged with Fort No. 8, and for a considerable time ashore, before the fort of the capital came up. Both forts replied with up a heavy fire with mortars, ten-inch shells, and guns, making very good practice. The Pearyalan suffered very much, the enemy's firing not Commander Willmot were killed at the same moment by a round shot, and a shell burst in front in the fore part of the ship, killing seven men and wounding more than double that number at the same time. The action continued for thirty-five minutes : most of the enemy's guns were dismounted, and the forts were silenced. Not a shot was fired on this day. As soon as the action commenced the Prince's steamers were set by and destroyed ; five Japanese gunboats, and all the native craft in the harbour also were burnt. During all this time a typhoon was blowing and the rain falling in torrents. The enemy's shot rained over head an iron shower ; the shells burst, and the flames, fanned by the wind, leaped from street to street, having been fired from mines and shrapnel. Amid all these the men anchored, the batteries ceased firing, and the Perseus sent in a rocket a few and then all was quiet.

"The next day the fighting was continued ; the batteries were silenced, with the exception of a few guns. The Japanese town of Kagosima, and Satsuma's castle battered with shot and shell. The fleet then steamed out, and left what was Kagosima a mass of ruins and flames. Satsuma's ships—steamers and junks—were destroyed, his factories and foundries burnt, his castle riddled, his magazines blown up, and his guns dismounted.

"Our fleet was pretty well knocked about, the rigging cut up, and most of our boats smashed. The Havoc's position suffered most. The little gun-boat Havoc, which behaved splendidly, was cut to pieces. Her hull—like a wafer—the dodged about, defying the enemy to touch her. Our loss is about sixty killed and wounded. Two of the officers of the Legation were hurt. All returned safely to Yokohama, and the fleet is now repairing damages."

OFFICIAL DESPATCH FROM ADMIRAL KUPER.

A despatch, of which the following is a copy, has been received at the Admiralty from Vice-Admiral Kuper, C.B., the Commander-in-Chief of Her Majesty's ships and vessels on the East India and China station, giving full details of the expedition to Kagosima :—

"Eury also, Gulf of Jeddo, Aug. 22.

"Sir,—I request you will acquaint the Lords Commissioners of the Admiralty that having embarked Lieutenant-Colonel Neale, her Majesty's Chargé d'Affaires, and such of the members of the Legation as he wished to accompany him, I left Yokohama on the 6th inst., with the Euryalus, Pearl, Coquette, Argus, Pigmy, Racehorse, and Havoc, for Kagosima, the capital of the Daimio Prince of Satsuma. As it was desirable to encounter as little as much as possible, the greater part of the passage was made under sail, and the squadron did not, in consequence, arrive off Cape Chichakoff until the afternoon of the 11th.

"It was unable to obtain any correct information respecting the Gulf or Bay of Kagosima, and having no pilot on board, I sent a Japanese boatman who had been once at that place in the steamer Envoy. Of course, it was necessary to approach with caution. As we advanced up the gulf, however, it was found that our greatest difficulty was to discover the depth of the water, and, as no soundings, but which proved to be nothing more than seven insignificant rocks close to the shore.

"3. I weighed again at seven o'clock on the morning of the 12th inst., sending the Coquette, Racehorse, and Havoc ahead to sound, and by nine a.m. the squadron was anchored in line, opposite to the town of Kagosima, in 7½ fathoms water, and within about 1200 yards of the batteries, which, at intervals, line the whole of the bay shore. The masters of the ships were directed to obtain as many soundings as possible, and to proceed in pairs during considerable distances.

"4. Several Japanese officials having come on board to inquire into the object of our visit, Lieutenant-Colonel Neale delivered to them a despatch addressed to the Prince of Satsuma, embodying the demands made upon him by her Majesty's Government (this despatch being identical with that of which a copy was forwarded for the public information in my letter of the 16th of April last, No. 115). Twenty-four hours were allowed for a reply and the interval of time was made use of by us in obtaining as much local information as circumstances rendered possible ; and towards the evening Captains Borlase and Jesling, Commander Wilmot, and Captain Brine, Royal Engineers, went in the gig and boats, and discovered three steamers of the Prince of Satsuma anchored close to the shore, in a bay about seven or eight miles from our anchorage, but quite out of sight.

"5. During the afternoon Lieutenant-Colonel Neale and myself were with various excuses for delay in sending a reply to the demands, as well as to induce Colonel Neale and myself to go on shore to hold a conference, which, however, knowing it to be a mere ruse de guerre to get us on shore, from prudential motives, thought fit to decline ; offering, nevertheless, to hold the conference on board the flag-ship, or to move the Havoc close in shore for the purpose, which, finally, it was also observed that preparations were actually being made for hostilities. They had commenced at daylight to assemble large bodies of men in the batteries, and at one point the whole of the guns (numbering from seventy to eighty) upon the sea-face were removed from the batteries belonging to the Prince, and employed in the trade with the Loo-Choo Islands, were wrapped and left in the harbour and anchored out of the line of fire between the batteries and the squadron. In consequence of these circumstances, we undoubtedly hostile in character. I considered it expedient to be on my guard against any act of treachery ; and—as it had been decided by Lieutenant-Colonel Neale and myself that hostilities should, in no circumstance by us unless we were obliged to take the initiative, and as, from the depth of water and the direction of the wind and tide, it would have been difficult, if not impossible, to keep the ship's broadside to bear on the batteries—that the Havoc be got up and the squadron to be ready to weigh at a moment's notice.

"6. At about 4 p.m. we observed a number of boats coming out of the inner harbour, and, on approaching the squadron, they were found to contain a few water-melons and eggs, and two or three fowls, intended, probably, to represent the supplies which the town had promised to furnish us. One of these boats pulled off to each ship of the squadron, but, refusing all going alongside to sell the supplies they contained, they merely pulled round the ships and returned to the shore. Soon after this, from the presence in each boat of a large number of yacoulns, or soldiers, that their object was simply to obtain, by close observation, a knowledge of the strength of the various ships, and of the situation of guns and boats. This result was all more necessary to be on our guard.

"7. Shortly following this occurrence an officer said to be of high rank, and who stipulated for the admission to the ship of a guard of forty men, came on board. I offered no objection to the guard accompanying the official, but had a guard of marines to face them on the opposite side of the quarter-deck. This officer, who was the bearer of the reply to Lieutenant-Colonel Neale's despatch, appeared to be in a state of great nervous anxiety, and no sooner had he taken his seat in the cabin than another boat was observed pulling hastily off from the shore, and waving flags as signals for the preceding one. On coming alongside it was ascertained (as stated by the Japanese) that as there was some mistake in the despatch it was to be taken on shore again for alteration ; and the officials accordingly left the ship without delivering it. Feeling perfectly convinced that this was a ruse de guerre to detain the ships in their present position, which would enable the batteries, during slack water, to fire upon us with comparative impunity, I directed the squadron to weigh, and to be prepared to return the fire of the batteries. But finding they did not open fire upon us, which was probably owing to the change in our position having completely thrown them out in the direction and elevation of their guns, I endeavoured to find an anchorage above the fort, in the channel between the Island of Sakura and the main ; but the water proved to be too deep (from 30 to 40 fathoms close to the shore), that, after a careful examination of the whole channel, I was obliged to return opposite to the town, and anchor in the same position as before, and nearer to the Sakura side. After much trouble, an anchorage was found for the small vessels in a bay on the island, but very close to the shore. The letter from the Prince was delivered to Lieutenant-Colonel Neale on board in the evening by the same officer as before, who attempted to explain his former conduct in the afternoon by stating that there was a misunderstanding, and that the letter he then delivered to Colonel Neale was the one which was originally intended to be sent.

"8. In the forenoon of the 14th I proceeded in the Havoc, partly for the purpose of satisfying myself as to the position of the three steamers mentioned above, and partly to ascertain if I could find a spot at the head of the gulf above Sakura Sima ; it proved to be every thing that could be desired, and we had a perfectly secure anchorage 50 fathoms within 100 yards of the shore. A strong breeze from the eastward blowing at the time, and the appearance of the barometer indicating the probable approach of a typhoon or heavy gale, the squadron weighed and proceeded to sea.

"9. I have now to report to their Lordships the further progress of the events following the receipt, on the evening of this day (14th inst.), of the reply from the Prince of Satsuma to Colonel Neale's despatch, in which I was requested to enter upon such measures of coercion as might be considered necessary, and to proceed to the capital of Satsuma in a sense of the serious nature of the determinations which had been taken by Her Majesty's squadron to the Bay of Kagosima.

"10. The Pearl, Coquette, and Racehorse, which three were sent at daylight on the 15th, under the orders of Captain Borlase, to seize the three steamers mentioned in my letter of the 16th of April, and briefly described as follows :—England, screw, 1150 tons, purchased for 85,000 dols. ; Contest, screw, 350 tons, purchased for 95,000 dols. Captain Borlase was further directed to avoid, as much as possible, the destruction of property, and to capture the ships, if possible, very accordingly taken possession of without opposition, and brought down to the anchorage of the squadron, where the vessels lashed alongside the Coquette, Argus, and Racehorse, which vessels anchored in the same position as before. I had also directed Captain Borlase in the event of any detention of these steamers as reprisals, until the Prince of Satsuma should either comply with the demands, or make overtures to her Majesty's Government, which were yet to be made known to me.

"11. The weather still looked threatening.

"12. A typhoon, or very equal command by much rain, the whole of the batteries on the Kagosima side suddenly opened fire upon the Euryalus, Havoc, and Argus, which, although at long range, and the shell passed over and close around her, no damage was done beyond cutting away a few ropes. Finding that the springs on the cable would not allow the ship's broadside to bear, and in a position with the comparatively small force at my command to engage the batteries under the fire of which I was then placed, the destruction of the steamers, I signalled to the Coquette, Argus, and Racehorse to bore their prizes, and to the Havoc and Pearl to weigh and form the line of battle according to seniority (as Havoc being directed to secure the destruction of the three steamers.

"13. From the time the Euryalus's anchor was slipped her cable, was directed to fire on the north battery until the signal was made to form line of battle, which order was executed by Commander A. J. Kingston with great promptness.

"14. Although the weather was very dirty, with every indication of a typhoon, I considered it advisable not to postpone, until another day, the return of the fire of the Japanese, to punish the temerity of which the ship's company and in the immediate vicinity of the flag ; and, everything being now ready, I proceeded towards the batteries under fire, which was then disposed of with no considerable effect, and passed, at slow speed, along the whole line, within point-blank range, firing probably to the unfavourable state of the weather, the ships could not maintain their positions with as close order as I could have wished, and the Euryalus was consequently exposed to a heavy fire from the batteries, and the guns of the batteries at the same time, and suffered somewhat severely. About this time also, the Euryalus's fore-topmast was shot away, a deeply regret to state that I was deprived, at the same moment, of the assistance of Captain Jesling and Commander Wilmot, both of whom were killed by the same shot, and Lieutenant Wise, of the Marines of the Euryalus, directing the fire of the quarters, and setting an example of coolness and gallantry which I have never witnessed surpassed.

"15. In consequence of the dense smoke, and occasional heavy showers, it was difficult to ascertain the extent of the damage done to the earthwork batteries, but by the time the Euryalus got abreast of the last of the batteries on the north side of the bay, they had no fire on her in several places ; and, the weather having now assumed a most threatening appearance, I considered it prudent to discontinue the engagement and to seek a secure anchorage for her Majesty's ships. The Euryalus, subjected to a momentary stoppage of her engines, unfortunately took the ground opposite the north battery, but by the prompt energy of the commanders of the Coquette, Argus, and Havoc, which vessels were following in her wake, she was got off without damage, the steady fire kept up by Commander Charles D. F. Johnson, of the Euryalus, completely silencing every injury from the battery, which had already been much disabled by the fire of other ships. The Havoc was then ordered to set fire to five large junks belonging to Prince Satsuma, which Commander George Poole accomplished in a most satisfactory manner ; and these, as well as a very extensive range of buildings, were completely burnt to the ground.

"16. During the whole of the succeeding night it blew almost a hurricane, but the vessels of the squadron rode it out without accident, with the exception of the Euryalus, which parted her best anchors off the bank into sixty fathoms water, and was compelled to slip her cable, regaining the following morning that which had been somewhat moderated. The gale subsided gradually during the 16th, and at 4 p.m. on the 17th I proceeded with the squadron towards the batteries on the hill above the anchorage, enveloped in trees and bushes, and which might have inflicted much damage upon the small vessels lying within pistol-shot of the shore, but which, owing to their safety, and determined to move the squadron out to the anchorage we had originally occupied, and of which I had given notice, for the purpose of repairing damages, fishing spars and refitting, previous to proceeding to sea.

"17. The squadron accordingly weighed at 3 p.m. of the 16th, and, passing in line between the batteries of Kagosima and Sakura Sima, steamed down the bay, keeping well over to the Sakura side of the island, taking advantage of the occasion to shell the batteries on the Sakura side, which, however, did not appear to contain any guns, and the palace of the Prince in Kagosima. A feeble fire only was returned from the batteries, which did not seem closely engaged in the first attack, and this, happily, without damage to her Majesty's ships.

"18. The injury inflicted upon the possessions and property of the Prince of Satsuma by the operations above detailed may be briefly summed up as follows, viz.—The disabling of many guns, explosion of magazines, and other serious damage to the principal batteries, the destruction by fire of the three steamers and five junks before mentioned, the whole of the town of Kagosima and palace of the Prince, together with the large arsenal and gun factory and adjacent storehouses ; added to which may be noticed the injury to many of the junks lying in the inner harbour, caused by explosion of shells which may have passed over the batteries. The confla-gration thus created continued with unabated ardour up to the time of the departure of the squadron, forty-eight hours subsequently to the first attack.

"19. I have already reported to their Lordships, in a separate despatch, the severe loss the profession has sustained in the melancholy death of Captain John J. S. Jesling and Commander Edward Wilmot, both of this ship, who fell while gallantly doing their duty in the face of a heavy and destructive fire.—With much regret I have to add that the returns received from the various ships present a list of casualties unusually great, being no less than thirteen killed and forty-two wounded, the half of which occurred in my flag-ship alone. The particulars of these casualties will be found in an inclosure in this de spatch.

"20. Having thus accomplished every act of retribution and punishment within the scope of the operations of a small naval force, and having received from her Majesty's Chargé d'Affaires the expression of his satisfaction with the extent and complete result of those operations, and at which I trust her Majesty's Government may also be pleased to approve, I left the Bay of Kagosima, having with the squadron, on the afternoon of the 17th inst., on my return to Yokohama.

"21. It now becomes my duty to point out to their Lordships the zealous and efficient assistance I received during the above operations, carried out in a totally unknown port and under circumstances of considerable difficulty, from stress of weather, &c., from the various officers present at the time. To Captain Borlase the proper service to be rendered to the squadron generally (as will be seen by the annexed copy of a memorandum issued at the time) I entrusted the execution of the gallantry and zeal displayed by all classes ; and, although the seaboat-service devolved on Captain Jesling and Commander Wilmot has enabled me to reward with the promotion of the officers engaged, I should be wanting in an appreciation of the same high qualities displayed by others were I to bring their names prominently to the notice of the Lords Commissioners of the Admiralty for their favourable consideration.

"22. The services of Captain John Borlase, C.B., of the Pearl, have been so frequently brought before their Lordships by my predecessor in this command that I feel it will be unnecessary for me to enter than to add my testimony to the valuable assistance I have invariably received from him on all occasions. Throughout the operations I have here had the honour of describing, Commander Charles D. F. Johnson, of the Euryalus (since promoted), Commander L. J. Moore, of the Argus ; Commander A. J. Kingston, of the Perseus ; and C. D. F. Johnson, of the Racehorse, were severally and collectively most active and energetic in their co-operation and in their efforts to carry out my wishes in every respect. Lieutenant George Poole, commanding the Havoc, as well as officer of long standing and high character, rendered most useful and efficient assistance throughout, especially in the various duties with which he was intrusted, and merited my warmest acknowledgments.

"23. The services of Mr. Sidney Saunders, my command I would also desire to commend to their Lordships as favourable notice ; those of Mr. W. H. Parker, midshipman of the Euryalus, who, with the assistance of the master of the ships present, succeeded in making a rough survey of the bay of Kagosima, without which no squadron would have been unable to take up the eligible position it subsequently occupied whilst actually engaged in battle. My steady and confident manner in which Mr. Parker steered the Euryalus within point-blank range deserved my highest commendations.

"24. I have also to report that Captain Frederick Brine, Royal Engineers, whose services were placed at my disposal by the Major-General commanding the forces, rendered much useful information as to the strength and position of the batteries, &c.

"I have, &c.,
"AUGUSTUS L. KUPER,
"Vice-Admiral and Commander-in-Chief.

"To the Secretary of the Admiralty, London."

A list of casualties accompanies Admiral Kuper's despatch, of which the following is a summary :—Euryalus—killed, 10 ; wounded, 21 : total, 31. Pearl—wounded, 7. Coquette—killed, 2 ; wounded, 1 : total 3. Argus—wounded, 2. Perseus—killed, 1 ; wounded 9 : total, 10. Racehorse—wounded, 2. Grand total : Killed, 13 ; wounded, 50 : total, 63.

The following is a statement of the British naval forces in commission at Japan, under the command of Rear-Admiral Augustus Leopold Kuper, C.B., flag-ship Euryalus, 44, Captain Frederick Borlase, C.B.

The Prince of Satsuma is one of the most powerful of the great half-independent Princes of Japan. His name is Matsdaira Satsuma no Kami Shimadzu Saburo. He possesses and Fuchi, in which he possesses the fortresses or strongholds of Kagosima and Sado-shima, besides some also the Loochoo Islands. The revenue of Satsuma is 770,000 Japanese Reis-book at 2,450,000 dols. per annum. He has always been a bitter enemy of the foreigners, and is the chief instigator of the murderous attack on the seven upper princes of the Tycoon. Sir R. Alcock saw a Japanese of "considerable official rank" who remarkable as being one only of the Japanese official spies, sent successively from Jeddo into the Prince of Satsuma's territories who ever returned to tell the story tell of him, and who curiously the absolute power he wields in his dominions. According to Japanese etiquette, if he meets a daimio on the road he must turn aside, and the latter is held to be dishonoured if he does not avenge it. The present Prince of Satsuma has, it is said, considerably increased by the grants to the followers with those of the neighbouring nobles, made a rule that if one of his people was insulted by the retainers of another Prince, the insult should be by taking the life of his adversary, but on the condition that he performed hara-kiri, or killed himself. This, immediately afterwards, carried out the same time, he gave instructions that if any of his people were insulted and failed to retaliate he should be killed himself. In one of these the Prince, have his head struck off without trial, and head and body thrown into the sea—after the manner of Turks.

AN ELYSIUM ON EARTH.—We all love to read of such places, and here is the invention of a gentleman of Batavia, in the island of Java :—"Batavia is a brilliant specimen of Dutch cleanliness. Every house is close to within a few feet of the street, and back from the street, the intervening space being filled with trees, literally set in a garden, and a variety of beautiful plants, elegant flowers, and fruit, and is decorated with beautiful pictures, elegant lamps, cages, with various songsters, and numerous other ornaments. Each house contains accommodation for the family, who sit here morning and evenings. At night the coolness of night from the lamps. The streets are lighted with lamps, standards, at intervals to extend around them, covered with fine shady trees, with forest-like gardens, &c. Indeed, it appears more like this than like any thing else—a forest. The rooms are very high and spacious, without carpets, and mats for curtains. Beds, mats are spread up about the same as at Canton, and in the United States, although the habits of living are quite different. At daylight the mats are taken up, and the doors and windows opened, and again at dark the light refreshments. At seven breakfast is served, and at seven dinner. Coffee and tea are always ready. Fruit is plenty. The house in the rear is the same in the middle of the day on account of the heat. The nights and mornings are delightful, and the days very hot and sultry. The thermometer ranges on about eighty-two degrees throughout the year. The island of Java contains a population of 19,000,000. The country is covered with magnificent, luxuriant, and poisonous insects of all kinds. The finest fruits in the world are produced in great profusion."

The Nyneex Tal correspondent of the *Calcutta Englishman* draws a pleasing picture of life at that quiet watering-place where the Lieutenant-Governor of the north-west generally spends the hot season. The chief feature is the lake, a mile long, 6706 ft. above the level of the sea, well stocked with fish and easily caught by rod-and-line, and studded on each side by ranges of well-wooded hills, dotted here and there with cottages, from base to summit. The average annual fall of rain is about 100 inches. No parched, unsightly, dusty days are seen. In September the rains taper off into fine weather, with a cool bracing atmosphere, delightful. October is even more delightful, and November. Grand, lovely autumn glides on into winter, with its concomitants of snow and ice, which the place is almost deserted.

COLUMN FOR THE CURIOUS.

One hundred and three years since (on Saturday last) was laid the foundation-stone of Blackfriars Bridge, a structure of much handsomer design than either of the two bridges by which the Thames was then spanned. Yet a new bridge, in place of that of Blackfriars, is now in course of construction. Little more than a century is but a brief existence for so costly a stone fabric, especially when we remember that "London Bridge," built early in the thirteenth century, lasted to our time. The bridge at Blackfriars has a troublous history. There was a long squabble among the competing architects; the inscription on the foundation-stone was written in "bad Latin;" its first name of "Pitt Bridge" fell with the fame of the Minister; its tollhouses were burnt in the Riots of 1780; its architect was harshly treated for his columns of different heights and diameters; and his elegant balustrade has been swept away by the engineers in repairs which cost some £74,000, though a loss to the contractors, about twenty years since; and now, with a slight alteration of an old ditty, "Blackfriars Bridge is broken down." The new bridge promises to be something more than a mere engineering work, and, let us hope, will enjoy a longer existence than its showy predecessor.

The respecters of our old institutions will be gratified to hear that, although the Whetstone trust ceased on the 31st ult., and it commences at Highgate, its destruction will not affect the old custom of levying a heavy tax on goods going into or passing out of Highgate town, under the title of "the Bishop of London's toll." The City authorities abolished their tolls years ago, but just outside the metropolis the toll is continued to be levied at the Gate-house at Highgate; and it is stated that the collector holds a lease of the toll from the Bishop of London. The original gate was erected some four hundred years ago, to receive tolls for the see of London, upon an old road, from Gray's-Inn-lane to Barnet, being turned through the Bishop's Park; and the hamlet of Highgate has its name from the *high* situation of this *gate*, on the top of the hill. On its site was once a hermitage; and the ancient road or causeway between Islington and Highgate was made by one of the hermits, who excavated the gravel for that purpose from the top of the hill, thenceforth a pond; "a two-handed charity," says Fuller, "providing water on the hill, where it was wanting, and cleanness in the valley, which before, especially in winter, was passed with difficulty." The Gate-house was taken down in 1769. The name then passed to the adjoining tavern, which was well known some years ago for another kind of levy on travellers, who were made to swear "on the horns" on entering the road to London. It is curious to find that, although adjoining the Gate-house, the old chapel was taken down in 1833, and Sir Roger Cholmeley's schoolhouse has since been rebuilt, the toll custom has outlived these changes. There is a wonderful vitality in such money-matters!

That "there is nothing new" receives confirmation strong almost day by day. It has been said with truth and humour that at the present day Aristotle is to be consulted for new discoveries; and many of our engineering novelties may be found in old authorities, though of later date than the writings of the Stagyrite. The other day the chief engineer of her Majesty's dockyard at Portsmouth constructed a steam-launch, in order to test the applicability of the system of twin or double-screw propellers driven by independent engines for our men-of-war. This had already been accomplished in 1851 by Mr. George Rennie, with Carpenter's double screws; but a correspondent of the *Times* thus traces the invention a century earlier:—

So long ago as 1752 D. Bernouilli proposed to use screw-propellers at the bows, sides, and stern of a ship, and to drive them by a steam-engine. A sketch of this early suggestion is given in the *Annales des Arts et Manufactures*, tome 20, p. 329. In 1775 Kraft noticed this invention in a memoir at St. Petersburg, and two years afterwards we find it mentioned in the *Monthly Review*, vol. 56, p. 525. As usual, the idea was frequently reproduced or copied by other inventors; but even a century ago it included provisions for raising the screws out of water when out of use.

So much has been written of late upon the history of the screw-propeller that we are surprised to find it in dispute. Mr. Macgregor's valuable paper, with its woodcut diagrams, and Mr. Pettit Smith's testimonial will be remembered in 1858; since which the Patent Museum at South Kensington and Mr. Benet Woodcroft's valuable "Abridgments" have been added.

In the column adjoining the above communication appears an interesting account, by Mr. William Pole, of some military antiquities, thus introduced:—

In 1427, when the English in Normandy made their last assault on the Mont St. Michel, they brought to their aid "plusieurs machines espouvantables et divers engines de guerre," with which, to continue the words of the old chronicler, "ils dressèrent une batterie si furieuse contre les murailles qu'ils y firent brèche." Among these formidable weapons were two enormous wrought-iron guns, which, on the repulse of the besiegers, they were compelled to leave behind them, and which have remained on the rock to the present time.

The guns are of the kind termed "bombardes," and are of different sizes. The larger one is 19 in. calibre, 30½ in. greatest external diameter, and 12 ft. total length, of which about 8 ft. 8 in. belongs to the barrel, or "chase," and 3 ft. 4 in. to the smaller powder chamber in the rear. The smaller gun is 15 in. calibre and 11 ft. 9 in. long.

They are true "built-up" guns, being formed of longitudinal wrought-iron bars, about 3 in. wide, arranged like the staves of a cask, and bound round closely with hoops of the same material. The analogy of this ancient construction with that of the modern wrought-iron guns is very curious.

I found a projectile in each gun and several others lying about. They are granite balls, roughly spherical, and a little smaller than the bore. Those for the larger gun will probably weigh about 300 lb. each; but if the size of the gun be denoted according to the calibre, on the same principle as modern guns for round shot, it must be called a 920-pounder. The breech-chamber would hold about 40 lb. of powder. I estimate the weight of the large gun to be about 5½ tons, and of the small one about 3¼ tons.

These "Michelettes" are constructed on the same principle as the "Dulle Griete" of Ghent and the "Mons Meg" of Edinburgh. In this age of "monster guns" the above facts are significant.

We owe Horace Walpole's delightful letters, in the main, to his correspondence with Sir Horace Mann, to whom, writing Aug. 25, 1784, he says:—"I have been counting how many letters I have written to you since I landed in England, in 1741; they amount—astonishing!—to above eight hundred; and we have not met in three and forty years! A correspondence of near half a century is, I suppose, not to be paralleled in the annals of the post-office." Talking of letters, in 1786—a period when robberies in capitals appear to have been a sort of fashion—on Jan. 7, half an hour after eight, *the mail from France was robbed in Pall-mall*—yes, in the great thoroughfare of London, and within call of the guard at the palace. The chaise had stopped, the harness was cut, and the portmanteau was taken out of the chaise itself. What think you of banditti in the heart of such a capital? Yet at Dublin the outrages were ten times more enormous. About Strawberry-hill highway robberies were very frequent; the parson and his wife and servant were stopped by footpads, just by Walpole's gate, and were not so fortunate as the lady, who, in going to a party at a neighbour's, was robbed of her purse—of *bad money*, which she always carried in anticipation of being plundered; Walpole, her companion in the chaise, lost his purse of nine guineas.

Curiously enough, one of Walpole's letters of this period pleasantly gossips of Shorthand, about which we have heard much of late, in contrast with Longhand. Here we see that some eighty years since, letter-writers applied the Imperial maxim—that "Art is long, and life but short," to the saving of time in epistles of fashion and chronicles of scandal and small beer. Walpole thus anecdotically illustrates these curtailments, having already spoken of the grievance of a letter in an envelope being charged double:—"Now it is the fashion to curtail the direction as much as possible; formerly, a direction was an academy of compliments—'To the most noble and my singularly-respected friend, &c.,' and then 'Haste, haste! for your life, haste!' Now, we have banished even the monosyllable *To!* Henry Conway, Lord Hertford's son, who is very indolent, and has much humour, introduced that abridgment. Writing to a Mr. Tighe, at the Temple, he directed his letter only thus, 'T. Ti., Temple,' and it was delivered. Dr. Bentley was mightily flattered on receiving a letter superscribed, 'To Dr. Bentley, in England.' Times are altered; postmen are now satisfied with a hint. One modern retrenchment is a blessing—one is not obliged to study for an ingenious conclusion, as if writing an epigram. Oh, no! nor to send compliments that never were delivered. I had a relation who always finished his letters with 'his love to all that was near and dear to us,' though he did not care a straw for me or any of his family. It is said of old Sarah, Duchess of Marlborough, that she never put dots over her *i*'s, to save ink: how she would have enjoyed modern economy in that article!"

CHESS.

TO CORRESPONDENTS.

WEE PAWN, BUSACH, and Others.—The solution of Enigma 1359, which appears to have given some trouble, begins—1. B to K 3rd (ch). If Black take the K Pawn White plays, 2. B to K B 4th (dis. ch), and mates next move. If Black, instead of taking the K Pawn play K to K 4th, then follow, 2. B to K B 4th (ch), and mate in two moves.

ŒDIPUS.—The key moves to Enigma 1350 are, 1. R to K B 5th (ch) and—when Black takes the Pawn—2. B takes Q B Pawn.

THE SPHYNX, Alexandria, Egypt.—1. Yes: see our Number for Oct. 10. 2. We should find it very difficult to say.

SOCIÉTÉ LITTERAIRE, GAND, R. S., of Malines, A BATH ARCHER, PRIMOGENITUS, T. ADDISON, and others, are all mistaken: Mr. Kling's Problem, No. 1026, *cannot* be solved in four moves.

TYRO.—You must look again at Problem No. 1025.

W. COATES.—It shall have all due attention.

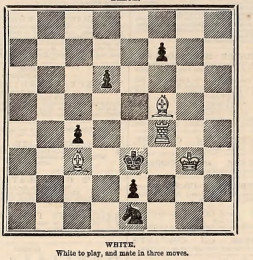
JOHNSTON MILLS.—You should devote yourself for at least two years to the study of the best problem masters before sending a composition for insertion in a public paper.

G. I. W., Maynooth.—We have not space to answer so many questions. You should practise with some friend until you are sufficiently advanced to study from the books.

SOLUTION OF PROBLEM NO. 1026, by Derevon, E. H. V., W. K., Sigma, Larry, Tyro, Peon, H. S., F. N., Œdipus, Wee Pawn, Lorimer, D. C. L., Magnus, T. W. P., Iota, Argus, L. S. D., Gammo, F. R. S., T. P. C., F. W. P., Box and Cox, Trinculo, Arbaces, Quidnunc, H. W. Medicus, A. Wallab, Morgana, Clericus, I. T. S., Pip, The Ghost, M.P., Peregrine, 1863, Manfred, Lionel, S. V. K., Bridget, Boston Stump, H. B. M., Omicron, Felix, O. P. Q., Henry, C. M., Old Salt, Cora, Uncle Tom, T. C. S., D. D., Peterkin, S. M. D., Johan, Query, Q. E. D., A Templar; G., Athenæum Club; W. S. Pavitt are correct. All others are wrong.

SOLUTION OF PROBLEM NO. 1027.

WHITE.	BLACK.	WHITE.	BLACK.
1. Q to K B 7th	R to K 4th or (*a*)	2. Q to K B 4th (ch)	K takes Kt (best)
		3. Q to Q B 4th (ch)	K takes Q
		4. Kt mates	



(If King takes Kt, then follow 2. Kt to Q 6th (ch) &c.)

(*a*) 1.	B to K B 3rd	3. Kt to K B 6th (ch) K moves.
2. Q takes R (ch)	B to K 4th	4. Mates.

PROBLEM NO. 1028.

By J. B., of Bridport.

BLACK.

WHITE.

White to play, and mate in three moves.

CHESS IN PARIS.

MR. PETROFF, THE FAMOUS RUSSIAN PLAYER.

One of the oldest and most accomplished chess masters, Mr. Petroff, has lately enlivened the chess circles of Paris by his presence. His stay, for the moment, was a brief one; but he intends, it is said, to return to the French capital in a few weeks and make it his home for the winter. Should he do so, expectations are entertained that Mr. Morphy, who is still resident in Paris, will be tempted to break a lance with the Nestor of Russian chess. In that case we may anticipate the pleasure of recording some of the finest games which have been played since the great combats of twenty or five and twenty years ago. During his recent sojourn in Paris, Mr. Petroff was a frequent visitor to the Café de la Régence, and among other games he took part in the following, for the preservation of which the public is indebted to the indefatigable diligence of Mr. Journoud:—

Game between Mr. PETROFF and Mr. JOURNOUD.

(*Allgaier Gambit.*)

WHITE (Mr. P.)	BLACK (Mr. J.)
1. P to K 4th	P to K 4th
2. P to K B 4th	P takes P
3. Kt to K B 3rd	P to K Kt 4th
4. P to K R 4th	P to K Kt 5th
5. Kt to K 5th	Kt to K B 3rd

(We prefer this line of defence to the older and more popular one based on P to K R 4th; but the latter, it is fair to say, has many advocates, whose opinions are entitled to respect.)

6. B to Q B 4th	P to Q 4th
7. P takes P	B to Q 3rd
8. P to Q 4th	Kt to K R 4th

(This move is an all-important element in the present mode of defending the Allgaier Gambit.)

9. B to Q Kt 5th (ch)

(Mr. Jaenisch recommends the opening player to move his King to K B second square; but, in reply to that step, Black, it has been shown, may preserve his advantage by playing—9. P to K B 4th.)

9. K to B sq

(So strong are Black's advanced Pawns, that he may almost afford, in our opinion, to play 9. P to Q B 3rd, and sacrifice his Q Rook for the adverse Bishop at this juncture.)

10. Kt to Q B 3rd	Kt to K Kt 6th
11. B takes K B P	Kt takes K R
12. Q to Q 2nd	Q tks K R P (ch)
13. P to K Kt 3rd	Kt takes Kt P
14. Q to K B 2nd	Kt to K B 4th

(This is better play than checking with the Queen at K R 8th, as the student will soon discover on examining the situation.)

15. Q takes Q	Kt takes Q
16. B to K R 6th (ch)	K to Kt sq

(If he had played the King to K 2nd, White, it is clear, would have won the Kt by checking at K Kt 5th.)

17. Kt to K 4th — B to K 2nd

(His only safe move. If he had played 17. B takes Kt, M. Journoud suggests the following as a probable continuation:—

17.	B takes Kt
18. P takes B	P to K B 4th
19. B to K 8th	P takes Kt
20. P to K 6th	Kt to K B 6th (ch)
21. K to K 2nd	Kt to K 4th
22. R to K Kt sq	B takes P
23. P takes B, and wins.)	

18. B to K 8th	Kt to K B 6th (ch)
19. K to B 2nd	Kt takes Kt
20. P takes Kt	B to K B 4th
21. Kt to K B 6th (ch)	B takes Kt
22. P takes B	Kt to Q 2nd
23. B takes Kt	B takes B
24. R to K sq	R to K sq
25. R takes R (ch)	B takes R
26. K to Kt 3rd	B to Q 2nd
27. P to Q B 4th	P to Q R 4th
28. P to Q R 3rd	P to Q R 5th
29. P to Q B 5th	B to Q B sq
30. P to Q 6th	P takes P
31. P takes P	B to Q 2nd
32. K to B 4th	B to K 3rd
33. K to Kt 3rd, and the Game was given up as drawn.	

CHESS IN HOLLAND.

An interesting Game, played by Messrs. DUPRE and DUFRESNE, consulting together against Mr. DUBOIS.—(*Q Kt's Opening.*)

WHITE (Mr. D.)	BLACK (The Allies).
1. P to K 4th	P to K 4th
2. Kt to Q B 3rd	Kt to K B 3rd
3. P to K B 4th	P to Q 4th
4. P takes K P	Kt takes K P
5. P to Q 3rd	

(This move, which permits Black to give check with their Queen, imparts an unexpected degree of animation to the opening, and leads to many instructive positions.)

5.	Q to K R 5th (ch)
6. P to K Kt 3rd	Kt takes K Kt P
7. Kt to K B 3rd	Q to K R 4th
8. Kt takes Q P	B to K Kt 5th
9. Kt to K B 4th	B takes Kt
10. Kt takes Q	B takes Q
11. P takes Kt	B to K B 6th

(The play on both sides is very lively and ingenious.)

12. R to K R 2nd	Kt to Q B 3rd
13. B to K B 4th	Castles
14. P to Q B 3rd	P to K R 3rd
15. P to Q 4th	P to K Kt 4th
16. B to K 3rd	B to K 2nd
17. B to Q B 4th	B takes Kt
18. R takes B	P to K B 4th
19. B to K 6th (ch)	K to Q Kt sq
20. B takes K B P	Q R to K B sq
21. P to K Kt 4th	B to Q sq

(Black's position is much inferior to their adversary's, owing to the confinement of their pieces; but they make a gallant struggle to remedy the inequality, and succeed much better than could have been expected.)

22. K to K 2nd	Kt to K 2nd
23. B to K 4th	R to K sq

(The object of this move will be evident presently.)

24. Q R to K R sq	Kt to K Kt sq
25. B takes K Kt P	B takes B
26. R takes B	Kt to K B 3rd

(A capital stroke of play, for which the allies had prepared by moving their Rook to K sq.)

27. P takes Kt	P takes R
28. R takes R	R takes R
29. P to K B 7th	K to Q B sq
30. K to K 3rd	P to Q B 3rd
31. B to K Kt 6th	

(We believe M. Dubois might have won the game at this point by playing his Bishop to K R 7th. For example:—

31. B to K R 7th	K to Q 2nd
32. K to K 4th	K to K 2nd
33. B to K Kt 8th	R to K R 7th
34. K to B 5th,	

and Black cannot save the K Kt Pawn, on which their game depends.)

31.	K to Q 2nd
32. K to K 4th	K to K 3rd
33. P to Q B 4th	K to K B 3rd
34. B to K R 5th	R to Q sq
35. P to Q 5th	P takes P (ch)
36. P takes P	R to K B sq
37. K to Q 4th	R to Q B sq
38. P to Q R 4th	P to Q R 4th
39. P to Q Kt 3rd	P to Q Kt 3rd
40. K to K 4th	R to Q sq

And the game was abandoned as a drawn battle.

SCIENTIFIC NEWS.

PHOTOGRAPHIC IMAGES OF THE MOON, about 39 in. in diameter, have been taken by M. Warren de la Rue, who has recently himself laid two specimens before the Academy of Sciences at Paris. One of these had been retouched to remedy the defects inherent to the collodion and to the size of the picture. The other remains in its integrity. The difference between the two is said to be nearly imperceptible, and testifies to the success of the truly gigantic and onerous operations carried on under the direction of M. de la Rue for three long months. He also exhibited to the meeting the small negative, rather more than half an inch in diameter, from which, by magnifying it 36½ times, he has obtained the above-mentioned great portraits of our satellite in her third quarter. It is said that these portraits have been limited to twelve in number, and that they are destined for distribution among the chief scientific bodies and governmental establishments.

VELOCITY OF SOUND.—Professor Tyndall has inserted in the *Philosophical Magazine* a note on "La Place's Correction of the Calculation of the Theoretic Velocity of Sound," made by Newton, who found it differed from the observed velocity by about one sixth. Professor Tyndall admits that La Place's result is verified by Joule's experiments on the amount of heat consumed in external work, when the air is allowed to expand, or under constant pressure. La Place supposed that the heat and cold produced their full effect in changing their elasticity of the air: and that there was no loss of heat either by radiation or conduction. Professor Tyndall's object is to direct the attention of philosophers to the application of our present knowledge of the different radiating process of gases to this subject; and especially to the fact that the elementary gases have no sensible radiative power, while the compound gases are endowed with this power in very different degrees. He thinks that, possibly, the correctness of La Place's result may depend upon a peculiarity of air, unproved in his day, but which distinguishes it from most other elastic fluids.

"THE MASS OF THE EARTH," says Archdeacon Pratt, in the *Philosophical Magazine*, "is arranged in nearly spherical strata around its centre." He then proceeds to show by calculation (for which we must refer our mathematical readers to his paper) that, if the outer surface be a spheroid of equilibrium, then all the strata are so also, however they acquired that form. He concludes by saying, in respect to his calculations, that "no more convincing argument, short of an absolute knowledge of the fact, can be produced to show that the earth's mass has derived its arrangement and form from having been in a fluid condition, especially as no other conceivable cause than rotation, acting on a fluid mass, could have made the interior of the mass in every stratum bulge out towards the equator, and in every part by the precise quantity required by the fluid theory."

PROLONGED VEGETATION.—The Comte Marschall, of Vienna, states that the Baron de Tinto recently cut down in his park at Schallaburg, Austria, a tree (Paulownia imperialis) which was attacked with decay in the lower part of the trunk, while the top was in full flower. During several weeks after its separation the upper part, which had been placed in a well-lit and ventilated barn, continued to cover itself with flowers as abundant and as fresh as if it still formed part of the trunk from which it had been detached.

JACOBINI'S NEW ELECTRIC PILE has been employed by the Father Secchi for three months. He states that it is as efficient as when first constructed. It is composed of a glass vase, two metals, pulverised sulphate of copper, sand, and common water. The two metals are copper and zinc, the last in the same form as in Daniell's battery; the copper is in the cylindrical form, resembling a small porous vase, but open at the bottom. The lower part of the copper is pierced with holes to the height of five centimetres, and its lower edge is cut like a saw. The total height of the cylinder is thirteen centimetres, and the diameter four centimetres. The copper wire which forms the electrode is soldered to the upper part of the cylinder. To form the pile, a layer of sand a centimetre and a half in thickness is laid on the bottom of the vase; on this is put a disc of blotting-paper, with a hole in the centre of the size of the copper cylinder; the cylinder of copper is placed on the sand, and the cylinder of zinc on the blotting-paper. The sand is so placed that it shall touch the zinc cylinder within and without. The cylinder of copper is then filled with the powdered sulphate, pressing it down from time to time while pouring it in. This done, equal parts of water are poured into the sand and sulphate, in order that they may be equally penetrated. Several hours elapse before the pile becomes fully active. Its intensity goes on increasing till it attains its maximum on the fifth or sixth day, when it slowly descends till it reaches its constant power.

COMPOUND EYES OF INSECTS.—When we closely examine an insect (for example, a fly) we perceive at each side of the head a small spherical projection, easily distinguishable by its colour. These are the two lateral rounded projections which constitute the eyes. The following is the cause why they are termed compounds. When seen through a good lens, or by means of a microscope magnifying about fifty times, each of these eyes is found to be formed of a multitude of facets, all which possess the property of a single eye, that of giving an image of objects; the being, in fact, a system of plano-convex lenses on which light falls. In "Poggendorff's Annalen," M. Grüel, of Berlin, has shown that in the eye of the Æschna grandis (dragon-fly) the hand and the movements of the fingers are reflected as many times as there are facets, when due precautions are taken to obtain distinct images of the objects. It is stated in "Cosmos" that Leuwenhoeck was aware of the compound character of the eyes of insects; and extracts are given from Puget, who states that after having tried the effect of the reflection of light on the eyes of insects, he determined on making an experiment with regard to refraction. For this purpose he separated the cornea from the head of a fly, cleaning out the concavity with a fine painting brush, so that it should be free from blood and other substances adhering to the multo-facettes of the cornea. Thus prepared, he placed it opposite the light, examined it with his microscope, and perceived that the concave interior, enchased between two glasses, resembled a piece of glass composed of circles, squares, and often of hexagons similar to the figure of bees' cells. He compares each of these figures to a lens, so that, looking at a burning candle, he saw the flame multiplied into as many little flames as there were facets. The neighbouring houses and the passengers in the street were multiplied in a similar manner. Puget's work ("Observations sur la Structure des Yeux des Insectes") was published anonymously in 1706, and is stated to be very rare.

THE DESTRUCTIVE ENERGY IN STEAM-BOILER EXPLOSIONS, in regard to its numerical expression and its comparison with that of gunpowder, is the subject of the leading paper, by Mr. G. B. Airy, the Astronomer Royal, in the *Philosophical Magazine* for November. He premises that very little of the destructive effect of an explosion is due to the steam contained in the steam-chamber at the moment of explosion. The rupture of the boiler is effected by the expansive power common to the steam and the water, both at a temperature higher than the boiling point. "As soon as steam escapes, diminishing the compressive force upon the water, a new issue of steam takes place from the water, reducing its temperature; when this escapes and further diminishes the compressive force, another issue of steam of lower elastic force from the water takes place, again reducing its temperature, and so on, till at length the temperature of the water is reduced to the atmospheric boiling-point; and the pressure of the steam (or rather the excess of steam pressure over atmospheric pressure) is reduced to 0. It is the enormous quantity of steam, of gradually diminishing power, which Mr. Airy believes causes the disastrous effects of the explosion, the smaller volume of gas in the steam-chamber in ordinary boilers being wholly insignificant. In order to compare this energy with that of gunpowder, Mr. Airy obtained from Mr. G. A. Biddell, of the firm of Messrs. Ransomes and Sims, of Ipswich, as an experimental result on the quantity of water issuing from a high-pressure boiler in the form of steam when the valve is gradually opened, the sum of 2⅜ cubic feet, or one eighth of the whole. We cannot, of course, give the calculations on this point which were made for Mr. Airy by Professor W. H. Miller, of Cambridge, but subjoin the very interesting results. The destructive energy of one cubic foot of water at the temperature which produces the pressure of 60 lb. to the square inch, surrounded by hot iron, is precisely equal to that of two pounds of gunpowder as fired in a cannon. Mr. Airy, however, considers that the energy of the hot water when the effect of the hot iron is abstracted is considerably less than the number used in this comparison, and would, therefore, state that the destructive energy of the water is equal to that of *one* pound of gunpowder.

PAINTINGS ON GLASS.—M. Chevreul has laid before the Paris Academy of Sciences a memoir on the ecclesiastical painting on glass, considered in four categories:—1. The different kinds of glass employed; 2, the nature of the solid layer which the atmosphere deposits on their external surface; the means of removing this layer without causing injury; and, 4, the causes of the fine effects of the ancient paintings on glass. M. Chevreul gave a viva voce analysis of this paper. He began by stating that, twenty years ago, a very honourable person, charged with the restoration of the painted glass of some of the ancient cathedrals, consulted him on the means of restoring transparency to glass which had become absolutely opaque through long exposure to the atmosphere. He was successful; but did not publish the process, because an archæological committee, to which specimens of the restored glass were shown, rather hastily concluded that it might lead to fraudulent imitations. Eventually, however, the process was communicated to M. Prosper Lafaye, who at once put it in practice on the glass of St. Gervais. The glasses used by the ancients were of three kinds—1, Glass coloured by extension on the exterior or interior surface by a thin layer of a coloured glass; 2, glasses coloured purple, green, &c., in their mass, in the act of fabrication; and 3, glasses simply painted on their surface with vitrifiable colours. The layer on the glass which renders it opaque contains sulphate of lime in large quantities, some sub-carbonate of lead, various calcareous salts, chloride of sodium crystalised in three forms; divers organic matters to which no name can be given; a nitro-sulphuret, and a fatty substance insoluble in alcohol; an inflammable carbonaceous matter resembling lampblack, containing hydrogen; ferruginous and siliceous matters, &c. M. Chevreul's process consists in—1, washing the glass in plenty of water; 2, plunging it for ten or twelve days in a bath of sub-carbonate of soda; 3, well washing it again in water; 4, plunging it into a solution of hydrochloric acid, to dissolve the carbonate of lime; and, 5, leaving it for some time in plenty of water. M. Chevreul attributes the superiority of the coloured glass of the ancients to the extreme care taken to attain as distinct vision as possible by various methods; and the modern cases of failure to neglecting the means of attaining this object. Further details will be found in the *Comptes Rendus*, vol. 51, No. 17.

NEW BOOKS.

THE NEW NOVELS.—Now ready, at all the Libraries,

CAUTION.—THE CELEBRATED LORD BURY TELESCOPE can only be had of J. H. STEWARD, Sole Maker, and his Agents. Will read the name of a light-ship at eight miles. Price £3 10s. complete. Address, 406, Strand London. Catalogues, with testimonials, post-free.

STEWARD'S BINOCULAR, FIELD, and LANDSCAPE GLASSES are unequalled for their power and brilliant definition. Price 3½ and 6 guineas; in Aluminium, one third the weight, 10 and 14 guineas. Highly recommended for India or any climate. Address 406, Strand, London. Catalogues post-free.

THE GLORIES of the HEAVENS seen distinctly by a New Telescope for £5, which will also distinguish the features of a man four miles, and time by a church clock ten miles. This instrument is guaranteed to be equal in the most important respects to telescopes costing £70.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Persons are invited to apply for a diagram with full particulars, and testimonials sent free.

OPERA, Race, Field, and General Outdoor Day and Night GLASSES, with an improvement which renders them much more portable and powerful, they being suited to the waistcoat pocket. It has always been a great drawback to the general use of field-glasses on account of their weight and large size; but as Messrs. S. have overcome this difficulty a more rapid sale is expected, which induces them to reduce the prices, which range from 20s.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

SPECTACLES.—The Patent Newly-invented TINTED SPECTACLES are patronised by the majority of the nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision.
S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

M. RÉNÉ FAVARGER'S PIANO CLASSES, 29, Somerset-street, Portman-square, W.; and at the Notting-hill College, 15, Stanley-place, Kensington Park-gardens, W.

TO INVALIDS.—A MEDICAL MAN, of twenty-two years' experience in a large practice, which he has partially relinquished, will be glad to receive ONE or TWO INVALID LADIES or GENTLEMEN requiring medical supervision. He resides in a large and commodious residence surrounded by eight acres of pleasure-grounds, situated in a romantic and healthy part of Hampshire, within two miles and a half of the sea and railway station. Terms, inclusive of medical and every other necessary attendance, together with carriage exercise when required, £250 to £300 per annum, payable in advance, quarterly or half-yearly. References given and required. Address X. Y. Z., Post Office, Botley, Hampshire.

THE GREAT FIRE at the PORTLAND BAZAAR.—NOTICE.—The above Bazaar having been rebuilt, the Grand German Fair will be re-opened on Nov. 30, with an entirely New Stock of Toys and Fancy Articles. Millions of Fancy Toys always on sale.

OSWEGO

PREPARED CORN,
for
Puddings, Custards, Blancmanges, &c.
Manufactured and Perfected by
T. KINGSFORD and SON,
of Oswego, State of New York.
It is the original preparation from the farina of maize, established 1848, commands the highest price from the trade, and offers the best value to the consumer.
It is a quarter stronger than any of the imitations, has a finer grain, and is more delicate.
The Oswego has the natural golden tinge, and not the chalk white produced by artificial process.
KEEN, ROBINSON, BELLVILLE, and CO.,
Garlick-hill, London.

KEEN'S GENUINE MUSTARD.
There are many qualities of Mustard sold.
Obtain Keen's Genuine Mustard and full approval is guaranteed.

THE ILLUSTRATED LONDON NEWS.

No. 1231.—VOL. XLIII. SATURDAY, NOVEMBER 14, 1863. WITH A SUPPLEMENT, FIVEPENCE

RECONSTRUCTION OF EUROPE.

THE expectation of all Europe, which hung upon the speech which the Emperor of the French was to deliver to his Chambers this year, has not been disappointed. Something unusual was calculated upon; and, while it was on all hands admitted that no less an issue than that of peace or war was involved in the almost oracular deliverance of the practical dictator of the high policy of the old world, no one ventured on a special guess as to what was forthcoming. It was known that the speech of the Emperor was this time, more than ever, his own composition—a clothing in his own words of his own ideas; and, within twenty-four hours of its utterance, his Ministers were equally ignorant with outer mankind of its nature and contents. Whatever it is, it is original, and born of Louis Napoleon's own conceptions, and is the result of his own consideration of the political situation of the time. In the preparation of his annual speeches the Emperor is rivalled by no Sovereign, the custom of whose realms requires the delivery of these great State papers; and it may well be said, as it is universally said, that he never before produced a speech which can be compared with this. With a frankness of tone which equals, if it does not exceed, that which is supposed to characterise the Royal document which the Ministers of our constitutional country theoretically and practically put into the hands of the Monarch on the opening of Parliament, it is full of the plainest and most colloquial references to the circumstances of the moment, and especially dwells on the internal affairs of France from a point of view which, if slightly argumentative, is in the main consistent with facts. After a semi-satirical allusion to the infusion of the Opposition element into the Chambers, a brief but pregnant sketch is given of the results of his system of government during the past year in the progress of national improvement. Notable in the highest degree is the skill with which the vexed question—vexed even in France—of the Mexican war is touched upon. Its policy is vindicated upon principles which no Frenchman can well gainsay; and the ticklish point of finance in connection with this subject is, to use a legal phrase, at once confessed and avoided. It will, no doubt, sound agreeably to French ears that the influence of France has been largely extended on the American and Asiatic continents, and that there is nothing particular to pay in hard cash for the possession of such advantages. In effect, also, the speech contains items of proposed administrative reform in France, which are founded on principles which, in England, are recognised as inalienably associated with Constitutional Government, while the reference to new regulations relating to baking establishments and theatres inevitably suggests a politic ministering to certain tendencies of the French people akin to those of the ancient race, whose most hearty cry to their Emperors was "Panem et circenses!" All this clever manipulation of home affairs the nations may admire and pass by, in order to come to that which to them is the staple of the speech, and for which they have been anxiously waiting. In the midst of the complexity of the affairs of the present time the Emperor comes forward with a plan. He proposes to reconstruct Europe. This idea is eminently Napoleonic. It must be remembered that in this proposition is implied a dealing with, in the sense of abrogating, the Treaty of Vienna. The occasion of that treaty was the re-settlement of Europe after the fall of the first Napoleon. At that time what in common parlance is called the Continent was practically under the dominion of the French Empire. That

INUNDATION OF THE NILE: REMAINS OF A VILLAGE NEAR TAUTAH, DESTROYED BY THE OVERFLOW.—SEE NEXT PAGE.

system having crumbled, or rather having been battered, down, and the monarchy of the Bourbons restored, it was thought by the allied conquerors that a mere return to the *status quo* was not an adequate compensation for the sufferings and the efforts of the nations which had combined against the great military architect of crowns and dynasties, and the representatives of the chief militant powers set about to share the spoil of the vanquished, in a territorial sense. Bearing in mind the exact spirit and the nature of the proceedings of that congress, it is not difficult to understand the feeling by which the Napoleon of to-day is actuated when he denounces the notion that upon another Congress, the object of which is, so to speak, to stamp out the Treaty of Vienna.

But whatever latent motive may lurk at the bottom of the proposition of the Emperor, it does not lose in the slightest are bound by edge of it by the doctrines and principles which it discloses. Those doctrines and principles might have been enunciated by Mr. Bright or by Mr. Cobden, if they had been taken into the Imperial councils, and been permitted to prepare this notable speech. There can be no question that such a manifesto marks a new epoch in the history of the attempts at the pacification of the world. It must be remembered that its author, who professes, and with some reason, to speak on behalf of France, is the leader of the most warlike and the most military nation which is ambitious mainly, if not altogether, of military glory. It is strange—but, as we think, accepted strange—that from Paris should come sentiments, which, if they mean anything, mean the inauguration of an era of peace and goodwill amongst the nations. It is from that one certain quarter that we hear that Europe is everywhere disturbed by the elements of dissolution; that it is the jealousies of the great Powers which hinder the march of civilisation; that the moment has arrived when efforts should be made to reconstruct on a new basis the edifice which has been destroyed, piece by piece, by revolutions; and, above all—mark the significance and the importance of the phrase—it is asked whether the nations of Europe are eternally to maintain a state of things which is neither peace with the security nor war with its happy chances! In this last demand the whole question of European polity is involved. In effect, the proposal is to sub-nit to a grand arbitration all matters in difference, with the object of obtaining a great peaceable rearrangement of European affairs, founded on the wishes of the people, and followed by a general disarmament. The alternative is put with equal clearness and perspicuity; for it is declared that at this juncture, and in the present constitution of the minds of Princes and peoples, there are but two paths open—the one which conducts to progress by civilisation and by peace; the other which, sooner or later, leads fatally to war by the obstinate maintenance of a past which is crumbling away. Plainly, says the dictator of an almost irresistible military country—shall it be peace, which I desire, or war, beginning once more the round of the past?

There is something so striking and so unlike what might have been expected in such a proposal, coming from such a source, that it is painful to have to come to the conclusion that it is but a grand vision. Of the impracticability of such a scheme, short there can be little doubt. It is true, to speak that the facts of the times are in favour of the plan. No one can deny that there are questions now agitating Europe that demand immediate solution. There is no doubt that the arrangement of 1815 has become practically a nullity. A new fundamental pact has become a necessity. Such a rearrangement must come at the conclusion of a European war of exhaustion: and it is a fine idea to suggest its being accomplished without an intervening sacrifice of blood and treasure. The questions which may be called, in diplomatic nomenclature, "open" are the matters of Schleswig, Rome, Venetia, Poland, the Rhine, and European Turkey. By what we deem a stretch of imagination, let it be conceived that the Congress is in Session, with whom will the race of disinterestedness begin? Will France evacuate Rome without compensation? Will the Rhine cease to be given to Austria for ceding Venice? Is the Turkish empire to be dismembered to repay Russia for yielding her Polish provinces? Will the Germanic Confederation give up its pretensions on Schleswig to Denmark? What is to induce Prussia to retire from the possession of her slice of Poland? And, lastly, will England surrender her impregnable Gibraltar? All these mutations, and all this devotion of cherished objects to an idea of universal peace and concord, are indispensable. Some of them, such as the Schleswig question, might easily be settled by a Congress; but, unless the representatives of all the Powers enter on consultation with a predetermination not to insist on the principle of compensation, of give and take, as a preliminary to discussion, the whole business would end in a melancholy futility. But the real question is, will such a Congress ever take place? Will the Powers whom the Emperor has bidden to a meeting—in a letter even more characteristic, if that were possible, than his speech to his Chambers—accept the invitation? That remains to be seen. No less than fifteen Sovereigns have been addressed on this subject, and, unless they all accept, the plan fails *in limine*. England, as we believe, very naturally demands to know distinctly, before her assent is given, what is to be the subject matter of consideration in the Congress, and on what principles the deliberations are to be based. It is as far as we can see, inconsistent with the Emperor's ideas that any nation should come to the Congress with conditions or qualifications. He requires a *tabula rasa*. Such a piece of furniture—and a curious piece of mosaic it would be—cannot be obtained. We believe that there will be no Congress.

The other alternative indicated by the Ruler of France remains. He can realise the prophecy he has uttered. The consideration of his proposal may, and probably will, take time. Absolute decision may be postponed until such a season of the year as is fitted for military movements; and it is now clear that if the era of universal peace is not proclaimed before the spring, war will rage in Europe, and that under circumstances and with combinations that have not been as yet dreamed of. Two points seem to be dwelt on decisively in the Emperor's speech—one is the ultimate re-establishment of Poland, and the other a desire to retain the alliance of Russia. What if the principle of compensation should be agreed to by Russia, might not the scheme of Nicholas be realised, and Turkey in Europe be offered by France in exchange for Poland? The war then would be waged by France and Russia as allies, and against whom? Of course against those nations whose policy it is to uphold the integrity of the Ottoman Empire, and that is to uphold the integrity of the Turkish dominions in Europe. That is the point that England has to look; and it is to be hoped that she will look to it.

But, whatever may betide, whatever may be the result of the extraordinary manifesto which has suprised and agitated Europe, one thing is certain, and that is that the Emperor of the French stands pledged to the great principles of peace. He will have a right to say, if war is once more to desolate the fair face of Europe, he is not responsible for it; and we repeat that which we have already said, that it is in speech in the international history of the world when, from the midst of the French people and from the head of the French army, there comes a declaration that war is an evil to be avoided, and that all the results which are presumed to follow from war can be attained by the more peaceful and beneficial peaceful conference amongst the representatives of nations.

THE INUNDATION OF THE NILE.

By the latest accounts from Egypt we learn that the Nile—the overflow of which is recorded in Holy Scripture as a most calamitous damage—goes down very slowly indeed. A telegram from Alexandria, however, informs us that the railway communication with Cairo is restored. The Alexandria correspondent of the *Times*, writing on the 20th ult., states that he had just returned from a trip on the Nile, and thus describes the scene:—

It is a sight never to be forgotten, and which probably will not occur. For some distance this side of the river, at Kafr Zez, the fields are flooded, probably on the northern side of the railway, where the waters stretch in a wide sheet over the fields and cultivated banks. Large boats are to be seen transporting produce from village to village, steering their way among the palm trees, and the Arab, in his light canoe, paddles about with ease and Indian corn. The train bridge looks like a low wall floating on the surface of the water, which, however, is not deep, and the line is perfectly clear. On the other bank, at Kafr Feyat, the waters reach as far as the eye can see. Ascending the river by steamer, I counted from the mast-head of the vessel as far as miles away from land, and the villages are dotted about like islands. Some are high enough to be above the inundation, but others have only the tops of the dirty ground, where the people huddle together. On both sides of the Nile the dykes appear like low banks, and, where it is encroaching on the land, several neighbouring villages together, but frequent breaks occur. In many places encampments of refugees are to be seen, and in the river are a number of ships or fragments of dykes, where they have sought refuge with their cattle, which have been driven away from the banks. Of course, as the river passes the cotton-plants are not entirely covered; but their upper leaves are under and shaky, the lower ones quite rotten. If the water does not fall off quickly, some of these fields may recover; but, necessarily, their yield will be light and poor. Between Cairo and Alexandria there are about 1,000 miles of the dyke of Nadir. I found steamers, lighters, and two regiments of soldiers hard at work trying to repair the breaches in other words, to close religious quotations, brought by boat from Cairo, have already been thrown in, the breach does not diminish. The Arabs are encouraged to work by a liberal tariff, two, three, and even more rubbers every day, instead of three times a week, as is customary. The Arab is a wonderful man in the way he will work, and just where water: a few days ago they were entirely covered. Thence to Cairo, and also at Alexandria, I saw how the Egyptians are trying to keep out the Libyan hills, and boats from their only mode of communication between the villages. They are at work night and day in relays, by day and by night, night, rushing down with a current of six or seven miles an hour; but the damage done is considerable. The latest accounts I received of crocodiles besides the Indian corn; but the danger is not yet over, as the waters are still so high that they have not left the land in any number. The navigation is carried by watchers day and night along both banks; at night fires are lighted and guns are fired to keep off the beasts.

The same gentleman, writing on the 27th ult., states that they "have not yet crossed the Delta, which is the gap of the dykes at Nadir, which is the one which overwhelmed the railway. The tops of the cotton-plants, which just show above water, are like bare sticks, without leaves or bark, so that all the cotton is destroyed—never Tantah, but in corn and sesame plants have also perished. Numbers of men are busily employed at the dykes, and it is said they succeed in one place in renewing the embankment and relaying the rails, but the main gape remains the same. Numbers of boats have been shut off at Tantah, and the flows in a strong stream, over a space of about thirty miles long by fifteen wide, on the southern side of the railway, and then pours through the gap. It has formed a deep channel, and discharges another large tract of land to the north.

We have received from Mr. Frederick George, of Cairo, three sketches of the inundation, one of which, showing the remains of a large village—called by the inhabitants—near Tantah, is given on the present Number: the two others will appear next week. On illustration on the preceding page) will serve to give some notion of the utter desolation which has been shut off at Tantah. Over all its splendour, tinging with its expiring rays the surrounding objects and the spectator's face, Mr. George, would be extraordinary, until were it not for the too palpable evidence lying around of ruined habitations, and here and there a dead body twisting and turning in the eddies and fast disappearing in the gloom of night which is creeping over the scene.

Her Majesty the Queen received on Monday morning an autograph letter from the Emperor of the French, in which his Imperial Majesty requests her Majesty's consent to send representatives to the Conference of European States, whose duty it shall be to take note of and recognise the points on which the Powers may be found to agree, and to consider the best means with respect to present complications as may best secure the general peace. Cabinet Councils were held on Saturday and Wednesday, at which the last mentioned letter was directed to a consideration of the Emperor's proposal.

The Dublin Gazette of last evening contains a list, with 233 grants, as a reinforcement to Japan, and a further addition is expected.

At Cologne, a young lady of good family was sentenced, the other day, to six months' imprisonment for stealing a cake. She is one of the Rosalgia Gardens there, of some of his guest rooms.

The Emperor of Austria has recently ordered the vigorous prosecution of researches in the Nydamm Moraas, in Sundewitt. Objects of antiquity of extraordinary value have been found in the Moraas, and it is hoped to be found in the second and third centuries. On the 21st ult., in the presence of the Emperor, a boat was found of large dimensions, and on the 23rd of nearly thirty feet in length was brought to light. Various weapons were found at the same time, some of them, like the boat, in a remarkable state, among which were an iron arrow-head and three swords, with rare bronze ornaments of the hilt and sheaths.

The French Ironclads.—A letter from Fanchial, in the Island of Madeira, of the 2nd inst., gives some details of the French iron-clads which arrived at that port on the 29th ult. The squadron left Brest on the 27th of October, with fine weather, which continued during the voyage. The steam squadron consisted of the following ships:—The Invincible, of 90 guns. Sixty five miles an hour was the rate of speed on this occasion, and their marks are very low, accomplished six knots, taking the best of all the others. After the sailing qualities of the ships were ascertained, an experiment was made to ascertain the consumption of coal. It appeared that each iron-cased ship can carry sufficient coal to perform 1,400 nautical leagues. Vice-Admiral Penaud hoisted his flag on board the Invincible.—The squadron has left Funchial for the Canary Islands, to continue their comparative trials. On the morning of their departure, the Talisman, steam-corvette, arrived from Cadiz with despatches for Vice-Admiral Penaud, who proceeds over the commission appointed to watch the proceedings of the vessels.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Emperor and Empress, with the Prince Imperial and the usual retinue of the Court, left Paris on Sunday afternoon for Compiègne, where receptions will take place, with hunting-parties on a great scale, until the return to the Tuileries for the winter season.

On Sunday morning the recently-nominated Bishops of Cahors, Perpignan, and Puy took the oath of fidelity and allegiance to the Emperor in the chapel of St. Cloud, in the presence of the Bishop of Arras, chaplain of his Majesty, and the Ministers of State, Justice, and Public Worship.

The Corps Législatif commenced its sittings yesterday week with a highly complimentary address from the President, M. de Morny. He commented on the Emperor's speech, and in doing so made some very handsome allusions to England. Nobody, he said, appreciated this admirable and liberal speech more than himself, because he had been brought up to admire English society, where individual and absolute liberty inspire the people with a feeling of dignity and independence, where liberty of association develops personal initiative, where the most extended liberty is counterbalanced by religious respect for the law and by public sound judgment. England, however, had taken years to realise these benefits. Revolutions in France had never been turned to the advantage of durable liberty. Freedom could only be established peacefully by a good understanding between a liberal Sovereign and an Assembly of moderate views. He would endeavour to maintain this good understanding. M. de Morny, in conclusion, said, that he had been seen with sorrow that popular suffrages had elected former Parliamentary celebrities. Their adhesion was a homage rendered to the government form of government. He esteemed them too much to doubt the loyalty of their intentions.

At the sitting of the Legislative Body on Friday M. Thiers took his seat on the extreme left and M. Berryer on the right centre. The other members of the Opposition seated themselves around the place which M. Thiers has made the centre of the constitutional opposition.

The number of electoral protests amounts to 172. It is believed that at least seven or eight elections will be annulled.

The Government has been sounding among the Senators and Deputies an account of the situation of the empire. This document is chiefly interesting to Europe now because of its résumé of the Polish question and of subsequent reflexions on that subject, which are evidently not from pacific intentions; at least, which appear to decline any responsibility on the part of France to go to war there.

Captain Aubaret, of the French navy, has been appointed Consul and Charge d'Affaires at Bangkok at Siam, in place of M. Castle, who has been called to fill another post.

THE EMPEROR'S LETTER TO THE SOVEREIGNS OF EUROPE.

Wilhelmsby's *Monitor* publishes the letter of the Emperor of the French to the Sovereigns of Europe proposing a congress, of which we subjoin a translation. The *Moniteur* prefaces the document with the remark that it has been addressed to the Sovereigns without any public publication in that journal, but, as the copy addressed to the German Confederation is published in a Frankfort journal, the motive for any further postponement of it no longer existed:—

Most high and very illustrious Princes, Sovereigns, and Free Cities composing the Most Serene German Confederation.

In presence of the events which arise and press each day, I deem it indispensable to make known to you my views as Sovereign to whom is confided the destiny of peoples.

Wherever profound shocks have unsettled the bases and displaced the boundaries of States, solemn transactions have taken place in order to co-ordinate the new elements, and, by creating a system of settling them, to consolidate effected. Such has been the object of the Treaty of Westphalia in the seventeenth century, and of the Congress and Treaty of Vienna in 1814 and 1815; this latter traits that the political edifice of Europe now rests; and yet—you are not unaware of it—it is undermined on all sides.

If we consider attentively the situation of different countries, it is impossible not to recognise that the stipulations of the Treaties of Vienna are daily evoked, modified, disavowed, or menaced. Hence duties without regulation, rights without title, and international conventions without sanction. Order is not denied, inasmuch as the improvements produced by civilisation, which has united peoples one with another by the reciprocity of mutual interests, would make war still more destructive.

There is matter for serious meditation. Let us not wait in order to come to a resolution till sudden and irresistible events disturb our judgment and draw us, in spite of ourselves, into unforeseen paths.

I intend, therefore, to propose to you to regulate the present and secure the future in a congress.

Called to the throne by the choice and the will of the French people, but trained in the school of adversity, it is perhaps less allowable for me than another to ignore the dangers of the present and the legitimate wishes of peoples. Thus I am ready, without a preconceived system, to carry into an international conference, with frankness, moderation, and candour, the portion of those who have ordered so many various trials.

If I take the initiative in this step, I do not yield to an impulse of vanity; but as I am a Sovereign to whom the most ambitious projects are attributed, I have it in my power to prove by this fresh act that my only aim is peace, and that I am ready to accept, without a shock, the pacification of Europe.

In case the Princes, whose Ministers the City of France should invite to embrace by their presence the authority of the deliberations, I should be proud to offer them my hospitality at Paris.

Europe would perhaps see some advantage in the capital whence the signal for subversion has so often been given becoming the seat of a congress destined to lay the bases of a general pacification.

I take this occasion to renew to you the assurances of the sincere attachment and lively interest which I take in the prosperity of the States of the Confederation.

Wherefore, most high and very illustrious Princes, Sovereigns, and free cities composing the most serene Confederation of Germany, I pray God to have you in his holy and worthy protection.

Written at Paris, the 24th year of grace, 1863. NAPOLEON.

(Countersigned) BROUYN DE LHUYS.

Napoleon's invitation to a European Congress has been responded to fifteen Sovereigns. It was rumoured that Prussia has expressed her adhesion, and that Austria is favourable to the Congress. At the same time a Vienna correspondent of the Prince Metternich has been authorised to declare to the French Cabinet that Austria is ready to co-operate in a congress. Russia has yet to be addressed, but for the strengthening of public European right, with special regard to accomplished facts, the *Presse* avers that all the Governments have replied to prove that the Powers are becoming more and more favourably disposed to the idea, and that it is probable the greater number of them will be represented at the Congress of Paris. Most of the replies praise the "lofty ideas" and "generous aspirations" expressed in the Imperial letter. The only reservation produced by the proposal is favourable. Most of the French papers accept it as a pledge of peace. The Liberal press of Italy likewise applauds the speech and approves the proposal. In particular the Italian papers are delighted with the passages in the Imperial address which proclaim the nullification of the Treaties of Vienna. In Austria, however, the impression appears to be by no means so favourable. So much of Austria's present position depends upon the Treaties of 1815 that a proclamation against them is accepted as a menace to her.

THE FRENCH IN MEXICO.

Official despatches received in London on Wednesday from Mexico announce that General Bazaine was preparing with a column of the expeditionary force, to march on the 30th of October to attack Juarez's army, which was concentrated at the bridge of the Rio Laja River.

Advices from the city of Mexico received at New York by way of San Francisco, and, consequently, not deserving of much confidence, report that the French are deserting in considerable numbers from them, had imprisoned a number of persons supposed to be implicated in it, and had ordered others to be transported to Martinique.

France has notified the American Government of the intent that an effective blockade is established at all ports along the Mexican coast now occupied by the French, which still acknowledge the authority of Juarez.

ITALY.

The journey of King Victor Emmanuel into his southern provinces is marked by the most enthusiastic demonstrations of welcome. On Tuesday the King held a review of the garrisons and 8000 of the National Guard of the province at Foggia. Great enthusiasm was manifested by the inhabitants. His Majesty reached Avellino in the evening, and met with a magnificent reception. The King arrived at Naples at midday on Wednesday, and was received by the Royal Princes, the Syndic, and the other authorities. He drove through the principal streets, which were densely crowded,

and was enthusiastically cheered by the people. The working-men's societies followed the cortège. The streets were decorated with flags, and lined by the National Guard of the whole provinces of Naples and Caserta. The garrison were under arms. His Majesty reached the palace amid loud shouts of "Long live the King of Italy!"

The Prince de la Tour d'Auvergne has presented his letters of recall to the Pope, and was to leave Rome on Saturday.

PORTUGAL.

ThQDnon has frequently appeared in public since her confinement. Princess Clotilde has sent numerous valuable presents to her godson, the infant Prince of Portugal.

It is stated that the differences between Mr. Lindsay, M.P., and the Union Mercantile Company are about being amicably arranged.

The Austrian Prince Colloredo is travelling, under the title of Count Mansfield, in Lisbon.

The orange-trees have been considerably affected by disease.

BELGIUM

The Chambers were opened on Tuesday by the King in person. The Duke and Duchess of Brabant and the Count of Flanders were also present. His Majesty, after acknowledging the sincere sympathy and confidence he had received from foreign Governments, dwelt on the internal affairs of Belgium, and described the state of the country as flourishing and prosperous. Amongst other subjects he dwelt upon the success of the Belgian school at the London International Exhibition, the progress of the fine arts, of public education, and popular instruction.

AUSTRIA.

The invitation to the proposed European Congress had arrived in Vienna. Prince Metternich has been authorised to declare to the Emperor Napoleon that Austria is ready to co-operate in a congress, upon a basis yet to be determined, for the strengthening of public European rights, with special regard to accomplishing which the Vienna journals advocate a close alliance with England and Prussia.

At the sitting of the Lower House of the Reichsrath on Monday a credit of 60,000,000 florins was unanimously granted by the House without debate. The Vienna press considers this to be a demonstration against the Polish Emperor's speech.

The vote of 20,000,000 florins, for relieving distress in Hungary, proposed by the Finance Committee, has been agreed to by the Lower House.

GERMANY.

At an extraordinary sitting of the Federal Diet, held on Monday, a letter from the Emperor of the French was presented inviting the German Confederation to send a representative to a congress at Paris; and a committee of seven members, composed of the representatives of Austria, Prussia, the four German Kingdoms, and the Grand Duchy of Baden, was charged to draw up a report on the communication.

SAXONY.

The Diet was opened on Monday by the King. The Royal speech announced an augmentation in the rate of payment of public functionaries and a reduction of certain taxes. The King expects that the approaching conference at Berlin will result in a universal understanding of the German Sovereigns upon the questions at issue with France and the maintenance of the Zollverein. In conclusion, the speech expresses a hope that the aims of the German Reform Act will be attained through negotiations on the basis already gained. The King further promises that federal execution in Holstein shall be carried out.

PRUSSIA.

On Monday the Chambers were opened by the King in person. The Crown Prince was also present. His Majesty expressed his earnest desire for a settlement of the difficulties which have arisen in the Chamber, but at the same time announced that he would consent to no Bodget which did not admit that reorganisation of the army upon which he has set his mind. The King also announced several projects of laws, and stated that the revenue was in a satisfactory condition. So long as that is the case, and no extraordinary necessity requires fresh taxation, his Majesty will rule without a legal Budget. The King commences that he will retain by the military service would be modified.

In Tuesday's sitting of the Upper House the address to the King was agreed to by a small majority. The Minister of the Interior communicated to the house the Royal ordinance on the press of the 1st of July last, and a bill making it permanent will be laid before you. The Ministers said that this ordinance was issued by the King because there was at that time an immediate want of a remedy, but that the ordinance was only applicable to a temporary state of things, and was not suited to remain as a permanent law. "The intention of the Government was to allow it to remain in force until there should be permanent legislation on the press."

THE INSURRECTION IN POLAND.

Letters from Warsaw assert that, by orders of General Berg, all the women and girls imprisoned in the citadel have been transported, without trial or formal sentence, to some unknown destination. Sixty of the chief ladies and inhabitants of Warsaw are described as having shared the same fate.

General Lewchine's orders about female costume at Warsaw read like a page out of the *Journal des Modes*. Here is a specimen :—"The bonnet must be worn of mixed colours, or, if black, must be set off with bright red, ribbons, but not with yellow. White or black feathers in black hats are forbidden. Black cloaks may be worn if lined with any colour but black or white. Shawls may be worn of red or black and white, umbrellas, shawls, handkerchiefs, or bournous, are strictly prohibited.—By order,—SECHTY."

The following General Order has published a proclamation encouraging the Poles to perseverance and confirming the order for ladies to discontinue wearing mourning.

A sanguinary engagement has taken place at Ochanow. The insurgents were commanded by Baron Meck. Both sequestrated the combatants.

A telegram received from the Russian Consulate-General in London states that the insurgent chief Czachowski's band was completely destroyed on the 6th inst. in the government of Radom; and that Czachowski himself, and his brother, were killed in the engagement.

The importation of furs, shoes, boots, and leather straps into Poland has been prohibited.

The ex-Dictator of Poland, Langiewicz, has addressed an appeal to the Austrian Government, in which, after urgently renewing his request to be allowed to remove to Switzerland, and again most emphatically beseeching that, if this be not done, he may be handed over to the Russian authorities.

Earl Russell's final despatch to St. Petersburg on the Polish question has been published. It is very brief, and nothing could be more cold and formal. It acknowledges the receipt of Prince Gortschakoff's last despatch and the Emperor of Russia's communication of his honeyless instructions towards Poland, but drily adds that the Emperor has peculiar duties imposed on him in regard to that kingdom, and that the last document which accompanied the ukase of the 22nd of February makes him responsible likewise for the discharge of the duties.

GREECE.

King George immediately on arriving in his new capital issued a proclamation, which is both modest and sensible. He declares that he brings no special ability and no trained knowledge to the task of governing the country, but that he has a sincere love for the people, that he will surround himself with the best advisers entirely irrespective of parties, and that he will respect the National Constitution. Thus actuated, and thus acting, he hopes to make Greece the model State of the East.

AMERICA.

WAR INTELLIGENCE.

The interest of the war is divided between the doings in Tennessee and Virginia, and at Charleston; but centres chiefly, perhaps, in the movements in Tennessee, by which Federals and Confederates are respectively endeavouring, the former to relieve Thomas's army and the latter to destroy or force to a disastrous retreat. General Thomas reports that General Hooker was attacked on Sunday upon the 27th ult. Severe fighting ensued, lasting two hours, with less vehemence until four o'clock. At seven o'clock General Hooker reported that the troops repulsed the enemy's attack and drove the enemy from every position they assumed. The Confederates abandoned Lookout Mountain without resistance, and the Federals occupy the south bank of the river from Bridgepect to Chattanooga. The river and railroad communications are unobstructed, facilitating supplies reaching Thomas. General Lee is said to have sent large reinforcements to co-operate with General Bragg in isolating Burnside and driving him out of East Tennessee. Despatches of a very satisfactory character are stated to have reached Washington from General Burnside.

There have been no great operations in Virginia. The bulk of Lee's force is said to be on the south side of the Rappahannock, but he has strong pickets on the north side, with which he harasses Meade's force, and watches all its movements. There has been some skirmishing between his advance and the Federals. Meade had moved his head-quarters from Warrington.

General Gilmore's batteries had reopened fire on Forts Sumter, Moultrie, and Johnson, and have even thrown a few shells charged with "Greek fire" into the city of Charleston. The Confederates were undaunted, and were briskly replying to the Federal fire.

GENERAL NEWS.

The Federal debt on the 1st of September was estimated at 1,228,000,000 dols.

The Mexican Ambassador from Juarez had been received by President Lincoln.

A "final grand rally" of the Republicans had taken place at New York in view of the election of State officers, which was to come off on the 3rd inst.

The quota for New York State under the last call for troops, in addition to the 300,000 already under the recruit, is reported to be 108,000, which total must be forthcoming, or the draught takes place on the 5th of January. The City of New York generously are appropriating two million dollars for volunteers.

There are reported to be 1,500 Federal prisoners in Richmond.

The Legislature of Virginia assembled on the 7th ult. Governor Letcher has sent to that body a message full of firmness and faith.

The officers of the Federal army have published a police excursion to Niagara. Great popular demonstrations of welcome were exhibited during their route.

General Rosecrans has been enthusiastically received at Cincinnati, to which city he went on giving up command of the army of the Cumberland to General Thomas, approving his conduct at the battle of Chicamauga.

The *New York Times* quotes from the Richmond papers, to show the alarming condition of the Southern currency, that the Confederate finances are in a state of collapse, and that a forced loan is the only alternative.

The Richmond papers are very angry with the Federal Government for detaining the blockade-runners in the Mersey. They even profess to regard the act as one of direct hostility.

The Confederate Commissioner Yema, one of the fastest of the entire fleet, was recently run ashore off New Inlet, North Carolina, while attempting to run out of Wilmington. The vessel is ashore, Nansemond, and totally destroyed. Her cargo consisted of tar and turpentine.

INDIA.

We learn, by telegraph from Suez, that there has been a great storm on the north coast of India and in the Bay of Bengal.

On the Upper Indus guerilla warfare was proving rather troublesome, but the English force there was being increased.

From Afghanistan the latest affair wear a more peaceable aspect, a reconciliation having been effected between the Ameer and Azim Khan.

Lord Elgin had started on a tour through the north-west provinces. Reinforcements were to be forwarded to New Zealand.

Accounts from all parts of the peninsula as to the cotton crop are very encouraging.

JAPAN.

The Dutch Governor of Java has ordered four war-steamers carrying 72 guns to the Japanese seas, no more are to leave Surinam, while six others are being armed in the Dutch arsenals for the same destination. The strength of the entire armament will amount to 23 guns.

Advices have been received from the Swiss Embassy at Yokohama announcing that the Ambassadors have received a first official visit from one of the chief officers of the Tycoon. The Japanese Government believes that England is carrying on ambiguous policy, and exciting the Japanese to resist the other Powers.

NEW ZEALAND.

A Melbourne despatch, dated the 25th of September, states that, according to the accounts from New Zealand, "the position of the Maoris was less favourable."

NEW MAYORS.

The following is a list of the Mayors for the ensuing year, as far as the elections were known to us at the time of going to press :—

Ashton-under-Lyne, Mr. Galt.
Bangor, Mr. Hughes.
Barnstaple, Mr. T. W. Goppy.
Bath, Mr. J. Gore.
Bedford, Mr. J. Howard.
Beverley, Mr. Wilson.
Berwick-on-Tweed, Mr. Thompson.
Bridlington, Mr. Robinson.
Birmingham, Mr. Holliday.
Blackburn, Mr. Rand.
Bolton, Mr. B. Harwood.
Boston, Mr. Hall.
Bradford, Mr. Farrer.
Brentford, Mr. Thomas J. B. Law.
Bristol, Mr. T. T. Jose.
Brighton, Mr. Phillips.
Bury St. Edmunds, Mr. Le Grice.
Cambridge, Mr. Bircham.
Canterbury, Mr. P. Martin.
Cardiff, Mr. T. Wood (re-elected).
Carnarvon, Mr. Turner (fifth time).
Chester, Mr. Bell.
Colchester, Mr. J. F. Bishop.
Coventry, Mr. Whitmore.
Coventry, Mr. R. H. Minster.
Darlington, Mr. Pease.
Dartmouth, Mr. T. M. Snow.
Deal, Mr. J. Wm. Rogers.
Falmouth, Mr. W. Carne.
Folkestone, Mr. Bates, M.P. W. Month.
Gateshead, Mr. Crawshay.
Glamorgan, Mr. Insole.
Guildford, Mr. Jacobs.
Halifax, Mr. E. Baldsworth.
Hanley, Mr. Serjeant.
Hartlepool, Mr. O. Robinson.
Hereford, Captain Fetherstall.
Hull, Mr. J. Wilson.
Ipswich, Mr. Boden.
Kidderminster, Mr. Rowe.
Leeds, Mr. O. Rousey.
Leicester, Mr. Sir Peter Fielden.
Leominster, Mr. T. C. Yeld.
Lichfield, Mr. H. Hall.
Liskeard, Mr. R. Chandler.
Liverpool, Mr. Morley.
London, Mr. Lawrence (Lord Mayor)
Macclesfield, Mr. J. Jackson.
Malden, Mr. R. Smith.
Manchester, Mr. Heywood.
Middlesbro', Mr. R. Gilkes.
Morpeth, Mr. Cowen (2nd time).
Newcastle-under-Lyme, Mr. C. Massey.
Newcastle-on-Tyne, Mr. Hedley.
Newport, Mr. S. Morgan.
Northampton, Mr. Gotch.
Norwich, Mr. Q. Sprighting.
Nottingham, Mr. J. Parsons.
Oldham, Mr. Radcliffe.
Oswestry, Mr. J. Lloyd.
Oxford, Mr. J. B. Carr.
Penrhyn, Mr. Jones Bellgrave.
Penzance, Mr. Davies.
Plymouth, Mr. Sir Worthington.
Pontefract, Mr. J. Monson.
Portsmouth, Mr. Alderman G. Mc. Chambers.
Preston, Mr. A. B. Smith.
Reading, Mr. J. Cox Smith.
Richmond, Mr. A. Young.
Ripon, Mr. Hon. C. Allanson (2nd time).
Rochdale, Mr. S. Stott.
Rochester, Mr. J. C. Taylor.
Saffron Walden, Mr. B. T. Sturgeon.
St. Ives, Mr. Hosken.
Salford, Mr. Pearson (re-elected).
Scarborough, Mr. J. Dalgliesh.
Southampton, Mr. Gray.
Southampton, Mr. G. Brinton.
South Molton, Mr. Bowden.
Stafford, Mr. J. Pollitt.
Stockport, Mr. Sir Edmund (3rd time).
Stockport, Mr. Eskrigge.
Stockton-on-Tees, Mr. F. W. Month.
Sudbury, Mr. Grover.
Swansea, Mr. Jones.
Tenworth, Mr. B. Robinson.
Truro, Mr. J. Fellin.
Torrington, Mr. R. Tapley.
Totnes, Mr. J. F. F. Phillips.
Truro, Mr. T. Trumen.
Tynemouth, Mr. J. Spence.
Wakefield, Dr. Holdsworth.
Walsall, Mr. J. Cox.
Warrington, Mr. Holmes.
Warwick, Mr. T. B. Dale.
Weymouth, Mr. H. Duvenah.
Wrexham, Mr. John Lewis.
Yarmouth, Mr. R. Stewart.
Yeovil, Mr. R. Whitby.
York, Mr. Holton (Lord Mayor).

In consequence of some recent disturbances at Guildford, and their anticipated renewal, the town was occupied on Guy Fawkes Day by the military and police. Bonfires were forcibly suppressed, and the streets cleared by a display of bayonets. The mob showed considerable spirit, but with resistance that the Mayor had to read the Riot Act, and military pickets were on duty all night in the streets.

LATEST NEWS FROM ABROAD.

The following telegram has been received through Mr. Reuter's office :—

PRUSSIA.—Berlin, Nov. 12.—In the Chamber of Deputies to-day, 268 members being present, Herr von Grabow was elected President by 224 votes, against 37 votes for Herr von der Heidt. Herren Unruh and Bockum-un-Dolffs were chosen Vice-Presidents. Herr Grabow characterised his post as a difficult one in the gloomy situation of the country. The strong desire expressed by the Royal house for a solution of pending differences would be fulfilled if the severe depression of the country were properly appreciated and acted upon only in its obvious spirit. Faith towards the rights of the Crown would not then be distinguishable from fidelity to the rights of the people, whose common danger would be conquered in defiance of death, and Prussia's mission in the German Fatherland would be accomplished.

GREECE.—FORMATION OF A NEW MINISTRY.—Intelligence received from Athens to the 6th inst. announces that, at the request of the King, Mr. Bulgaris had formed a new Cabinet, which is as follows—Minister of the Interior and President of the Council, M. Bulgaris; Finance, Deree; Justice, Diamantopoulo; Foreign Affairs, Bolyanni; Public Worship, Petsalis.

COUNTRY NEWS.

Mr. C. Neate, a Liberal, was on Saturday last elected for Oxford without opposition in the room of the late Mr. Lampon.

Property of the value of £1000 was destroyed by fire on Wellington-quay, Dublin, last Saturday morning.

Dr. Westall, of Clifton, has presented to that town a drinking-fountain, which is placed in front of the Public Hall.

A new line of railway has been surveyed by Mr. Page, designed to connect Whitby and Scarborough with the northern parts.

The Peel Park at Bradford, a memorial to the late Sir R. Peel, was formally handed over to the authorities on Saturday. The total cost of the site and planting is £18,000.

Mr. J. M. Jennings, of Great Driffield, has been elected successor to the late Captain Duncan Cuthbert Conyers, as Coroner for the East Riding of Yorkshire.

The Mersey Docks and Harbour Board has decided to apply to Parliament for power to borrow £875,000 for the extension of dock works on the Liverpool side of the river.

In a collection for the Wesleyan Missionary Society at Liverpool, on Tuesday, more than £7000 was collected in a congregation of about 1500 persons.

The Philosophical Institution at Edinburgh was opened yesterday week by the Lord Provost, who delivered the first Rede Houghton (Moncrieff Milnes). Lord Houghton is president of this institution, having received Lord Brougham in that post of honour.

The Rev. R. Brindley, who is about leaving Bath for Chelsea, has been presented with a library clock and silver tea and coffee services, by his congregation, in commemoration of his faithful services during his ten years' pastorate at Percy Chapel, Bath.

An attempt effected lately by the convicts at Dartmoor Prison was made on Saturday, and was repeated on Sunday; but prompt measures were resorted to by the officers, and defeated all the mischief intended by them, with the aid of a detachment of the civil guard, quelled the disturbance, and removed nine of the ringleaders to the strong cells.

The committee of the Herefordshire memorial to the late Sir G. C. Lewis has decided that it shall assume the form of a statue in bronze of the right hon. gentleman, to be placed within the walls of the county hall, Shirehall, Hereford. The work is to be intrusted to Baron Marochetti, who has undertaken to execute the statue for £1000.

The coast districts of North Lancashire have suffered greatly during the past week from the gales which have been of unusual severity, submerged, and the farmers have sustained very serious losses. At Garstang, Cockerham, and other places, much damage was done by the flooding of last week.

A large number of gentlemen connected with Huntingdonshire met at the Corn Exchange at Huntingdon, on Wednesday week, for the purpose of presenting the Earl of Sandwich, the Lord Lieutenant of the county of Huntingdon, with a portrait of himself. The portrait, which (a fine portrait of the Earl) was painted by Mr. John Lucas, at a cost of £90 guineas, is to be hung in the Shire Hall.

A meeting of the Liverpool Central Relief Society (an amalgamation of the three principal relief societies) was held on Monday last week to make arrangements for relieving the prospective distress of the winter. In addition to the subscriptions in the ordinary course of relief to provisions, &c., to make grants of clothing and money in cases where they were urgently needed. Since June last the society had relieved 4612 persons, and expended in hand of nearly £400.

An influential meeting was held last Saturday at the Townhall, Halifax (the Mayor, Mr. J. Crossley, in the chair), to consider a projected scheme for a railway to run from Huddersfield, through Halifax, Dewsbury to Bingley, and so join the Midland Railway at Keighley. A committee took with cordial approval, and a numerous committee was appointed to consider the merits of the scheme and to report thereupon at a meeting to be held previous to Parliament.

The long-standing meeting of the general local committee of the British Association was held at Newcastle-on-Tyne last Saturday, the Mayor, Mr. Bell, in the chair. The secretary read the report of the general subscriptions, exhibitions, &c., had been £4170, which, after defraying all liabilities, left a balance of £1000. The general committee recommended that £200 should be presented to the Natural History Society, and the balance divided between the Literary and Philosophical Societies. Before the meeting concluded with a hearty vote of thanks to the Mayor (the chairman) and the resident secretaries.

The colliers' strike in the North was reported to have been settled by a slight concession on the part of the masters. The *Sheffield Daily Telegraph* says—"On a certain scale, the last which had been mutually agreed on between the masters and the men, the workmen receive 4d. per ton, while the colliery—has been practically applied; but at Sunniyon Park the weighed at 5d. per ton. The men struck for the latter rate, and got it. Mr. Love's weighed less than that produced by unrocked tubs; and as to this question of weighing, the men have a right to submit, on the ground that they are overseers. There was a large and enthusiastic meeting at Bishop Auckland, in sympathy with the men, on Monday evening last week.

Mr. W. Morrison, M.P., addressed his constituents at Plymouth on Tuesday evening. After congratulating his constituents, Mr. Collier, on his recent elevation to the Bench, and the Corporation of Dublin, on the erection of Public-house Bill, Church Rates, the state of Prussia, the Polish question, the European Congress proposed by Napoleon, the War in America, and the weakness of our colonial possessions, and the duty of Canada to lend a more efficient assistance in its own defence, Mr. Morrison proceeded to speak of the Kagoslau, in Japan, was justified by Mr. Morrison, and the burning of the town pardoned to be another matter. Mr. Morrison then proceeded to say that those present a renewed vote of confidence at the close of the meeting.

Mr. Mackinnon, M.P., addressed a meeting held last week at the meeting of the Central Relief Committee on Monday, showed a further improvement in the state of the cotton manufacturing districts. In the last week of September there were 149,851 operatives out of work; in the last week of October the number had fallen to 135,000. The average consumption for the present year, 467,000 persons were dependent on the poor rates or public charity; last month the number was 392,000. Mr. Mackinnon, in a communication made by Mr. Rawlinson, that that gentleman and his assistant have already reported upon public works proposed in some forty-two local districts in the country. Applications are still being sent in, and Mr. Rawlinson believes that "the whole of the money will not be required under the powers of the Act of 1863." The sum of £,668 19s. 1d. had been received during the past week, and the balance in hand was £230,075. Four cargoes of clothing had been received; and one crate of hats, one bag of sugar, and six barrels of flour. Contributions of £1000 each from the Lord Mayor's committee for £146 is 8d., the balance of their fund, has been received.

Mr. James Lang, of Jamaica, has been presented with his wife have had a narrow escape with their lives. They were proceeding on Tuesday evening in a carriage from Ryde to the house of Mr. Rawlinson, of Mr. Christopher Webster. To reach Fallon Hall from Sandurland the carriage had to cross the North Staffordshire Railway at the Fallon station on a level. In passing through the first gate the wheel of the carriage caught a post, and it occurred to one side so as to be railway. While endeavours were being made to extricate it Mr. Lang fancied he saw a light approaching on the line of rails from Sandurland. He immediately opened the carriage door, got out, and pulled Mrs. Lang after him. In a moment afterwards an engine and tender, without anything attached, running from the South Dock, came up with great velocity, and struck the horses and carriage. The horses were killed, and the carriage was completely shattered. The coachman, Mr. and Mrs. Lang and their servants was most extraordinary. The two former were close to the engine at the time of the collision, and the latter, who were sitting on the box, were thrown on the platform of the up side. They were much shaken, but their injuries were not serious.

PRINCE DE LA TOUR D'AUVERGNE,
THE NEW FRENCH AMBASSADOR TO ENGLAND.

By a decree signed by the Emperor Napoleon, at the Tuileries, on the 19th of October, M. le Prince de La Tour d'Auvergne was appointed Ambassador to England, in the place of his Excellency Baron Gros, who for some time was desirous of resigning the position he has occupied with so much satisfaction to the English and French Governments. In publishing the Portrait of the newly-appointed Envoy of France to this country, we are glad to be able to give the following original biographical notice of the diplomatist who will shortly be amongst us.

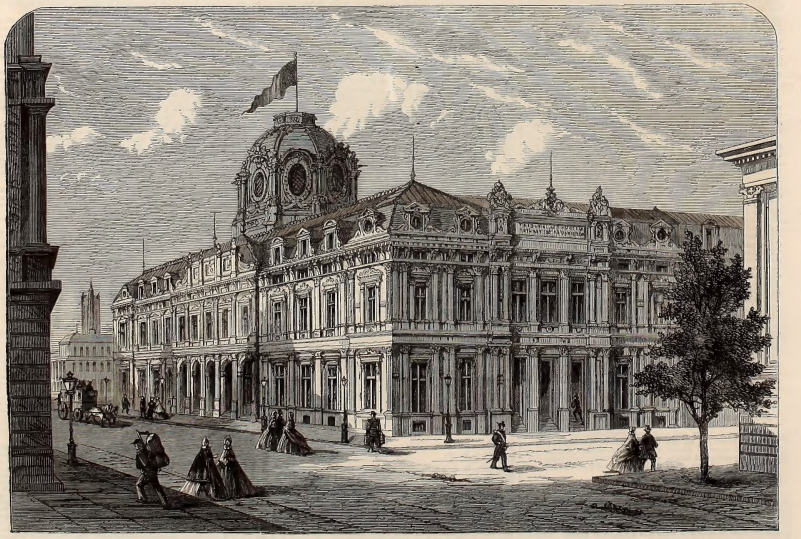
The new French Ambassador to the Court of St. James's, the Prince de La Tour d'Auvergne, although still in the prime of life, has already passed through a long diplomatic career. Having entered upon the political arena at a very early age, under the Ministry of M. Guizot, he became secretary to the Embassy attached to the mission of General Oudinot, and in that capacity furnished evidence of his aptness for political affairs by his coolness, his penetration, and the soundness of his judgment. The Prince at once attracted the attention of the French Government, and was successively appointed Minister at Florence and at Turin, which latter post he occupied when the war in Italy broke out. From the Court of Turin he passed to that of Berlin, where his great qualities obtained for him much esteem and consideration; and latterly the confidence of the Emperor called him to the difficult post of Ambassador of France to Rome, in which exalted position the Prince de La Tour d'Auvergne, carrying out the ideas of his Imperial master, constantly offered his advice, couched in those courteous terms, characteristic of the true gentleman, which give additional authority to expression. With such honourable antecedents, we may regard the advent of this distinguished interpreter of his Sovereign's wishes with confidence, feeling assured that he will continue to maintain those peaceful and amicable relations so happily existing between the two greatest nations of the earth.

By birth, the Prince de La Tour d'Auvergne belongs to one of the most illustrious families of France. According to the opinion of the best authors, the house of the Tour d'Auvergne descends from the ancient Dukes of Aquitaine, Counts of Auvergne. In the course of ages it became divided into several branches, one of which, that of the Counts of Auvergne and Lauragnais, finished with two daughters. The first, Madeleine de La Tour, married, in 1518, Laurent de Medicis, Duc d'Urbin, father of the famous Catherine de Medicis; the second, Anne de La Tour, married Jean Stuart, Duc d'Albanie, Prince Royal of Scotland, and died, without issue, in 1524. Amongst the other branches may be mentioned that of the Dukes of Bouillon, Princes de Sédan, who had the glory of giving to France Turenne, the rival and sometimes the superior of the great Condé.

The Prince de La Tour d'Auvergne belongs to the Lauragnais branch, which inscribes on its blazon the arms of Auvergne, La Tour, and Toulouse. It was to this branch that, in 1816, Louis XVIII. confided the keeping of the heart of Turenne and of that of the "first grenadier of France."

The new Ambassador, who is the head of his family, has but one son; he lost his wife whilst he was Minister in Tuscany. He has two brothers, one of whom is Archbishop of Bourges; the other, after having served for some years in the Imperial military household, won the epaulets of Chef de Bataillon at Solferino, and now commands a battalion of Tirailleurs à Pied.

Thus the Prince de La Tour d'Auvergne will come to our shores with all the prestige of birth, talent, and distinction.



The accompanying Portrait of his Excellency is from a photograph by L. Guyot and Cy., Rue Montmartre, Paris.

PRINCE DE LA TOUR D'AUVERGNE, THE NEW FRENCH AMBASSADOR TO ENGLAND.

THE NEW TRIBUNAL OF COMMERCE AT PARIS.

Since the year 1826 the Paris Tribunal of Commerce occupied a large portion of the first floor of the Bourse, which, through the gradual increase of business, had for some time past become quite insufficient for the wants of the public service. The city authorities therefore decided upon the construction of a separate building for the commercial tribunal, and the municipality has succeeded at the same time in carrying out a plan that will result in the economy of much time and trouble both to lawyers and their clients. With the exception of the *mairie* in each of the twenty arrondissements, where the *juge de paix* decides the petty causes rarely requiring the subse-

THE NEW TRIBUNAL OF COMMERCE AT PARIS.

"PUSS IN BOOTS—BEHIND THE SCENES," BY S. J. POTT, FROM PLATOU'S COLLECTION.

quent interference of a higher Court, all the tribunals of the capital—bankruptcy and equity courts, courts of seizure and magistrates' courts (*police correctionnelle*)—are now assembled on the same site, and are held in two buildings worthy of the importance of the matters to be transacted within their walls. The two buildings in question are the Palais de Justice and the new Tribunal de Commerce (the subject of our Engraving on the preceding page), the latter just terminated, and occupying the corner of the Boulevard of Sebastopol, immediately opposite the Palace of Justice.

The Judges of the Tribunal of Commerce are selected from the principal members of the commercial community, and are elected by that body. The jurisdiction of the tribunal extends to all matters relating to bankruptcy and to disputes arising out of commercial transactions, and its judgments in actions wherein the sum in litigation is less than £60 is without appeal; when exceeding that amount the affair may be ultimately submitted to an Imperial Court. The number of causes brought before the tribunal is about 60,000 annually, of which one half go by default.

In addition to the Bankruptcy Courts and to the Conseils des Prud'hommes (corresponding to our Sheriffs' Courts), who hitherto held their sittings in a remote and inconvenient part of Paris, are also to be installed in the new building, which has been constructed from the designs of M. Bailly, architect of the city of Paris. It consists of three stories and a dome. The basement will be occupied as shops, and the remainder of the edifice comprises the Salle des Pas Perdus (or grand hall), the chambers for deliberation and consultation, and the audience-chambers. Some dissatisfaction has been expressed with regard to the situation of the dome, which has been displaced from its proper architectural position in order that it might be directly opposite the centre of the façade of the Strasbourg Railway station, at the eastern extremity of the Boulevard. The entrance reserved for the Bankruptcy Courts is on the quay side, and that for the Conseils des Prud'hommes on the Boulevard of Sebastopol.

Our Illustration of this most recent ornament of the Parisian metropolis is from a drawing made by M. Felix Thorigny.

"PUSS IN BOOTS—BEHIND THE SCENES."

"BEHIND the scenes" is a phrase suggestive of much that is squalid, pitiful, repulsive, disillusionary. The penetralia of a theatre—from which the phrase, of course, originated—afford one of the most advantageous positions possible for philosopher, moralist, satirist, or cynic. There, for instance, we may often find the strutting hero of the play some poor wretch who has been sorely defeated on the stage of real life; the heroine, a still more piteous object, a broken-hearted, friendless woman; the ennobled monarch, an unemployed mechanic;

the gay, sylphlike dansense, a homeless, starving orphan. But that there, too, we may find the truehearted, the beautiful, and good passing unscathed through their fiery trials; and that there, also, we may gather materials for the noblest pathos, we have been shown by a Thackeray, a Charles Dickens, and other artists in words. Some of our painters likewise have enlisted our sympathies for this wide but neglected field for humane interest. Of this the picture by Mr. Pott (engraved on the preceding page) is an example. In it we have a pretty and apparently trifling incident, with, however, to our mind, a touching story implied. A poor young couple have been induced—certainly from no hope of large gain, but who knows by what pressure of distress?—to let their little one crawl about the stage, cased in mask and boots, in the part of "Puss in Boots" in some Christmas piece founded on the well-known nursery-rhyme. It is, perhaps, their first and only child, and this was, we may suppose, "his first appearance," as the play-bills have it. His performance has given infinite delight to the holiday-folk and their little ones in pit and gallery and the delicately-nurtured children of rich and luxurious in box and stall. But has any one, of all that great throng, save his parents, thought of the pain and discomfort, and the still greater terror the tender infant—for he is scarcely more—may have suffered? The little fellow thought only to please "father" and "mother;" and, judging by their expression, he has played his part well; yet the additions (to the times of rehearsal) of the glare of the house and the noisy applause, seen and heard through the suffocating mask, might well scare one so young—as, indeed, we see it has. Of the suspense and anxiety of the parents during the performance we may guess by their present joy and pride, and the hasty removal of the mask for the gratified and reassuring kiss. What a pity the audience cannot see this final scene of pussy's triumph!

CALENDAR FOR THE WEEK ENDING NOV. 21.

SUNDAY, Nov. 15.—Twenty-fourth Sunday after Trinity. St. Machutus o Malo. Minorca taken by General Stuart, 1798. Final Closing of the International Exhibition, 1862.

ROYAL ENGLISH OPERA, COVENT-GARDEN.—Under the management of Miss LOUISA PYNE and Mr. W. HARRISON.—On MONDAY NOV. 16, Tuesday, Wednesday, Thursday, and Friday, the last representations of Wallace's Popular Opera, THE DESERT FLOWER. To conclude with THE MARRIAGE OF GEORGETTE. On Saturday, Nov. 21, will be produced a new Opera, by M. W. Balfe, entitled BLANCHE DE NEVERS. New Scenery, Costumes, and Decorations. The Performances will commence each Evening at Seven, doors opening at Half-past Six.

THEATRE ROYAL, DRURY LANE.—Managers, Messrs. Edmund Falconer and F. B. Chatterton. Great and continued success of the production of Lord Byron's MANFRED, generally acknowledged by the Press and the Public to be one of the most complete and legitimate triumphs of a combination of artistic capabilities achieved on the stage for many years.

On MONDAY, and during the Week, her Majesty's servants will perform the new and original farce by W. Brough and A. Halliday, Esqrs., entitled MY HEART'S IN THE HIGHLANDS. Principal characters by Messrs. Belmore, G. Weston, J. Neville, Warde; Miss Harfleur, and Mrs. Neville. After which, commencing at a quarter before Eight o'clock, and concluding about Ten o'clock, Lord Byron's Choral Tragedy of MANFRED. Mortals:—Manfred, Mr. Phelps; Abbot of St. Maurice, Mr. Ryder; a Chamois Hunter, Mr. A. Rayner; Manuel (an aged Retainer), Mr. Neville; Herman (a young Domestic in the Castle of Manfred), Mr. G. Weston; Retainers, Messrs. Bedford, Weever, Kirk, Wilson, Smith, and Edwards. Immortals:—Arimanes (Ruler of the Evil Agencies), Mr. Warde; Ariel (Spirit of the Ether), Miss Emma Heywood; Hesper (Spirit of the Stars), Miss Louisa Ritter; Undine (Spirit of the Waters), Miss Poole; Miserima (Spirit of Memory), Miss Cicely Nott; Auster (Spirit of the Storm), Mr. Swift; Astaroth (Spirit of the Earth), Mr. Meagerson; Nubes (Spirit of the Shadow of Night), Mr. Ryde; Titanos (Spirit of the Mountains), Mr. G. Spencer; Nemesis (Goddess of Vengeance), Mrs. Edmund Falconer; Clotho, Lachesis, and Atropos (the Three Destinies), Miss Emma Atkinson, Miss C. Weston, and Miss Murray; The Phantom of Astarte, Miss Rose Leclercq; the Witch of the Alps, Miss Eburne; Evil Agencies and Spirit Spectres of the Weird World, Messrs. T. Matthews, J. Morris, and J. Cormack; Miss Seymour, Miss Harfleur, Miss Green, Mrs. Melville, Mrs. Warlow, and the Ladies and Gentlemen of the Choir and the Ballet. Order and character of the Scenery:—Act I.—Scene 1. Studio and Gothic Gallery in Manfred's Castle. Scene 2. A Precipice and Glaciers nigh the summit of the Jungfrau. Act II.—Scene 1. The Chalet of the Chamois Hunter and Alpine Pass. Scene 2. The Steinbach, a Waterfall, in one of the Lower Valleys among the Alps and overhanging Cliffs, the Haunt of the Witch of the Alps.

The sunbow's rays still arch the torrent with the many hues of Heaven,
And roll the sheeted silver's waving column o'er the crag's perpendicular.

Scene 3. The Snow-capped Summit of the Jungfrau, by Moonlight. Scene 4. The Hall of Arimanes in the Nether World, painted by Mr. Danson and Son. Act III.—Scene 1. Terrace and Exterior of Castle. Scene 2. The Turret Studio, the Magian's Midnight Haunt, Shook and Illumined by a Thunderstorm, and finally Destroyed by Flashing Bolt and Crashing Avalanche. Last Scene. A Snowy Alpine Waste or Wilderness. Programme of the Songs and Choruses:—Act I.—Scene 1. Mystical Responses of Viewless Spirits to the Magian's Invocation. First solo, "Mortal to thy bidding bow'd," Miss Emma Heywood. Second solo, "In the blue depth of the waters," Miss Poole. Third solo, "I am the rider of the wind," Mr. Swift. Septet, Misses Poole, Heywood, Cicely Nott; and Mr. Swift and chorus. The imprecation solo, "When the moon is on the wave," Miss Cicely Nott. Solo, "Though thy slumber may be deep," Miss Poole. Chorus by the whole choir. Act II.—Scene 3. Solo and chorus, "The Captive Usurper," Miss Cicely Nott and chorus. Song, "The ship sailed on, the ship sailed fast," Miss Emma Heywood. Scene 4. Grand Choral Hymn of the Evil Agencies, "Hail to our master, Prince of Earth and Air!" solo verses by Mr. Swift. Chorus by full choir. Jubilant chorus and accompanying Dance, by full choir and the ballet. Act III.—Last Scene. Grand dual chorus of Good and Evil Spirits by the principal singers and full choir. The general action of the tragedy arranged by Mr. Phelps. The incidental dances designed and directed by Mr. Cormack. Costumes from designs by R. W. Keene, Esq., and from Flaxman's Illustrations of Classical and Mythological Conceptions. Machinery by Mr. J. Tucker and assistants. Gas illuminations by Mr. J. Hinckley. Spectral illusions by Mr. Cox; and also Professor Pepper's adaptation of Dirck's invention, under the special superintendence of Professor Pepper. The whole of the entirely new scenery designed and principally painted by Mr. W. Telbin, assisted by his son, Mr. H. Telbin. The Hall of Arimanes painted by Mr. Danson and Sons. The increased orchestra and present arrangement of the music (originally composed by Sir Henry Bishop) under the direction of Mr. Barnard. The choir under the direction of Mr. Charles Beale. To conclude with a New and Original Farce, by John Oxenford, Esq., entitled BEAUTY OR THE BEAST; principal characters by Messrs. Addison, G. Neville, Barrett, Spencer, and G. Weston; and Mrs. Edmund Falconer and Miss R. Leclercq. Stage Manager, Mr. Phelps.

THE CONSERVATIVE LAND SOCIETY.—At the ANNUAL MEETING at EXETER HALL, on TUESDAY, Dec. 8, Viscount RANELAGH in the chair, there will be a Drawing to determine the Order of Selection of Allotments on the Society's Estates. Fifty numbers will be drawn from the list of shares in progress, and twenty-five numbers will be selected by rotation (or date of seniority of membership), to be placed on the Register of Rights of Choice. In this Society the taking of land is quite optional, as investors, without any partnership liability, may either take out shares to receive half-yearly five per cent per annum, or may open accounts in the Deposit Department, without being members of the Society, with a fixed rate of interest at four per cent per annum, payable half-yearly. Both in the Share and Deposit Department the investor has the privilege of withdrawing his money at fixed periods. Purchasers of land on the Society's estates can also have building advances on liberal terms. Prospectuses sent free to any part of the world. CHARLES LEWIS GRUNEISEN, Secretary.
Offices, 33, Norfolk-street, Strand, W.C.

NOW READY,
Price One Shilling, beautifully Printed in Colours,
THE ILLUSTRATED LONDON ALMANACK FOR 1864,
containing Fresh-Water Fish, from Paintings by H. L. Rolfe, with interesting descriptions, by James G. Bertram, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine-Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Headings to the Calendar, by F. W. Keyl.
It contains also Lists of the Royal Family of Great Britain; the Queen's Household; her Majesty's Ministers; and Public Offices and Officers; Law and University Terms; Fixed and Movable Festivals; Anniversaries and Remarkable Events; Times of High Water at London and Liverpool; Tables of Stamps, Taxes, and Government Duties; the Christian, Jewish, and Mohammedan Calendars; Astronomical Symbols and Abbreviations; and a considerable amount of useful and interesting information, rendering the ILLUSTRATED LONDON ALMANACK an acceptable and elegant companion to the library, boudoir, or drawing-room; whilst, as regards price, it is the cheapest Almanack published.
The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.
Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, NOVEMBER 14, 1863.

LORD PALMERSTON was cheered long and loudly when he entered Guildhall on Lord Mayor's Day, but we do not suppose that any great effort of oratory was expected from the Premier upon that festive occasion. He said, however, all that reasonable men could desire, and there was significance in his silence upon the most important question of the hour. He stated that he saw no prospect of a termination of the American war, and perhaps this may be construed into a new insult by the writers in the Federal interests, who declare the "rebellion is at its last gasp," though they do not go quite so far as Mr. Chase, and say that it has actually expired. Further, the Premier of England described the Emperor of Russia as deliberately pursuing a course of barbarous extermination in Poland, and these words are not likely to please M. Gortschakoff, who, as Mr. Seward says, is so able at defending the policy of his Imperial master. Beyond this Lord Palmerston had little to say, though, with two Cabinet Councils to attend, on Tuesday and Wednesday, he may be supposed to have "thought the more." His reception was enthusiastic, and, though we agree with Miss Martineau that the perpetual references to his age are not in good taste, it may be permitted to say that he looked exceedingly well, and quite competent to grapple with M. Gortschakoff or any other able defender of the Yankee-Russian faith in brute force.

But perhaps the most remarkable incident of the evening was the reply to the toast of the representatives of foreign nations. London drank to the world, and was answered in Persian. His Excellency from Ispahan responded to the Lord Mayor. There was no French Minister, with charming epigrams; no American Envoy to claim Shakspeare and Milton as citizens of the United States; no Russian Baron to urge that, if his master were enslaving Poles, he was, at all events, imitating England by liberating serfs; no Italian Marquis to speak of a new and constitutional kingdom that hoped to emulate the island of freedom; no Prussian soldier to assure us that his Sovereign, though appearances might be against him, was really an Alfred and a Victoria in one; no Spanish grandee to regret that such good men as he saw were in such a bad way as Protestants; no Turkish nobleman to state that, now the Porte had taken to keeping books, Turkey would go on as regularly as the establishment of any of the merchant princes around him. The Tigris alone made answer to the Thames. As to what the Persian Minister said—well, the reports stated with the utmost confidence that he returned thanks for the splendid hospitality which it had been so pleasant to him to enjoy; and very likely this was it. But in one of Mr. Douglas Jerrold's plays a gentleman announces that he must go, having to give a lesson in Chinese. "Bless me," says his wondering friend, "do you understand Chinese?" "That is beside the question, Sir; I teach it." Do we understand Persian? That is beside the question; we report the substance of a speech delivered in Persian.

One would very much like to know what his Excellency thought of the whole business. He saw a great hall, blazing with gas and banners, and two hideous idols in two corners, and some monuments, which he probably deemed only a little less hideous. He saw a great number of ladies, some beautiful, all beautifully attired, sitting unveiled, and unhesitatingly talking to any one who happened to be near them. And he beheld some eight hundred people eating something that is neither fish nor flesh, nor good red herring, but which is regarded as the ambrosia of the civic Olympus, and following it up with

large draughts of wine, better than that of Shiraz—better, perhaps, than Mr. Thomas Moore's ideal vintage—

Whose the dark-eyed maids shove
Rosy sealed with precious musk.

Then—we mean a good while afterwards, and when a vast banquet had been eaten through—he saw a person of imposing appearance, and with a mighty voice, wave a wand and proclaim silence, and, after a brief address from the Chief Magistrate, the Persian saw the wand waved, heard it, and heard it shout again and again. Of course, his Excellency speaks some other language then Persian, or somebody about him does, and he was told that all this was the mode in which we testify our affection for our Sovereign. He would next witness a series of similar homages to her family, to her Army and Navy, and to her Volunteers; and then he would see a display of regard for the gentleman who, a year ago, was, for the first time, in the seat of honour and glory. He would be told that this gentleman's name was Rose—a word for which there are, we believe, about fifty equivalents in Persian; and we should not wonder if his Excellency—who has probably a courtier's wit—said a pretty thing about a rose; but, as the Aldermen are not compelled to be familiar with Persian, the epigram would be lost to most of them. Next, his Excellency would perceive that he himself was being talked at, looked at, and shouted at; and, as Oriental dignity is never discomposed, he would listen with calm serenity to the assurance that if London was attached to one nation rather than another it was to the Persians. Not having had the felicity of being able to hear the Lord Mayor, we are unaware whether he introduced any speciality of compliment, and the reporters do not say whether he quoted, to repudiate, Horace's unfavourable opinion of Asiatic Apparatus, appealed to the ladies whether they did not adore Persian cats, or showed that Shakspeare was a profound student of Persian costume, as testified by the allusion put into the mouth of King Lear, "You will say those garments are Persian, but let them be changed." Here we are sure the Lord Mayor said all that was necessary and proper. Then his Excellency was informed, possibly by a poke from his secretary, that now was his time to be *en évidence*, and we are told what he was supposed to say. But, as aforesaid, we should like to know what he thought. International law, just now, is a dangerous study; and it might be held a breach of the comity of nations did we put thoughts into an Ambassador's mind, so we will only venture our belief that he did not trace in the proceedings of that night any insecurities connection with the ruins which mark those Franks, conquering and to conquer, far beyond Persia itself, and which dictates all that marvello us policy which, either in peace or in war, adds kingdoms to the dominions of Her for whom those turtle-eaters had been shouting.

Then, we dared from the gorgeous East, that in her bosom bears the morning like a jewel, heard tremendous shouts, and presently beheld a cheery-looking elderly gentleman, with a broad blue ribbon diagonally intersecting his bosom, rise and smile, but respectfully open the Oriental mouth, and then deliver a speech to which all listened with the intensest interest. The Minister knows his brother Minister, and, perhaps, wishes he could understand him; but the secretary promises to tell him all the next morning, when the scribes have sent in their scrolls. Probably his Excellency may be aware that the gentleman in the blue ribbon has overthrown several Governments, and upon other occasions has been himself overthrown, and that, though he is the best friend with his Sovereign and trusted with the control of all her dominions, it is not much more than two years ago that he was exceedingly well scolded for writing despatches without obtaining the consent of his Queen, and was commanded not to do so any more. Now he may do pretty much as he likes, for everybody trusts him to the utmost. The Persian Minister may think that, as the Vizir of the Franks have some good customs, especially as regards their rulers; and he may speculate as to whether, had he at any time written despatches without the Shah's leave, that blue ribbon, or anything analogous, would have been his reward, or whether silk night have been presented to him in a more agreeable fashion. The Englishman has done. Were Ali himself to come back to the East and enter Ispahan, the faithful could not make more noise than these infidels are making at the gentleman with the blue ribbon. It is a good thing to be a popular Englishman, the Persian may think. He seems to be afraid of nobody.

What does the next talking and shouting mean? his Persian Excellency asks. This, the secretary explains, is homage to the great men who talk over the lawn until they are made. And the next? This is honour of the great men who expound the laws and order persons to be hanged. The Oriental gentleman looks at these with interest, and perhaps does not see in Mr. Justice Erle's intellectual face any sign that he is likely to hang more people than the Lord Chancellor. But the next? This is tribute to the persons whose business it is to save people from being executed—this is to the Bar. The Persian thinks that he would confine their interesting zeal within very modified limits. The next? Ah! those are the gentlemen who have the last of the initial: if they get there is no chance for the poor escape. The Sheriffs are most interesting of all to the Oriental mind. And then it would seem as if all was over, for people are going away. "Do they say nothing about their priests?" he asks. "I thought that those were always mentioned," and then he looks uneasily at Gog and Magog; but the secretary, who is a man of the world, insists upon his chief's coming round to take leave of his host in another chamber, and the Ambassador withdraws. As he smokes his pipe that night he says many things which it would be edifying to hear; but the person and privacy of an Ambassador are alike sacred. On our part, we may note it as not a thing unworthy of remark, that at our grand London banquet the world outside the island was answered for in Persian. Perhaps, next year it will be in Japanese—we certainly hope so, as this will argue that we have finished with our bombardment.

THE COURT.

The Queen continues at Windsor in the enjoyment of excellent health.

On Saturday last her Majesty, accompanied by Princess Helena and the Princess of Hohenlohe, and attended by the Countess of Caledon, Major-General Reid, and Colonel Ponsonby, visited Queen Marie Amelie at Claremont. Her Majesty afterwards called to inquire after General Sir Robert Gardiner, at his residence, near Claremont. Her Majesty travelled by the London and South-Western Railway to Teddington station, thence the Royal party proceeded in close carriages to Claremont, returning to Windsor in the evening. The Queen was received with marks of affectionate respect at the various stations along the route. The Crown Prince of Prussia, attended by Captain Von Lorentz, arrived at the castle at two o'clock the same day. Colonel F. Seymour, C.B., met the Prince at the railway station and attended his Royal Highness to the castle. The Prince left Windsor in the evening for Dover.

On Sunday the Queen, Princess Helena, Princess Louisa, Prince Leopold, and the Princess of Hohenlohe attended Divine service in the private chapel. The Hon. and Very Rev. the Dean of Windsor officiated.

On Monday the Queen, accompanied by Princess Louisa, walked and drove in the park. Princess Helena, attended by Lady Caroline Barrington, the Hon. Mrs. Ponsonby, and Colonel H. F. Ponsonby, went to London in the evening, and honoured the performance at the Olympic Theatre with her presence. Her Royal Highness returned to the castle soon after twelve o'clock. The Princess of Hohenlohe, attended by the Hon. Horatia Stopford, left Windsor for her home at Hampton Court.

On Wednesday the Queen, accompanied by Princess Helena, drove in the castle grounds. The Crown Princess of Prussia arrived at the castle from Southampton to-day. The Queen and her Royal Highness had a long walking and driving exercise in the vicinity of the castle. Baron Gros, the French Ambassador, was presented to the Queen at Windsor Castle yesterday by Earl Russell, who had the honour to be Lord in Waiting.

During last week Mr. Frith has had the honour of sittings at Windsor Castle from Princess Helena, Princess Louisa, Princess Beatrice, Prince Leopold, the Crown Prince of Prussia, and Prince Edward of Saxe-Weimar arrived at Sandringham in the evening on a visit to the Prince and Princess.

On Sunday the Prince and Princess, the Crown Princess of Prussia, Prince Edward of Saxe-Weimar, and suite attended Divine service in the church of Sandringham. Prince Frederick of Denmark, attended by Captain Lund, took his seat in the Royal Pew this morning, and in the evening on a visit to the Prince and Princess.

Monday being the twenty-second anniversary of the Prince's birthday, the Prince and Princess commemorated the auspicious day by giving a dinner to the labourers and their families upon the estate, to the number of 300. The Prince and Princess rural party assembled upon the lawn in front of the House. Upon the arrival of the Prince and Princess the Royal party received the usual hearty greeting. The National Anthem and "God Bless the Prince of Wales" were sung, and, after another cheer, the whole party marched to the tables, which were in the spacious coach house. As soon as they were seated the Prince, Prince Frederick of Denmark, and Prince Edward of Saxe-Weimar, with the gentlemen of the household in waiting, entered and proceeded to the side of the labourers the Princess, the Crown Princess of Prussia, and ladies in waiting attending upon the children. At the labourers' table the chair was taken by Mr. Carmichael, the land steward. After dinner the Chairman, Mr. Carmichael, in a beautiful speech, proposed the health of the Prince of Wales, which was received with tremendous cheering. The toast of the day was then given—"The Health of the Princess of Wales and Family," with that of the Princess, wishing his Royal Highness long life and prosperity." The toast was drunk with cheers both long and loud, to which was added, "The Healths of the Queen and all the rest of the Royal Family," "The Crown Princess of Prussia," &c. The dinner, of the most substantial description, was followed by a dance in a large barn, to which the principal residents of the neighbourhood were invited. The number of guests was forty-three. The company began to arrive at half-past nine o'clock. Supper was served at twelve o'clock, and to the centre of the table was the birthday cake, which was ornamented with the feet in height. After supper dancing was resumed and kept up until three o'clock. On the birthday morning the labourers' wives and children had a beautiful breakfast, and the various Royal guests planted trees in the grounds in memory of the day.

Lady Augusta Stanley, Lord Frederick Fitzclarence, and Major-General Grey are in attendance upon Prince Edward of Saxe-Weimar went out shooting. The Princess and the Crown Princess drove out.

The Prince and the Crown Princess of Prussia, attended by Count Twistenstein and the Countess of Hohenthal, took leave of the Prince and Princess of Wales this morning, and left by the 10.57 train en route for Windsor.

Prince Frederick of Denmark, attended by Captain Lund, took his departure for Oxford, and Prince Edward of Saxe-Weimar left also by the 10.57 train for London. The Prince and Princess accompanied their guests to the station, by the Wolferton line. The Prince subsequently went out cover shooting.

The Princess takes daily drives in the neighbourhood of Sandringham.

PRINCE ALFRED.

Prince Alfred continues at Heligoland.

On Friday, at half-past two o'clock, the Prince, accompanied by Prince William of Hesse, attended by Major Lowell and Captain Zoegen, left the university in a carriage and four, and drove to Winton Castle, on a visit to Lady Hothvam. Upon the arrival of their Royal Highnesses at the castle they were met by the Hon. Mrs. Hothvam. A select party were invited to meet the Royal visitors at dinner. In the evening there was a ball given in honour of the Prince. Their Royal Highnesses returned the next day to Holyrood.

The Prince has been elected an honorary Fellow of the Royal Scottish Society of Arts.

The Crown Prince of Prussia left the Victoria Station of the London, Chatham, and Dover Railway at eight o'clock p.m. on Saturday last, and proceeded at once to the Royal Pavilion immediately embarked on board a special steamer, the Bruce, for Calais.

His Royal Highness the Duke of Cambridge has arrived at Gunnersbury House, Acton, from Cambridge.

Their Royal Highnesses the Duke and Duchess de Chartres have returned to their residence at Stowe after a short tour.

His Excellency Count Bernstorff, the Prussian Ambassador, on Sunday afternoon visited Earl Russell at Pembroke Lodge, Richmond Park, and Mrs. Villiers, at the official residence for the Foreign Office.

His Excellency the Austrian Ambassador and Countess Apponyi are expected at the Embassy, Chandos House, this day (Saturday) from Vienna.

The Duke and Duchess of Marlborough have issued invitations for a dinner party on Tuesday next, at Blenheim Palace, on the 25th inst. The party will be in honour of Frederick Prince of Denmark.

The Duchess of Montrose left Belgrave-square on Tuesday for Buchanan House, Stirlingshire.

The Duke and Duchess of Manchester have arrived at Kimbolton Castle from a tour of visits in the north.

The Duke of Buccleuch and Lord Walter Scott left Sefton House on Thursday for Dalkeith House, Edinburgh.

The Duke of Newcastle arrived in town on Monday from his seat, Clumber Park, Notts.

Marchioness Townshend and Lady Audrey Townshend have arrived in Dublin.

The Marchioness of Salisbury and the Ladies Cecil have returned to Hatfield House, Herts, from a tour of visits.

The Marchioness Dowager of Lothian and Lady Alice Kerr have arrived from a tour on the Continent.

The Marquis of Exeter left town on Saturday last for his seat, Burghley House, near Stamford.

The Earl and Countess of Shaftesbury and family have left town for their seat, St. Giles' House, Dorsetshire.

The Earl and Countess of Malmesbury have arrived at their mansion in Stratford-place from Heron Court, near Christchurch.

The Earl and Countess of Dunraven and Mount-Earl arrived at their residence in South Audley-street from Knockdrin House, Tipperary.

Earl and Countess Russell, Viscount Amberley, and the Ladies Russell arrived in Chesham-place on Saturday from Pembroke Lodge.

Earl Brownlow and Lady Marian Alford left Prince's-gate on Monday en route to Madeira.

The Earl of Westmoreland has arrived at Cureon House from Apethorpe, Northampton.

Viscount and Viscountess Palmerston arrived at their residence in Piccadilly, on Saturday last, from Broadlands, Hants.

Field Marshal Viscount and Viscountess Combermere have arrived at their villa, Bella Vista Lodge, near Cobham, where they are spending the winter.

Lord and Lady Blantyre left town on Thursday on a visit to the Duke of Devonshire, at Chatsworth, Derbyshire.

The Right Hon. Sir George Grey arrived in London on Monday from his seat, Howick, Northumberland.

The Chancellor of the Exchequer arrived at his residence in Carlton-terrace on Tuesday from Hawarden Castle, Chester.

APPROACHING MARRIAGES IN HIGH LIFE.—A marriage will shortly take place between Sir Henry Hawkins, son of the late Major-General Sir Henry Hawkins, C.B., and Lucy, daughter of the Hon. and Rev. Alan Legge, Rector and Patron Viscount Dowager of Dudley.—The marriage of Captain Greville with Lady Augusta Fane, daughter of the Duchess of Montrose, is fixed to take place on the 16th of next month.—A matrimonial alliance is arranged between Lord William Nevill, second son of the Duke of Richmond, and Miss Molyneux, daughter of the Rev. Mr. Molyneux.—A marriage is also arranged between the Hon. Charles Bruce, Deputy-Lieutenant of Lady Augusta Bruce, sister of the Earl of Elgin.—A marr age is also to take place between Sir Wroughton Drake, of Amesbury, Wilts, Bart., and Miss Louisa Herbert, daughter of Mr. William Herbert, of Clytha.

A banquet took place at the Music Saloon, Wakefield, on Wednesday week, to celebrate the inauguration of a new organ, called the Albert Wing, which has been added to the Clayton Hospital and Waterloo Dispensary as a memorial of the late Prince Consort.

The interior of the new Royal dairy at Frogmore is being decorated in a very beautiful manner. The walls are lined with white coloured tiles, designed in a rich and tasteful style, and bearing representations of the scenes of the dairy, executed in a series of sketches from agricultural life. The windows are filled with coloured glass.

Captain Speke was entertained at a banquet given by the Bristol Society of Merchant Venturers on Monday. On Tuesday week Captain Speke proceeded to Taunton, where a congratulatory address on his return to active employment was presented to him. On Wednesday a dinner in his honour took place at Ilminster.

A silver jubilee gift of £50 sovereigns have been presented to the Rev. James Mann by the church and congregation of Hamilton-square, Birkenhead, on the occasion of affectionate regard for their pastor, and in testimony of his faithfulness in the discharge of his pastoral duties during a period of twenty-five years. Mr. Mann has also been presented with a tea-service, as a memorial of the esteem in which she and her family are held.

THE PRINCE CONSORT IRON-CLAD FRIGATE IN A GALE.

THE iron-cased screw steam-frigate Prince Consort, 35, Captain Vesey, returned from Dublin to Plymouth last Saturday, and is now in Keyham steam-yard for the purpose of being thoroughly overhauled and refitted. We give an Engraving from a sketch by Captain Prince Consort in the late gale—of her doings in which we gave some particulars last week. The sketch from which our Engraving is taken was made at the time her crew were shortening sail, taking in the fore and main topsails and lowering the foretopmast. The foretopsail was half hauled down, but the downhaul and sheets were both carried away, so the sail nearly blew to pieces before it was secured. The close-reefed mainsail was also being furled, but being set to wind, as it was found that the vessel could not get into Holyhead on account of the weather being on the lee shore. The Prince Consort then steamed across to Dublin Bay.

As the circumstances connected with the Prince Consort's voyage to Liverpool to watch the steam-runs, and of her failure to reach the Mersey, have excited much attention, the following details, extracted from the *Times*, may be considered interesting:—

The Prince Consort left Plymouth Sound on Wednesday, Oct. 28, at 1 p.m. The weather began to be very boisterous, and continued to increase in blow most fearfully from west-south-west. At 7.30 a.m. on Thursday the Smalls Lighthouse, some twenty miles S.W. of Milford Haven, was observed on the starboard bow. At 8.10 the course was altered to north-east. Carnligan Lighthouse was passed at 9.40, and the Tuskar Rock Lighthouse was observed on the beam at 1.40. The frigate then commenced rolling very heavily, large quantities of water were shipping, and the weather was very bad. At 4.30 the Southstack Lighthouse (Holyhead Island) was observed on the starboard bow, and sail was made at 4.40 the Victoria Channel, steaming away the foretopsail. At 5.30 Southstack Lighthouse was twelve miles distant, east-south-east. The gale increased, and a heavy sea was running, the wind being west-south-west and west. As the night was approaching, it was not considered safe to attempt to run for Liverpool Bay, as the Rock Lightship, therefore, could not be found in Bardsey Bay. The water then came on board in such quantities that the steam-pumps could not keep it down, and the foretopsail blew away from the bolt-ropes. At 7.30 the last sight of the Southstack Lighthouse, which then bore east-by-north, 24 miles distant, was lost sight of. The foretopsail and gaff, and the foretopgallant stay (wire) was carried away. The gulf sails were taken in. The frigate labouring very much, and the wind veering more to the S.S.W. At 9.30 Friday morning Bailey-head Lighthouse (on the north side of Dublin Bay) was made, and the Kish Bank on the starboard bow. At 12.30 the Kish Bank was on the port bow. The engines were stopped at one o'clock, and the vessel came to off Bailey Head, in 5 fathoms water, on the small bower cable to 30 fathoms. At 8.30 she anchored off Kingstown, in seven fathoms, when the cable parted, and the starboard bower was brought out to 75 fathoms.

The Prince Consort experienced very heavy weather during the week she was in Dublin Bay, and it was expected that she would have to put to sea to return to Plymouth, left on Thursday, Nov. 5, at 1 p.m., and, after an ordinary passage, arrived in the North Sea at 6 a.m. on the 7th.

But for the very superior engines of 1000-horse power with which the Prince Consort is supplied she must have been ashore on the Arklow Bank on the 7th, the 9th ult., when all on board would have probably perished, so severe was the gale that blew at the time. The vessel was hove to, but the wind would not heave her to, and she drifted on to the bank. The whole of the starboard paddle-boxes were washed up, and the water was so deep that the stokers were obliged to stand on the bunkers and throw the coals down to the furnaces in order to keep it dry. The fires at this time could not have been kept up more than half an hour longer, and in the opinion of apparent unworthiness of the Prince Consort, it is difficult as yet to arrive at any reasonable conclusion. Had the engines not command of water which were in the vessel it was supposed that she would have foundered, as she was in a very bad fix. What is known of her qualities is observable. It is unknown to those on board how such an accumulation of water could have got below. The engineers, however, head to wind under full steam great seas were shipped, especially after 5 p.m., on the 7th, when the wind shifted to the north-west, on which the waist netting was broken in. For such seas the Prince Consort has no adequate means of freeing herself, her scuppers being only two in number, set right on the water; in her the outlet of the scuppers is 6 ft. below her bulwarks. But rolling chimneys and hanging lamps were her worst misfortunes and hatchways, entering the ship in every direction. Her capabilities for resisting leakage, also, are unknown, as she has not yet been docked since she was greatly increased by her fretful propensity to roll. It was this quality especially that troubled and disheartened so many of her crew. Her engines, boilers, screw shaft, and propeller, 760 tons, are of necessity placed (with the fuel) nearly in the bottom of the ship. On each side, chiefly above the keel line, she has 350 tons of iron armour-plates. The disadvantage of the application of weights for steerage purposes is unfortunately increased by her peculiar armament, which consists of eleven Armstrongs, 110-pounders, and twenty solid 68-pounders, weighing 120 tons in all, chiefly under her sides. A ship thus weighted must roll, unless means are adopted for distributing the weights or for counterbalancing them. The Prince Consort has a beam of 60 ft. 6 in., is 271 ft. long, 54 ft. broad, and has a depth of hold of 19 ft. 10in. She draws 18 ft. 6 in. of water aft, 18 ft. 3 in. forward, and 18 ft. 10 in. amidships. She is very stiffly built, with the exception of wood sully, does not rot. Her decks, of which there are six, are covered with teak.

THE PRINCE CONSORT IN A GALE, FROM A SKETCH BY AN OFFICER ON BOARD.—SEE PRECEDING PAGE.

THE RAILWAY-BRIDGE ABOUT TO BE ERECTED ACROSS LUDGATE-HILL BY THE LONDON, CHATHAM, AND DOVER RAILWAY COMPANY.

SEE NEXT PAGE.

MEMBERS OUT OF PARLIAMENT.

There is a prejudice in the House of Commons against lawyers, as members of the Bar are there generally called. In the first instance, it is founded on the notion that every barrister who takes to so much politics as is implied in representing a constituency is intent, above all things, on obtaining a place or preferment of some kind. Then, it is assumed that gentlemen of the long robe (their robes are no longer than those of anybody else that wears robes, wherefore the Parliamentary designation is not immediately apparent) always take narrow views of subjects, nibble at details, and refine away substance in their arguments; as if every lay member took a broad, philosophical survey of questions, and never brought them within the scope of his comprehension and his proclivities. Again, it is assumed that the professional advocate is always long in speech, and by consequence, as it were, prosy; and, in short, the case may be summed up by saying that a class of men of necessity of intellect up to, if not above, the average, subjected to severe training, of considerable experience of men and things, practised as public speakers, and who by reaching a certain eminence in their calling have given guarantee for character and honour, when they come within the precincts of the Legislature become dull, tiresome, squirrel-minded (we thank Tom Moore for teaching us that word), and self-seeking individuals, who stand out and apart from that body of superlatively proper gentlemen who, though legislators, happen not to be lawyers. The fallacy might be easily made clear, but it endures and inures in the house, and so there is no use in struggling against it. It is for this reason that one is enabled to enumerate on the fingers of one hand the great lawyers who have been successes in the House of Commons in the last twenty-five years. At present we have two who occupy marked positions on opposite sides of the house. When Lord Derby's Government was in office, probably for the first time since Murray became Mansfield, a Solicitor-General was seen taking, or rather was given, the leading part in great debates. It was the fortune of Sir Hugh Cairns twice, when the fate of his party was in question, to have committed to him the onerous duty, in the one case, of replying to one of the chief leaders of the Opposition at a critical moment of the discussion; and in the other to wind up the debate on the part of the Government to which he belonged, a post which it was believed that Mr. Disraeli would have yielded to no man but one who, had not merely his own confidence, but was fully accepted by the House. Thenceforward Sir Hugh Cairns stood in a great position for a lawyer in Parliament, and he held it alone—for to talk of Mr. Whiteside in the same breath would have been absurd—until Sir Roundell Palmer made his re-entry into the Legislature. That learned gentleman, holding at first the same office as that which Sir Hugh Cairns raised to such importance during his tenure of it, took the same position for his Government. To him has been assigned one of the chief posts in debate, and to him has been intrusted the same function of winding up formal debates on the part of Ministers; so that a certain rivalry between the two lawyers who have soared above the prepossessions of the House, and stepped into its very highest places, is complete, even in the smallest minutiæ. Their styles are essentially different. Sir Hugh Cairns, though fluent and unfaltering in speech, correct in the collocation of his words, and energetic in his demeanour, with a certain chastening of his energy, uses plain language, seldom if ever rises or falls (according to opinion) to a trope, and, so far from being declamatory, has a tendency to hardness in his style. A logical reasoner, he is often ingenious; but when he is on that tack is not so subtle as wholly to conceal that he is exercising his skill in that way; and, on the whole, gives the impression that he wants breadth, and is rather inclined to attack a subject in detail than to charge in force upon it. Sir Roundell Palmer is a man of great natural and acquired eloquence, a master of the grander and less colloquial phraseology of our language; and, indeed, when he formerly sat in Parliament, exhibited a tendency towards a style which was only not declamatory because he did not use mere words, but in all he said, if a little too verbosely said, he produced matter and substance. A few years of rigid legal advocacy has toned that style down to one, in the use of which he is capable of running through the whole gamut of Parliamentary oratory. As a speaker, he is superior to most of the members of the House; but he does not fly beyond that region of eloquence which the House has prescribed for itself. He has the happy art, if art it be, of letting it be seen that he believes in what he is saying; and whereas no one is more capable of skilful and ingenious argumentation, that quality is always made subservient to a certain depth and comprehensiveness in dealing with a subject which, in combination with a manner which is deferential to the House while it is palpably unalloyed by the least tinge of moral timidity, makes up the perfection of philosophical oratory. We have been led almost unconsciously into this dissertation on the qualities of two members of the House, who have vindicated, in the most remarkable manner, their class from what, we repeat, is a prejudice under which they labour in Parliament, by observing that Sir Hugh Cairns has been speaking at a public meeting at Belfast, a course which, if we remember rightly, he has very seldom taken. The subject-matter was important, inasmuch as he formed one of a body of gentlemen who met to consider whether the Irish Protestant Church was in danger or not, and to devise measures to meet danger if it supervened. The plan proposed by Sir Hugh seems to us an illustration of his Parliamentary tactique, as endeavoured to be indicated above. He suggests a re-distribution of the revenues of the Church in such a manner that work and pay should be made more nearly coincident, and that the revenue of a parish without Protestants should be transferred to support a minister where there were many. The point against the Irish Church being that a parish of Roman Catholics is taxed to pay a Protestant teacher, the remedy suggested is to continue the impost without having any minister at all. Sir Hugh is only half an Irishman; but really this is more Irish than anything Irish itself.

For, we believe, the third time in the course of these desultory chronicles this year, we have to return to Essex. Already we have had to point out that the Conservative representative element there was in a state of chronic activity, and, circumstances having prevented some of the Essex members from attending their fraternal gatherings on previous occasions, the absentees showed last week at Maldon, and, in choosing that place, seem to have had a special purpose. It is well known that in that borough is to be found the one Liberal Essex member. There a Liberal Independent Club has had its head-quarters, and every year has brought into one focus the heads of the Liberal party in the county, who are in the habit of sending for outlying Liberal members, who are connected by birth and property with Essex, and petting and cosseting the one Radical lamb, whose plaintive bleatings of triumph in having won a seat from the "Conservative ten" must be so distasteful to the ears of the latter. In fact, it seems as if the object was to mob him out of Maldon; to excommunicate him in the very hall where he has been almost canonised; and as we have not yet had tidings of the annual meeting of the Liberals in the borough, and as the Tories have got their candidate for the next election cut and dried, it may be that the political *status quo* in Essex is at hand. As a humble historian in these columns once and again of his oratorical feats at Maldon, we venture to ask, Where is Mr. Western this year? At the meeting on which we are now dilating Mr. Perry Watlington took the chair. A product of the last general election, this gentleman has taken a very fair stand in the ranks of the Conservative party in the house. When it is said that he is very generally known by the frequenters of that place, a good deal more is implied in his favour, as a young member, than may be supposed. But, of course, the great gun—popgun we had almost said—of the occasion was Mr. G. M. W. Peacocke. In most of his personal and Parliamentary attributes this hon. member would seem to be a survivor, or, rather, a reviver, of that school of philosophical politicians, half out of egg-shells, which flourished some twenty years ago under the title of Young England; and as he continues to quote Mr. George Smythe's poetry, who was the laureate of the party, the evidence against or in favour of him, as the case may be, on this point seems to be complete. He is one of our prime favourites is Mr. Peacocke. His I-will-not-touch-pitch-lest-I-should-be-defiled manner—he never takes off his gloves in the house—his measured style of speaking, the quiet way in which he says very cutting things, the unconscious impudence, the settled composure, the immobile countenance, only the eyes expressing any emotion, and the self-satisfied tone of *ex cathedrâ* criticism on statesmen and measures of all degrees, the solemn assumption of prophetic warning, and sometimes the downright threat of what he will do if things are not ordered as he suggests, within a certain time, are inimitable and unique. In all his specialties and peculiar qualifications, such as they are, there is no member in the house who in the least degree approaches or can be assimilated to Mr. Peacocke, and, if that is not a distinction, what is?

THE LUDGATE-HILL RAILWAY VIADUCT.

The Engraving of this structure which we give on the preceding page accurately represents the bridge intended to be forthwith erected by the London, Chatham, and Dover Railway Company across Ludgate-hill and the position in which it will be placed. The design is identical with that exhibited by the company in 1860 before the Parliamentary Committees of both Houses.

At the point where this bridge will cross Ludgate-hill the street itself is only 42 ft. wide; but, as the City Corporation intend at some future time to enlarge the thoroughfare, the span is to be made 18 ft. wider than the street, and will extend, therefore, to 60 ft. It will be composed of five girders of wrought iron, which will be screened from sight by ornamental ironwork, and their straight, hard lines will be broken up by brackets of cast iron and by medallions. The latter are to be eight in number, and made of bronze, bearing alternately the city of London arms and those of the London, Chatham, and Dover Railway Company. The City arms will be the largest and most prominent, and will be placed immediately beneath the four handsome gas-lamps by which the bridge will be lighted. The parapets will be of cast iron. The abutments, formed of dressed Portland stone, will contain staircases leading from the pavement beneath, by means of which persons may proceed to the railway station—to be situated almost directly overhead—or they may cross the bridge by one of the two footways placed at its side and communicating with the companion staircase in the opposite abutment, descend, and so avoid all danger and inconvenience in crossing a road usually thronged by horses and vehicles of all descriptions. The bridge will carry four lines of rail—two of mixed and two of narrow gauge, and it will be raised 18 ft. above the level of the street.

The Ludgate-hill railway station will be placed between Bridge-street and Earl-street, Blackfriars, and its carriage approach will be from Earl-street. The latter thoroughfare is about to be widened by the Board of Works, and to be continued in a direct course towards Cannon-street, whereby there will then not only be an easy and brief cut towards London Bridge and the eastern parts of the City, but the great thoroughfare up Ludgate-hill, round St. Paul's, and down Cheapside will be considerably relieved. The line of railway from Ludgate-hill station will run in a north-easterly direction, passing under Skinner-street, Snow-hill, to a junction with the Metropolitan Railway near Charles-street, Smithfield; and there will also be a spur line from it, in a still more easterly course, to meet the line of the Metropolitan Railway Extension to Finsbury, at a point near the northern extremity of King-street, Smithfield. These lines will therefore, on the one hand, connect the London, Chatham, and Dover Railway with all the great railways to the north, north-western, and western parts of the kingdom; and, upon the other, with those of the eastern counties; besides affording to persons living in, or visiting different parts of, London convenient railway communication with particular districts in this vast metropolis to which they may desire to go.

In regard to the various plans proposed to obviate the necessity of having a railway bridge across Ludgate-hill, little need now be said. The chief difficulty in the way of tunnelling was the short distance from the bank of the Thames to the junction which this line must make with the Metropolitan line, and which would necessitate a very steep gradient. But this was not all. Had the line been carried under Ludgate-hill it would have had to make a slight détour, for the purpose of easing the ascent, and the cost of constructing it would have been enormously increased. One of the most feasible of the suggestions made in regard to a change of course and to the construction of a tunnel involved the destruction of Apothecaries' Hall, the churchyard adjoining it, the *Times* printing-offices, and serious interference with the foundations of St. Martin's Church, Ludgate-hill, the Old Bailey Sessions House, and Newgate Prison.

The railway authorities have done much in this matter towards meeting the wishes of the public, without actually imperilling the success of their own undertaking. They are about to erect a bridge which will be wide enough to admit of improvements being made in the thoroughfare beneath—one that will contrast very forcibly with the less ornamental, yet still, perhaps, useful, girder-bridge now in course of erection near London Bridge.

The designs for the Ludgate-hill Railway Bridge were furnished by Messrs. Joseph Cubitt and F. T. Turner, joint engineers to the London, Chatham, and Dover Railway Company; the architectural features being designed by Mr. John Taylor, jun., architect. The bridge, which will be commenced immediately, will, it is stated, be completed in the course of next spring.

METROPOLITAN NEWS.

The new Lord Mayor has resigned his seat at the Metropolitan Board of Works.

Nadar's balloon is being exhibited at the Crystal Palace. It is suspended from the roof of the great transept, and is inflated to its full dimensions.

Mr. Alderman Lawrence was on Saturday inducted into the office of Lord Mayor for the ensuing year, with the usual formalities. A summary of the doings on Lord Mayor's Day is given in another page.

At a meeting of the Metropolitan Board of Works yesterday week a motion was carried to apply to Parliament for powers to construct a park for the south-eastern district of the metropolis.

The number of students in attendance at the evening classes at King's College, which opened for the winter session last month, has already reached 539. The classes place a systematic collegiate education within the reach of those engaged during the day.

The first meeting this session of the Law Amendment Society was held on Monday evening. The annual address of the council was read and considered, and a committee was appointed to take action in reference to the concentration of the law courts.

Yesterday week a farewell meeting of the pioneer party of settlers, in connection with the Church of England Emigration Society, who are about to proceed to Auckland, New Zealand, took place at the schoolroom of St. Paul's Church, High-street, Shadwell.

Mr. Thomas Hodges, chairman of the board of guardians at Shoreditch, has been presented with a substantial testimony of the ratepayers' regard, consisting of dinner, tea, and coffee services, a silver salver, a silver cup, and a beautiful clock—the amount of the subscription being about £250.

The 22nd anniversary of the birth of the Prince of Wales was ushered in on Monday morning by the ringing of the bells at most of the churches and the display of flags and banners at several of the Royal tradesmen's establishments. In the evening the loyalty found vent in private banquets and in illuminations, which almost assumed a general aspect.

The births of 1963 children—1011 boys and 952 girls—were registered last week in London. In the ten corresponding weeks of the years 1853-62 the average number (corrected) was 1879.——The deaths in London increase as the colder season draws on, but hitherto the rate of increase has been slight. They were 1270 in the week that ended last Saturday. The average number of deaths in ten corresponding weeks (viz., the 45th in each of the years 1853-62) is, with a correction for increase of population, 1270. There were 23 deaths from smallpox. Scarlatina was recorded in 125 cases. Typhus exhibits an increased mortality.

The Temple Gardens, with their fine shows of chrysanthemums, brought so near to a state of perfection by the skill and care of the gardeners, Messrs. Broome and Lane, are now open to the public. The flowers are not so forward as those of last year were at this period, owing to the continuance of dry weather at the time when they usually begin to grow fast, the development of bloom having thereby been retarded about a fortnight. Despite this, however, and the recent heavy gales, which did some injury to the plants, there are some beautiful specimens in full bloom.

The members of the Ethnological Society assembled on Tuesday evening for the first ordinary meeting of the season—Mr. Lubbock, the president, in the chair. A paper, contributed by Mr. Crawfurd, was read, "On the commixture of the races of man as affecting the progress of civilisation," being a continuation of the papers previously contributed by Mr. Crawfurd on the same subject. A second paper, entitled "A correct outline of the classification of the Tamul castes," by Simon Casie Chitty Maniegar, was read, which gave rise to some discussion.

The Court of Common Council met yesterday week to consider the question of removing that long-standing grievance, the steep inclines of Holborn-hill and Skinner-street down into the valley of the Fleet. Mr. Deputy Fry, as chairman of the committee to whom this question had been submitted, reported that the committee were unanimously in favour of a design for removing these streets altogether, and forming a new street on a high and straight level from the top of Skinner-street to Hatton-garden, or still higher up Holborn if necessary. The Common Council unanimously agreed to the report, and remitted it to the committee to take the necessary steps for carrying out the design. Three of the plans embrace this bold feature, and it will be for the committee to choose between them.

The bill of fare for the dinner at Guildhall on Lord Mayor's Day was as follows:—250 tureens of real turtle, containing 5 pints each; 200 bottles of sherbet, 6 dishes of fish, 30 entrées, 4 boiled turkeys and oysters, 60 roast pullets, 60 dishes of fowls, 46 dishes of capons, 50 French pies, 60 pigeon pies, 53 hams (ornamented), 43 tongues, 2 quarters of house lamb, 2 barons of beef, 3 rounds of beef, 2 stewed rumps of beef; 13 sirloins, rumps, and ribs of beef; 6 dishes of asparagus, 60 dishes of mashed and other potatoes, 44 dishes of shellfish, 4 dishes of prawns, 140 jellies, 50 blancmanges, 40 dishes of tarts (creamed), 40 dishes of almond pastry, 30 dishes of orange and other tourtes, 20 Chantilly baskets, 60 dishes of mince pies, and 60 salads. The removes: 80 roast turkeys, 6 leverets, 80 pheasants, 24 geese, 40 dishes of partridges, 15 dishes of wild fowl, and 2 peafowls. Dessert: 100 pineapples, from 2 lb. to 3 lb. each; 200 dishes of hothouse grapes, 250 ice creams, 50 dishes of apples, 100 dishes of pears, 60 ornamented Savoy cakes, 75 plates of walnuts, 80 plates of dried fruits and preserves, 50 plates of preserved ginger, 60 plates of rout cakes and chips, and 46 plates of brandy cherries. The wines comprised champagne, hock, claret, madeira, port, and sherry.

The first meeting of this season of the Royal Geographical Society was held on Monday evening at Burlington House, Piccadilly—Sir Roderick Murchison, the president, in the chair. The room was crowded. The chairman, after a few prefatory remarks, announced that Mr. Markham would read a paper by Baron Charles Von der Decken, "On the Snowy Mountains of Eastern Equatorial Africa." He said he had great pleasure in informing them that the Baron was then present, and was in England for the express purpose of fitting out another expedition. The paper stated that the highest mountain in Africa was the Killimandjaro, whose summit was 20,000 ft., and the snow descended below 16,000 ft. He then gave an account of his efforts to penetrate inland, together with the manners and customs of the people and products of the country. He also mentioned an insect called the donderoo, which had never before been heard of in Europe, whose bite was so fatal to goats and asses that they died within two days after receiving the bite of that insect; and when questioned concerning the latter animal he said he thought the ass made a much greater impression on the minds of the wild tribe than the European did. The following gentlemen then spoke:—Mr. M'Queen, Captain Maury, Mr. John Crawfurd, Sir Edward Belcher, Lord Donoughmore, Mr. Tinney, Bishop Colenso, &c., after which a communication from Dr. Blaikie on the Niger expedition was read.

Law and Police.—The Alexandra case is to come on in the Court of Exchequer, on Tuesday next.

A rule nisi to set aside the execution under which the Great Eastern has been seized for debt was granted by the Court of Queen's Bench on Friday.

Vice-Chancellor Wood decided on Tuesday that Mr. Boucicault, the actor, had no copyright in the well-known piece, "The Colleen Bawn," he having first produced it in America. His application to restrain another person from having it represented was dismissed with costs.

The case of "Hudson v. Slade and others," Benchers of the Temple, has been decided by Sir John Coleridge, to whom it was referred by the Chief Justice. Mr. Hudson is to withdraw all imputations against the Benchers of want of honour or gentlemanly feelings on the evenings of the dispute, and the Benchers, in their turn, are to pay Mr. Hudson £50.

Jane Henderson, lady's-maid to Miss Emily F. Domville, an invalid, living at Connaught-place West, has been committed from the Marylebone Police Court, charged with stealing nearly £2000 worth of jewellery, the property of Mr. Hancock, of Bruton-street. Mr. Hancock was in the habit of sending large quantities of jewellery for Miss Domville to select from; the articles were taken to her by the maid, who from time to time helped herself.

Triple Murder and Suicide of the Murderer.—On Saturday night, between eight and nine o'clock, a cab was hired at the Shoreditch station of the Great Eastern Railway, and a man and a woman, accompanied by two little girls, got into it. In Bishopsgate-street the man stopped the cab at the Green Dragon public-house, and told the driver to get him some half-and-half. The driver complied, and the liquor was drunk by the persons in the cab. The driver had been ordered to go to the Royal Oak, Westbourne-grove, by way of the City, and after the stoppage just mentioned proceeded on his journey. In Holborn he was again checked. The man got out of the cab, paid the driver his fare, and told him to take the lady to her destination. On arriving at the Royal Oak and opening the door of the cab the woman and the two children were found to be dead. The bodies were taken to an hospital, where the surgeon in attendance expressed a strong opinion that they had been poisoned by prussic acid, which it is supposed had been mixed with the beer. A reward of £100 was at once offered for the apprehension of the man. An inquest was opened on Monday, without anything of consequence being added to the facts; but during the course of Tuesday the mystery was cleared up, though another horror was added to the tragedy. A letter-carrier at Camberwell, named Prescott, had read in the papers an account of the circumstances connected with the murder, and as he remembered having seen a neighbour, named Hunt, enter his house alone on Sunday, the thought crossed his mind that Mrs. Hunt and her children might have been the victims, especially as the description circulated by the police applied closely to them. He communicated his suspicions on Monday night to the police, who at once went to the house, which is one of a row called St. Ann's Cottages, Wellington-street, Camberwell-road. They found the door bolted, but succeeded in obtaining admission, and met Hunt in the passage. They followed him into a room, where he sank into a chair. The police told him what their object was; and Hunt said, in reply, "I cannot speak to you. I have a pain, a disease of the heart." The inspector and his colleague saw that the man was in a dying state, and they had him at once removed to the Camberwell Police-station, and obtained the immediate assistance of two medical gentlemen residing in the district; but within three-quarters of an hour of the first interview the police had with him he died from the effects of aconite, which he no doubt took as soon as he was aware of the presence of the police at his door. The letter-carrier has since identified the dead bodies as those of Mrs. Hunt and her children. The cabman also at once identified the body of the man. The reporters give the following particulars of the murderer:—The man is thirty-four years of age; his name is Samuel Hunt, but he is in no way related to Mr. Hunt, the chemist, of whom the zinc ointment which was found in the woman's possession was purchased. Hunt was a traveller in the employment of Messrs. Butler and M'Culloch, seedsmen, herbalists, and druggists, of Covent-garden, and in that capacity seems to have obtained some knowledge of herbs. For the pursuit of that knowledge he fitted up a small laboratory in his house. The neighbours represent that he and his wife were constantly quarrelling, and at times they appeared to be very wretched. He had been heard on more than one occasion to say he would "do for his wife and children one of these days." Hunt was at his usual business during the whole of Friday last, and before going away he stated to his employers that he wished for leave of absence on Saturday in order to take his wife and children out of town. The permission was granted, and he was absent on Saturday. On Monday morning Hunt attended again at Covent-garden, and was engaged in his duties till half-past seven o'clock in the evening, but there was nothing remarkable in his appearance and conduct.

We are assured that a woman who kept an inn at Krumau, in Austria, and recently died, weighed 853 lb. English.

Lord Chesham died on Tuesday night, at the family residence in Grosvenor-square, after a severe illness of about three weeks. His Lordship was in his seventy-first year.

The borough of Tenby makes a curious figure in the population returns. The population at the Census of 1851 was 2982, and again the Census of 1861 found exactly 2982 inhabitants. There was one more male in the place in 1861 than in 1851, but there was one female less.

In accordance with instructions from the Government the steam-rams in the Mersey have been valued. El Toussin was appraised at £106,000, and the unfinished El Monassir at £80,000. Messrs. Laird refused to disclose the contract price. It is stated that the Government wish to purchase the vessels.

Testimonials to Clergymen.—The Rev. C. Stephenson, who has been Curate of St. John the Baptist Church at Kentish-town for seven years, has received a pocket sacramental service, and a purse containing £70, on his quitting that district. The congregation of the parish church of Farnham, Dorset, have presented the Rev. William Finch, M.A., Curate, with a silver inkstand and other articles. The *Guardian* records the following presentation of testimonials to clergymen:—To the Rev. T. A. Wills, a silver inkstand and tea-service, with the names of the subscribers illuminated on vellum, on leaving the curacy of Wickham, Hants. The Rev. R. H. White, on leaving the curacy of Martham, Norfolk, a silver pocket communion service and an inkstand. The Rev. Matthew Thomas, on leaving the curacy of Alvington, a gold pencil-case, penholder, and pen, by the ladies, and a purse containing £14 3s. 6d. by the parishioners and school children. The Rev. George Shaw, a silver salver and purse of sovereigns, on his leaving the curacy of Kinver, Stourbridge. The Rev. J. G. Pilkington, Curate of St. John the Baptist, Toxteth Park, Liverpool, a purse containing £72, together with an address illuminated on vellum, from the congregation, on his leaving the parish. The Rev. W. N. M'Guinness, minister of Verulam Episcopal Chapel and Curate of Lambeth, a silver salver from the congregation, and a silver inkstand from the Sunday-school teachers and scholars, as testimonials of esteem for his valuable ministry. The Rev. Dr. Wilde, a timepiece and a pair of drawing-room stands, from the parishioners, on his resignation on account of the delicate state of his health, after nine years' incumbency of Dodderhill and Elmbridge, near Droitwich. The Rev. A. T. Gregory, a silver salver and cake-basket, value £50, from the parishioners, on his resignation of the perpetual curacy of Flixton, which he had held twenty years.

THE FARM.

The East Lothian Farmers' Club have held an important discussion on the subject of steam-ploughing. Mr. Scott Skirving, the president for the evening, stated that there were only three steam-ploughs in Scotland, as against 500 in England, and gave "the bad farming in England" as the somewhat paradoxical reason for such a remarkable majority. The first trial under the auspices of the Highland Society was that of Heathcot's steam-plough at Dumfries, in 1837, and, to use the words of Mr. Hall Maxwell, "the machine was a failure, and the remains, I believe, still lie in Lochar Moss." Mr. Skirving thus put the parallel between the horses of flesh and steam. "All seemed to agree," he said, "that from ten to fifteen years was the lifetime of a steam-plough, and several put it at only ten; whereas, if he began a farm with twenty-four horses, all of them four-year olds, and continued for ten years, many of these horses would be dead, some of them lame, and others broken-winded; and if he sold his stock when they had reached fourteen years of age he would get little for them." Mr. Sadlier, of Ferrygate, had some important experience to communicate respecting "the horse of iron, who eats only when he labours." He did not attempt to decide between the great rival systems—the turnover furrow v. the smashing up without inversion, but thus epitomised the respective advantages of Fowler's and Howard's implements:—"If Fowler cannot send a light implement over the land in moist weather and prepare a seed-bed in the excellent manner in which I saw Howard doing the other day at Fentonbarns, in potato-land in preparation for wheat, he can, on the other hand, drive a grubber, two yards wide, through the ground in dry weather at the rate of ten and fifteen acres per day or more, at 1s. 6d. per acre, employing only six people, part of whom are boys, and he can dig 10 in. or 12 in. deep in solid clay, as I have been doing this autumn. Fowler, however, requires more favourable circumstances; he does not adapt himself so much to the tenant; he will not work in angles; he must have the fences 400 yards apart; and he must have the stones taken out of his way."

With respect to Mr. Fowler's advice to use breast-diggers and abandon cultivators, Mr. Sadlier observes that the cultivator or grubber must be adhered to in working potato and bean land in autumn for wheat, the drill following the engine close up. He also stated his experience that where potatoes are to be grown the crop can be increased a fourth by the use of steam power; that it will pay any man who grows forty acres of them to use it; and that, in fact, this crop will bring in the best return for such outlay. The fourteen horses on his farm have been reduced to nine without inconvenience; and, in course of time, Mr. Sadlier expects "to find no fields less than one mile long and 400 yards wide, hedges on one side of each field removed, and in its place a sunk fence on each side of a road for the engine."

The subject of expense was summed up by Mr. Hope, of Fenton Barns, in this wise:—"As the cultivator goes over fully six imperial acres daily, the expenses may be reckoned nearly 4s. per acre, exclusive of interest on capital invested, and the tear and wear. This is greater or less per acre, according to the number of acres it is spread over. The apparatus I have got cost £550. Say I count for interest and depreciation £70 per annum, and spread this over betwixt 400 and 450 imperial acres, which I fully expect to accomplish, this will add nearly other 3s. 6d. per acre, and make the total expense 7s. 6d. per imperial acre. From the quality of the work performed, I consider it fully worth this sum; besides, I anticipate other incidental advantages, such as keeping the land more easily clean, and getting the various crops sown in better time."

The Sarsden herd, 120 strong, will be sold by Mr. Strafford in the spring, and the grand flock of about 2000 Cotswolds will come under the hammer of Messrs. Lynn and Son. Among the fresh arrivals are a red Churchwarden, from Countess; a red Charming Woman, from Roan Duchess; and a red Aunt Sally, from Sally. The cow Ringlet, about whose chances some weighty doubts were expressed at Mr. Ambler's sale, has enriched Mr. G. Atkinson's herd with a roan bull-calf, by McTurk. Mr. Ambler has taken no steps, as yet, to form another shorthorn herd, but is going into Leicester sheep, which he considers well-suited to the district.

Mr. Wilson of Brawith's shorthorn stock was sold by Mr. Wetherell on Wednesday last. The twelve bulls and thirty-three cows and heifers averaged £35 7s. The highest price was 76 gs., which was given by Sir A. de Rothschild, of Aston Clinton, for Eardrop by Emperor (6973), from Golden Drop by Prince George (5024).

NATIONAL SPORTS.

The sports of the great "pulling-up-behind-and-before month," as it has been too aptly termed, progress pretty favourably on the whole. Hereford has had a better meeting than usual; and at Worcester, where the Lexington stock were in great force over the flat and the fence, old Medora performed so well that, even with 18 lb. extra, she was made first favourite at 3 to 1 on her for the Worcestershire Cup, at Upton-upon-Severn. She had won this cup in 1861-2; but she fell at a grip, and shot Mr. Rowlands out of the saddle, when her chances of winning again were excellent. Lord Stamford's forty-five horses in training and twenty yearlings—which include own brothers to Imaus and Kildonan, sister to Saccharometer, and half brothers to Cambuscan, Diophantus, Nutbush, Tom Fool, and Glenbuck—are announced for sale at Newmarket on Wednesday, Dec. 2. His Lordship's trainer, Joseph Dawson, suddenly found himself a general without his army, a few days since, as all his horses were taken from him when out at exercise on the heath and sent home in two divisions to William Butler's and Daley's old stables. We conclude that there must have been some solid reason for this very public and galling mark of non-confidence in a trainer who has won so much for his Lordship; but still we do not forget that Sam Rogers had to send in the "blue and black belt" almost as summarily this spring because he failed to win upon a wretched, faint-hearted mare. The *Life* also states, in justice to the trainer, whose character has always stood high in the racing world, that Limosina was examined at his Lordship's request directly after the race for the Cambridgeshire Stakes, and that there were no symptoms of "dosing" or poisoning about her. Cambuscan is among the lots for sale, but Newcastle, Dulcibella, and the brood mares are not. The Two Thousand entries for 1865 exceed by thirty those for the present year, and are eleven in advance of those for 1864; whereas the prospects of the One Thousand are not quite so promising.

The deer-stalking season in Scotland has been very excellent, and the deer, owing to the mild spring, are remarkably fine. Sir Thomas Ridley has shot one of the largest, after having had his eye on it for two or three seasons. Except on the low moors, the grouse have not been very numerous; black game have been a good average, and capercailzie immensely on the increase in Perthshire. The salmon-fisheries have been rather short of grilse; still it has been a good season on the whole, especially near the sea-coast, and the price was never lower, except in 1854. The rod-fishing has been capital, and Lord Willoughby has been especially successful on the Tay, at Stobhall. The largest which has been got with a net on that river this season weighs 54 lb.

Sea Pink, Coorooran, and Carabradzo were all beaten in the Clifton Cup at Ridgway Club; and Mr. Spinks's kennel, which had been unlucky in the North Lancashire Stakes, did much better with its Sea Breeze and Sea Bird in the South Lancashire. The Canaradzo blood had no luck at the Cirencester Club, where a daughter of Racketty Hop Picker divided the Oaks with Luna by David, and Tornado by Regan won the Derby. This club consists at present of 111 members. The Yarmouth Club, Aberystwith, Spelthorne Club, Altcar Club, the Ardrossan Club, and the Marbury meetings are fixed for next week.

LIVERPOOL AUTUMN MEETING.—Wednesday.

Handicap Hurdle Race.—Pot Pourri, 1. Bowman, 2. Soothsayer, 3.
Juvenile Stakes.—Alpheus, 1. Orphene, 2. Persuasion, 3.
Flying Handicap.—Gemma, 1. Farfalla, 2. Pupil, 3.
Sweepstakes of 10 sovs.—Birkenhead, 1. Rothschild, 2. Birthday f., 3.
Knowsley Nursery Stakes.—Cutaway, 1. Practitioner, 2. Jane Shore, 3.
Handicap Plate.—Cassidia, 1. Confidence, 2.
Aintree Plate.—Despair, 1. East Lancashire, 2. Sorceress, 3.
All-aged Selling Stakes.—Prescription, 1. Highland Mary, 2. Acceptance, 3

Thursday.

Scurry Nursery Handicap.—Cutaway, 1. Virginia, 2. Alice Leigh, 3.
Sweepstakes.—Jenny Wren, 1. Lord Dundreary, 2. Crisis, 3.
£50 Handicap Plate.—Spicebox, 1. Erythia, 2. Vigil, 3.
Sefton Handicap.—Alice, 1. Dead heat between Charming Woman and Despair.
Autumn Steeplechase.—Reporter, 1. De Ruyter, 2. Thomastown, 3.
Hunters' Stakes.—The Monk, 1. Zeloo, 2. Emblem, 3.
Handicap Plate of 50 sovs.—Bernice, 1. East Lancashire, 2. Poland, 3.
Helter Skelter Stakes.—Mrs. Nesbitt, 1.

A French paper announces that Mr. Pritchard and his family have perished at sea, while passing from one of the Fejee Islands, where he was Consul, to another. The American Consul was also on board, and shared the same fate. Mr. Pritchard was Consul at Tahiti at the time of the French occupation of that island, and the treatment he then received very nearly involved the two nations in war.

The Caucasus.—A letter from Constantinople of the 28th ult. states:—"The news which arrives here from the Caucasus, and especially from the Circassian coast, is exceedingly unfavourable for the Russians. The excitement and discontent are on the increase. Fighting is going on in Daghestan, on the banks of the Caspian, and, at the same time, on those of the Black Sea. In the latter region it is especially the districts between Anapa and Souchum-Kaleh which are insurgent. The Russians operate against the insurgents, having the sea as their base of operations. To this end they employ a flotilla of twelve war-steamers, which take in tow a number of transport-vessels. If this number could be proved it would establish a breach of the stipulation of the Treaty of Paris, according to which Russia consented to the neutralisation of the Black Sea, reserving only the power of maintaining there six war-steamers. The war on the Circassian coast is carried on by the Russians with the same ferocity as in Poland. The burning of villages and the expulsion of all the inhabitants into the mountains is the order of the day. The fact that arms and ammunition have been furnished to the insurgents by way of the sea has at the same time given occasion to a strict blockade, in which a part of the steamers of the so-called Odessa Company are made use of."—The *Invalide Russe* publishes a ukase ordering the 19th, 20th, and 21st Divisions of Grenadiers in the Caucasus cavalry and artillery to be placed on a war footing, and the formation of reserve battalions, squadrons, and batteries.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Notwithstanding that the demand for gold for export purposes still continues somewhat active, and that the stock of bullion in the Bank of France is reduced to £8,400,000, the value of Home Securities has been fairly supported, and the sales of stock for money have not increased. The business doing, however, has been much restricted. In Indian Stocks, &c., the dealings have been very moderate.

The demand for money for commercial purposes has been rather on the increase. On Thursday the directors of the Bank of England separated at their weekly meeting without making any alterations in their rates of discount.

The lowest rates for the best commercial paper in Lombard-street are as follow:—

Thirty days' bills	6 per cent.		Four months'	6¼ 6½ per cent
Sixty days'	6 "		Six months'	6½ 7 "
Three months'	6¼ "			

In the Stock Exchange no advances can be obtained under 5 per cent for short periods, or 5½ to 6 per cent till the next account. In order to give some relief to the money market the Council for India have notified that, in future, they will draw bills upon the various presidencies at the rate of £900,000 per month, instead of £700,000 as previously. The steamer for the East has taken out £656,590, including £153,300 in gold for Alexandria, on account of cotton houses.

About £350,000 has arrived from various quarters; but the whole of that amount, as well as several parcels withdrawn from the Bank of England, has been absorbed for export purposes.

Most of the Continental exchanges are unfavourable, but there is still a profit on the import of gold from America. On the Continent money is still advancing in price. We annex the rates in the leading cities:—

	Bank rate, per cent.	Open market, per cent.		Bank rate.	Open market.
Paris	7	7	Amsterdam	4	4½
Vienna	5	5 6	Turin	7	7
Berlin	4½	4½ 5	Brussels	4	4
Frankfort	5	5	Hamburg	—	5½
			St. Petersburg	6	9 10

At the above rates capital is somewhat scarce.

Considerable inactivity prevailed in the demand for National Stocks on Monday; nevertheless, no change of importance took place in prices. Consols, for Money, were done at 92⅝ ¾; Reduced and New Three per Cents, 90⅜ ½; India Five per Cents, 108⅝ ¾; India Bonds, 12s. to 17s. prem.; Exchequer Bills, 1s. to 6s. discount. Bank Stock was 236 to 234; India Stock, 224; and the Five per Cent Rupee Paper, 105½. On Tuesday the dealings were very limited. Consols closed at 92⅝; Bank Stock, 234 to 236; Reduced and New Three per Cents, 90⅜ ½; India Stock, 224 to 226; Ditto, New, 108⅝ ¾; Rupee Paper, 105½ to 105½, and 115½ to 116; Exchequer Bills, 3s. to 8s. discount. Increased heaviness was observed on Wednesday. Consols sold at 92¼ ⅜; Reduced and New Three per Cents, 90⅜ ½; Bank Stock, 234 to 236; India Stock, 224 to 226; Ditto, New, 108⅝ ¾; Rupee Paper, 105 to 105, and 115 to 116; India Bonds, 5s. to 10s. prem.; Exchequer Bills, 8s. to 4s. discount. On Thursday the market opened with rather more firmness, but subsequently became inactive. Consols closed at 92¼ to ½, for Money, and 91½ ⅝ ex div., for Account. Reduced and New Three per Cents marked 90⅝ ¾; Exchequer Bills, 9s. to 4s. dis.; and India Five per Cents, 108⅝ ¾.

Most American Securities have met a dull market, and prices have had a drooping tendency. Erie Shares have been 66½; Illinois Central Seven per Cents, 18½ dis.; and United States' Six per Cents, 68½.

There has been continued heaviness in the Market for Foreign Securities. Greek Bonds have fluctuated in value to some extent, but Spanish Securities have exhibited rather more firmness. In most other descriptions the tendency of prices has been downwards. Portuguese Scrip has marked 1½ to ¾ prem.; Brazilian, ¾ to ½ dis.; Italian, 1 prem.; and the Confederate Loan, 61 to 63. Brazilian Five per Cents have been done at 100; Ditto Four-and-a-Half per Cents, 1860, 89½; Chilian Six per Cents, 101; Ditto Four-and-a-Half per Cents, 85¼; Buenos Ayres Six per Cents, 101; Egyptian Seven per Cents, 98¾; Greek, 39¾ to 31½; Mexican Three per Cents, 29⅞; New Granada Land Warrants, 7⅝; Peruvian Four-and-a-Half per Cents, 1862, 86; Portuguese Three per Cents, 1862, 49½; Russian Five per Cents, 91; Ditto, 1862, 88 ex div.; Ditto Three per Cents, 56½; Ditto Four-and-a-Half per Cents, 90½; Sardinian Five per Cents, 89½; Spanish Three per Cents, 51½; Ditto, Passive, 34¾; Ditto, Certificates, 13½; Turkish Old Six per Cents, 91⅝; Ditto, 1858, 69⅞; Ditto, Small, 73; Ditto, 1862, 71½; Venezuela Six per Cents, 56¼; Belgian Four-and-a-Half per Cents, 97½ ex div.; Dutch Two-and-a-Half per Cents, 63½; Dutch Four per Cents, 100½; and Italian Five per Cents, 71⅝.

A fair business has been transacted in Joint-Stock Bank Shares, and the quotations have, in some instances, improved. Alliance have sold at 47; Ditto, New, 27¾; Anglo-Austrian, 6½; Australasia, 77; Ditto, New, 49; Bank of Egypt, 27; Bank of Otago, 10¾; Bank of New Zealand, 12¾; Brazilian and Portuguese, 7⅝; Chartered of India, Australia, and China, 37, ex New; Chartered Mercantile of India, London, and China, 71; Colonial, 40; English and Irish, 9¾; English, Scottish, and Australian Chartered, 23½; Hindustan, China, and Japan, 27½; Imperial, 23¼; Imperial Ottoman, 17¾; London Joint-Stock, 36½; London and Northern, 10½; London and Westminster, 79½; Mercantile and Exchange, 14; National Provincial of England, New, 28; Oriental, 58½ ex div.; Provincial of Ireland, 92½; Scinde, Punjaub, and Delhi, 5½ ex New; Union of Australia, 57½; and Union of London, 40.

Colonial Government Securities have been dealt in to a moderate extent as follows:—Canada Six per Cents, 1877-84, 103½; Ditto Five per Cents, 92; Cape Six per Cents, 110; New South Wales Five per Cents, 1871-6, 101¾; Ditto, 1888 to 1892, 102; and Victoria Six per Cents, 110½.

The Miscellaneous Market has been moderately active. Subjoined are the leading quotations:—Anglo-Mexican Mint, 20; Australian Agricultural, 20; British Indian Tea, 4½; Crystal Palace, 38; Ditto Debentures, 117½; Egyptian Commercial and Trading, 4½; Electric Telegraph, 106½; General Credit and Finance of London, 6¾; Great Ship, ½; Hudson's Bay, 14; International Financial Society, 9; Joint Stock Discount, 6⅝; London Financial Association, 15⅝; Madras Irrigation and Canal, 3½; National Discount, 9¾; Oriental Inland Steam, 2¼; Peninsular and Oriental Steam, 83½; Rio de Janeiro City Improvements, 27¾; Ditto, 5; Royal Mail Steam, 75 ex div.; Birmingham Canal, 93¾; Regent's, 24⅞; Berlin Waterworks, 9¾; Imperial Gas, 87; London, 87½ ex div.; Westminster Chartered, 87; European, 15⅝; Guardian Insurance, 50½; Imperial Fire, 350; London, 145; Indemnity Marine, 145; London and Provincial Marine, 2¼; Marine, 96; Ocean Marine, 17; Phœnix, 149 ex div.; Thames and Mersey Marine, 6¾.

Considerable flatness has prevailed in the Railway Share Market, and prices have not been supported. The "calls" for the present month amount to £970,206. The following are Thursday's official quotations:—

Ordinary Shares and Stocks.—Caledonian, 117¾; Great Eastern, 49¾; Great Northern 126; Great Western, 64¾; Ditto, South Wales, 65; London and Blackwall, 70¾; London and Brighton, 111; London, Chatham, and Dover, 45; London and North-Western, 103¾; London and South-Western, 101¾; Manchester, Sheffield, and Lincolnshire, 49½; Metropolitan, 126½; Midland, 128; North British, 53; North-Eastern—Berwick, 102; Ditto, Stockton and Darlington, 38; South-Eastern, 91¾; Staines, Wokingham, and Woking, 10½.

Preference Shares.—Bristol and Exeter Four per Cent, 91; Great Western—West Midland, Oxford, Second Guarantee, 121; London, Chatham, and Dover, 99; Manchester, Sheffield, and Lincolnshire, 125.

Lines Leased at Fixed Rentals.—Lancaster and Carlisle, 210½; London, Tilbury, and Southend, 100½.

British Possessions.—Bombay, Baroda, and Central India, 105¾; Buffalo and Lake Huron, 6¾; Eastern Bengal, 107¾; East Indian, 106¾; Grand Trunk of Canada, 21; Great Indian Peninsula, 107¾; Ditto, 13¼; Great Western of Canada, 10½; Ditto, New, 7½; Madras Five per Cents, 105½; Melbourne and Hobson's Bay, 57⅝; Delhi, 2½; Punjaub, 105½.

Foreign.—Antwerp and Rotterdam, 9; Bahia and San Francisco, 18¾; Namur and Liege, 9; Ditto, Six per Cent Pref., 20; Recife and San Francisco, 17½; South Austrian and Lombardo-Venetian, 21 ex div.; Turin and Savona, 15½.

The return of the Bank of England for the week ending November 11, shows the following results, when compared with the preceding statement:—

A decrease of circulation of	£687,595	A decrease of bullion of	£338,633
An increase of public deposits of	557,521	An increase of rest of	34,132
A decrease of other deposits of	196,862	An increase of reserve of	277,482
An increase of Securities of	65,909		

The total circulation is £22,115,423 Public deposits amount to £5,624,330; and private deposits to £13,664,311. Securities are £31,121,795; and the stock of bullion is £13,460,765.

THE MARKETS.

Corn Exchange (Nov. 9).—The supply of English wheat on sale here, to-day, was only moderate. Good and fine samples commanded a steady sale, at full prices; but other kinds moved off slowly, at late rates. Foreign wheat—the show of which was extensive—commanded extreme rates, with a fair consumptive demand. Floating cargoes were quite as dear as last week. Malting barley sold readily, at full currencies. Grinding and distilling sorts were dull, but not cheaper. About an average business was doing in malt, on former terms. The oat trade may be considered steady, at quite previous rates. Beans and peas were very inactive, but not cheaper. Flour was in moderate request, at the late decline in value.

Nov. 11.—The wheat trade was steady, at prices quite equal to Monday. All other kinds of produce moved off slowly, at late rates.

English.—Wheat, Essex and Kent, red, new, 40s. to 45s.; ditto, white, 41s. to 47s.; Norfolk and Suffolk, red, 40s. to 45s.; rye, 32s. to 34s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 33s.; malting ditto, 28s. to 38s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 57s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 27s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 22s.; ditto, white, 16s. to 23s.; tick beans, 28s. to 30s.; grey peas, 32s. to 34s.; maple, 36s. to 38s.; white, 36s. to 37s.; boilers, 36s. to 38s. per quarter. Town-made flour, 37s. to 40s.; town households, 34s. to 36s.; country marks, 27s. to 30s. per 280 lb. American flour, 19s. to 25s. per barrel; French, 36s. to 39s. per sack.

Arrivals this Week.—English and Scotch: Wheat, 950; barley, 2310; malt, 1290; oats, 2300; flour, 1470. Irish: Barley, 170; oats, 1180. Foreign: Wheat, 5830; barley, 1840; oats, 16,000.

Seeds.—Canary seed has sold freely, at very full prices. All other seeds have met a dull inquiry. In the value of cakes no change has taken place.

Linseed, English, crushing, 62s. to 66s.; Calcutta, 62s. 6d. to 64s. 6d.; hempseed, 44s. to 48s. per quarter; coriander, 14s. to 16s. per cwt.; brown mustard seed, 10s. to 13s.; white ditto, 10s. to 12s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed, 62s. to 65s. per quarter. Linseed cakes, English, £9 10s. to £10 10s.; ditto, foreign, £9 10s. to £11; rape cakes, £5 to £6 per ton; canary, 42s. to 56s. per quarter; red clover seed, 38s. to 75s.; white ditto, 64s. to 72s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 6½d. to 7d.; of household ditto, 5d. to 6d. per 4 lb. loaf.

Imperial Weekly Averages.—Wheat, 40s.; barley, 31s. 2d.; oats, 18s. 7d.; rye, 23s.; beans, 35s. 10d.; peas, 35s.

The Six Weeks' Averages.—Wheat, 40s. 7d.; barley, 34s. 4d.; oats, 19s.; rye, 26s. 5d.; beans, 36s. 6d.; peas, 35s. 7d.

English Grain Sold last Week.—Wheat, 105,093; barley, 99,697; oats, 8971; rye, 181; beans, 3464; peas, 1597 quarters.

Tea.—The market generally is steady, at full prices. Advices from China state that the exports had amounted to 55,000,000 lb.

Sugar.—All raw qualities continue in good request, and, in some instances, prices have further advanced 6d. per cwt. Refined goods move off freely, and common brown lumps are worth 50s. per cwt. The stock of sugar is 92,499 tons, against 79,219 tons last year.

Coffee.—The market is inactive, at about previous quotations. Stock, 9859 tons, against 9829 tons in 1862.

Rice.—Prices are unaltered, and the demand is restricted to small parcels. Stock, 41,400 tons, against 67,260 tons.

Provisions.—Most kinds of butter have moved off freely, at very full prices. Bacon is in moderate request, at 56s. per cwt. for sizable Waterford. Other provisions are inactive.

Tallow.—The demand is very inactive, at barely stationary prices. P.Y.C., on the spot, 42s. 9d. per cwt. Stock, 63,214 casks, against 43,340 casks last year.

Oils.—Linseed oil moves off slowly, at 41s. 9d. per cwt. All other oils are inactive, at barely stationary prices. French turpentine is freely offered, at 68s. per cwt.

Spirits.—Rum sells slowly, at 1s. 5d. per gallon for proof Leewards. Brandy is selling at from 3s. to 11s. 4d.; Hambro' spirit, 1s. 4d. to 1s. 5d.; English ditto, grain, 1s. 8d. to 1s. 10d.; ditto, rice, 1s. 4d. to 1s. 5d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 5s.; clover, £4 to £5 10s.; and straw, £1 5s. to £1 10s. per load.

Coals.—Best house coals, 19s. to 20s.; seconds, 16s. 9d. to 17s. 9d.; Hartley's, 15s. to 16s.; and manufacturers', 14s. to 15s. 6d. per ton.

Hops.—A fair average business is doing in most kinds; and prices range from 100s. to 160s. per cwt.

Wool.—The public sales are progressing steadily, at 1d. to 1½d. per lb. more money.

Potatoes.—The supplies are seasonably good, and the demand is steady, at from 50s. to 100s. per ton.

Metropolitan Cattle Market (Thursday, Nov. 12.)—Our market to-day was well supplied with beasts as to number; but their general quality was inferior. The few prime breeds on offer were taken off readily, at full prices, the top figure being 5s. per 8 lb. Otherwise, the beef trade was heavy, at about previous rates. The supply of sheep was small; nevertheless, the mutton trade was in a sluggish state, at Monday's currency. The general top quotation for mutton was 5s. 8d. per 8 lb. We were moderately supplied with calves, which moved off slowly, at late rates. Prime small pigs were the turn dearer. Inferior pork was heavy. In milch cows very little was doing. Per 8 lb. to sink the offal:—Coarse and inferior beasts, 3s. 4d. to 3s. 8d.; second quality ditto, 3s. 10d. to 4s. 4d.; prime large oxen, 4s. 6d. to 4s. 10d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 10d. to 4s. 2d.; second quality ditto, 4s. 4d. to 4s. 8d.; prime coarse-woolled sheep, 4s. 10d. to 5s. 4d.; prime Southdown ditto, 5s. 6d. to 5s. 8d.; large coarse calves, 3s. 8d. to 4s. 4d.; prime small ditto, 4s. 6d. to 4s. 8d.; large hogs, 3s. 6d. to 4s.; neat small porkers, 4s. 2d. to 4s. 6d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 20s. to 26s. each. Total supply:—Beasts, 1220; cows, 116; sheep, 3500; calves, 305; pigs, 412. Foreign: Beasts, 650; sheep, 1100; calves, 210.

Newgate and Leadenhall.—These markets are fairly supplied with meat, and the demand is steady, as follows:—Beef, from 2s. 10d. to 4s. 2d.; mutton, 3s. 8d. to 4s. 8d.; veal, 3s. 8d. to 4s. 4d.; and pork, 3s. 6d. to 4s. 8d. per 8 lb., by the carcass. Robert Herbert.

BREAKWATER AT THE MOUTH OF THE TEES.

As briefly noticed in our last Number, the foundation-stone of the South Gare Breakwater, between Middlesborough and Redcar, on the south side of the mouth of the river Tees, was laid on Tuesday week by Isaac Wilson, Esq., of Nunthorp Hall, chairman of the Tees Conservancy Commission, officiating as deputy to the Earl of Zetland.

We give from the local journals some particulars of this breakwater, and of the ceremony of laying the foundation-stone. The South Gare Breakwater is already in a considerable state of forwardness, and when completed it will form a work not merely of local but of national importance, giving to the estuary of the Tees the advantages of a harbour of refuge. This object will be more fully accomplished by the construction of a corresponding breakwater on the north side; but at present that part of the scheme is in abeyance, on account of the absence of those facilities which exist on the south side.

The South Gare Breakwater was commenced by the Tees Conservancy Commissioners about a year and a half ago. The materials of which it is composed are the refuse of the numerous furnaces for smelting iron which have sprung up with such marvellous rapidity in this neighbourhood during the last few years. The breakwater now stretches out from the limit of high water to a distance of a mile and a half, and it is intended to carry it upwards of a mile further. Facilities are afforded by the various ironmasters and the railway company to such an extent that the contractor is able to execute ten yards in length per week, tipping about 600 tons of material per day. This rate of progress will not be exceeded when, as the commissioners expect, they will be able to double the amount of dip; as the ground is now deepening to such an extent as to require a much larger amount of material to continue the breakwater at its present level. At the end of the South Gare it is intended to build a hundred yards of ashlar stone, and upon this portion an iron lighthouse will be constructed, showing light 60 ft. high from the top of the breakwater. The breakwater will be 5 ft. above high water of spring tides, and it is expected it will run down at a slope of six to one to the seaside. Walls will also be constructed so as to direct the current on the bar. When the North Gare is constructed there will be a channel about 700 yards between them, and the scouring effect will be such as to fix as well as to deepen the bar, which is at present of a very shifty character. The cost of the South Gare Breakwater, had it been constructed of stone, would have been about £600,000; but, owing to the facilities already described, its actual cost is estimated at little more than £100,000. That sum will be advanced on loan by the Exchequer Loan Commissioners, on the security of the tolls on shipping levied by the Conservancy Commissioners. The importance and desirableness of this great undertaking was impressively illustrated on Tuesday week by the spectacle of a ship which had been stranded on the beach by the storm of the preceding day, as well as by the ribs of some previous wrecks projecting above the sand.

THE SOUTH-GARE BREAKWATER AT THE MOUTH OF THE RIVER TEES.

GENERAL VIEW OF THE BREAKWATER.

A special train left Darlington about 12.30 p.m., and, stopping at Stockton and Middlesbro', brought a numerous party of gentlemen to the spot. A branch line, uniting with the main line, traverses the breakwater from end to end; but before reaching the farther extremity the party alighted from the carriages and walked the remainder of the distance, when Mr. Fowler, the engineer of the commissioners, described the character of the work which is being carried on under his superintendence. Amongst the gentlemen present were H. Pease, Esq., M.P.; J. W. Pease, Esq., of Darlington; T. Brentnall, Esq., Mayor of Middlesbro'; Joseph Laing, Esq., Mayor of Stockton; Mark Millbank, Esq.; Major Elwon, Redcar; Captain Challoner, Guisbro'; John Fowler, Esq., engineer of the Tees Conservancy Commission; John Anderson, Esq., contractor of the works; and James Guthrie, Esq., of Newcastle. In the cavity of the stone were deposited a scroll, with the names and designation of the commissioners, various coins of the realm, and copies of several papers published in the district. The document sets forth that this great work "has been designed for the twofold purpose of improving and protecting the navigation of the river Tees, and of affording shelter and refuge to the shipping of the north-east coast." Mr. Wilson, after having gone through the usual formalities, mounted the stone and delivered an appropriate address.

The ceremony was followed by a banquet, provided in the Central Hall, Redcar, at which upwards of a hundred gentlemen sat down.

CLUBHOUSE, HALIFAX, NOVA SCOTIA.

The enterprising citizens of Halifax, Nova Scotia, have just opened this fine building, somewhat novel in character, as far as the British North American colonies are concerned, there being, with this exception, but one clubhouse in the several provinces, and that in Montreal, Canada West. Its main front (constructed throughout of the native freestone) is situated in Hollis-street, and presents a bold and striking appearance. The style is Italian Renaissance; the ground and first stories are decorated with the Roman Doric and Ionic orders, and surmounted by caryatidm trusses, bearing a fine mobillion cornice.

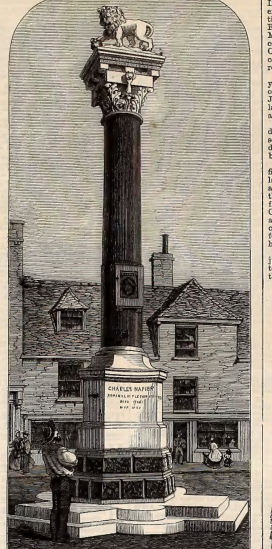
MR. ISAAC WILSON, CHAIRMAN OF THE TEES CONSERVANCY, LAYING THE FOUNDATION-STONE.

In the internal arrangements every regard has been paid to the comfort of the members, combined with elegance of architectural finish. The main central hall is paved with Maw's encaustic tiles, and is, together with the grand staircase, lighted by a cupola lantern. On the ground floor is situated a spacious coffee-room, with waiters' compartments, &c., adjoining, and also the library and reading-rooms, of corresponding dimensions. On the first floor are arranged a fine billiard-room (the entire depth of the building), a private dining-room (which may also be used as a committee-room), and card and writing rooms. In the upper story it is proposed to give partial accommodation to lodgers, after the manner of some of the London clubhouses—on the type of which, as to general arrangement and management, this clubhouse has been instituted and conducted. The basement is appropriated to the various kitchen and housekeeper's offices, together with bath and dressing rooms for the convenience of members.

The building has been designed and superintended throughout by Mr. David Stirling, of Halifax, N.S., the architect of many important structures in that city, amongst which may be mentioned the large Government building just about being erected in the market square for postal and revenue departments.

NEW NATIONAL AND INFANT SCHOOLS FOR ST. MARK'S, TOLLINGTON PARK, AND ST. MARY'S, HORNSEY-RISE.

The Lord Mayor, having laid the foundation-stone of these buildings on the 3rd of February last, presided at the general meeting of friends and subscribers to these schools, upon their approaching completion, held on Tuesday the 27th ult. A numerous party of clergy and laity assembled on the occasion to meet his Lordship and the Sheriffs; among others, Colonel Wilkinson, the Rev. Daniel Wilson, Vicar of the parish and Rural Dean; the Rev. C. W. Edmoustone, Incumbent



CLUBHOUSE RECENTLY OPENED AT HALIFAX, NOVA SCOTIA.

of St. John's; the Revs. John Lees and Reginald Gunnery, Incumbents of St. Mark's and St. Mary's, Hornsey-rise.

The schools and class-rooms are arranged to accommodate 436 children—viz., 126 boys, 126 girls, and 180 infants; and have residences over them for the master and mistresses. They are substantially built of brick, relieved with coloured bricks and Bath-stone. The style assimilates to the Venetian Gothic, and is well adapted to the materials employed in their construction. The breadth of buildings, accentuated by a narrow site, is relieved by projecting gabled centres, porch entrances, and staircases; and the height of roof by the grouping, at well-adjusted distances, of bell-gable, chimnies, and ventilating turrets. The interior is well finished, and furnished with all the usual school fittings, and is lighted and ventilated upon the best-approved principles. In the arrangement of the design for these schools the educational purposes for which they were intended have been considered of primary importance, and the structure has been rendered, as far as practicable, in conformity with the requirements of the Committee of Council, combining at the same time, as a secondary consideration, convenient accommodation for large public meetings, and other objects of local interest. It is also applicable to the purposes of a school chapel for the working classes, or substitute for a temporary

NEW NATIONAL AND INFANT SCHOOLS FOR THE DISTRICT OF ST. MARK, TOLLINGTON PARK, AND ST. MARY, HORNSEY-RISE.

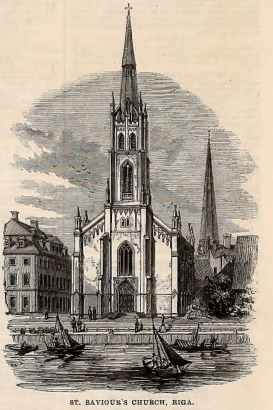
COLUMN AT PORTSMOUTH IN HONOUR OF THE LATE ADMIRAL SIR CHARLES NAPIER.

church. The outlay upon these buildings does not exceed £2500. They have been erected, from the designs and under the direction of Mr. A. D. Gough, of Lancaster-place, Waterloo-bridge, by Messrs. Dove Brothers, of Islington.

THE NAPIER MEMORIAL, PORTSMOUTH.

The memorial column which has been erected on the open space which forms the junction between Lion-gate and Commercial-roads, Landport, in honour of the late Admiral Sir Charles Napier, is a handsome addition to the few works of art which commemorate great men in the borough of Portsmouth. The design consists of what is called a rustic basement, supporting a triangular pedestal, with three narrower alternate faces. The mouldings are solid and handsome; and from the sloping cornice rises a column of red-coloured stone 24 ft. in diameter, on the capital of which stands a spirited figure of a lion in a defiant attitude, his paw resting on a bombshell. The carved capital is allusive in design, the Napier crest, seamen's cutlasses and the anchor being introduced. On the lower portion of the shaft of the column is a cartouche inclosing a medallion in bronze—a lifelike production by Phyffers, representing the gallant Admiral as in the latter part of his life. The inscription on the face of the pedestal immediately beneath is as follows:—"Charles Napier, Admiral of the Blue, K.C.B., born 1786; died 1860." On the two remaining sides are other inscriptions—viz.: "To commemorate the untiring efforts of a gallant officer and true-hearted man in advancing the welfare of the British sailor, this column is erected by petty officers, non-commissioned officers, seamen, and marines of her Majesty's Navy, 1863;" and the ancient motto of the Napier family, "Ready, aye Ready." On the three alternate faces of the pedestal are recorded the names "Martinique," "Cape St. Vincent," and "Acre," each the scene of a hard fight, in which Napier was engaged. The total height of the monument is about 29 ft. It was designed by Messrs. Willson and Nicholl, the architects of the Chesapeake memorial at Southsea-co nmon.

ST. SAVIOUR'S, RIGA.



In the year 1852 (pursuant to a resolution passed in 1829, the execution of which, from unavoidable circumstances, had been from time to time postponed) the body of merchants constituting the English factory at this port addressed a petition to his late Imperial Majesty Nicholas I. for permission "to erect a church for the celebration of Divine worship according to the rites of the United Church of England and Ireland, and of the other occasional services connected therewith;" and their petition having been graciously received and acceded to, the structure was forthwith commenced.

Owing, however, to the breaking out of the war in the following year, the progress of the work was interrupted until the restoration of peace in 1856, when it was actively resumed, and on the 18th of June, Old Style (30th, New Style), 1857, the foundation-stone was laid by her Britannic Majesty's Consul, Richard Levinge Swift, B.C.L., assisted by the merchants of the factory and other English residents.

At the base of the spire, in a tin case imbedded in the stone, were deposited British and Russian coins of the year, with a parchment scroll engrossed with the inscription, in Latin and English, of the dedication of the church to the most blessed Saviour, and subscribed by all who took part in the ceremony.

On Sunday, the 26th of July (O. S.), 1859, the edifice being sufficiently advanced, it was consecrated by Walter John Trower, D.D., late Bishop of Glasgow and Galway (at present Bishop of Gibraltar), acting as Bishop Commissary for the Bishop of London, assisted by the Rev. John Ellis, A.M., of St. John's, Oxford, Chaplain to the factory, and the Rev. Edward Law, D.D., of Christ Church, Oxford, Chaplain to the English Factory at St. Petersburg, the Government and town authorities, with the resident clergy, being present at the ceremony; and on Advent Sunday in the same year it was opened for permanent service; which, from Palm Sunday, 1859, had been held in the German Reformed Church in this city.

The church is of English Gothic architecture, built by D. Kreeger, jun., from a design and under the superintendence of the city architect, Mr. Felsko. It is beautifully situated on the ramparts fronting the river; and is furnished with a splendid organ, by Walker;

ST. SAVIOUR'S CHURCH, RIGA.

a highly-wrought mediæval font, by Westmacott; and a memorial altar window, representing the Crucifixion, ably executed by Messrs. James Ballantine and Sons, Edinburgh, gifts of different members of the congregation. The cost of the church, including the site, was 86,000 silver rubles, equal to about £14,700.

BENGAL MILITARY NORMAL SCHOOL AT SANAWUR.

In the immediate neighbourhood of the Lawrence Military Asylum, near Kussowlee, a British sanitary station in Bagiast, is situated the Bengal Military Normal School for training soldiers and soldiers' wives and daughters for the posts of school masters and mistresses in regiments serving in India. The male and female departments of this institution are located respectively at Sanawur and Kussowlee. They were established in 1850, in connection with the Lawrence Asylum, by the present Superintendent of Army Schools for Bengal, at the orders of the Indian Government, and on the model of the Military Normal School at Chelsea. These schools are now, however, being of a purely military character, detached from the asylum. Our Engraving of the establishment at Sanawur is from a photograph taken by Mr. L. A. Stapley.

THE BENGAL MILITARY NORMAL SCHOOL, AT SANAWUR, IN THE HIMALAYAS.

*** The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

Messrs. Alison and Waddell, Basinghall-street.

BANKERS.
London and Westminster, St. James's-square.

SECRETARY.
Mr. R. T. Piggott.

The Committee of the Poor Clergy Relief Society invite attention to its objects. Established in the year 1856, it has been the means of dispensing upwards of £6000 for the relief of about 700 applicants, consisting of clergymen, their widows, and orphans. The cases which have been brought under their notice have undergone full investigation, the result of which has been to convince the Committee of the great value of such an agency as their Society affords.

Deeply thankful for the kind sympathy their work has already elicited, the Committee feel that the Society needs only to be more extensively known to obtain increased support. For such support they would earnestly appeal both to the clergy and laity. The former can afford them much valuable aid by introducing the Society to the notice of their parishioners or by allowing its claims to be advocated from their pulpits.

Donations and subscriptions are thankfully received daily, from Eleven to Four, at the Office, 32, Southampton-street, Strand, W.C.; or by J. A. Cahusac, Esq., to whom Post Office orders and cheques are made payable.

On behalf of the Committee,
JOHN EDMUND COX, M.A., F.S.A., Chairman.
J. A. CAHUSAC, Esq., F.S.A., Treasurer.

NEW ZEALAND—REMITTANCES.

THE BANK OF NEW ZEALAND—(Incorporated by Act of General Assembly)—Capital, £500,000, grants Letters of Credit, and undertakes every description of Banking business throughout the several provinces.
Terms and particulars on application at the London Office.
50, Old Broad-street, E.C., London. F. LARKWORTHY, Managing Director.

DELICATE CHILDREN.—A Lady residing in a very healthy locality, at a short distance from Oxford, wishes to receive into her family TWO or THREE CHILDREN to bring up and educate with her own. They would receive the most careful, mental, and physical training, and their health and happiness would be promoted by every means. Their education, with strict reference always to their age and strength, would be systematically carried on under her immediate direction. Children requiring special care, from delicate health, or whose parents are abroad, would here meet with peculiar advantages. Address A. B. C., care of A. MacLaren, Esq., The Gymnasium, Oxford.

TO INVALIDS.—A MEDICAL MAN, of twenty-two years' experience in a large practice, which he has partially relinquished, will be glad to receive ONE or TWO INVALID LADIES or GENTLEMEN requiring medical supervision. He resides in a large and commodious residence surrounded by eight acres of pleasure-grounds, situated in a romantic and healthy part of Hampshire, within two miles and a half of the sea and railway station. Terms, inclusive of medical and every other necessary attendance, together with carriage exercise when required, £250 to £300 per annum, payable in advance, quarterly or half-yearly. References given and required. Address X. Y. Z., Post Office, Botley, Hampshire.

EVERY MAN HIS OWN PRINTER.—The PEOPLE'S PRINTING-PRESS, price £3 3s.
D. G. BERRI, Engraver and Stamp Maker to H. M.'s Post Office, 36, High Holborn, London, W.C.

TO INVENTORS.—The GENERAL PATENT COMPANY (Limited), 71, Fleet-street, obtains PATENTS for INVENTIONS, and affords unusual facilities to Inventors. Printed information gratis. R. M. LATHAM, Sec.

THE GREAT FIRE at the PORTLAND BAZAAR.—NOTICE.—The above Bazaar having been rebuilt, the Grand German Fair will be re-opened on Nov. 30, with an entirely New Stock of Toys and Fancy Articles. Millions of Penny Toys always on sale.

Lists post-free on application.
Address W. and J. Burrow, Malvern.
London Agents: Arnold, 72, Baker-street; Wales and M'Culloch, 56, Cheapside, and 32, Ludgate-street.

TESTIMONIAL from the ADMIRALTY, Somerset House, of the new £5 DAY and ASTRONOMICAL TELESCOPE:—"Wishing to test the power of your £5 telescope, I went on one occasion, at the end of my morning's rifle-practice, to the head of the pier, 2¼ miles distant as the crow flies, and counted the bull's-eyes on a second-class target, and this was on a day when there was so much mist that a well-known seamark at a distance of seven miles was invisible. In conclusion, I have only to observe that, in my opinion, of all the telescopes exhibited this year at the Wimbledon meeting of the National Rifle Association, there was not one to be compared to yours for great power with great cheapness."—Your obedient servant, SAML. S. LEWES.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

SPECTACLES.—THE PATENT TINTED SPECTACLES are patronised by the majority of the Nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision. The adaptation of spectacles to imperfect vision by experienced persons is, indeed, of vital importance. One of the Firm who has had great experience and practice attends to this branch only.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Opposite the York Hotel.

CAUTION.—THE CELEBRATED LORD BURY TELESCOPE can only be had of J. H. STEWARD, Sole Maker, and his Agents. Will read the name of a light-ship at eight miles. Price £3 10s. complete. Address, 406, Strand, London. Catalogues, with testimonials, post-free.

DULL EVENINGS MADE MERRY. All the New Parlour Games, Magic Lanthorns, and thousands of Penny Toys, &c. ARTHUR GRANGER'S Noted Cheap Shop, 308, High Holborn, W.C.

WASHING, WRINGING, DRYING, and MANGLING MACHINERY and APPARATUS, for Families, Hotels, Institutions, &c. Adopted by her Majesty's Government. Indiarubber Wringers from £1; Washing-machines, £3 10s.; Mangles, £2 10s.—WILLIAMSON, 139, High Holborn.

TO MALTSTERS.—NASH'S IMPROVED MALT-SCREEN. Registered. Price £4 5s. To be had of Alfred Nash, Royston, Herts, who will send drawing and description on application.

PARKER'S NEW STEAM-PROPELLED CARRIAGE goes twice the speed of all others. 4 in., 3s. 6d.; 7 in., 5s.; railway free, 1s. extra. Fuel, spirit. Inventor of Parker's Steam-boats, 6, Lilford-road, Camberwell.

W. F. THOMAS and CO.'S PATENT SEWING-MACHINES.—These machines, made by the original patentees and introducers of the invention, with all the improvements which 15 years' experience has suggested, stand foremost and unrivalled for all practical purposes. They are guaranteed to perform their work efficiently, with exceeding rapidity, regularity, and durability, and give no trouble. The stitching (alike on both sides of the material) is without cord or ridge, and the thread cannot be pulled out. They hem, bind, gather, and braid with equal facility. Catalogues on application to 66, Newgate-street; and Regent-circus, Oxford-street, London.

FURNITURE, CARPETS, and BEDDING (CARRIAGE-FREE), see our ILLUSTRATED CATALOGUE, containing Prices and Estimates for Furnishing Houses of different classes, which will be forwarded gratis. This book is universally allowed, for its practical utility, to be unique. LEWIN CRAWCOUR and CO., Cabinetmakers, Upholsterers, and Bedding Manufacturers, 73 and 75, Brompton-road, Knightsbridge, London.—N.B. Fifty Drawing and Dining Room Suites, from 12 to 100 guineas. An assortment of Old Oak Furniture. Established 1810.

OAK FURNITURE.—A choice SUITE of OAK DINING-ROOM FURNITURE is OFFERED for SALE at an unprecedented low sum. Comprises a noble sideboard of chaste design, large telescope set of dining-tables with extra leaves, eight massive chairs in green morocco, a comfortable lounging-chair, and luxurious couch, the whole to match. Lowest price for this splendid suite of furniture only 46 guineas, about half the manufacturer's price. To be seen at LEWIN CRAWCOUR and CO.'S, Upholsterers, 73 and 75, Brompton-road, Knightsbridge.

TO PARTIES about to FURNISH.—An elegant SUITE of DRAWING-ROOM FURNITURE, in fine Italian walnut wood, in perfect condition, for SALE, an unusual bargain. Price, complete, 38 guineas. It comprises a handsome settee, two easychairs, and six prettily-shaped drawing-room chairs, in rich reps, en suite; fine centre and occasional tables, beautifully-designed chiffonier fitted with plate-glass back and doors and marble top, two fancy occasional chairs, and a large chimney-glass in gilt frame. Also, a Superior DINING-ROOM SUITE in Spanish mahogany, and covered in morocco, 30 guineas. May be seen at LEWIN CRAWCOUR and CO.'S, Upholsterers, &c., 73 and 75, Brompton-road, Knightsbridge.

THE LORD DUNDREARY EQUILIBRIUM CHAIR. Extremely comfortable, good, and very cheap. "There's the idea!"—A. SEDLEY and CO., 210, Regent-street, London, W., Patentees of Equilibrium Chairs.

SEDLEY'S Patent EQUILIBRIUM CHAIRS are the most comfortable and cheapest yet offered to the public. Capital for India, packing up in less space than any other chair. Also, first-class Furniture, Carpets, &c., at very moderate prices. 210, Regent-street, London, W.

DRAWING-ROOM FURNITURE, of the most superior design and workmanship, arranged in complete suites, and covered in brocaded silks, rice moquette, and Neuilly tapestry, in all colourings, always ready for inspection and delivery, at prices varying from 35 guineas per suite for cash.—A. SEDLEY and CO., Upholsterers, 210, Regent-street, W.

FOUNTAINS, STATUES, JARDINIÈRES, ANIMALS, &c., the celebrated Bronzes d'Art en fer of Messrs. Barbezart, of Val d'Osne, France. Prize Medal, 1862.—A. SEDLEY and CO. have the honour to announce that they have become Agents for the above beautiful and cheap productions, and have NOW ON VIEW a SUPERB COLLECTION of FIGURES, ANIMALS, FOUNTAINS, and CANDELABRA, suitable for Galleries, Halls, Gardens, Parks, &c., at Paris prices, cost of import only added. Illustrated Lists on application by post to A. Sedley and Co., Upholsterers, Cabinetmakers, and Patentees of Equilibrium Chairs, &c., 210, Regent-street, London, W.

MARRIAGE NOT A LA MODE.—See "Temple Bar" for November, page 518. Extract.—"There lies before me the price-list (illustrated) of A GENERAL FURNISHING and UPHOLSTERY COMPANY, whose premises are in one of the best streets in London, and some of whose things are about me as I write. Let me turn to their 'japanned deal bedroom furniture' in their list. Not to be unnecessarily minute, the 'complete set' costs ten guineas. Of course there figures another set handsomer, but not one whit better, or cleaner, or really nicer-looking, which costs twenty-nine pounds. A 'complete set of furniture for a servant's bedroom' costs five guineas. From these figures guess the rest; and believe me when I tell you that you shall furnish your fifty-pound house for two hundred and fifty pounds."
GENERAL FURNISHING AND UPHOLSTERY COMPANY (Limited), 24 and 25, Baker-street, W.
Complete Illustrated Catalogues free by post.

ATKINSON and CO., CABINETMAKERS. Showrooms separately arranged for Drawing-room, Dining, and Bed-Room Furniture in all designs.
CARPET WAREHOUSEMEN.—One of the Largest Stocks in London to select from of every description. Choicest Patterns in Velvet, Brussels, and Tapestry Carpets.
UPHOLSTERERS.—Worsted, Damask, Pekin, and Persian Cloth, Gilt and Brass Cornices; Poles in Oak, Walnut, Mahogany, &c.; Chintzes and all other materials for Window-curtains, Bed-hangings, &c.
GENERAL DRAPERS.—Blankets, Sheetings, Linens, Table-covers, Damask Cloths, &c.
SILK MERCERS.—A large and well-assorted Stock of Silks, Shawls, Mantles, &c.
WHOLESALE DEPARTMENT.—Estimates to public institutions, charities, &c. Atkinson and Co. specially direct the attention of the clergy and charitable distributors of Blankets, Woollen Clothing, Flannels, &c., to the poor at this season to this department.
Illustrated Catalogues either by post or applying at 69 to 75, Westminster Bridge-road.

CHUBBS' FIREPROOF SAFES, with their Drillproof and Powder-proof Locks; Cash and Deed Boxes, Detector Locks, Street-door Latches. Illustrated Price-lists, gratis and post free.—Chubb and Son, 57, St. Paul's-churchyard London.

THE ELEPHANT AND CASTLE TEA COMPANY will OPEN their Premises early in December for the sale of the choicest Teas and Coffees.
Elephant and Castle (postal letters), London.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.
GLENFIELD PATENT STARCH,
used in the Royal Laundry,
and awarded the Prize Medal, 1862.

INDIGESTION.—MORSON'S PEPSINE WINE is a perfectly palatable form for administering this popular remedy for weak digestion.—Manufactured by T. Morson and Son, 19 and 46, Southampton-row, Russell-square, W.C., in bottles at 3s., 5s., and 10s. each.

ROOTS.—The Indian and other primitive nations were in the habit of extracting medicinal qualities from various roots. DR. MATTHIAS LANG, following their example, discovered a preparation, which his Son continues to manufacture: this is the ESSENTIAL SPIRIT OF MELISSUS. Its restorative effects are unequalled, it is the best resource in weakness, and is also very useful for Headache, Toothache, &c. Sold, in 1s. 9d. and 3s. 6d. bottles, by all Patent Medicine Venders throughout the country. Directions for use on wrapper.

ALL afflicted with WEAK EYES may obtain instant relief by using Dr. WARNER'S EYE WATER; it removes all inflammation arising from cold, dust, or constitutional causes.—Sold in bottles, 2s. 9d., 4s. 6d., by Sanger, Oxford-st.; Prout, Strand; Barclay, Farringdon-street; Hooper, London-bridge.

HOW'S YOUR POOR FEET? If tender, a perfect cure soon effected by using "SALVEO PEDES." Sold in Bottles, 2s. 6d. each, wholesale, 13, Little Britain; Barclay and Sons, Farringdon-street, E.C.; and all Patent Medicine Venders.

DENTINE, prepared only by ARMAND et FILS (under the direction of one of the most eminent living Dentists), prevents toothache, renders the teeth a pearly white, sweetens the breath, and leaves in the mouth the pleasant flavour of Eau de Cologne. In metal case, 1s. 6d., through all Chemists and Perfumers. Wholesale only, at 75, Milton-street, E.C.

TEETH.—OSTEO-EIDON, Messrs. GABRIEL'S SPECIALITE.—The numerous advantages, such as comfort, purity of materials, economy, and freedom from pain, obtainable hereby, are explained in Messrs. Gabriel's "Pamphlet on the Teeth," just published, free by post, or gratis on application.—Messrs. Gabriel, the old-established Dentists, 27, Harley-street, W., and Ludgate-hill (over Benson's, silversmith); Liverpool, 134, Duke-street; and Birmingham, 65, New-street. Diploma, 1815.

PATTERNS POST-FREE.

"THE DREAM AT SEA."—LANGTON WILLIAMS'S New Song. Just published. Price 2s. 6d. Sung by Miss Lascelles.
W. WILLIAMS and Co., 221, Tottenham-court-road.

NEW MUSIC.

NEW SONG, THE OAK AND THE SAPLING, composed by HENRY SMART. Price 2s. 6d. (sent at half price). This is one of the most successful songs of the season. It is universally admired. Compass from D to E.
DUFF and HODGSON, No. 20, Oxford-street.

W. VINCENT WALLACE'S SONGS. "Old Friends and Other Days," "Thou wilt come back again," "Remember and Forget." Price 2s. 6d. each (sent at half price). The gifted Composer of "Maritana," "Lurline," &c., has added to his fame by the production of the above three Songs, which are perfect gems. DUFF and HODGSON, 20, Oxford-street.

SECONDHAND PIANOFORTES. CHAPPELL and CO., have a large Stock of SECONDHAND PIANOFORTES for SALE, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, New Instruments of every description.
Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to Small Rooms, Yachts, Boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action and all the latest improvements.
Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood or Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to many of the tuners. In elegant rosewood case, with full fret, similar in every respect to other instruments at 50 guineas, price 35 guineas; in walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut 60 guineas. This instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich; and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase) at the new Showrooms of
CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 60 guineas; other varieties at 25 and 35 guineas. Illustrated Catalogues of Pianofortes and Harmoniums upon application to
CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM, by ALEXANDRE, with five octaves, two footboards, and in oak case. These instruments are lower in price and superior to all other cheap Harmoniums. Descriptive lists on application to
CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 13 stops, 4 rows of vibrators, and Venetian swell, worked by the heel of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in walnut, French polished:—"We have had occasion to examine a new description of Pianoforte manufactured by Boosey and Sons, which combines quality and cheapness in a degree which has not previously been ever attempted. When heard it creates such surprise as would be caused by a child 'discoursing most eloquent' music with the voice of a full-grown man. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room; and the whole mechanism of the instrument seems to be firm and durable. No piano at so small a price has ever before been presented to the public."—Vide ILLUSTRATED LONDON NEWS, Feb. 28, 1863. This Piano is well adapted for the cabin of a ship or an extreme climate.—Boosey and Sons, 24, Holles-street, London.

PRATTEN'S SEVEN-GUINEA PERFECTED CYLINDER FLUTE, old system of Fingering. This Instrument, the result of many years' experiments, possesses all the reputed advantages of the Cylinder Flute on Boehm's and other principles, without changing the familiar Fingering of the old 8-keyed Flute, in addition to which, through Mr. Pratten's ingenious improvements in its construction, the manufacturers are enabled to produce this instrument at one third of the expense of any cylinder flute hitherto sold.
An Illustrated Prospectus may be had on application to the manufacturers, BOOSEY and SONS, 24, Holles-street, London, W.

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street (the largest in Europe). The most varied selection of Pianofortes are to be found in this Gallery.
The quality of every instrument may be relied upon as at least equal to representation. Pianofortes of the very inferior class are carefully excluded from the stock. Every facility is afforded to exchange, without loss to the buyer, any time within six months, should an instrument of a higher class, or by a different maker, be thought desirable.
Pianofortes by every maker of eminence will be found in the Gallery.

CRAMER'S NEW 7-OCTAVE SEMI-OBLIQUE PIANOFORTES. Price 45 guineas in Rosewood, and 50 in Walnut.
In introducing this Instrument prominently to the notice of the public, Cramer and Co. may be permitted to observe that it is alike remarkable as regards power and quality of tone, firmness and elasticity of touch, durability of tuning, and the capacity to develop its resources. The tone may be forced by the powerful finger of the artist, or drawn out by the less-accustomed hand of the amateur; in the one case there is no harshness, and in the other its charmingly vocal qualities are produced with little effort.
The action, or mechanism, is of the very best description, being somewhat similar in its principle of construction to that of the semi-grand. The stringing is complete, there being three wires to each note, like the full grand.
Cramer and Co. guarantee these Instruments for any reasonable length of time, and forward them to all parts of the country without risk to the purchaser and at a very trifling cost.
Pianoforte Gallery (the largest in Europe),
207 and 209, Regent-street.

CRAMER'S ENGLISH PIANETTE, 22 guineas.—Cramer and Co. manufacture this capital small instrument. It has all the requisites of the best Pianoforte—check action, solid touch, agreeable tone. The case is of polished ash or pine. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose in the key and worn in the hammer. In rosewood, 25 guineas; in walnut, 26 guineas.
Purchasers are particularly requested to observe that this instrument has not the common or single action, but the double or check action; and that Cramer and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

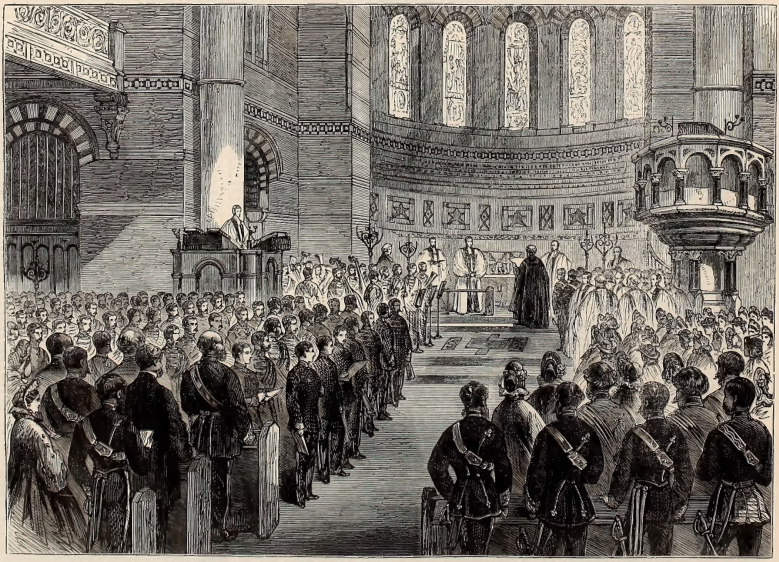
PIANOFORTES, NEW, by Broadwood, Collard, or Erard, for SALE or HIRE—At CRAMER'S PIANOFORTE GALLERY (the largest in Europe), 207 and 209, Regent-street.

CRAMER'S INDIAN PIANOFORTE. CRAMER and CO. manufacture for India a superior COTTAGE PIANOFORTE, in solid Mahogany, with metallic bracings and all other appliances necessary to resist the effect of extreme climates. Nothing has been left solely to the glueing. The mechanism of the Instrument as well as the Case has been secured throughout by screws. Unusual skill and attention have therefore been bestowed upon the manufacture, and they have obtained the highest commendations for their excellent quality of tone and durability.
Cramer and Co. deliver these Instruments f.o.b., packed in cases lined with zinc, at any home port, for 50 guineas. Size:—Height, 3 feet 11½ inches; width, 4 feet 4½ inches; depth, 2 feet 1½ inch.
Pianoforte Gallery, 207 and 209, Regent-street, London.

CRAMER'S ARTIST'S CONCERTINA, selected by Richard Blagrove. In purity of tone, delicacy of touch, noiseless rapidity of articulation, and general perfection of mechanism these instruments are altogether unrivalled. The vibrators are of tempered steel, and retain their perfect tuning in any climate. Price 12 guineas, including case.
Cramer and Co., 201, Regent-street.

ENGLISH CONCERTINAS, by LACHENAL, Full Compass, with all the latest Improvements, warranted for Hot Climates, and to keep well in Tune, from Two guineas, with Case, Lock and Key, &c.
HOPWOOD and CREW, 42, New Bond-street.

THE LATE CAPTAIN JOSLING, R.N., OF H.M.S. EURYALUS.



THE LATE COMMANDER WILMOT, R.N., OF H.M.S. EURYALUS.

THE LATE CAPTAIN JOSLING AND COMMANDER WILMOT.

We give Portraits of the above officers of her Majesty's ship Euryalus, flag-ship of Vice-Admiral Kuper, who lost their lives by the same shot in the attack upon Kagosima, Japan. Both were held in high respect. "They possessed," writes one who knew them well, "every grace that can adorn the officer and the gentleman." Annexed is an epitome of their services:—

Captain John James Stephen Josling was thirty-seven years of age, and had been in the Navy twenty-three years, nineteen years and nine months of which was devoted to active sea service. He was Acting-Lieutenant of the Scout, 14, Commander Loring, in the East Indies, in 1847; and senior of the Thetis, 38, Captain Kuper, C.B., in the Pacific, from July, 1850, to the spring of 1854, when

CONSECRATION OF ST. GEORGE'S CHURCH, ERECTED FOR THE USE OF WOOLWICH GARRISON: THE CHANCELLOR READING THE SENTENCE OF CONSECRATION.—SEE NEXT PAGE.

he joined the Eurydice, 26, Captain Ommanney, in the White Sea, and remained in her until promoted to Commander, Nov. 2, 1854. As Commander he served in the James Watt, 91, at Devonport, from May, 1856, until June, 1857; in the Princess Royal, 91, in the Mediterranean, from February, 1858, until December, 1859, when he joined the Queen, 86, and again served on the same station until advanced to post rank, Jan 31, 1861. He was appointed to the Euryalus Feb. 10, 1862.

Commander Edward Wilmot was in his thirtieth year, and entered the Navy in 1845. He was Mate of the Prince Regent, 90, employed on particular service from June, 1852, until the spring of 1853, when he was appointed to the Royal yacht Victoria and Albert, and remained in her until the following September, when his Captain, Lord Adolphus Fitzclarence, G.C.H., obtained flag rank. He was advanced to the rank of Lieutenant Sept. 26, 1853, and, after a few months' employment in the Excellent gunnery-ship at Portsmouth, joined the Royal Albert, 121, flag-ship of Vice-Admiral Lord Lyons, G.C.B., &c., June 24, 1854, and was employed in the Mediterranean until August, 1858. He was Lieutenant of the Indus, 78, flag-ship of Vice-Admiral Sir Houston Stewart, K.C.B., on the North American and West India station, from November, 1858, until the spring of 1859, and was Flag-Lieutenant to Rear-Admiral George Rodney Mundy, C.B., in the Hannibal, 89, in the Mediterranean, from May, 1859, until advanced to the rank of Commander, Dec. 24, 1861. As Commander he served in the Agamemnon, 89, on the North American and West India station, from January, 1862, until paid off in October following; and his appointment to the Euryalus was made Jan. 29 of the present year.

CONSECRATION OF THE NEW GARRISON CHURCH AT WOOLWICH.

The newly-erected church on Woolwich-common for the use of the garrison was consecrated on Monday week by the Bishop of London in the presence of his Royal Highness the Duke of Cambridge (Field Marshal Commanding in Chief), the Right Hon. Earl De Grey and Ripon (Secretary of State for War), Viscount Sidney, and other distinguished visitors. They arrived at a quarter to eleven o'clock, were saluted with a salvo of nineteen guns from the Green Hill Battery, and received by the Commandant, Major-General Sir R. J. Dacres, K.C.B.; Major Reilly, C.B., his Aide-de-Camp; Major-General Bloomfield, Inspector-General of Ordnance; Major-General Sandham, Governor of the Military Academy; Brigade-Major Millward, Major Field, Major Johnson, Captain Nangle, Deputy Assistant Quartermaster-General, and other officers. A guard of honour was stationed in front of the church, and the Lord Bishop of London was received at the principal door of the edifice by his chaplains, Registrar the Rev. G. R. Gleig, M.A., Chaplain-General of the Forces; W. Hare, M.A., Garrison Chaplain at Woolwich; W. M. Wright, Garrison Chaplain at Chatham; and clergy of the diocese. The Bishop having proceeded to the front of the communion-table, was presented by the minister with a petition praying him to perform the ceremony of consecration; and his Lordship, his chaplains, and the clergy then walked from the east to the west end of the church, repeating alternately the verses of the 24th Psalm. The Bishop then offered up prayers, after which the Chancellor read the sentence of consecration, which the Bishop signed, and ordered it, with the petition and deeds, to be deposited in his registry. The collect and services of the day were then read by the Rev. W. Hare and the Chaplain-General. The fine organ was accompanied by a selection from the band of the Royal Artillery. After the communion service, the Bishop delivered to a crowded congregation an eloquent discourse, selecting as his text the ninth verse of the seventh chapter of Revelations—"After this I beheld, and, lo, a great multitude which no man could number, of all nations, and kindreds, and people, and tongues, stood before the throne, and before the Lamb." The offertory was then made. After the services the Bishop, with the Duke of Cambridge, the Secretary of State for War, Viscount Sydney, and others, proceeded to the officers' mess-room, at the Royal Artillery Barracks, to partake of refreshments. The new church (of which an Engraving has appeared in this Journal) is named "St George's." It is a noble structure, in the Byzantine style of architecture, from the design of Messrs. Wyatt, and is built on the same plan as the celebrated church erected, by the late Lord Herbert, at Wilton. The officers of the garrison have subscribed nearly £1000 for its elaborate interior decorations and an organ. It contains a beautiful stone pulpit, coloured-glass windows, embodying the most marked events in the life of our Saviour; and the ceilings and galleries are highly finished and decorated.

A "Sailor's Daughter" has transmitted, through Messrs. Drummond, the bankers, £100 to the National Life-boat Institution.

A St. Petersburg letter mentions that the armour-plated frigate Sebastopol has just been launched at Cronstadt with success. She is to carry engines of 1000-horse power, and will be armed with 38 rifled guns. The Sebastopol is covered with iron plates throughout. On the stocks from which she has just been launched another vessel of the same rank, to be called the Emperor Nicholas, is about to be laid down, and will, it is expected, be ready for launching in the spring.

In the City article of the *Times* it is stated that, by the advices from Buenos Ayres, a new pass across the Andes had been discovered, which may have a great effect in facilitating the traffic from the Atlantic to the Pacific. The pass is situated to the south of the city of Mendoza, and is in the same latitude as Buenos Ayres. It is affirmed that the Andes here diminish into insignificant hills, and that the route is throughout practicable for wheeled vehicles, with the exception of about half a mile, where a road would have to be made.

The following is an official list of the sums granted by the State since 1852 towards the embellishment of Paris:—Junction of the Palaces of the Louvre and the Tuileries, up to 1858, 62,500,000f.; repairs of historical monuments, 2,170,000f.; Palace of the Elysée, 1,400,000f.; Boulevard de Strasbourg, 3,149,000f.; Boulevard de Sébastopol (right bank), 23,500,000f.; monument to Marshal Ney, 50,000f.; Hippodrome of Longchamp, 1,500,000f.; Tomb of Napoleon I., 865,000f.; Hotel of the Ministry of Foreign Affairs, 4,500,000f.; constructions on the Ile des Cygnes, 428,000f.; Palais de l'Industrie, 14,880,000f.; Boulevard de Sébastopol (left bank), 12,500,000f.; Ponts des Invalides, d'Jèna, and d'Arcole, 4,250,000f.; Cathedral of Paris, 3,500,000f.; barracks, 7,850,000f.; grand works (law of 1858), 60,000,000f.; New Opera, 28,000,000f. Total, 225,042,000f.

The quarterly general court of the Royal Society for the Protection of Life from Fire was recently held at the society's offices, 47, Ludgate-hill—J. W. Butterworth, Esq., F.R.S., in the chair. The report was of a most satisfactory character, evincing not only the continued progress of the society in the extension of their fire-escape stations, but also the valuable services rendered through its instrumentality in the rescue of human life. During the past six months there have been no less than 314 fires attended by the Royal Society's fire-escapes and conductors, and the following are amongst the more recent cases in which life has been rescued, and which were selected by the committee for reward:—The society's silver medallion, accompanied by one sovereign, to B. Burgess, for his intrepid and humane exertions in saving the lives of three persons at a fire at 9, Hayes-court, Soho, on the night of the 5th of July, 1863. A testimonial on vellum, and one sovereign, to the late fire-escape conductor, Francis Bartons, who rescued two persons by bringing them down his fire-escape from the roof whilst the whole of the lower part of the house was enveloped in flames (this conductor has just accepted the office of superintendent of Mr. Hodges's volunteer fire-brigade). Before leaving the society's service he was presented with a silver medal, made at the expense of Mrs. Whalley, the lady whom he saved, and which bore the following inscription:—"Presented by Mrs. Whalley to John Francis Barton, of the Ball's-pond fire-escape station, for his noble conduct in saving her and her servant from the fire at No. 13, Halliford-street, Islington, on the 20th of September, 1863." The society's silver medallion to fire-escape conductor Wm. Hocking, for his exertions at a fire at 2, Cambridge-place, Kingsland-road, on the 18th of October, 1863, when he rescued no less than six persons from the house on fire, encountering great personal risk. Rewards were also voted to fire-escape conductor James Ward for exertions at a fire at 147, William-street, Caledonian-road, where he succeeded in saving three lives. Also to Conductor Virco for exertions at a fire at 18, Upper-street, Islington, when, by his energetic promptitude, he rescued by means of his escape the lives of two individuals, who but for his exertions must inevitably have perished. Three additional stations have been established by the committee within the past quarter—viz., one in Shadwell district and two in the St. John's-wood district. As the efficiency of these stations so much depends on the vigilance and alacrity of the men to whom they are intrusted—a point to which too much importance cannot be attached—we give the following extract from the society's minutes, being the result of the last quarterly test of the conductors' efficiency:—"1st divison, average time at twenty-one stations, in calling, lighting lamp, and starting, 44 seconds; 2nd division, 30 seconds; 3rd division, 50 seconds; 4th division, 33 seconds." The society's machinery is reported to be in very good condition. The fire-escape at the Connaught-place, Edgware-road, station has been lately replaced by a machine of very superior construction, the height attainable by the whole of the ladders being upwards of 80 ft.

CURRENT LITERATURE.

Furness Abbey. By James Payn. (1 vol. Simpkin, Marshall, and Co.) This handsome volume is worthy of a place upon the most exquisitely-appointed drawing-room table. A cunning hand is traceable in every portion of it. The writing is skilful, the photography is skilful, the printing is skilful, and the binding is skilful. Sol himself, with unerring rays, impressed the scenes upon the susceptible paper; and the art of man has seconded Sol and burnished his work to a soft, chaste brilliancy. Indeed, it were difficult to find more charming photographs than those which adorn this welcome book. One may wish that the human figures were absent from the "Furness Abbey from the South-west" and the "Calder Abbey, Cumberland," views; for in both they stand out stiff, isolated, and inharmonious; but it is scarcely possible to hit upon any other objection. Nor are the map of Lake-land and the ground plan of Furness Abbey, which accompany the descriptions, ill-matched with the specimens of beautiful photography, for each seems excellent, both in point of execution and usefulness. It must be added that hints for excursions in the neighbourhood of Furness Abbey are subjoined to the information about the abbey itself; that the style in which the hints and information are communicated is authoritative (as of one who knows his subject well), sprightly, and amusing; and that the whole will form, for those who have visited the spot, a grateful souvenir, and for those who have not, a powerful inducement to do so.

Rachel Ray. By Anthony Trollope. (2 vols. Chapman and Hall.) Mr. Anthony Trollope is prolific to a marvel, to a degree which would be astonishing even in a novelist who did not serve his country in an official capacity. Stories seem to ooze from his pen as spontaneously as gum from the far-famed trees of Araby. He has here, as mere by-play, written a novel which would raise to notice many an obscure author. It is true that the plot is slight, and that diffuseness and iteration might be charged against the writer; but the real stuff is there, and the reader is more than sufficiently rewarded for his reading. For who can describe better than Mr. Trollope the weak-minded, tender, pious woman; the strong-minded, rugged, pious woman; the natural, loving, true-hearted girl—born victim of the two pious women; the stately High-Churchman; the gentleman-like Low-Churchman; the ungentleman-like No-Churchman; the vulgar wife of the vulgar tradesman, and her demi-semi-vulgar daughters; the refined lady, well-mannered, and kindhearted; and the sturdy, resolute, confident, not over-gentle lover? Such are the characters principally whose acquaintance we make in "Rachel Ray;" and Mr. Trollope sketches them in his usual happy manner, showing a pleasant mixture of shrewdness, causticity, humour, and feeling. It is essentially a love story, and a love story of the very slightest kind. There is not a single sensational incident; the events are all such as might happen and do happen daily in ordinary domestic circles. And herein is one of Mr. Trollope's chief recommendations, that he can interest us by truthfully representing things as they commonly are without having recourse to exceptional circumstances. He introduces us to the interior of the cottage, the farm, and the mansion, leaving the life of Bohemia and the cafés to be dealt with by others. The scene of the story is laid in the cider-drinking county of Devon, where it would seem improbable that a brewer, especially if he brewed bad beer, would be able to gain a livelihood. Nevertheless, Mr. Tappitt does manage to make a very decent income, though nobody can tell who drinks his beer, and makes his fortune; and the disputes between Mr. Tappitt and young Mr. Luke Rowan, who has a share in Tappitt's brewery, and is haunted by an insane (according to Tappitt) desire to brew good beer, have a great deal to do with roughening the course of Rachel's true love. For Luke Rowan is Rachel's lover, and he wooes in the bluff and rather overbearing style in which Harry the Fifth wooed sweet Katherine of France. Those who would trace love's triumph over the weakness of amiable Mrs. Ray, the unsisterly insinuations of grim Mrs. Prime, and the well-meant but erroneous advice of the Rev. Mr. Comfort, must do themselves the pleasure of reading Mr. Trollope's two volumes. They will find it far from a heavy task.

The Ionian Islands. By Professor D. T. Ansted. (1 vol. W. H. Allen and Co.) The seven islands over which Great Britain has so long exercised a not very enviable protectorate having been brought by recent events into unusual prominence, a book about them was, as publishing is managed, a necessity; and the Professor was determined to be to the fore. He took the view of Macbeth,

> If it were done when 'tis done, then 'twere well
> It were done quickly;

and so soon, therefore, as it became evident that the Septinsular dominion would soon be transferred to a King of the Hellenes, he started for Vienna, en route for Trieste and Corfu. A flying visit seems scarcely long enough to allow the visitor "to *observe* and *study* the physical geography and geology of the islands and the customs of the people;" but the Professor has contrived to put together some interesting information and to elaborate a readable book. He has something to say about every one of the seven islands—about Corfu, Cephalonia, Zante, Ithaca, Santa Maura, Paxos, and Cerigo; and he has added to his work maps, crude, perhaps, but not unserviceable. He has, of course, taken advantage of poetry and romance—the Odyssey, with its episodes of Alcinous and the Phæacians—to throw an antique charm about his narration; and to that fact may, to a great extent, be attributed the bulk to which his volume has swollen. He sums up the natural advantages of the islands, and the probable result of their contemplated annexation in the following terms:—"They have a soil that appears, indeed, rocky and barren, but a sky under which the vine will bear abundant fruit when planted even in loose stones; where the smallest amount of labour is repaid a hundredfold, and whose ground is covered with trees which yield a profitable crop without labour. With corn, and wine, and oil in abundance; growing a fruit, also, of which they almost possess a monopoly; having a coast indented with innumerable little bays and creeks, situated in the great highway of the European nations; having a population wealthy and intelligent, these islands cannot fail to exercise a considerable influence on Greece and the Greeks when forming part of the united kingdom."

The Personalities of the Forest of Dean. By the Rev. H. G. Nicholls, M.A. (1 vol. John Murray.) The author of this little work published, about five years ago, "An Historical and Descriptive Account of the Forest of Dean," and he now puts forth as supplementary to his former publication some further information touching that peculiar district. He treats now of the worthies—public and private, past and present—who have inhabited and exercised influence in the district, either in a private or in an official capacity. His book is, in fact, for the most part a collection of small biographies of the notabilities, lay and clerical, who have lived and laboured amongst the singular population of Dean Forest.

The Post Office Directory of Birmingham, Staffordshire, Warwickshire, and Worcestershire for 1864. (1 vol. Kelly and Co.) It requires a strong imagination to conceive of this excellent work as a part of literature, commonly so called. He who should read it for the purpose of beguiling a rainy day would probably arrive at the same conclusion as the lady arrived at to whom Johnson's Dictionary was offered for a similar purpose—namely, that the language was good, but that there was too little connection to make the story interesting. But, if Kelly's Post Office Directory cannot compete with other works as a means of intellectual recreation or instruction, it yields to none in point of usefulness. Nor is it without information of a less special kind than that which you may require respecting the address of Mr. or Mrs. So-and-So, for it includes also a general account and a minute map of the places of which it is a directory; and these are valuable additions to its otherwise useful contents. It appears, moreover, to have been arranged with a laborious care sufficient to call forth the warmest gratitude of all who are engaged in business or are in any way interested in men, their trades, and their addresses.

The number of tourists who have this year visited the Lake of the Four Cantons, in Switzerland, has been greater than ever before known, and 60,000 persons visited the Rhigi.

Mr. David Raimbach, the Head Master of the Birmingham School of Art, has been directed by the Lords of the Committee of Council on Education to proceed to Paris and to report on the exhibition of art applied to manufactures now open in the Palais de l'Industrie.

FINE ARTS.

THE WINTER EXHIBITION.

The Annual Exhibition of Cabinet Pictures by British Artists, which takes place at this season of the year in the gallery, 120, Pall-mall, was opened on Monday last. The present collection, brought together for the most part by Mr. Wallis, the well-known picture-dealer, is superior to any which has preceded it in the average quality of the pictures exhibited. There are not, it is true, many works of salient excellence, but a larger proportion than heretofore range on a level of merit, especially of a technical kind, which entitles them to respectful examination. It is encouraging to find so many of the younger contributors displaying a command of at least the language of their art. With so much happy fluency of expression, they will doubtless by-and-by find matter more worthy of communication than can be extracted from the subjects of which many of them treat at present.

We had better, perhaps, say at the outset of our remarks on individual contributions that some few pictures have, either actually or in duplicate, been previously exhibited at the Royal Academy and elsewhere and reviewed already in our columns. An enumeration of the following will therefore suffice, viz.:—"Charlotte Corday Contemplating her Portrait prior to her Execution" (39), by Mr. E. M. Ward, R.A. (a smaller repetition of the Academy picture which we engraved); "The Market Girl" (56), by Mr. Faed, R.A.; "The Jury (84), by Mr. Morgan; the Illustration of the repentance of St. Peter" (105), by Mr. T. J. Gullick (another picture we have engraved); "Nightly Cares" (15), by Mr. R. Carrick; "A Spanish Post Office" (142), by Mr. Burgess; "The Poor Helping the Poor" (90), by Mr. A. H. Burr; and landscapes by Messrs. Linnel, Creswick, Witherington, E. Gill, Shayer, sen., S. R. Percy, A. Williams, Pyne, and Bright.

One of the most noteworthy new contributions to this exhibition is No. 65, by Mr. Calderon; a picture splendid in colour, and, though too much of a mere costume piece, original in conception; a work which, while defying the laws of composition and inclining to voluptuous abandonment in sentiment, clings fascinatingly to the memory and gives a happy augury of the future of this young and rapidly rising artist. On a raised dais and behind a table—the white cloth of which cuts the picture disagreeably almost in two—and beneath a canopy of golden tissue, embroidered with chequers, flowers, and heraldic divices, of dragons rampant, and crown of fleurs-de-lis, with the appropriate legend "Dieu et ma dame," sit a Norman Baron and his "ladye-love," the latter in the conical head-dress and depending lawn veil of the fifteenth century. The canopy, the aforesaid tablecloth, and the mass of dazzling accessories somewhat diminish, however, the proper importance of these figures. Grapes and goblets of wine are placed before them, and the gentleman leans forward apparently to pledge the lady, but the expression of the little of his profile shown is ambiguous. Not so the lady's, however. The loving, languishing delight with which she listens is only too apparent. The motto chosen for the picture is the opening lines of Ben Jonson's anacreontic "Song to Celia" (the ninth piece in "The Forest")—

> Drink to me only with thine eyes.

A lute, suggesting an accompanied love-ditty, lies against a chair. Through a Norman archway to the right a fat cook is seen lifting up his hands in astonishment at finding some delicate chef-d'œuvre of his art brought by the serving-man untouched from the pre-occupied lovers' table.

Mr. F. Goodall, R.A., contributes a very tiny picture, and little more than a sketch—entitled "Wayfarers" (49), but with all the qualities of great art. We are happy to find Mr. Joseph Clark (the painter of "The Sick Child" and other well-remembered works) striving for more positive effect and brilliancy of colour than he has attempted of late, in his picture of an itinerant crockery-dealer offering his wares at a cottage door (168); but another picture of children bringing their cross-bow to a carpenter to be mended (189), though full of the quiet truthfulness which places this artist's works so much above the ordinary crop of pictures of child-life and domestic incident, is not free from, as it is technically called, the "muzziness" of execution which has enfeebled recent works. Of the taste of Mr. Dobson, A.R.A., we must also say that, though sometimes tame and always mannered, it is to be commended for a simplicity and chastity rare in the English school. A good example of the mellow tone and polished, albeit too often empty, breadth of his style is afforded in "Esther" (11), though why this female head is so named we cannot say, seeing there is nothing Oriental about it except in the accessories. Another, but technically an inferior, picture by this artist is "Giving a Bite" (155), a girl allowing a jackdaw to peck a piece of a pear from between her lips. A study of a female head by Mr. J. Sant, A.R.A., struck us as free from the paintiness with which some recent works have been chargeable, and as also more carefully modelled, while the expression is sweet and tender. Another female head, by Mr. Baxter, is, as usual, pretty, but with little of nature; and a third, by Mr. A. Johnstone, is effective but conventional. Of the same class, on a smaller scale, are Mr. J. F. Dicksee's "Maria with the Letter" (35) and "Juliet" (44), both polished and taking, though not quite successful in character and expression, and too mechanical in execution. Into two or three pictures of rustic children Mr. Le Jeune, A.R.A., seeks, as usual, to import a certain academic grace; but he seems to us as far as ever from giving the appropriate freshness and true charm of nature. Mr. Hayllar's picture of ladies seated in a carriage, "Going to the Drawingroom" (127), and almost smothered in circumambient surges of crinoline and muslin, is injured by hardness and the unnatural exaggeration of the size of the irides of one of the ladies' eyes. Besides the already-exhibited "Jury," there is a large picture by Mr. Morgan of a "Country Auction" (132). The "lot" being put up is an infant's cradle, and the incident creates a great deal of mirth in many very expressive faces; but vulgarity in place of real humour is everywhere needlessly prevalent and unrelieved.

Mr. W. B. Richmond has a large picture of "Jonathan bringing David to Saul" (92). Jonathan, having interceded with his father the King on behalf of his youthful friend, has led him into the Royal presence; but the wicked Saul conceals his face from the young hero, whom he had sought to murder. The conception of this picture is dignified, and as nearly as, from the height at which it is placed, we could judge, it is painted in a large style befitting the subject. We had not seen another young painter, Mr. G. D. Leslie, to such advantage as in "Courtship at the Village Pump" (166). It is solidly painted, luminous, and true in colour. We like less the more fantastic, mediævally-dressed figures of Nos. 156 and 185. Of Mr. Long's two Spanish subjects "The Coupé" (174), and a boy begging beneath the jalousie of a senora, the latter is the truer in character and couleur locale, as it is certainly the more vigorous in effect. "Hard Times—Lancashire Distress" (164) is a riskful subject for painting, and though Mr. J. T. Lucas's picture with this title has very considerable merit, the expressions do not quite fully conciliate one's sympathetic pity. Mr. James Campbell has made a notable advance to completeness and roundness in the hackneyed theme of an old connoisseur examining a painting (114). The vivid effect on the figures in Mr. W. M. Egley's picture of "Miranda's First Sight of Ferdinand" (22) is rather that of artificial light than the open air; but the painstaking finish is to be esteemed for its conscientious intention. Mr. F. Roberts has an amusing diptychal work of a boy fagging to another, and again as having turned upon his tormentor and knocked him down, entitled "Persecution and Retribution" (94). Mr. F. D. Hardy's "Artist in his Studio" (206) represents a painter at work inside a cottage with quaint, low window, and large old chimney-place, and is remarkable for delicate elaboration.

There are many works of merit (generally small in size) which we must be content to mention, such, for example, as Mr. Pope's admirable "Mother and Child" (79), Mr. G. B. O'Neil's effective and highly-finished "Crockery Vender" (47), Mr. Weeks's capital Roundhead "Sentinel" (31), the carefully-painted old "Weaver" (5) at his loom, by Mr. Bayes; a girl "Practising" (80) her song, daintily painted by Mr. Hicks; and, by the same artist, a picture, with many figures, of the "Swindon Station Waiting-room" (177)—possibly a study for a larger picture; "The Pets" (108), by Mr. Barnes; "The Pet Rabbits" (178), by Mr. E. Hughes; Mr. J. D. Watson's clever but rather black picture of a man, in Elizabethan ruff, doublet, and trunk hose, gravely cogitating, entitled "A Train of Thought" (194); Mr.

W. Nicholl's "Reading" (187); and Mr. Storey's picture of a girl returned from a ball at "Early Morning" (141).

The female artists are fairly represented. A picture, by Millie, Rosa Bonheur, of sheep huddled together under the shadow of a large stone, and designated "A Scene on the Hills on a Warm Day" (36), has great tenderness and truth of animal characterisation, but fails to express the sunny laziness apparently aimed at and suggested by the title. The sunlight is very weak, the effect rather cold and raw than warm. Mrs. E. M. Ward exhibits an elaborate picture of children grouping about a table covered with toys—presents to a little one with wreathed head, whose "birthday" is being celebrated (165). The draperies are very successfully painted, the heads are good, and we must say, in the interest of the accomplished artist herself, that the picture appears generally less careful in execution than many of her previous works. A greater remark must be ventured in respect to the German courtship scene at a window, pleasantly entitled "O! dearest, how could I?" (6), by Mrs. Anderson. We should be untrue to the artist's reputation if we overlooked a certain blackness and want of refinement in the work. Mrs. Anderson's study of a lady, called "Reflection" (7), in the costume in advance; and we may mention as worthy of technical praise the picture of a lady before a portrait styled (rather ambiguously by-the-way) "Looking Back" (22), by Miss Edwards; a head by Mdme. De Reyl (107); a picture by Mrs. E. Goodall; and another by Mrs. Robinson. A group of Roses (66), by Miss M. D. Mutrie, is somewhat unfavourable.

Several foreign pictures besides the Rosa Bonheur have found their way into the exhibition. Among others, No. 11, "Interior of Meadows" (145), though at present rather cold, is of more than average excellence, the varied grouping and characteristics of the cattle being especially admirable. Mr. A. Gilbert has also surpassed himself in a large upright picture of "Faust and Loch (160), remarkable for the cunning gradations and the shimmering lights. A "Scene in Cheshire" (41), by Mr. Hargitt, is decidedly valuable for a singularly truthful and truly painted effect. The whole of the foreground and middle distance is of a sunless character, from the shadow of a heavy cloud in the sky; but in startling contrast with this is the cold, vivid light, near the horizon, where the cloud has been lifted. Against this the church and trees and the old church tower are relieved with touches of marvellous delicacy. All the details in shadow are equally exact and descriptive. Mr. H. B. Davis's "Summer Time" (12) is a picture full of truthfulness in its extreme elaboration. Mr. Vicat Cole's "Autumn Evening" (5) is vigorous; but another landscape by the artist (No. 9) the same title (69), reminds us less of former works. The effect in the latter of the warm, lingering, suffused light, is very successfully, in fact strongly expressed. Mr. A. W. Hunt has a study called "Mist Wreaths" (140), wonderful for variety of form and colour, but photographic in character, and somewhat wanting in "feeling". The scene is the bold granite crests of some mountains in Scotland or Wales, with a rushing water in the foreground, a cloud-mass, a scurry of cloud and mist, and a double rainbow formed against a retiring bank of cloud. The remarkable tendency of the pictures by Mr. Creswick, R.A., to sootiness, is still more obvious in two contributions to the exhibition. Mr. Peel has gained in force and richness in No. 61 and No. 81. A landscape (144)—apparently a study from life—by Mr. Jotham, is placed too high for fair examination. Lastly, Messrs. Elmore and Niemann are represented, though not very favourably.

In the lower room at St. James's Hall, Piccadilly—so long occupied by Christy's Minstrels—an "Historical Panorama of the Civil War in America" (we dislike extremely a Mr. Church to the exclusion of American painter of that name), with musical accompaniments and a descriptive lecture. The panorama is by Mr. Bell, and is a very efficient artist, some of whom have been in the conflicts they represent, while others have painted from photographs. As a rule the scenes are represented, which are as various in interest as they are unequal in execution—the battle-pieces being, however, by much the best. Even these have little art value; but, as a matter of interest, it is instructive, placing as it does before us, compendiously and vividly, and without perceptibly leaving the room, the leading and salient events of the gigantic and sanguinary struggle of which we read and think with such interest and regret.

The Royal Academicians have decided, on account of want of space, not to submit any more female students into their schools at present.

The Queen has approved of Mr. Gustav Schunhoff as Consul at Cape Town for the King of Hanover.

It is proposed to establish an Oriental library in Bombay, to include all Sanskrit and other Oriental works.

Accounts from Algeria state that the plain of El-Outaia has been planted with nine thousand vine-stocks of the Bordeaux, the great Algerian manufacturer. The result is remarkable. The first year's produce was forty acres, which much encouraged the proprietor to extend the cultivation. Irrigation likewise is being introduced into the three provinces of Algeria. It is said that a much cheaper article can be formed at Algiers than in any capital, which proposes to irrigate the Metidja. Another plan is under consideration which would irrigate the whole of the province of Oran.

Her Majesty's Emigration Commissioners have chartered the Montrose, 779 tons, for the conveyance of emigrants to Sydney, New South Wales; the Ellen, 564 tons, to Melbourne; the Mary Wood, 1,100 tons, for the reception of her passengers at Birkenhead, on the 8th of December next. —The Steamer, H.M.S. Lee, Captain Burrows, sailed from Queenstown on the 28th instant for Sydney, New South Wales, having on board 402 Government emigrants, comprising 61 married couples, 102 single men, 102 single women, 29 boys, and 25 girls between one and twelve years of age, and 8 infants.—The Ship Urgula, 1,000 tons, sailed from Plymouth on the 1st instant for Adelaide, South Australia, having on board 321 emigrants.

On Friday next will occur a meeting of the Royal National Life-boat Institution was held at its house, John-street, Adelphi—Thomas Chapman, Esq., F.R.S., in the chair. Reports were announced to the number of 194, relative to the crews of the life-boats of the society stationed at Dundalk, Fleetwood, Penzance, Aberdeen, Southport, Hastings, Ramsgate, and Deal, and during recent heavy gales, the following shipwrecked crews:—Four men from the schooner Adelaide, of Whitehaven, four from the schooner Ellen, of Preston; four from the schooner Gipsy, of Drogheda; seven from the barque Ardincaple, of Greenock, Southport; fourteen from the schooner Ida, of Skien, Norway; four from the smack Saucy Jack, of Inverness; and one from the brig Sarah Jackson, Whitby, performing shore duty. Rewards to the crews of which were accomplished during the dark hours of the night, the life-boats, in every instance were reported to have behaved admirably, and to the men their gallant crews never flinched for a moment under the most perilous circumstances. The thanks were also voted to the Hon. Secretary of the Institution at Holyhead, Rye, Hudden Ness (Dundee), and Walmer for assisting in bringing safely into port the Italian brig Giuseppe Gherardi, of Genoa; the schooner Lily, of Whitby; schooner Gleaner, of Palermo; and the smack Sally, of Amsterdam, with their crews. Rewards have been also granted to the crews of the boats of the life-boats. Rewards amounting to £56 4s. were likewise voted to the crews of several life-boats for services rendered to vessels in distress, with the view of saving life; but then the vessels had, happily, got out of danger or the crews had been rescued by other means. Various other rewards were also granted to the crews of shore-boats for saving the crews and passengers of vessels in distress on our coasts. Captain Ward, R.N., the inspector of the National Life-boat Institution, read a report of the proceedings of the life-boat establishment from Berwick-on-Tweed to the Humber. He found the boats everywhere in excellent order. Now life-boats were supplied by the Institution during the past month to Teignmouth (Devon) and to Rye (Sussex). A communication was read from the Comptroller of the Royal Navy stating that it was proposed to supply all vessels of war with a life-boat in lieu of one of the boats usually carried, and asking the Institution for all the information in its power on the subject of ships' life-boats. Accordingly, valuable reports were laid before the committee by Captain Ward, R.N., the inspector of life-boats, and by Mr. Joseph Peake, surveyor of the institution, on the subject, which were ordered to be submitted to the Lords of the Admiralty. Messrs. Forrests' life-boat built two ships' life-boats under the superintendence of the society, and it was decided that their Lordships should be invited to inspect the same. Payments amounting to upwards of £100 sanctioned were made on various life-boat establishments, the proceedings terminated.

MUSIC.

We have to notice some musical performances of last week for which there was not room in the columns of our last Number.

On Friday evening, the 6th, Mr. BENEDICT gave a grand evening concert at St. James's Hall, for the special purpose of bringing before the metropolitan public his new cantata, "Richard Cœur de Lion," composed for and performed with great effect at the recent Norwich musical festival. A beautiful work lost none of its effect by repetition, and was received, if possible, even more enthusiastically than at Norwich. The principal solos were sung by Misses Tubelli, Bessi, Bettini, Wilbye Cooper, and Santley, and the choruses were by the choir of the Vocal Association. Though this cantata was the chief it was not the only feature of the concert. There was also a fine selection from Gounod's "Faust;" and several miscellaneous pieces, all of which were executed in the most perfect manner.

On Tuesday evening, the 3rd inst., at the AGRICULTURAL HALL, Islington, Lieut.-Colonel Chesney, R.A., F.R.S., one of the new organ built by Willis the International Exhibition, and now erected in the new Building. The performers on the instrument were numbered above a thousand performers; and the principal singers were Miss Parepa, Madme. Sainton-Dolby, Mr. Wilbye Cooper, and Mr. Thomas. The vast hall, capable of containing twelve thousand persons, was well filled; and, as the building is well fitted for not an eight-part choir, "Judge me, O God!" and the psalm, "Rest in the Lord," by Mendelssohn, were admirably rendered by the organ. In this last piece the solo part was sung by Mdme. Lemmens-Sherrington, who has a power and expressiveness peculiarly her own. Sir Henry Lind. During the whole performances of the evening the choir maintained its high reputation for discipline and efficiency.

On the same evening, at the Royal Academy of Music, the MUSICAL SOCIETY of LONDON had a trial-performance of new orchestral compositions by members of the society. Several symphonies and overtures were performed, but a full and excellent orchestra, which did them every justice. Among them the most remarkable were a Symphony in F minor, by Mr. Frederick Corfe, and a symphony in A minor, by Mr. John Francis Barnett, both remarkable compositions, which did infinite credit to their talented authors. Miss Smith's symphony especially, coming from the pen of a young lady, was a striking proof of the sound studies and high theoretical attainments of the members of this admirable society. We trust that both these symphonies will be brought before the public in the course of the ensuing season.

THE THEATRES.

SADLER'S WELLS.—On Monday a new play was produced which, from its elevated aim and its elegance as a dramatic composition, merits more than ordinary notice. It is from the pen of Mr. Westland Marston, and is entitled "The Ties of Life." The subject suit as much the style of the play as the character of the here. The new drama is in five acts, the first serving as a prologue to the other three. The scene in which the action occurs is Baden-Baden, where the usual mixture of reputable and disreputable characters is discovered. The principal male personages introduced are Mr. Rochford, an aspiring artist with his wife, and others of less note, but who serve to fill up the canvas of the picture. Mrs. Rochford, the heroine, is associated with his uncle, Mr. Langley (Mr. J. Perfitt), who has found himself in such straitened circumstances as to be reduced to play. The fatal propensity still clings to him, and he contrives to send Rochford from the spot in order to receive some jewels and money that bring his nephew into the possession of a large fortune. Meanwhile he amuses himself with rouge et noir, and loses his money to one Richard Vane (Mr. Ryder), a gambler. Rochford, on his return, returns in time to prevent the quarrel ripening into an assault, and a duel ensues, which, however, is satisfactorily settled, and then proceeds with his uncle on his way to take the conveyance for Strasbourg, and, after accepting from him his diamond ring in return for money he has lost to him, returns to the gaming-table at the hotel. Shortly afterwards shots are heard, and Rochford, fearing the worst, hurries to the spot, and finds Vane lying mortally wounded in the wood. While he is employed in vain endeavours to help the latter, the police enter and take him on an suspicion. A circumstantial evidence is strong against him. He is tried, and condemned, not, however, to death, but to perpetual imprisonment. He is sent to the Bagne, and there, in the following year, dies. His daughter Evelyn becomes the protégée of Miss Fortescue (Mrs. Boddington), and Mrs. Rochford, upon her return to England (Miss Marriott) is living under the protection of Miss Fortescue, but in ignorance of what had befallen her father, of whom she is only led to think he had broken her mother's heart. Evelyn proves to be the adopted heiress of Miss Fortescue and the affianced bride of Mr. Rochford's brother, Edmund (Mr. Phelps), who is loved by Gerard Fane (Mr. Edmund Phelps), who seeks to take advantage of their lovers' absence to win the fortune. But Evelyn is as an expert in stealing ladies' hearts and borrowing their parents' money, and is pursued by a Mr. Morley (Mr. Bullion), whom he has thus defrauded. Mrs. Rochford, Evelyn's mother, appears in the Bagne, under the name of Vernon, and as a drawing-master, in which character he becomes acquainted with Sir Gerard's daughter, who is also a teacher. Soon he becomes acquainted with Sir Gerard's projects, and learns that Evelyn is his niece. He, of course, becomes Evelyn's secret antagonists come into contact, and become known to each other as former acquaintances at Baden-Baden. At however, Rochford denies his identity. Evelyn, in the fortune. But Rochford, who has also found it, he thinks, in one Lancia, an Italian political agent. Meanwhile he sees Evelyn, and, by a fortunate chance, prevents the consummation of his preserving his secret. he will permit him to wed Evelyn and comply with the terms of her fortune. But Rochford refuses to do so, the safest course, deems it best to confess all to his daughter. This confession, which forms the great scene of the play, occupies a large portion of the fourth act. It is very powerfully written, and Miss Marriott Bruckenbury's father refuses to permit him to marry Evelyn, except on condition of his relinquishing his assumed name, and Evelyn herself takes part with her newly-found father on such terms. Besides, Sir Gerard Fane proposes to Evelyn to discover Mr. Gibbs's murderer, and to identify Rochford as a returned convict. Lancia does so; but, at the same time, produces evidence which entirely acquits Rochford of his former crime, and Sir Gerard Fane withdraws his opposition, and all the lovers are made happy. Rochford, thus tried and purified in the furnace of affliction, is restored to his wife, and to the world at large. We have already said that this drama is elegantly written. We may now add that it is powerfully constructed, and is full of dramatic interest with a critical audience. In these days of sensation-pieces and translations from the French an original work of unquestionable merit should be especially welcome. We should cordially accept the proof it gives that there are Englishmen who can write plays of their own invention, with both plot and style unborrowed from foreign sources, capable of enclaining the attention and exciting the feelings of an enlightened audience. The present work, indeed, is remarkable for its beauty as a literary composition. As an acting play it is unexceptionable. Altogether, too, it was well acted. Mr. Henry Marston, as the sorely-tried father, by his excellent impersonation has established for himself a position which, for the future, will place him in the foremost rank of our actors. Mr. Ryder, as Vane, the gambler, was admirable, and in the great scenes of emotion produced a strong impression. Mrs. Buckingham White, who was expressly engaged, found in Miss Fortescue a part remarkably well suited for her talents; and Mr. Edmund Phelps, in the rôle Baronet, was quiet and acted with much discretion and point, but in his make-up showed considerable judgment. By it his appearance was much improved; and it also rendered his manner more than usually effective. Mr. David Jones, as the lover, manifested great warmth of feeling, and an intelligence which will surely make its way with the public. Miss Mandelbert, in the small but important part of the maid-servant, achieved a great success in the trying situation consequent on her discovery of the murder of the count, and his arrest. Her faith in his innocence and the agony of her desolation both received full and natural and forcible expression. The drama is, in a word, a great and well-received success, and ought to have a prolonged run.

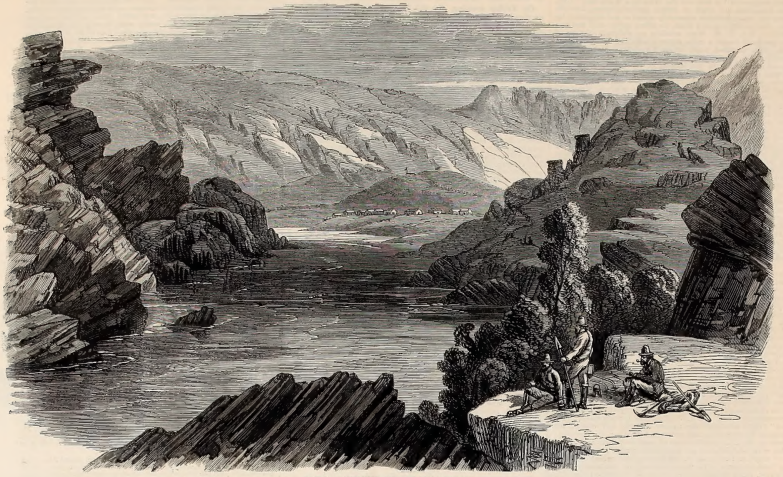
HAYMARKET.—An adaptation from the French, entitled "A Bill in a China Shop," was produced on Saturday. The action takes place in the house of Mr. Bagshot, St. Tipthorpe (Mr. Compton). The old gentleman is awaiting the arrival of an old friend from the East—one Baptist Pratt (Mr. Buckstone), on whom Bagshot relies for subsequent incidents depends. Bagshot has come from an excursion to Normandy to Mr. Tipthorpe, and is received with open arms accordingly. He becomes at once Tipthorpe's confidant, who confesses to him a matrimonial delinquency, and asks his counsel. Tipthorpe has been twice married, and has a married daughter by his first wife; but he has lately passed himself off as a widower to Arabella Fitz-Kensington (Miss Caroline Hill), and dined with her at the Star and Garter, Richmond. Bagshot, who loves to meddle with other people's affairs, writes a letter for him to the lady in which he precisely the contrary effect intended, and brings her to the spot followed by her lover, Major Bellamy Brownjohn (Mr. Rogers). Bagshot meanwhile has become acquainted with Mrs. Bryce (Miss H. Lindley), whom he suspects of an intrigue with one Fritter (Mr. W. Gordon), a clerk in the War Office. This lady, in private, is the addressee to the daughter. He makes a further blunder. Piper, a confectioner (Mr. Clark), who is secretly married to Tipthorpe's mistaken by him for Miss Tipthorpe's lover. Bagshot is bewildered; and when, in conclusion, all parties are set right, he ridiculously compliments them on the successful sacrifice of feeling which they have made with so much magnanimity. Such a part in any other hands than Mr. Matthews's would have completely failed; but his quaint and vivacity carry it through to the end with spirit, and commands success not obtained by the piece itself.

DRURY LANE.—On Monday evening a new farce was produced under that "Maufred," that of "Beauty and the Beast," being placed in the front rank of the company. The title of the new venture is "My Heart's in the Highlands," and is put forth as original by its authors, Messrs. Brough and Halliday:—two Whitechapel Cockneys that Scotland, having previously assimilated to their nature and adopt the manners of the Highlanders. Their foolish mistakes make the fun of the piece. It is full of fun, and is very broad in its farce. Mr. G. Weston is also humorous as his companion; and the John of Grass of Mr. Paul Bedford is the most jovial of patriarchs. The piece excites the loudest merriment.

SCIENTIFIC NEWS.

THE NEW METAL WASHUM, noticed in our Number for Oct. 31, p. 451, is stated by Dr. Percy to be a compound body; his analysis gave it to be yttrium combined with didymium and terbium. The question will have to be determined by the chemists.

YELLOW AMBER.—A piece of this substance, about 3 in. long by 2 in. wide, and 1 in. thick, is in the form, with an entrance of honey-yellow; and yellowish white, yellowish, and perfectly homogeneous in the interior, has been found at the north of the town in the sand in the tertiary sands of Poitalon Cotton, Austrian Silesia. It is remarkable that this piece, which is probably the largest piece of amber ever preserved in its interior the soft plastic consistence proper to resinous substances.



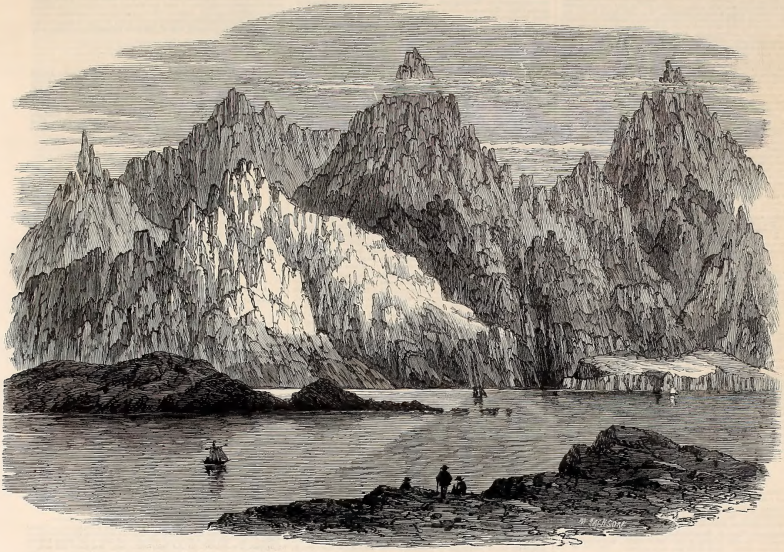
A NEW APPARATUS FOR DETERMINING SPECIFIC WEIGHTS, made by M. Lasser, after the idea of Archimedes, was described by him at a note read at a meeting of the Academy of Sciences at Vienna. It consists of the beam of a balance, with two yellow copper scales, which hang down, and divided in the direction of its length into two equal parts of some absolute value. At one of the ends of the beam, and of suspension a counterpoise, all, as the other a small basket of metallic wire, both ends being provided with said books which may be attached to the corresponding ends of the divided scales at its length. The object, the relative density of which is required, is placed in the basket. It is weighed first in air, and then in water. In each case, the exact weight till the equilibrium be re-established. The two distances of the centres where the hooks are attached to the beam afford the results for the calculation of the specific density. M. Tschermak states that the results obtained by means of it are in a satisfactory degree of precision differing only 0·06 from those obtained by a sensitive hydrostatic balance.

CHEMICAL CHANGES.—Mr. Schönbein has recently announced by certain substances of developing catalytic phenomena (said to occur though the mere presence of a substance, as in the combination of oxygen and hydrogen when a piece of spongy platinum is introduced). M. Schönbein says that this power is shared by the salts of the protoxide of manganese generally. He asserts that the seeds and roots of all plants contain catalysing substances; and he thinks that phosphorescence is intimately connected with the presence of a substance of this nature, and that everything which annuls the catalytic activity of a substance at the same time annuls its phosphorescence.

ELECTRIC CONDUCTIBILITY.—M. De la Rive has laid before the French Academy of Sciences a note on Professor W. Thomson's new method of measuring electric conductibility and its application to submarine cables. Professor Thomson, by employing an arrangement of successions of which one only is charged, and an electro-motive force whose intensity of the current depend on the wire of a galvanometer in regard to the two electric resistances which are opposed to it. In this arrangement the two extremities of the wire of the galvanometer abut on two points of the two conductors of the cable, which are so determined that there shall exist in the same relation the total resistance of the two conductors. It then appears that if the same electro-motive force be made to act successively on the system (which are, on the one hand, the unknown resistance, and on the other, that which serves to annul it), the ratio of the current in the galvanometer is null. The principle of the arrangement is the same as Wheatstone's; and, although somewhat complicated, it is said to be applicable to the measurement of smaller resistances. We must refer our readers to the *Comptes Rendus* of 26th inst. for Professor Thomson's formulæ and numerical data, and for M. de la Rive's conclusions. In regard to metals tin, lead, bismuth, and antimony, is found that the resistance increases with the heat, while that of the liquid metals he could deal with. The total augmentation corresponding to 100 deg. between the freezing and boiling points of water is for platinum 0·365, for tin, 0·424 for lead, and 0·418 for bismuth, quantities notably different, and all smaller than that found for platinum, which is the metal most conductive. For all the above-mentioned metals there was found to be a decided variation of resistance proportional to the square of that of state. For the platinum, and zinc, the resistance rose to nearly the double: for bismuth and antimony the variation was inverse, and the resistance fell nearly one-half.

METEOROLOGY OF THE GULF STREAM.—In the *American Journal of Science and Arts* for March Notes" on Key West and Cuba" will assist in the Florida Channel, by Major B. S. Hunt, U.S., in which will be found some interesting observations on the temperature of the Gulf Stream, its colour, transparency, and the Gulf Stream cloudbanks, &c. We can only select a few particulars. Major Hunt observed that the water at the new anchorage at Key West is very frequent at Key West. It is not uncommon to see the rays in the east converging in the south, and sometimes in the west, and the whole horizon on the sun is above it, which Major Hunt calls the anti-sun. Sometimes the converging rays appear in the east, and sometimes are quite as distinct in the west. These exhibitions are due to the inshore drift of the Gulf Stream evening cloud bank. The top line is broken in the dark by the rays which are made visible by the diffused and tenuous vapour incident to the evening cooling. The most remarkable feature in the Gulf Stream region at Key West peculiarly warm and moist; hence great difficulty exists in the preservation of perishable articles. Major expresses the opinion that the correct plan is to seal up such articles in close sheathed chambers, hermetically sealed, and filled with dry air. He thus calls "Water mercurie"—When boulmet one beautiful evening, between the red and the gray, the water in the cistern opened, and a broad crescent column seemed to bend the disc and its reflection, just like a coherent water-column between the lifted disc and the still water surface. In another case the column parted at it broke off, and the water was seen to be distinctly above the watery column. Major Hunt could not account for mercury as Major Hunt could estimate a certain thickness of water, and the mercury as Major Hunt could estimate a material connection between the disc and reflection was perfect, both before and as the column was broken and separated. This observation has interest in its relation to the contact phenomena of ellipses.

SKETCHES FROM THE NEW ZEALAND GOLD FIELDS.



TEVIOT TOWNSHIP ON THE MOLYNEUX.

We give on the accompanying pages four Illustrations, from sketches taken by Mr. Nairn during a recent visit to the gold fields in New Zealand. Mr. Nairn also sends a description of his journey, as follows:—Having made a splendid passage from Queensland, leaving Rockhampton on Tuesday evening and arriving (viâ Sydney) off Nelson, New Zealand, at midnight on the Sunday week following, I determined to take advantage of the steam-ship Airedale continuing her voyage southwards to acquaint myself with the wonders of the new gold fields which have recently come to light in the south and on the west coast of this island. Wonders, indeed, they have effected at Dunedin, which from a dull straggling village has now claims to be considered a town of some importance. Certainly, it has not much to boast of with respect to regularity of design; for houses, large and small, and of every description of taste, are jumbled promiscuously together—a large house overtopping a smaller, and a modest wooden one being wellnigh crushed between two brick ones. Wharves, jetties, roadmaking, and other local improvements are making considerable progress, owing to an abundant supply of labour caused by the recent influx of population. At one time there were more hands than occupation could be found for, but these were instantly absorbed on intelligence arriving of the discovery of the fresh gold fields, or "rushes," as the term now is. The principal diggings are the Dunstan on the Molyneux river; and the "rushes" are to the river Shotover and district of Lake Wakatipi, by the

DUNSTAN OR UPPER TOWN, AND HARTLEY OR LOWER TOWN, AT THE JUNCTION OF THE MANUHERIKIA WITH THE MOLYNEUX.

SKETCHES FROM THE NEW ZEALAND GOLD FIELDS.

LAKE WAKATIPU.

GOLD-DIGGERS OUT PROSPECTING.

ordinary route taken by the drays, about 180 miles from Dunedin. But this way is so mountainous, circuitous, and broken that I found the better plan was to proceed by a little steamer to Invercargill, at the extreme south of the island, and then strike inland. At the Bluff we saw a splendid vessel, the Flying Mist, on shore with a hole through her bottom; farther away, on a sandbank, a fine brig, a total wreck; and at low water scattered timbers, evidence of many a former calamity. Yet, once fairly inside, the harbour is a fine one, and is considered a very safe one. Another day brought us to the mouth of the New River, on which is situated Invercargill, the chief town of the province of Southland. Here we signalled for the pilot, who made his appearance *after* we had entered the river. Possibly he may have thought his services unnecessary, as the channel is thoroughly buoyed off—with here a mast, there a funnel, and there again a hull—until within a few miles of Invercargill. The channel shallows very rapidly as it approaches the town, so that it is only at very high tides a vessel drawing 7 ft. or 8 ft. of water can get up to the jetty. Fortunately for us, the tide served. The town as seen from the jetty is a pleasant spot to look on. The country is level, with plenty of bush, but the climate is cold and wet; and, if one may judge from the appearance of the trees inclining all one way, the gales must be frequent and severe. At present the town consists of one street; the projected lines of the others are cut into the bush, with deep open ditches half full of water intersecting the town in every direction, by order of the Town Board. The country is chiefly occupied by sheep and cattle farmers, by whom it will be thoroughly explored, and thus the parts adapted for agricultural purposes will become known.

From Invercargill I started on foot for Lake Wakatipu, by what is termed the "long road," a very good track, rising gradually for 140 miles, but winding to avoid the ranges, with here and there a soft place, and a river—the Mataura—to ford three times.

At the last ford you enter a narrow valley, about a mile and a half in width, which leads to the lake. Pursuing this for about six miles, you arrive at the southern end of Lake Wakatipu. Here I took boat for thirty miles up the lake to the spot known as Rees's Station, from the neighbourhood of which is taken the view which I inclose. This lake is seventy-five miles, or thereabouts, in length, and averages three in width, fringed with mountains of from 3000 ft. to 5000 ft. high. They are perfectly barren, composed chiefly of mica, and penetrated with thin veins of a white quartz, and terminate in needle-like pinnacles. The water of the lake is fresh and pure, and of an intense Atlantic blue, owing probably to its immense depth, as close inshore 200 fathoms of line found no bottom.

Here I first saw the diggers "on the rush;" and now, for the first time, I saw what man can do stimulated by thirst of gold. The wildest recklessness of life and limb, strength taxed to the uttermost, climbing steep, craggy mountain sides with sixty and often eighty pounds dead weight on his back, through a country of chasms, precipices, creeks, ice, deep snow, and wind that seems to blow through a spout, coming with such force that man and horse both lie down to it. This "rush" was to a place called Slatey Creek, some thirty miles in a northerly direction from the lake, the men all hurrying on in single file and in a silence that is oppressive.

I saw nothing to tempt my further stay here, and determined to proceed to the Molyneux, to see what was doing there. I now passed through some of the best country for sheep farming I had seen in the Otago province, the hills being well grassed, not too high, with spots of useful timber. Arriving at the Molyneux, I found the diggers deploring the loss of their cradles and other implements from a sudden flood of the river. The water being very low, many had been induced to prosecute their search in the river-bed, where they were overtaken by a sudden rush of water, common to this extraordinary river, which swept away all their tools and occasioned the loss of some lives. By the sketches I send you of the Teviot township, on the Molyneux, and one of the Dunstan, or upper town, and Hartley, or lower town—the latter situated on the junction of the Manukerekia with the Molyneux and thirty miles further up the river—you will be able to form some idea of the dangers attending diggings among the broken rocks at the very edge of the water, known to be deep, but which the strength of the current has prevented being fathomed.

The towns on the Molyneux—Dunstan, Hartley, and Teviot—are calico towns, a framework of poles covered over with cheap calico. In the Dunstan and Hartley they form a street. Some of the larger houses are divided into rooms; but they are at best dirty, the dust from the six miles of plain between the townships, accumulated from the constant traffic, driving in clouds day and night, and finding its way into every part of these houses.

CHURCH AND UNIVERSITIES.

The Dean of Westminster has accepted the Archbishopric of Dublin, and is to be succeeded by Canon Stanley.

The Bishop of London resumed his Tuesday levées at London House, on Tuesday, for the coming season, and they will be continued, with the exception of the usual intervals of Christmas, Easter, and Whitsuntide.

St. Margaret's Church, Rooden-lane, Manchester, having just been enlarged, at the sole expense of the Earl of Wilton, was reopened for Divine service on Sunday. Most of the new seats are free.

On the 31st ult. the parish church of Alverstoke, Hants, after having been enlarged and partly rebuilt, was reopened and consecrated by the Bishop of Winchester.

Mr. Walford, of Balliol College, Oxford, who some years ago seceded to the Church of Rome, has been received back into the English Church by the Bishop of London.

Assington Church, Suffolk, has lately been reopened, after considerable restorations. The achitect of the restoration has been the Vicar (the Rev. P. Gurdon) himself, assisted by the advice of friends. The entire cost of the work is about £1500, all of which has been raised in the parish, and no debt remains. The whole of the work to the chancel was done at the cost of the lay rector, Mr. J. Gurdon, father of the Vicar, and the rest has been carried out at the expense of the parishioners.

St. Leonard's Church, Prius Marston, Warwickshire, was reopened yesterday week The restoration of this church has comprised an almost entire rebuilding of the nave and aisle, with new roof, stone pulpit, and stalling throughout. A memorial font has also been presented, consisting of Bath stone, with a stem surrounded by alabaster columns, and having an incised inscription round the edge. The work has been completed by voluntary subscriptions and the sale of old materials, its cost falling little short of £1000.

The Lord Chancellor has now more than 300 Church livings for sale under the new Act to increase the incomes of the benefices. It appears that they are situated in 24 dioceses, of which 11 are in the diocese of Canterbury, 4 London, 25 York, 24 Exeter, 27 Lincoln, 22 Worcester, 13 Chichester, 10 Gloucester, 15 Oxford, 22 Norwich, 11 Sarum, 13 Hereford, 12 Rochester, 4 Carlisle, 11 Lichfield, 15 Ely, 13 Winchester, 17 St. David's, 9 Bath and Wells, 2 Manchester, 19 Peterborough, 9 Ripon, 1 Llandaff, and 3 Durham.

A private meeting was held at Wilton House, Salisbury, the residence of Lady Herbert, last week, to receive a statement of the Bishop of Columbia respecting his diocese. The meeting was well attended. The chair was taken by the Bishop of Salisbury. The Bishop of Columbia detailed the spiritual condition and requirements of the colony, and stated his object to be the securing of an annual subscription of £3000 per annum for five years, with a donation of £10,000. After some remarks from Lord Heytesbury, Mr. Sotheron-Estcourt addressed the meeting on behalf of the Bishop's appeal, and suggested that a fund, to be called the "Wilton House Fund," be formed for the Columbia mission. The right rev. chairman seconded the suggestion, which was generally approved of, and a subscription-list opened.

On the festival of SS. Simon and Jude was reopened for public worship the beautiful church of Ringstead, Northamptonshire, after having been closed for three years and a half. In 1860 the church was pronounced unsafe for public service, and from that time till Wednesday week no service of the Church of England, save the burial office, was performed within the parish of Ringstead, containing 800 inhabitants. In 1862 two non-resident landowners—Messrs. W. B. Stopford and G. Capron—set a noble example and restored, in a thorough and substantial manner, the roof and windows; but still the condition of the interior was such that the resumption of the Church services was impossible. At Easter, 1863, a new Vicar was appointed, and these two gentlemen, in conjunction with him, convened a meeting of the parishioners, who unanimously granted £250, to be raised by rate, in addition to a subscription of £114. Grants were obtained from the church-building societies, and, by the further liberal aid of Mr. Stopford and Mr. Capron, and of subscriptions from the Vicar and other friends, the work of restoration, under the direction of Mr. Slater, was completed on Oct. 28, after an expenditure of £1500.

The Universities and Public Schools.—In a convocation at Oxford, on Thursday week, the nomination of Robert Bertram to the office of teacher of the German language in the Taylor Institution was submitted to the house and approved.

The annual meeting for the distribution of prizes to the students of the Worcester Diocesan Training College took place on Thursday week, at the institution, Saltley, near Birmingham. Lord Lyttelton, the president, Sir J. Pakington, the Bishop of Lichfield, Mr. Adderley, M.P., and others addressed the meeting.

Last Saturday the council of University College held their first session of the academical year 1863-4—Mr. Grote, treasurer, occupying the chair. A letter was received from Messrs. Cama and Co., expressing their approval of the spirit of religious tolerance displayed in the management of the college, and inclosing a cheque for £3000 as a donation to the funds. The meeting unanimously passed a vote of thanks to Messrs. Cama and Co. The council passed a further vote of thanks to Messrs. Cama and Co, as an acknowledgment of a donation of £1000 to University College Hospital. A vote of thanks was also passed for a contribution of £500 from an anonymous benefactress, forwarded through Messrs. Morris, Prevost, and Co. The following prizes were then awarded:—Classics: Scholarship of £85, awarded to Mr. A. S. Wilkins; second scholarship of £60, to Mr. J. S. Cluff. Mathematics: Scholarship of £85, Mr. N. E. Hartag; second scholarship, £60, Mr. P. Magnus. Filliter exhibition, for proficiency in pathological anatomy, £30, Mr. A. Bruce. Longridge prize, for general proficiency in medicine and surgery, £40, Mr. A. Bruce. The examination for the Ricardo Scholarship, political economy, of £20 per annum for three years, will take place on Dec. 1.

TALK ABOUT LORD MAYOR'S DAY.

Lord Mayor's Day, with its glittering show and gorgeous feasts—in the great Hall, the companies' halls, and in tavern dining-rooms—was celebrated on Monday last. The glorious "9th" is not neglected in the City. Time was when citizens would not "begin fires" until Lord Mayor's Day, however cold the season might be, and perchance the custom still lingers in a few old houses. Who that has read and does not remember Theodore Hook's humorous sketch of the mayoralty—"the splendid annual"—of some thirty years since?—how Scropps could not sleep all night for his greatness; the wind down the chimney sounded like the shouts of the people; the cocks crowing in the mews at the back of the house he took for trumpets sounding his approach; and the ordinary incidental noises in the family he fancied the popguns at Stangate, announcing his disembarkation at Westminster. The mayoralty pageant is shorn of its aquatic state: we miss the "golden glister" of the State barges and the rustling of the silken banners on the river; the Stationers, in their gilt barge, no longer call at Lambeth Palace for their hot spiced ale, and buns, and cakes, and wine; nor has the Company to provide new wooden sack-cups, though the Archbishop of Canterbury may receive his annual present of almanacks from Stationers' Hall. But the Lord Mayor's inauguration-day is still long enough for mortal to endure: the breakfast at Guildhall, going to church at St. Lawrence's, and then the state procession, or show, often extended in its route so at to pass through the new Lord Mayor's ward, moves on through the City, Fleet-street, the Strand, Charing-cross, and Whitehall, still "holding due course to Westminster," notwithstanding Lord Sidmouth, as High Steward, once protested against a similar passage through his civic domain by the greater civic pageant. The show, with its stray features of mediæval state and modern anachronism, is still a holiday sight, more especially on a Monday; and the new life of its Volunteers and Fire brigade is enjoyed more than "dull fools suppose." We remember the majority of the shows of the present century, and many attempts to vary the pageant:—how an immense ship, fully rigged and manned, was once the novel nucleus; how copies of Gog and Magog, in Guildhall, each 14 ft. high—the giants' faces level with first-floor windows—were carried in the show; and how an extra sum of money was expended in getting up a sort of national pageant in Sir John Musgrove's mayoralty, which was picturesque, but very theatrical, and lacked civic character. The last ancient feature was the poor men of the company to which the Lord Mayor belonged, wearing their long gowns and close caps of the company's colour, and bearing painted shields, there being as many men as years in the Lord Mayor's age. This was well enough, but "dull fools" laughed at the poor old fellows as so many "Guys" of four days previously. But those historical personages, the "men in armour," have been spared; and the state coach, more than a century old, with its gaily-ribboned horses, still bears the new chief magistrate to Westminster for presentation to the Judges in the Exchequer Court, who are then invitated to the banquet. The return of the procession, lengthened by the carriages of guests, is a slower work. The paucity of the ancient features of the show, though bewailed by antiquarian "fogies," is atoned for by the spick-span splendour of the dress and state carriages of the Lord Mayor and Sheriffs, reminding the industrious crowd of work and wages: and this brings to mind Cobbett's homely illustration of the show, and the good it does:—

> Our Lord Mayor and his golden coach, and his gold-covered footmen and coachmen, and his golden chain, and his chaplain, and his great sword of state, please the people, and particularly the women and girls, and when they are pleased the men and boys are pleased; and many a young fellow has been more industrious and attentive from his hope of one day riding in that golden coach.

And so it has proved: for some of the Mayors of the present century came to London to seek their fortune—some as "poor boys:" the obelisk at the south end of Farringdon-street attests a rise of the former kind. But, to rejoin the procession. Formerly the horses were occasionally taken from a carriage, and the popular inmate drawn up "the hill" by his admirers; we all remember the story of Wilkes's coachhorses; the practice was liable to abuse, as in the instance of a Sheriff, a publisher, being thus "drawn up" by a set of men from a neighbouring printing-office, who, provided with ropes, awaited the arrival of Mr. Sheriff. No good came from such purchasable enthusiasm. Onward moves the show, and great is the rabble-rout behind the state coach, which rolls down King-street to the porch of the Guildhall. The interval until the dinner-hour is pleasantly relieved by the arrivals of celebrated guests. At length the Lord Mayor and the more distinguished company proceed by sound of trumpet, by a circuit of the great hall, to the upper table; grace is said, and the feast commences. The Hall then presents a magnificent spectacle, such as is nowhere else to be enjoyed. The noise of some 1200 guests setting-to is, of course, great; and the serving of the dinner requires some 200 persons and 8000 plate changes. Towards the south-west corner of the hall is a relic of old festal state. Here is the City carver, upon a sort of dais, carving with due circumstance the baron of beef, which had been brought into the hall with the customary pomp. The old giants seem to leer at the good things beneath them, and remind us of the nursery "sell"—when they hear the clock strike they will come down to dinner. The clatter increases, for in this respect we beat our forefathers, who feasted in this hall off wooden trenchers. It is just *two centuries since* the earliest recorded Lord Mayor's dinner took place in the Guildhall, thus told by that recorder of good things, Samuel Pepys, in his inexhaustible "Diary":—

"29th Oct., 1663.—To Guildhall, and up and down to see the tables, where, under every salt, there was a bill of fare, and at the end of the table the persons proper for the table. Many were the tables, but none in the Hall but the Mayors and Lords of the Privy Council that had napkins or knives, which was very strange. I sat at the Merchant strangers' table, where ten good dishes to a messe, with plenty of wine of all sorts; but it was very unpleasing that we had no napkins nor change of trenchers, and drunk out of earthen pitchers and wooden dishes."

Curiously enough, the Lord Mayor of 1664 was named Laurence. Some ten years later, 1674, when Sir Robert Viner was Mayor, Charles II. dined here; and, Sir Robert getting elated, the King stole off and made towards his coach, which stood ready for him in the Guildhall-yard. Then, the Mayor "had grown so intimate" that he pursued the King, and, catching him fast by the hand, cried out, "Sir, you shall stay and take t'other bottle!" and, as the *Spectator* tells, "the airy Monarch looked kindly at him, over his shoulder, and, with a smile and graceful air (for I saw him at the time, and do now), repeated this line of the old song,

> He that is drunk is as great as a King,

and immediately turned back and complied with his landlord." We are never tired of this piece of exquisite humour, and we hope the reader holds it in the same estimation: age is a test of goodness in stories as well as wine; in neither case does the bad last.

In Guildhall the inauguration dinners of the Lord Mayors have been held since 1501; and from 1660, with only three exceptions, our Sovereign has dined at Guildhall on the Lord Mayor's Day after his or her accession. The exceptions were James II., who held the City charter upon a writ of *quo warranto* at his accession; George IV., who was rendered unpopular by his quarrel with his Queen; and William IV., who apprehended political tumult. But George IV. when Regent was entertained there, on the 18th of June, 1814, with the Emperor of Russia and King of Prussia, when the banquet cost £25,000; and on that day year, June 18, 1815, was fought the battle of Waterloo! The Guildhall inauguration dinner, including wines, usually costs about £1500, which is supposed to be paid out of the public money; but the City contribute only £200, the remainder being paid half by the Lord Mayor and half by the two Sheriffs. The procession costs about £300, and the decoration of the hall £800, which expedition is similarly apportioned.

The dinner-table at Pepys's feast, with its wooden trenchers, and dishes, and earthen pitchers, must have been barbarously decked. The display of costly plate is now very fine. The 250 tureens of turtle do not figure in the old diarist's bill of fare. The loving-cup is of mediæval times; but the lighting of the old feasts must have been very sparse or rude, in comparison with the present flood of gaslight, exceeding that of 46,000 wax candles. The decorations of the Hall have been very much improved in artistic taste, much of the merit of which is due to the ability of the late City architect.

There have, doubtless, been many delightful associations formed at the mayoralty table, but none exceeding in interest the first meeting of Erasmus and Sir Thomas More, the latter then not eighteen years old. Tradition relates it to have been arranged that the two scholars should meet, without either of them knowing it, at the Lord Mayor's table, "which was then open to literary men of every nation." A controversy arose at dinner, and in the equal match of wit and argument Erasmus exclaimed, "Aut tu Morus, aut nullus!" to which More, equally surprised, replied, "Aut tu es Erasmus, aut Diabolus!" And, from this memorable meeting—in 1497, in the mayoralty of William Purchase—sprang one of the most interesting friendships in literary history.

LORD MAYOR'S DAY.

THE PROCESSION.

The Right Hon. William Lawrence, the Lord Mayor of London for the ensuing year, went in State on Monday from Guildhall to the Exchequer Court, at Westminster, where he was sworn in with the usual formalities. There was the usual show, made up of men in armour, watermen, volunteer bands, banners of City companies, gilded coaches, and the usual constituents of a Ninth of November show.

The procession left Guildhall at twelve o'clock, passing through Gresham-street, Coleman-street, London-wall, Moorgate-street, Princes-street, King William-street, Cannon-street, St. Paul's-churchyard, Fleet-street, Strand, to Westminster, in the following order:—

The Band of the London Rifle Volunteer Brigade.
Three Trumpeters.
The Band of the Royal Society for the Protection of Life from Fire.
Watermen bearing the Banners of the Livery Companies of the City of London.
Master and Wardens of the Fruiterers' Company in a Carriage.
The Band of the Third Tower Hamlets Volunteer Brigade.
Carpenters' Company.
Banner of the Arms of the Worshipful Company of Carpenters.
Banner of the Arms of the late Sir William Staines, Knt., Lord Mayor, 1801.
Banner of the Arms of the late Alderman Lawrence.
Banner of the Arms of Robert William Kennard, Esq., M.P.
Banner of the Arms of Alderman James Clarke Lawrence.
The Union Jack.
Banner of the Arms of the Right Hon. the Lord Mayor.
The Royal Standard.
The Beadle bearing the Company's Mace.
The Clerk of the Company, in his Chariot.
The Members of the Court of Assistants, in their Carriages.
The Wardens of the Company, in their Carriages.
The Master of the Company, in his Chariot, attended by the Chaplain.
Watermen bearing the following Banners:—
Royal Standard.
Banner of England. Union Jack.
Banner of Scotland. Banner of Ireland.
Six Streamers of the City Arms. Banner of the City of London.
The Band of the Grenadier Guards.
First Knight,
in a plain Cap-à-pie Suit of Armour of the early part of the Seventeenth Century,
attended by Two Esquires;
one a Swordsman in a Suit of Black and White Armour, the other in a Demi-Lance Suit.
Second Knight,
in Tilting Armour, early part of the Sixteenth Century,
attended by Two Esquires;
one in Cavalier Suit of Langrened Armour, the other in Cavalier Suit of Bright Armour.
Third Knight,
in Tilting Suit of the Second Half of the Sixteenth Century,
attended by Two Esquires;
one in Half Suit of Bright Armour, the other representing a Demi-Lance.
Fourth Knight,
in a Cap-à-pie Suit of Engraved Armour of the First Half of the Sixteenth Century,
attended by Two Men-at-Arms in Foot Armour.
Fifth Knight
in a Cap-à-pie Suit of Bright Armour of the First Half of the Sixteenth Century,
attended by Two Esquires;
one in a Suit of Splints, with engraved Morion, the other in a Back Plate of Steel.
Sixth Knight,
in a Cap-à-pie Suit of Black and White Armour of the First Half of the Sixteenth Century,
attended by Two Esquires; one in Maltese Armour, the other in Italian Armour.
The Band of the Irish Rifle Volunteers.
The Two Under-Sheriffs.
The Officers of the Corporation of London.
Three Trumpeters.
Mr. Sheriff Cave, in his State Chariot, drawn by four horses, attended by his Chaplain.
Three Trumpeters.
Mr. Sheriff Nissen, in his State Chariot, drawn by four horses, attended by his Chaplain.
The Band of the Hon. Artillery Company.
The Aldermen who have not passed the Chair.
The Recorder.
The Aldermen who have passed the Chair.
THE LATE LORD MAYOR.
The Lord Mayor's Servants, in State Liveries.
The Band of the 1st Life Guards, mounted.
The City Marshal, on horseback.
Gentlemen of the Lord Mayor's Household.
THE RIGHT HONOURABLE THE LORD MAYOR,
in his State Carriage, drawn by six horses,
attended by the Chaplain, Sword Bearer, and Common Crier.
Guard of Honour, on horseback.
The Military Escort was a detachment of the 12th Light Dragoons (Lancers).

The ceremony of swearing in the Lord Mayor took place before the Barons of the Court of Exchequer, immediately after the arrival of the procession at Westminster. The learned Judges present were Lord Chief Baron Pollock, and Barons Bramwell, Channell, and Pigott, who wore their full robes of State. His Lordship after the ceremony went through the law courts, inviting the Judges to his banquet at the Guildhall in the evening.

The procession returned from Westminster by way of the Strand, Fleet-street, Ludgate-hill, St. Paul's churchyard, Cheapside, King-street, to Guildhall. On its return it was joined by the Lady Mayoress, the Ambassadors, her Majesty's Ministers of State, the Nobility, Judges, Members of Parliament, and other persons of distinction invited to the banquet at Guildhall. The London Rifle Brigade met the procession on its return at Temple Bar, and preceded the Lord Mayor to Guildhall, where they formed a guard of honour in Guildhall-yard and King-street.

The Lord Mayor met with a hearty reception, due both to the estimation in which he is held and to his accession to the chief magistracy of the City.

THE BANQUET.

The usual banquet took place in the evening in the Guildhall, and was given with more than wonted splendour, most of the fittings and decorations used at the ball to the Prince and Princess of Wales still remaining. There were about 800 guests. The following were among the company present:—Lord and Lady Palmerston, the ex-Lord Mayor and ex-Lady Mayoress, the Duke and Duchess of Somerset, the Marquis of Salisbury, Earl Granville, the Earl of Hardwicke, Mr. Sheriff Nissen and lady, Earl and Countess De Grey and Ripon; the Right Hon. E. Cardwell, M.P., and Mrs. Cardwell; the Persian Minister, the Columbian Minister; the Right Hon. S. H. Walpole, M.P.; Sir W. Dunbar; Mr. Stansfeld, M.P.; General Sir George Pollock and Lady Pollock; the Hon. Mr. Brand, M.P.; Viscount Torrington; Lord Saye and Sele, Major-General Sir E. Lugard, Sir C. Wentworth Dilke, Sir G. C. Young, Sir Richard Mayne; Mr. T. S. Baring, M.P.; Mr. Money Wigram; Mr. C. Gilpin, M.P.; Sir J. Bowring and Lady Bowring; Mr. R. W. Crawford, M.P.; Mr. S. Beale, M.P.; Mr. Tite, M.P.; Mr. J. T. Norris, M.P.; Mr. Pownall, Professor Donaldson; Mr. Hawkshaw, C.E.; Mr. Newmarch, Mr. Lubbock, Mr. Dillon, Sir C. Young, Sir Harry Parks, Mr. Jas. Johnstone and Mrs. Johnstone, Mr. Jas. Grantham, Mr. J. R. Robinson, Chief Justice Sir William Erle, the Chief Baron Pollock, the Judge Ordinary, and six Puisne Judges; Serjeants Woolrych, Parry, Payne, Tozer, P. Burke, and Spinks; and the Attorney-General (Sir Roundell Palmer, M.P.) and the Solicitor-General (Mr. Collier, M.P.).

The dinner, as will be seen by the above list, was duly attended by the representatives of those great public bodies which the City delights to honour at the festive board. Ministers, Lords and Commons, Army and Navy, Judges and Bar, were all more or less represented, properly felicitated, and appropriately responsive. But the speech which is looked for on these occasions is that of the Prime Minister, which, accordingly, we give entire.

LORD PALMERSTON ON PUBLIC AFFAIRS.

The Lord Mayor, in giving "The Health of her Majesty's Ministers," said that we had good reason to congratulate ourselves upon the position which this country occupied at the present time, owing to the strict neutrality of its policy and its firm adherence to the blessings of peace. England was a free country, and its people were in the habit of criticising boldly and fearlessly the acts of all Sovereigns and of all nations, and showing its sympathy with countries struggling for independence and liberty. It was a proud thing for the country that it had at the head of its affairs a veteran statesman who enjoyed the confidence not only of one great party, but of the nation in general (Cheers). There never was a Prime Minister so popular as Lord Palmerston since the time of the late Earl Grey (Loud and renewed cheering). Most earnestly did he trust that his health might long continue, and that his life might long be spared to the nation (Cheers). The name of Palmerston was the symbol of liberty in every country in the world; he enjoyed the respect of true statesmen in all parts of the world, and the despots of every nation had the fear of the noble Lord always before them (Cheers).

The toast was drunk with great enthusiasm. Lord Palmerston, on rising to reply, was vehemently cheered, and when at length he was able to obtain a hearing the noble Lord said:—

"My Lord Mayor, Ladies, and Gentlemen,—For myself and my colleagues I beg to return most sincere thanks to you—my Lord Mayor, for the manner in which you have been kind enough to propose, and to you, ladies and gentlemen, for the manner in which you have been good enough to receive, the toast. Those who are charged with the conduct of the affairs of this country must always feel the highest gratification in being permitted to be present at the splendid hospitalities of this great city of London (Cheers). And not only do we receive personal gratification, but we feel that on these occasions what takes place cements that union between the different classes of the community which is so important to the interest of the whole. It is well that those who are engaged in carrying on those commercial transactions on which the wealth, the strength, and the happiness of this great country depend should mix from time to time with those who, as responsible advisers of the Crown, are engaged in conducting the political affairs of the country. I do not mean to say that on these occasions, when we meet at the festive board, matters of importance are discussed, for we are too much occupied in enjoying the festivity and hospitality which surround us for that; but acquaintances are formed on those occasions which ripen afterwards into friendships. It is well known that the transactions of business are made much easier when those who meet to carry them on know and like each other; and therefore I say that these meetings are of great political importance in bringing together those who are connected with the commerce of the country and

those who are responsible for its political government (Hear, hear). There have been occasions when it has been the lot of those who have had to explain the state of political affairs to congratulate you upon the tranquil state of the civilised world. I am afraid I cannot do that on the present occasion; for although I trust that there is nothing in the horizon which can grow into a cloud of war, yet we see on all sides—in the Far West and in the distant East—struggles going on of the most lamentable character, and scenes enacted which make us shudder for humanity and feel deep compassion for the countries in which those events are taking place (Hear, hear). In the Far West we see a nation of the same race and the same language, and the same religion and the same manners, and the same literature as ourselves, split into two, slaughtering each other by hundreds of thousands, and carrying on a contest the result of which it is impossible to foresee, and the end of which now, after more than two years' duration, he would be a bold man indeed who said he could predict. Lamenting that state of things, the Government of this country have felt it their duty not to yield either to the entreaties or the objurgations of one party or the other (Cheers). Blandishments on the one side and threats on the other have been equally fruitless to direct our course (Cheers). We have felt it our duty to abstain from taking any part in that lamentable contest. If, indeed, we had thought it was in our power to put an end to it by friendly intervention, no efforts would have been wanting to accomplish so holy an end—(hear, hear)—but we felt that interference would be vain, and we deemed it our duty—and in that respect I am sure we followed the wishes of the country—to maintain a strict and impartial neutrality (Loud cheers). In the distant East events which are also of a lamentable character are taking place. We there see, on the one side, a barbarous system of deliberate extermination carried on, and, on the other side, revenge venting itself in murder and assassination. We endeavoured to enlist the opinions and the feelings of civilised Europe in joint remonstrances, and so far we succeeded; but those remonstrances have failed. We have done our duty, and we can only hope that those who have the conduct of affairs in the Russian empire may, at length, cease to pursue that course which has thrown upon them the condemnation of Europe, and that peace may be restored, upon terms of equity and justice, to an unfortunate country (Cheers). Well, my Lord, although abroad things look ill, and much misery and calamity are sustained, yet, as you have just observed, this country forms a happy exception to that which seems to be the prevailing condition of nations (Hear, hear). We have been blessed by Providence with an abundant harvest; we have been preserved by the Government and the good sense of the country from the calamities of war; our population are contented and loyal, feeling that for a long course of years the Legislature of the country has been occupied in remedying grievances, in removing defects in our laws, and in casting away those obstructions which the less enlightened policy of former times had thrown in the way of the productive industry of the country; and I am happy to say that I believe the commercial and material prosperity of the country is brighter now than it has been at any former period. Those who know the course of the commerce of the world will tell you that year by year this great city of London is growing more and more the centre of the commercial transactions of other States; that bills are drawn upon London to pay debts all over the world; and that commodities destined for other countries are sent here for deposit—a tribute paid by the people of other nations to the industry, the the good management, the integrity, and the high honour of the commercial community of this land. My Lord, I congratulate you on this happy state of things; and I trust that the people of England will feel that they are greatly indebted for it to the reign of that beneficent Sovereign under whose mild and enlightened rule they have the happiness and good fortune to live. My Lord, I beg again, on behalf of my colleagues and myself, to return you our most sincere thanks, and to assure you that we derive high gratification from being allowed to be present at your festive board on this occasion." (Loud cheers.)

Several other toasts having been drunk the proceedings terminated.

OBITUARY OF EMINENT PERSONS.

THE DOWAGER COUNTESS OF LEVEN AND MELVILLE.

The Right Hon. Elizabeth Anne, Dowager Countess of Leven and Melville, was the second daughter of Sir Archibald Campbell, second Baronet, of Succoth, in the county of Dumbarton, by his wife, Elizabeth, eldest daughter of John Balfour, Esq., of Balbirnie, in the county of Fife, and was grandaunt of the present Sir Archibald Islay Campbell, Bart., of Succoth. Her Ladyship was born Aug. 10, 1804, and was married, June 21, 1824, to David, eighth Earl of Leven and Seventh Earl of Melville, by whom (who died Oct. 8, 1860), she had two sons and four daughters—viz., Alexander Viscount Balgonie, a Major in the Grenadier Guards and a Knight of the Legion of Honour, who died, unmarried, in 1857, of fatigue from the Crimean campaign; the Hon. David Archibald, who died young, in 1853; Lady Elizabeth Jane, wife of Thomas Robert Brooke Cartwright, Esq., brother of William Cornwallis Cartwright, Esq., of Aynhoe, Northamptonshire; Lady Anna Maria, Lady Susan Lucy, and Lady Emily Eleanor. Lady Leven and Melville died at Melville House, Fifeshire, on the 6th inst. Her Ladyship's late husband's brother, John Thornton Leslie-Melville, is the present Earl of Leven and Melville.

LADY STANLEY OF ALDERLEY.

The Right Hon. Maria Josepha, Dowager Baroness Stanley of Alderley, was the eldest daughter of John Baker Holroyd, first Earl of Sheffield, by his first wife, Abigail, only daughter of Lewis Way, Esq., of Richmond, Surrey, and was the granddaughter of Isaac Holroyd, Esq., living temp. Queen Anne, who married Dorothy, youngest daughter of Daniel Baker, Esq., of Penn, Bucks, through whom the Baker estates came into the possession of the first Earl of Sheffield. Lady Stanley was born in 1777, and was married, Oct. 11, 1796, to Sir John Thomas Stanley, seventh Baronet, of Alderley, Cheshire, who was created Baron Stanley of Alderley May 9, 1839, and who died Oct. 23, 1850. By this marriage her Ladyship had three sons and eight daughters, of whom two sons and five daughters survive. Her eldest son is the present Sir Edmund John Stanley, second Lord Stanley of Alderley, Postmaster-General, created Lord Eddisbury in 1848. Among her surviving daughters three have been married—viz., the Hon. Lucy Anne, widow of Lieutenant M. T. Hare, R.N.; the Hon. Harriet Alethea, wife of General W. H. Scott; and the Hon. Emmeline, wife of Albert Way, Esq., of Wonham Manor, Surrey. The two other married daughters were the Hon. Lady Parry, who died in 1839, and the Hon. Mrs. Adeane, who died in 1850. Lady Stanley died at Holmwood on the 1st inst. Her Ladyship, who was half-sister of the present Earl of Sheffield, was in remainder to the barony of Sheffield of Roscommon, which remaindership passes to her eldest son, the present Lord Stanley of Alderley.

THE DUCHESS OF MONTEBELLO.

Eleanor Mary, Duchess of Montebello, whose death has recently occurred, was the youngest of the three daughters of Sir Charles Jenkinson, tenth Baronet, of Hawkesbury, in the county of Gloucester, by his wife, Catharine, fifth daughter of Walter Campbell, Esq., of Shrawfield, Lanarkshire, and Islay, Argyleshire (a branch of the noble house of Lothian), and was niece of the Right Rev. Dr. Jenkinson, Bishop of St. Davids, and cousin of Robert Bankes, second Lord Liverpool, Prime Minister of England. Residing in France, Miss Jenkinson had, from her beauty, become known in the fashionable circles there as "La belle Ecossaise," &c. She was married, July 10, 1830, to Napoleon Lannes, second Duke of Montebello, eldest son of the famous John Lannes, a Marshal of France, and first Duke of Montebello, one of Napoleon I.'s most brilliant lieutenants, who was mortally wounded at the battle of Essling, May 22, 1809, and died nine days afterwards at Vienna. The second Duke (the husband of Miss Jenkinson, the subject of this notice) was born July 30, 1801, and is a personage of note in France. He was made a Peer of France by Louis XVIII., and was Minister of Marine to King Louis Philippe, and escaped in disguise, and with much difficulty, from Paris after that Monarch's overthrow, in 1848. He subsequently took office under the present Emperor, and has been successively Ambassador of France at Berne, Rome, and St. Petersburg. By her union with him, the Duchess leaves a family, of whom the eldest son, Napoleon de Montebello, was born in 1835. The Duchess's two sisters are Georgiana Elizabeth, who is the wife of Baron Walter Nugent, of the Austrian Empire, and whose daughter Ismay is the present Lady Southampton, and Katherine Frances, who is widow of Richard Samuel Guinness, Esq., M.P. for Kinsale and afterwards for Barnstaple.

WILLS AND BEQUESTS.

The will of the Venerable Thomas Kaye Bonney, M.A., Archdeacon of Leicester, Prebendary of Lincoln, Rector of Coningsby and of Normanton, was administered to in the London Court by his sister, Mrs. Nevinson, as his only next of kin. The testator died a bachelor; and his sister, Miss Henrietta Bonney, who was the executrix and sole legatee named in the will, died prior to the testator. The personalty was sworn under £14,000.

The will of General Sir James Lillyman Caldwell, G.C.B., of Beachlands, Ryde, Isle of Wight, and of Portland-place, was proved in London by the executors and trustees—namely, Mrs. Sullivan, the testator's daughter; Edward Cockburn Kinderley, Esq.; General Duncan Smith, E.I.C.; and Charles Baker, Esq., of Lincoln's Inn; the personalty being sworn under £120,000. This gallant military officer was a General in the Indian Army; served under Lord Cornwallis; was present at the two sieges of Seringapatam; and commanded the Engineers at the capture of Mauritius. Sir James attained the age of ninety-three. His will bears date 1858, with two codicils 1860-2. After making a few bequests to relatives and some personal friends, the testator leaves to his daughter and executrix, Mrs. Sullivan, a life interest in the sum of £50,000; and, upon her decease, bequeaths £20,000 to her daughter (the testator's granddaughter), Lady Lees; and £30,000 amongst his great grandchildren, the six children of Sir John and Lady Lees, being £5000 to each; and appoints his said daughter, Mrs. Sullivan, residuary legatee.

The will of James William Gilbart, Esq., of Brompton-crescent, late general manager of the London and Westminster Bank, was proved in the London Court by his executors—I. W. Weldon, Esq., manager of the Westminster branch of the London and Westminster Bank; Thomas Hewat, Esq., secretary of the Provincial Bank of Ireland; and the Rev. Joseph Denham Smith (husband of the testator's niece, Mrs. Sarah Figgis Smith). The personal property was sworn under £35,000. The testator died on the 8th of August last, having executed his will in 1857, and two codicils in 1861-2. He has made a liberal provision for the children of his niece, Mrs. Smith, appointing her son, James William Gilbart Smith, residuary legatee. There are numerous legacies, specific and pecuniary, left to personal friends, officials of banking-houses, and to his executors. There is a special direction in his will that his shares in the Bank of Australia shall be sold, and the proceeds held in trust, and designated "The Gilbart Memorial and Publication Fund," to be applied to the undermentioned purposes—namely, the erection of a monument, or some other memorial, of him in commemoration of the interest he took in banking operations, and as the first manager of the first joint-stock bank in London; the distribution of copies of his works on banking business, bound, and, together with an engraving of himself framed, presented to the directors, managers, officials, and others with whom he had been connected in banking transactions in England, Ireland, and other parts.

CHESS.

TO CORRESPONDENTS.

DAVUS, R. M., D. C. L., and others.—The solution addressed to "Wee Pawn," &c., in our notices to correspondents last week is that to the Enigma of Comte Pongracz and Mr. Bayer, No. 1358—not of No. 1359.

AN EXPECTANT SUBSCRIBER.—The last number of *La Nouvelle Régence* published is that for July of the present year, so that the magazine is four months in arrear.

Q. S. M. B., Mateo de Zamora.—1. You have fallen into precisely the same error as many of our English correspondents in assuming that Mr. Kling's problem, No. 1026, can be solved in *four* moves. It *cannot* be solved in the manner proposed, and this for a reason so obvious that it is wonderful how so many players have overlooked it. 2. The other Problem, from *La Nouvelle Régence*, in which you claim to have detected a blunder, we do not remember to have seen.

L. DOONER, Aldenham.—What is to hinder White from mating on his second move by playing B takes K R Pawn?

M. LANDESMANN, Vienna.—In your problem No. 2 White can obviously give mate at once by playing his Kt to K B 6th. You have possibly omitted some piece.

T. ADDISON, W. SHORT, W. CEXBY, HANDY ANDY.—The key move you propose for "I. B., of Bridport's" beautiful two-move problem—1. B to K 4th—is the true one.

ŒDIPUS.—It is so. If the report is really of any consequence after this lapse of time, perhaps you will send another copy of the questions; but we can hardly think it is worth the trouble.

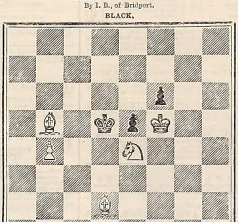
R. S., Malines; T. ADDISON.—We must repeat that Problem No. 1026 cannot be solved in *four* moves as you suggested. Try it again and again until you find out your mistake; for, depend upon us, you are in error.

I. S., Newport.—Black is altogether wrong. He cannot legally move his King into check, no matter how the checking piece may be circumstanced. The question has been answered a thousand times.

W. T. P.—In the description of the two-move problem you have been good enough to forward the pieces and Pawns are mingled together so oddly that, in the absence of a solution, we despair of making it out. Can you favour us with a diagram, or give the position of the men in the order usually adopted?

SOLUTIONS OF PROBLEM NO. 1027.—Maid Marian, A Swede, F. N., Box and Cox, Cymry, Lex, D. C. L., Omega, Try-again, F. C. S., W. A., Glaswegian, Peregrine, Stanley, R. B. W., Telemachus, Q. E. D., A Subscriber; X. X. Z., Knaresborough; Alton Hants, R. D. T., Pip, Café, C. Maderni et Fils, Lyon, Œdipus, Sigma, W. P., Iota, Peterkin, Gorilla, S. L., Ludovic, Percy, M.P., Victoria, H. S. V., Oliver, O. W., I. Weston, T. C. D., The Ghost, R. T. K.; L., of Barnsley; Quidnunc, are correct. All others are wrong.

SOLUTIONS OF PROBLEM NO. 1028, by M.P., Palace Hotel, Sigma, T. V. D., Ernest, H. T. M., A. M., Davus, Tyro, Pip, I. W. G., Omega, F. R. S., Peterkin, Larry, Fingal, L. Remington Wilson, Purblind, S. M. R., Sydney Smith, Percy, F. C. S., Histrion, L. S. D., Propeller, A Middy, Antony, Wilfred, Q. E. D., Medicus, R. B., H. V. D., Box and Cox, R. D. T., LXXXI., Andrew M. Carolus, W. Vincent, H. B., T. Carter, S. S., A. B. S., Francis, H. L., Œdipus, Samuel Holmes, I. D. Pratt, Caroline, White Surrey, F. A. S., A German, S. V. O., A Swede, Hermes, F. N., Oxoniensis, Subscriber, Nemo, I. M. G., J. L., Lex, Philip, Boston Stump, C. D., H. P., are correct. All others are wrong.



Problems by Herr Kling, Nereus, Boscobel, Charles F. Smith, W. T. P., G. M'A. are now undergoing examination, and shall be reported on next week.

*** The answers to very many chess correspondents are unavoidably postponed from want of room.

PROBLEM No. 1029.

By I. B., of Bridport.

BLACK.

WHITE.

White, playing first, gives mate in five moves.

CHESS IN LONDON.

A spirited Game, played at the Great Chess Meeting last year, between Mr. ANDERSSEN and Mr. MONGREDIEN.

(*King's Bishop's Gambit.*)

WHITE (Mr. M.)	BLACK (Mr. A.)
1. P to K 4th	P to K 4th
2. P to K B 4th	P takes P
3. B to Q B 4th	P to Q 4th
4. P takes P	Q to K R 5th (ch)
5. K to B sq	P to K Kt 4th
6. P to Q 4th	Kt to K 2nd
7. Kt to K B 3rd	Q to K R 4th
8. Kt to Q B 3rd	B to K B 4th
9. Kt to Q Kt 5th	Kt to Q R 3rd
10. P to Q 6th	

(The attack is conducted with a good deal of vigour and determination up to a certain point.)

10.	Castles

(This is sheer desperation; Black's position being so hopeless that he could see no escape.)

11. P takes Kt	K B takes P
12. Kt takes Q R P (ch)	K to Q Kt sq
13. Kt to Q B 6th (ch)	P takes Kt
14. B takes Kt	B to Q B 4th
15. P to Q B 3rd	B to Q Kt 3rd
16. P to Q R 4th	K to R sq
17. B to K 2nd	

(Lost time. He should have pushed on with his Q Rook's Pawn, allowing Black not a moment's respite.)

WHITE (Mr. M.)	BLACK (Mr. A.)
17.	P to K B 3rd
18. P to Q Kt 4th	Q to K Kt 3rd
19. P to Q Kt 5th	B to Q R 4th
20. B to Q 2nd	K R to K sq
21. P takes Q B P	B to Q B 7th
22. Q to Q B sq	R takes B

(Ingenious, but quite unavailing against the best play on the other side.)

23. K takes R	P to K Kt 5th
24. Kt to K sq	R to K sq (ch)
25. K to B 2nd	P to K Kt 6th (ch)
26. K to Kt sq	R to K 7th
27. Kt to K B 3rd	

(An inexplicable blunder, by which White throws away the game at the moment he might have claimed it as his own. He had only to play his Queen to her Kt 2nd, and Black would have been bereft of all resource; for, suppose:—

27. Q to Q Kt 2nd — B to Q Kt 3rd (taking the K Kt P with Rook, or the K R P with Pawn, would have been obviously useless)

28. P to Q R 5th, and White must win.)

27.	R takes P (ch)
28. K takes R	P takes P (dis ch)
29. K to B sq	B to Q 6th (ch)
30. K to K sq	Q to K Kt 6th (ch)

and White resigns.

CHESS IN PARIS.

We have the pleasure to present this week another of the games played by the great Russian master, Mr. Petroff, during his recent visit to France.

(*Allgaier Gambit.*)

BLACK (Mr. X.)	WHITE (Mr. P.)
1. P to K 4th	P to K 4th
2. P to K B 4th	P takes P
3. Kt to K B 3rd	P to K Kt 4th
4. P to K R 4th	P to K Kt 5th
5. Kt to K 5th	Kt to K B 3rd
6. B to Q B 4th	P to Q 4th
7. P takes P	B to Q 3rd
8. P to Q 4th	Kt to K R 4th
9. B to Q Kt 5th (ch)	K to B sq
10. Kt to Q B 3rd	Kt to K Kt 6th
11. R to K Kt sq	Q to K B 3rd

(In the next game it will be seen that Mr. Petroff varied his play at this point by taking the K R Pawn, and, in so doing, added much to the interest of the combat.)

12. Kt to K 2nd	

(The editor of *La Régence*, to whom we owe these games, notes here that Black would gain nothing by capturing the K Kt Pawn—

12. Kt takes K Kt P — B takes Kt
13. Q takes B — R to K Kt sq
14. Q to Q B 8th (ch) — K to Kt 2nd (*best*)
15. Q takes Q Kt P — Q takes Q P
and White has a good position.)

12.	B takes Kt
13. P takes B	Q to Q Kt 3rd
14. Kt to Q 4th	

(Q to Q 4th, according to the authority just cited, would have been more to the purpose, as in that case White must have exchanged the Queens, because taking the Bishop would have involved the loss of the game. Thus:—

14. Q to Q 4th — Q takes B
15. Kt takes Kt — P takes Kt
16. B to K R 6th (ch) — K moves
17. P to K 6th, &c.)

BLACK (Mr. X.)	WHITE (Mr. P.)
14.	P to Q B 4th
15. P takes P (in passing)	Kt takes P
16. B takes Kt	P takes B
17. B takes P	Kt to K B 4th
18. Kt to K 2nd	

(This is better play than moving the P to Q B 3rd.)

18.	B to Q R 3rd
19. R to K B sq	R to Q sq
20. Q to Q B sq	Q to Q Kt 5th (ch)
21. K to B 2nd	

(If he had played his B to Q 2nd the reply would have been Q to K 5th, &c.)

21.	P to K Kt 6th (ch)
22. K to B 3rd	B takes Kt (ch)
23. K takes B	Q to K 5th (ch)

STAFF.—Major and Brevet Col. H. Hamilton to be Deputy Adjutant General in Ceylon.

BREVET.—Captain and Brevet Major R. Gibson to have the honorary rank of Lieutenant-Colonel; Capt. H. G. A. Vicars to be Major in the Army. The following promotions to take place in succession to Gen. W. L. Darling, Colonel of the 98th Foot, who died Oct. 8, 1863:—Lieut.-Gen. W. Pattle to be General; Major-Generals P. Edwards, W. Cartwright, A. Gore, D. Goodsman, and P. Taylor to be Lieutenant-Generals; Lieut.-Col. and Brevet Col. H. Bates to be Major-General; Major and Brevet Lieut.-Col. C. W. Green to be Colonel; Capt. and Brevet Major L. H. Hamilton to be Lieutenant-Colonel; Capt. W. H. Fitzgerald to be Major; Lieut.-Cols. T. G. A. Oakes and R. Hume to be Colonels.

ADMIRALTY.

In consideration of the valuable assistance rendered by Commander F. W. Sullivan during the recent successful operations of her Majesty's troops in New Zealand, Commander Sullivan has been promoted to be Captain.

Also, in consideration of the successful operations against the batteries of Kagosima, the following promotions have taken place:—Commander L. J. Moore to be Captain; Lieuts. J. A. Poland and G. Poole to be Commanders; and Assist.-Surg. C. R. Godfrey to be Surgeon.

Vice-Admiral of the White T. Bennett has been appointed to receive a pension of £150 a year, as provided by her Majesty's Order in Council of June 25, 1851, vacant by the death of Admiral G. F. Rich, and the name of Vice-Admiral Bennett has been removed to the Reserved Half-pay List accordingly; and, in consequence of this removal, the following promotions have taken place:—

Vice-Admiral of the Blue Sir Charles Talbot, K.C.B., to be Vice-Admiral of the White.

Rear-Admiral, on the Reserved List, the Right Hon. Lord John Frederick Gordon Halyburton, G.C.H., to be Vice-Admiral on the same list.

Rear-Admiral of the Red Sir John M'Dougall, K.C.B., to be Vice-Admiral of the Blue.

Rear-Admiral of the White George Elliot to be Rear-Admiral of the Red.

Rear-Admiral of the Blue George Goldsmith, C.B., to be Rear-Admiral of the White.

Capt. Edward Gennys Fanshawe to be Rear-Admiral of the Blue.

THE COURT-MARTIAL ON COLONEL CRAWLEY.—At the request of the legal advisers of Lieutenant-Colonel Crawley, the opening of the court-martial has been postponed from Thursday, the 12th, till Tuesday next, the 17th inst.

Colonel Warre, of the 57th Regiment, has been placed on the New Zealand Staff, temporarily, as Colonel on the Staff.

Colonel Charles Henry Somerset, C.B., died recently in his forty-sixth year.——The death of Rear-Admiral James Pulling, in his seventy-sixth year, took place at Plymouth, on the 2nd inst.

The Government are making inquiries as to the expense of erecting at every barrack in the United Kingdom a gymnasium for the recreation of the troops.

A fire occurred in one of the stables of the Military Train at Aldershott yesterday week, destroying seventy-six horses. The stable was a wooden erection, and was reduced to a heap of ashes in a very short time.

The Royal factories at Woolwich have commenced manufacturing guns of the new kind ordered by the War Department. The work is ordered to be carried on night and day.

The screw-launch Experiment, fitted with twin screws driven by double cylinder engines of 3-horse collective power (nominal), made her second official trial at Portsmouth last Saturday. The speed attained on the present trial was rather in excess of that on the first trial.

From the return of the Registrar-General of Seamen and Shipping relative to the Royal Naval Reserve for last month it appears that, up to the 31st ult., 19,199 applications had been received and 16,617 volunteers enrolled. Of the above 46 possess certificates of competency as masters and 510 certificates of competency as mates, 19 certificates of service as masters, and 53 certificates as mates. This force also includes 2567 petty officers in the merchant service.

The fourth battalion of the Military Train Corps, under the command of Colonel O'Brien, having been inspected by the Commandant, Major-General Sir R. J. Dacres, last Saturday, marched from the garrison to the Royal Arsenal Pier, Woolwich, preceded by the band of the corps, and embarked on board the troop-vessel Empress, Captain Ellis, for New Zealand. The Empress had previously shipped 1000 quarter barrels of powder, a large amount of shot, shell, and other war stores, a number of guns, hospital stores, trenching-tools, 150 tons of saddlery, harness, &c. The screw steam-ship Sea King, Captain Pinel, having been fitted up as a troop-vessel, arrived off the Royal Pier last Saturday, from the Victoria Docks, under orders to embark the T Battery of the fourth brigade Royal Artillery for New Zealand. She will also take out two complete batteries of 12-pounder Armstrong guns and a general cargo of war stores. The T Battery, under the command of Lieutenant-Colonel Barstow, comprises 15 officers and 258 non-commissioned officers and privates.

THE VOLUNTEER MOVEMENT.

The fifteenth company of the Queen's (Westminster) competed for their first series of prizes on the 6th inst. The first prize (£12) was won by Sergeant John Prichard; the second prize (£7), by Sergeant Jesse Robinson; the third prize (£4), by Private Lawson; and the fourth prize (£2), by Private Anderson.

Last Saturday a battalion contest, between twenty members of the West Middlesex and twenty members of the South Middlesex Rifles, took place at Wormwood Scrubbs. Lords Ranelagh and Radstock, the Commandants of the two battalions, and a large number of volunteer officers were present. The losing corps were to present three university tankards to the three competitors making the highest scores on the winning side. The West Middlesex were victorious, making in the aggregate 1017 with their twenty men, whilst the South Middlesex twenty made but 931. The three winners of the tankards were Captain Dear, Private Armstrong, and Lieutenant Marriner. The highest score on the other side was Private Stackpoole.

On Saturday last a deputation from the officers of the 4th East York (Hull) Artillery Volunteers waited upon Lord Londesborough, at Grimston, and presented to him a magnificent sword.

The annual meeting of the Yorkshire Rifle Association was held at York on Wednesday week—the Lord Mayor was in the chair. The report, which concluded by an appeal for extended support, was adopted. Strensall-common was selected for next year's meeting; Lord Wenlock was appointed president of the association for next year.

A movement is being inaugurated with respect to the volunteer system, which is a most satisfactory proof that its popularity is not only spreading, but that active and energetic steps are being taken to further its aim in a very important particular. Rifle-matches have become a recognised part of the institution, and, as no general rules had ever been recognised respecting them, but the terms of each have depended chiefly upon local considerations, it was quite time that some conference or general meeting had been held to decide upon certain regulations which should be the guiding basis of all such contests. A preliminary meeting was recently held at the St. James's-quadrant to consider a proposal for holding a conference on "rifle-shooting." Nearly every metropolitan corps was represented on the occasion. Captain MacGregor presided, and, after the subject had been thoroughly discussed, it was moved by Captain Fane (Oxford), seconded by Captain Peal (St. George's), and carried unanimously, "That it is desirable to hold a conference in London of volunteers and others interested in rifle-shooting, to consider the management of rifle-matches, county meetings, and other competitions, and the regulations as to prizes, entries, and weapons, as well as targets, marking, and scoring, so as to promote the financial success of such meetings, and to aid the National Rifle Association in its efforts to make rifle-practice more popular as a manly exercise, and more effective as a national defence." Moved by Lieutenant Scott (London Scottish), seconded by Lieutenant Cunningham (Harrow), and carried unanimously,—"That such a conference, as proposed in the first resolution, be convened by the gentlemen now present, and that the resolutions of the conference be respectfully submitted to the Council of the National Rifle Association for their consideration." Moved by Captain Field, (Hon Artillery Company), seconded by Sergeant Tyrrell (Ealing), and carried unanimously,—"That the gentlemen present and those who have signified their assent be a committee to carry out the above resolutions, and with power to add to their number. Captain Macgregor to be chairman; Captain Woods, vice-chairman; and Lieutenant Cunningham, hon. secretary. Address, King's College." It is probable that the conference will take place in January.

The Queen has been pleased to appoint Henry Mills, Esq., one of her Majesty's counsel learned in the law, to be a Judge of the High Court of Judicature at Fort William, in Bengal.

THE OPENING OF THE FRENCH CHAMBERS.—A little before one o'clock on Thursday cheers were heard outside the Louvre, the drums at the same time beating a salute, and almost immediately after a master of the ceremonies, advancing into the hall, announced "The Empress," and at once the whole assemblage rose. Her Majesty and the Prince Imperial the next moment appeared at the entrance, and proceeded up the hall, preceded and followed by the great officers and ladies of her household, and, as they advanced, were greeted with loud cries of "Vive l'Impératrice!" "Vive le Prince Impérial!" Her Majesty, who looked in blooming health after her late excursion to Spain, took her seat with the young Prince in a tribune on the right, close to the estrade, having near her Princess Clotilde, Princess Mathilde, and Princesses Lucien and Anna Murat. The Prince was dressed in his uniform as a Corporal of the Grenadiers of the Guard. Her Majesty had only just taken her seat when the cannon of the Invalides announced the arrival of the Emperor, and the next moment the Imperial cortége entered the hall in the customary order.

OSWEGO
PREPARED CORN,
for
Puddings, Custards, Blancmanges, &c.
Manufactured and Preferably
by the Oswego Starch Factory.
Sold by Grocers and Oilmen.

It is the original preparation from the farina of maize, established 1848, remarkable for its delicacy, from the inside, and often the best value to the consumer.

It is more delicate than any of the imitations, has a finer grain, and is more nutritious.

The Oswego has the natural golden tinge, and not the chalk white produced by artificial means.

KEEN'S GENUINE MUSTARD.
Caution Keen's Genuine Mustard and full approval is guaranteed.
MANUFACTURED BY

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by GEORGE C. LEIGHTON, 198, Strand, aforesaid.—SATURDAY, NOVEMBER 14, 1863.

THE ILLUSTRATED LONDON NEWS.

No. 1232.—VOL. XLIII. SATURDAY, NOVEMBER 21, 1863. WITH A SUPPLEMENT, FIVEPENCE

DEATH OF THE KING OF DENMARK.

FREDERICK VII., King of Denmark, died shortly after noon on Sunday last. An attack of erysipelas in the head and face unexpectedly proved fatal. The telegram which, on Monday morning, announced the mournful event to the people of England took them by surprise. The grief and consternation of the Danes are said to have been indescribable.

It is at a peculiarly critical moment of European history that the late King of Denmark has been gathered to his fathers. At the time of his death a fortnight had not elapsed since the Emperor of the French, in his speech at the opening of the Legislative Chambers, had astonished every Court and nation of Europe by proposing to reconsider and resettle the territorial questions which keep the Continent in a state of continual ferment, and which had developed an international complication well described as being "neither peace with its security, nor war with its happy chances." Of these questions that of Schleswig-Holstein was one, if not of the widest importance, at least of the most immediate urgency. The Germanic Confederation, acting upon its undoubted legal rights, but pushing the assertion of them to their extreme limits, had resolved on the military occupation of the Duchy of Holstein as a sort of "material guarantee" for a redress of the grievances of which the German portion of the population of Schleswig complained, and the Danish Monarch and people were alike intent on meeting that "federal execution" with war. What would have been the reply of Frederick VII. to the invitation of Napoleon III. to be present, either in person or by representative, or both, at the proposed Congress, had he lived, must be matter of conjecture only. He has now done with the politics of earth. The Treaty of 1852, signed by the Great Powers, setting aside the line of Augustenburg, fixing the succession to the crown of Denmark in the line of Sonderburg-Glücksburg, and guaranteeing the integrity of the Danish kingdom, takes complete effect, and Prince Christian of that line, father of the Princess of Wales and of George I., King of the Hellenes, who has just taken possession of his new throne, inherits the regal dignity of the departed Sovereign.

It cannot be pretended that the late King won his popularity by the blamelessness of his private life—two divorces and a third marriage, politically called "morganatic," constituting, as they did, the salient features of a career never governed by the exercise of self-restraint, would probably have gone far to alienate the respect and confidence of his subjects, if their attention had not been diverted by the attractive qualities exhibited by the King in connection with public affairs. The frank loyalty with which, on his succession to the Crown in January, 1848, he published the Constitution which had been drawn up by his father, the expansion of it, at least in so far as it affected the Danes, in 1854, and the singular decision and gallantry with which, in the face of imminent and serious dangers, he upheld, throughout his reign, the integrity and independence of his little kingdom, gained for him a remarkable ascendancy over the hearts of his people. From the outbreak of the Schleswig and Holstein revolt in 1849, to the signing of the Berlin treaty of peace in the summer of 1850, the Sovereign maintained the rights of his crown and kingdom, not only against his rebellious provinces, but against the armed strength of Prussia sent to aid them, with unblenching courage, and, on the whole, with marvellous success. Fortune favoured him. Political reasons of a domestic nature led to the withdrawal of the Prussian army, then under the command of General Wrangel, which had pushed its way as far as Fredericia; and the armies of the duchies, although subsequently led by a Prussian officer of high renown, soon lost the whole ground which had been obtained for them by their German ally, and were completely defeated at the sanguinary battle of Idstedt. The high spirit with which the King confronted the odds which had been brought to bear against him, the substantial triumph to which it had led the way, and the fearless energy with which it made preparations for the more unequal conflict yet to come, rallied the confidence of the Danish people to Frederick VII. They loved him in spite of the defects which, under other circumstances, they would probably have marked with severer displeasure; and we can readily believe that tidings of his decease, coming unexpectedly upon them, have overwhelmed them with temporary dismay.

Prince Chrisfian of Schleswig-Holstein-Sonderburg-Glücksburg, now in his forty-fifth year, succeeds to the Royal honours assigned to him by the Treaty of 1852 at an anxious moment, but one, we think, which sheds a ray of hope upon the destiny of his country and the tenour of his reign. On the one hand, there hangs over him the executory resolution of the Germanic Confederation, to which Prussia and Saxony hold themselves bound, if not ready, to give effect. On the other hand, the personal relation in which he stands to Europe as the father of the new King of the Hellenes, and to this country through his daughter, the Princess of Wales, will assure him of a moral sympathy and diplomatic intervention likely enough to protect his kingdom from any hasty enforcement of the demands of the Federal Diet. But fear as well as favour will probably befriend him. The Potentates, great and small, which make up that clumsy political machine known by the name of the Germanic Confederation, have their eyes fixed, for the present, not upon

"THE FIRST BITE," BY W. C. T. DOBSON, A.R.A., IN THE WINTER EXHIBITION.—SEE NEXT PAGE.

attractiveness are eliminated from a work of art, and much is sacrificed to breadth, there is always a danger of falling into emptiness, inanity, and "quetism," especially when the negative tendency extends to invention and expression. We should, in justice to other artists, point out, as a proof of this danger, the fixed expression of the girl's head, and a want of the true vivacity of childhood. Nevertheless, the artist may have been thoroughly true to nature, and invaluable in a work of this class. They, indeed, even more than higher mental characteristics, constitute the merit of painting or poetry, and, in the same way, Burns's song to the daisy is, in its kind, as true and choice a specimen of poetic art as Milton's description of a fallen archangel.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Emperor presided at a Council of Ministers at the Tuileries on Wednesday. His Majesty summoned Monsignor to the evening.

The *Progrès de Lyon* publishes the subjoined intelligence from Conspicuous Gallantry.—A staghunt took place on Wednesday week. On Thursday the Court and the guests took an excursion to the Chateau of Fierefonds (an Engraving of which is given on page 517). On Friday there was a battue in the reserved park, where 900 head of game were killed, of which 175 fell to the Emperor's gun." On the 15th the Emperor returned to the troops in garrison at Compiègne as well as the National Guard, and afterwards distributed recompenses.

A colossal bronze statue of Prince Napoleon Benaboniaus has been placed on the pedestal prepared for it in the Place Prince Eugène.

The election of M. Bouvier, deputy of the Corps Législatif in consequence of an informality of the returning officer. The election of M. Bouvier, of Villiers, department of Seine-et-Oise, has been cancelled upon the same grounds. The elections of MM. Chanbrun, department of Loobre, and Gervegeau, department of Loire-Inférieure, will be brought forward in addition to the list for the department of the Rhône, out of the various places for which he had been elected. The committee appointed in the election of M. Roy Lavalay for the department of the Charente Inférieure, and of M. Abbattucci for Corsica. The election of M. Brenier, for the department of Gard was proposed to be annulled.

The official yellow-book of diplomatic documents has been issued to-day. It contains nothing new. The Times says "It adds some documents in it relating to America—one being a despatch of M. Drouyn de Lhuys, of Sept. 5, which was written before the news of the battle of Antietam. The latter contradicted the rumours in circulation respecting a protest of the Federal Government against the events taking place in Mexico, and denied the truth of the assertions relative to an alleged Russo-American alliance. M. Drouyn de Lhuys in reply declared that M. Dayton had informed him that the Washington Government on the American question had not changed. It had not recognised the South, but it had not protested. It was therefore, had not signed the treaty with it for the cession of Texas and Louisiana. M. Drouyn de Lhuys added that France sought neither for herself nor others any exclusive influence."

THE PROPOSED CONGRESS.

The Marquis Pepoli has received the reply of King Victor Emmanuel to the Emperor's letter of invitation to the congress.

According to a telegram from Madrid, Queen Isabella has replied to the Emperor Napoleon's letter relative to the proposed congress to the congress, and has intimated her acceptance of the proposal.

Senhor Silvestre Pinto de Avila has been appointed delegate to be present on the part of the King of Portugal at the congress.

La France believes itself able to state that General Baraguay d'Hilliers has officially announced Count Rechberg's acceptance of the congress. No refusal has as yet been received. *La Patrie* thinks itself in a position to state that all of the great Powers have given their assent to the invitation to the proposal for a congress. Several Governments (it adds) have formally announced their reply from Paris, and not from Vienna, but state that they will still allow some time to elapse before sending their official reply.

THE FRENCH IN MEXICO.

General Forey made his farewell address to the Mexicans on the 15th of November. He announced that he had accomplished the great mission with which the French Emperor had intrusted him and was about to return to France. He assured the Mexicans that no alternation had been made in the views of the Emperor in the new Constitution, under which all might be happy; that the Emperor's intentions had not been fully explained, but that a misunderstood had not been sufficiently known. In conclusion, he considered that the nation ought to thank Providence that its happiness had been consigned to such a Monarch.

SPAIN.

The Queen received Marshal Narvaez on the 12th inst.

In last Friday's sitting of the Congress the verification of the elections of seventeen deputies took place.

Two steamers have left Cadiz for St. Domingo with 1190 troops. This Government is determined to uphold the rule of Spain in that island. By the last advices from St. Domingo, we learn that the insurrection was in full vigour. The rebels held possession of the entire island, with the exception of the capital. The Emperor Soulouque, who was reported within a few miles of St. Domingo City. Two victories were claimed by the Spaniards near San Juan and Monte Plata.

ITALY.

The King held a review on Tuesday, at Naples, of twelve legions of the National Guard of the city and nine battalions from the provinces of Terra di Lavoro and Principato Ulteriore, as regards the Royal Majesty arrived at Leghorn on Wednesday, and was enthusiastically received.

The Parliament has resumed its sittings.

The Chamber of Deputies, at Turin, on the 13th, the committee appointed to examine the treaty of commerce and navigation with France brought up a report proposing its adoption.

The following is the budget of receipts for 1864:—The anticipated increase of the revenues amounts to 3,727,436,21 lire. The bills for the new taxes, which are already passed by the Senate, have not yet been taken into the calculations of the Minister of Finances. The ordinary receipts amount to 522,013,436,21 lire. The total receipts are 1,758,303,436,21 lire, leaving a deficit of 238,844,574,21 live. The extraordinary expenses, estimated at 124,106,987,52 live, will be covered by the aforesaid deficit.

The Roman Railway Company has accepted the conditions of a concession for the construction of the line from Ancona to Otsenay, the line to be completed within two years and a half.

AUSTRIA.

The Upper House of the Reichsrath has voted 20,000,000 of florins for the relief of the distress in Hungary.

At the sitting of the Lower House of the Reichsrath on Tuesday the Galician deputy Ruzicka demanded of the Police Minister that the excessive severity of the police in Galicia should be abated and the laws of Austria be applied to Galicia. He said that the reports that the measures adopted by the authorities were in accordance with the law, and only directed against the revolutionary party who wished to sever Galicia from the Austrian empire.

PRUSSIA.

The Chamber of Deputies has resumed its consideration the report upon the Royal ordinance of June last concerning the press. Two influential members of the Chamber have brought forward a resolution declaring that the Royal ordinance was founded on unconstitutional ground that it was at once unnecessary and unconstitutional. The resolution, in addition, declares unconstitutional, the principle that no limitation of the liberty of the press could be effected by means of a Royal ordinance, and that the decree in question was, therefore, even according to the terms in which it was couched, a violation of the Constitution.

DENMARK.

DEATH OF KING FREDERICK VII. AND PROCLAMATION OF PRINCE CHRISTIAN AS KING.

The King, of whose illness only a slight previous intimation had been received, died on Sunday of erysipelas, at his palace at Glucksburg, near Flensburg, in the Duchy of Schleswig. A memoir of his Majesty is given in our "Obituary" column, at page 527.

The late King is succeeded by Prince Christian, father of the Princess of Wales and of the King of the Greeks.

On Monday M. Hall, President of the Council of Ministers, proclaimed Prince Christian as King of Denmark, under the title of King Christian IX., from the balcony of the Palace of Christiansborg, Copenhagen. On the appearance of the new King on the balcony an immense crowd assembled before the palace gave enthusiastic cheers for "Denmark and Schleswig!" "The new Danish Constitution!" "The Hall Ministry!"

King Christian has given his sanction to the new Constitution, which had passed the Rigsraad during the life of the deceased King, but had not been confirmed by him. The alacrity of the act has given great satisfaction, and his Majesty is very popular at Copenhagen.

THE SCHLESWIG-HOLSTEIN QUESTION.

The Government project of a common Constitution for Denmark and Schleswig was adopted on the 12th by the Rigsraad. The announcement of this vote was received with loud applause by the public filling the gallery of the house.

A confidential note to Schleswig-Holstein was made to the Germanic Confederation by Denmark, on Saturday last; and the death of the King will possibly postpone for the moment any further proceedings.

The death of the late King has opened up a fresh phase of the Danish-vexed Schleswig-Holstein question. Prince Frederick of Augustenburg has issued a proclamation claiming to be Duke of Schleswig-Holstein. The Duke of Saxe-Coburg and some other German Princes have recognised the Augustenburg claimant. The Duke has had an interview with Count von Bismarck, and Berlin is full of rumours of approaching hostilities. The Holstein Deputies are active in their opposition to King Christian's succession to the Duchies.

RUSSIA.

According to advices received at Trieste, the Russians are making warlike preparations on the Caspian Sea. Moreover, the Russian papers publish the following official statement. Fresh twelve new regiments of infantry, each containing three battalions. This force is intended to form the third reserve army. Other accounts from St. Petersburg speak of maritime preparations. Letters received from Odessa state that Russia is increasing her army in the southern provinces. 100,000 men are to occupy the Crimea country from the Crimea to Galicia, under the command of General Luders.

THE POLISH INSURRECTION.

Between the Russian Government and the Russian authorities Polish landowners will certainly be ruined. The National Government has ordered the realisation of a forced loan of forty million florins; and a decree by the Russian authorities in the Kingdom of Poland an additional tax to indemnify the Treasury for the sum of twenty-seven millions of roubles expended by the insurgents. The deficit is to be replaced within eleven years.

By an Imperial decree the Grand Duke Constantine has been definitively relieved of his functions as Viceroy of Poland.

News from Warsaw includes a statement that on Wednesday 300 prisoners left the citadel to be condemned to deportation. The women of the poorer class, not having been able to conform to the regulations respecting apparel, have been arrested in great numbers. All the clergy of the Franciscan convent have been arrested. Numerous arrests are also being made.

A communication from Vienna states that the Federal Government has at length granted to Langiewicz permission to go and reside in Switzerland.

Mdlle. Pustowiojoff, the Polish amazon, and late Aide-de-Camp to Langiewicz, is said to have abandoned the profession of arms, and is now in a situation as companion to a lady in Galicia.

TURKEY.

The Porte has addressed a note to the Cabinet of St. Petersburg protesting against the armaments on the frontier and the building of gun-boats on the Black Sea, in violation of the Treaty of Paris. The Turkish arsenals and navy-yards are working day and night in order to meet eventualities.

GREECE.

The King assumes the title of "George I., King of the Hellenes." The protocol outlying the resignation of the Protectorate and the cession of the Ionian Islands to the kingdom of Greece by Great Britain was signed on Saturday by the representatives of the five great Powers, in the following order, in alphabetical order:—Austria; 2, Great Britain; 3, France; 4, Prussia; 5, Russia. The fortifications of Corfu will be demolished previously to the transfer of the island to Greece.

AMERICA.

WAR INTELLIGENCE.

Alternate advance and retreat seem to be the order of the day in Virginia. This time it is General Meade who makes the forward movement. On the 7th inst. two versions of his army, under the command of Generals French and Sedgwick, advanced on the north bank of the Rappahannock, the former crossing the Rappidan rebofsts at the Rappahannock Bridge and Kelly's Ford, together with 1000 cavalry, and after a sharp engagement, in which the Federals lost 800 men according to one telegram, and 400 according to another, the next day the whole Federal army crossed the Rappahannock, and advanced, with little opposition, towards Culpepper, while the heights of Fredericksburg were reported to have been occupied by General Kilpatrick's Federal cavalry. On the morning of the 9th inst. "heavy firing" in the neighbourhood of Culpepper was heard in Washington, nothing was known respecting its origin or result.

Chattanooga despatches of the 3rd inst. state that the Confederates on Lookout Mountain (stated in a previous despatch to have been relinquished by them) were shelling General Hooker's position in Lookout Valley, and added that General Bragg's position had been captured. There had been, it is said, some severe fighting between the Confederate forces and General Longstreet near Tuscumbia; but we are not told either the date or the result. The Confederates had apparently commenced serious operations against General Burnside's position in East Tennessee. Despatches from that way of General Burnside's advanced positions had been captured, and their portions of the plan of campaign had thus fallen into the hands of the enemy. Part of the Confederate army was said to have disappeared from Chattanooga, the Federals at Chattanooga, there were reports that at least fourteen Confederate brigades were across the Tennessee river, while there had been several sharp encounters between Federal mounted bodies and bodies of Confederate partisans in Tennessee.

Despatches report that Columbia, Alabama, is in Federal possession, without giving details of its capture.

The Confederates had been defeated at Collierville, on the Memphis and Charleston Railway, and the General in command of them, with his Staff, had been captured. The Kansas troops had been repulsed, and it was said that General Price had retreated beyond the Red River.

Charleston advices are to the 5th inst. The heavy bombardment of Fort Sumter by the Federals continued without cessation. Part of the sea-wall, and fifty feet of the brick barracks, had fallen. Beauregard has visited the defences, and has expressed an opinion that they could never be taken.

MISCELLANEOUS.

The elections in the State of New York have been decisively won by the Republicans. In New Jersey the Democrats have triumphed.

General Butler had been placed in command of North Carolina in the room of General Foster.

Mr. Seward has made a speech asserting that there could be no peace until Mr. Lincoln was President of the whole United States. He anticipated the early submission of the insurgents, "when there would be peace, and the angels in heaven might tune their harps to the symphony of such a peace." There was no State that had not been made stronger, and no citizen that had not been made richer by the war.

Governor Seymour has addressed a large meeting of the Democrats of New York, pointing out the immense number of men called to serve in the army, the serious loss of life, and the prospect of bankruptcy and ruin to the nation; and all for the purpose, not of restoring

the Union and the preservation of the nation, but for the centralisation of power in the hands of the President.

President Jefferson Davis has made a speech at Mobile, reminding the troops that they were not common soldiers, but the best population of the country poured into the army, and he appealed to them from other incentives than military discipline. Self must be entirely forgotten in present times, and those who were hoarding up wealth were handing up infamy, the mark of which they and their posterity who shall have grown rich by war must bear.

INDIA, CHINA, AND JAPAN.

The news from Calcutta, by the overland mail, is of very slight importance.

The same remark applies to that from China, the most noticeable circumstance being the departure of Rear-Adm. Sir Augustus Leopold Kuper, Captain Osborn, and General Brown, with the view of inducing the Imperial Government to come to a clear and definite understanding as to Captain Osborn's flotilla and the Captain's position in regard to it.

Up to the departure of the mail there had been no further active hostilities in Japan. The reported effect of the bombardment of Kagoshima had been to cause the passage to the inland sea, which has been open to merchant vessels for three or four years, to be closed.

AUSTRALIA.

VICTORIA.

The leading events of the month (says the *Melbourne Argus* of Sept. 26) are the arrival of his Excellency Sir Charles Darling, and his assumption of the government of this colony; the departure of Sir Henry Barkly for the Mauritius, and the appointment to that Sir William Stevenson; and the prorogation of Parliament without Mr. Haines's bill to amend the Land Act of 1862 having become law. Sir Charles Darling reached Melbourne on the 9th inst., the Suffolk having had a favourable passage of seventy-two days. He was received by the Ministry, and was warmly welcomed on his landing at Sandridge Railway Pier by the Mayor and Corporation of Melbourne. In the same afternoon Sir Henry Barkly and Sir Roger Kynyt assent to two bills of a pressing character. On the following Friday Sir Charles Darling took the oath of office in the presence of a vast assemblage, and afterwards prorogued Parliament. [We shall illustrate this ceremony next week. On the evening previous Sir Henry Barkly, attended by Lady and Miss Barkly, left Government House, and the mail steam-ship Bombay, which sailed at an early hour next morning for Sydney, where Sir Henry and his family will be the guests of Sir John and Lady Young. They again embarked by the Northam on route for the Cape by way of Galle. Both are expected in the Bombay and his short visit to Melbourne during the Northam's stay in the bay Sir Henry Barkly received every becoming mark of attention. His Excellency Sir Charles Darling left for the seat of war on the 16th inst. It was unusually well attended, and the first impressions created by his Excellency and lady are favourable.

Mr. and Mrs. Charles Kean have arrived at Melbourne.

We have received a letter from our Correspondent at Melbourne, but are unable to find room for it in the present Impression.

SOUTH AUSTRALIA.

The Governor of Adelaide intend to introduce a bill to promote the settlement of the northern territory, fixing the price of land at 7s. 6d. per acre. Half the quantity will be reserved for sale in England, and the other half will be sold in the colony for one shilling. A half-acre town allotment will be given in with each preliminary land order, as free offerings with the 160 acre purchases.

The Legislative Council has agreed to the address to be sent home to the Queen, protesting against the resumption of the transportation movement.

NEW SOUTH WALES.

At Sydney the public interest was fixed on the enlistments being forwarded to New Zealand.

Mr. Martin's motion of censure on the Government, for their police and judicial appointments, has been defeated in the Assembly by a majority of 44 to 18. Mr. Smart proposed his Budget on the 3rd inst. Apprehending that at the end of the year a deficit would be supposed to issue debentures, redeemable in five years, and to impose a number of duties, including stamp taxes, to double the colonial postage, and to increase the duties on tea, beers, and coffee.

Several daring robberies have been committed on the gold-fields in the western and southern districts.

QUEENSLAND.

Parliament has been prorogued.

The reported new gold-field at Rockhampton has turned out a failure.

NEW ZEALAND.

Since the last mail there have been two or three skirmishes with the Maories, who were believed to be assembling in a body at a place called Moerangi, on the bank of the river Wanganui, where they are trenching themselves, and where General Ca meron hoped to be able to strike a blow before he has decided on.

Reinforcements of volunteers were arriving in New Zealand from the Australian colonies.

An order had been issued confiscating the lands of the natives who were in arms, and promising grants to those of the colonists who should volunteer for the suppression of the native insurrection.

Advices from Herat state that the Turcomans had resumed hostilities with thousand Persians, with twenty guns, had arrived in the vicinity of Herat.

Prince Coura opened the National Assembly of the Danubian Principalities on Sunday, and in his speech on the occasion made a strong appeal in favour of harmony between the different parties.

The great popular festival of the Netherlands, to celebrate the attainment of their deliverance from Spanish domination, commenced in Amsterdam on Monday and continued throughout Tuesday. The festival was preceded by religious services in all the churches of the country on Sunday.

Mr. Pritchard, formerly British Consul at Tahiti, writes to contradict the statement of his death which was made by the French journals. He says:—"I have been in England for seven years. I have been the travelling secretary for the Home and School at Blackheath for the sons and orphans of missionaries. The schooner Aimo sailed from Portsmouth on the 1st of January, bound for the Navigators Islands. There were ten passengers on board. Among them were Captain Gardiner, American Consul at Samoa, and his lady; also Miss Pritchard, my daughter, who was bringing to this country the two daughters of her brother, Mr. William Pritchard, who had been sent to me in the constituency. On the 11th of the same month they were overtaken by a most violent hurricane, in which the vessel was dismasted, and soon foundered. My son was not in the schooner."

Another disastrous gale has swept over the coast last week, causing great loss both of life and property. Several vessels foundered or were ashore, and the gale seems on this occasion to have been general on the foreign vessels, several of which are reported lost, with all hands on board. Many coasting trading traders were also lost, and the list of those ashore—During the late storms the National life-boats succeeded in rescuing thirty-six persons from seven wrecks, making a total of 1,000 persons saved by the life-boats. The life-boats also went off in reply to signals of distress on various parts of the coast, and rendered such assistance as required.

Her Majesty's Emigration Commissioners have chartered the ship Today, 1,180 tons, Captain Wetherall, belonging to Messrs. T. M. Maclay and Co., London, for the voyage of emigrants to Melbourne, Victoria, at £14 7s. 6d. per statute adult. The vessel is now loading at the Queen's steamers at Deptford, and is about the 15th of January next.—The ship Flying Cloud, 2,000 tons burden, belonging to Messrs. Enderby and Sons, of London, has been chartered by the Commissioners, Captain H. C. Keen, commander. The Flying Cloud is the thirty-fifth vessel chartered by the Board during the present year, and is intended for the conveyance of emigrants, under the immediate superintendence of the Queensland Government. She contains 332 souls, divided into married couples and free passengers, and consisting of 116 married couples, 1 widower, 1 widow, and 64 single females.—The ship British Crown, which sailed from Liverpool for Lyttelton, New Zealand, on the 21st of May last, with the first batch of its distressed cotton operatives, arrived out at her destination on the 14th of August, all well. Ten births and twelve deaths (all of children under three years) took place on the voyage.—The Government emigrant ship Robert Small, 741 tons, Captain Darke, which sailed from Southampton on the 16th of June last, arrived at Melbourne, Victoria, on the 16th of September, having on board 70 married couples, 4 single men, 20 single women, 1 widower, 1 widow, and one and twelve years of age, and 9 infants—numbering in all 184 souls. Two births and one death (that of an infant) took place on the voyage. The majority of these emigrants were Lancashire operatives, who received free passages by reason of the sum of £600 remitted from by the colonial authorities for their benefit.

LATEST NEWS FROM ABROAD.

The following telegrams have been received from abroad. Mr. Reuter's office:—

PARIS.—Turin, Nov. 19.—The *Official Gazette* of to-day publishes a Royal decree proclaiming an amnesty. It annuls all penal punishments awarded in the Neapolitan provinces for all crimes except those connected with brigandage and ordinary offences. The amnesty extends to all officers' deserters, to all priests, and to persons who have evaded the conscription or acted in contravention of the laws relative to the National Guards.

POLAND, Breslau, Nov. 19.—The Russians have been selling at Lowicz, by public auction, the timber from the woods, which have been cut down as a strategic measure. A Polish cavalry corps has invaded the town and seized 10,000 florins, the produce of the sale, leaving a receipt.

COUNTRY NEWS.

The working men of Leeds have determined on erecting a memorial statue to their late distinguished townsman Sir Peter Fairbairn.

The Andover election has terminated in the return of the Conservative candidate, Mr. Hunt, by a majority of 20 votes on Monday, and at the close the numbers were—For Humphery, 193; for Hawkshaw, 85.

Mr. Wm. Murkby, of the Inner Temple, will be the Recorder of Buckinghamshire, in the room of Mr. Serjt. Ellis, Q.C., who resigned that appointment on being named Judge in the Supreme Court of Bengal.

By the elevation of Mr. Hon. Mr. Cowdroy to the Peerage, in consequence of the death of Lord Chatham, a vacancy has occurred in the representation of Buckinghamshire.

Mr. Pengelly has found in the copper coins, of ancient date and of different reigns, have been discovered in the vicinity of Old Sarum, on property belonging to the Earl of Radnor, and which Mr. Pengelly considers One is of the reign of Edward the Confessor, another 109, and a third 140.

On Tuesday last the Lord Justice Clerk, Commissioner of Jedburgh, with a party of troops, met the Commissioners at the South Gate Brookwater, month of the Tees, and carefully inspected the works in progress and expressed their great satisfaction with them.

Miss Margaret Vining, of St. Ives, Cornwall, has been presented by the Royal Humane Society with an inscribed vellum scroll, framed and glazed, in recognition of her having on the 4th of June last, at the imminent risk of her own life, saved a young woman who, a short time since, was carried out to sea by the ebb tide.

A Glasgow paper announces "for sale, by private bargain, the wonderful organ of James Watt, the illustrious inventor of steam, made by his own hands, and presented by himself to his friend Mr. Brown, forty years ago."

The eleventh annual report of the Free Public Library at Liverpool states that since the commencement of the library more than 2,400,000 volumes of books have been issued, the average issue for the last year was 400,000 volumes per day.

An officer in the Manchester police force, named Robert Mills, has been presented by the Royal Humane Society with an acknowledgment, elegantly engrossed on parchment, of his bravery in saving the life of a boy from drowning in the Manchester Ship Canal.

At a meeting of the local subscribers to the Hartley Relief Fund, held at Newcastle-upon-Tyne, it was announced that the total would amount to about £3000. This it was generally desired should be spent in enlarging the Hartley Institute, and the Duke of Northumberland is the Hartley catastrophe.

A conference of Nonconformists was held in Manchester on Wednesday, for the purpose of promoting the objects sought to be attained by the Liberation Society. A public meeting was held in the Free-trade Hall in the evening, at which the Rev. Newman Hall presided. The business of the society were passed.

A meeting of the tenants of Lord Combermere celebrated his Lordship's ninety-first birthday. The noble Viscount has been in the British service for seventy-four years. Congratulatory addresses on the occasion of receiving a memorial to his Lordship, and about £600 was collected in the room.

A meeting in support of the National Society of Education was held at Maidstone on Wednesday, when his Grace the Archbishop of Canterbury presided. In the course of the proceedings addresses on forms all that had been done for the Church education in the county since 1811, forming a total sum of £20,000. Mr. G. Hasty, M.P., Mr. Beresford Hope, and several other gentlemen also addressed the meeting.

Colchester is under military rule celebrated at Bristol, yesterday week, by the customary gatherings of the three societies—the Anchor Lifeboat, the Merchant Seamen's, and the colonial institution. Whatever collected for charitable purposes at those dinners were respectively £610, £480, and £410, the total being £1710. The Lord Mayor presided at the last mentioned feast.

A musical meeting was held at the Mansion House, Dublin, yesterday week, in order to adopt measures for the opening of Stephen's green as a public park. The proceedings, which were numerous, were addressed by the Lord Mayor Elect. Mr. J. Haughton, Mr. R. D. Webb, Mr. Kenny, Mr. P. Lynch, Mr. J. Barrington, Mr. Sheridan, Mr. Gaffney, Mr. Jackson, Mr. Corrigan, Mr. Solomons, Mr. M. Burke, Professor Galloway, Mr. Dwyer, and Mr. Lane. A considerable sum was subscribed on the spot.

A grand amateur Shakspearean representation was given at Winchester by the committee intrusted with the management of the Winchester Shakspeare Memorial Fountain. The performance on the tragedy of "Macbeth" was performed—Miss Marriott, of Sadler's Wells, personating the part of Lady Macbeth, and Mr. Marriott, of Sadler's Wells, was performed by Mr. H. Wyeth, and Macduff by Mr. G. F. Poynter. Both were considerably applauded. The theatre was crowded in every part, and up with skill and went off with acclamation.

The Prince of Wales, as Duke of Cornwall, as the late Duke of Richmond, at Bushy, Aberdeenshire, took place yesterday week in the presence of a large concourse of people. The fountain, which is the gift of Lady Burdett-Coutts, is the work of Mr. Alexander Brodie, a R.S.A. in height, and represents the Duke of Cornwall's feathers, with the motto "Ich dien," and the Prince's crest and Peninsular medals, and the Order of the Garter, with the sword by his left side. The figure is cast in one piece, and is about 9 feet high. The pedestal is bronze, in gold letters, and surmounted by a crown:—"Erected as a memorial of the Duke's visit to Bushy, with Deed of Richmond, by the Baroness Burdett-Coutts, Lordship at Bushy, 1862.

A new school of design has been opened at Coventry. The building, which is to be surmounted with more, has also a picture-gallery, 101ft. long by 30ft. wide, and a library, 30 ft. long by 16ft. wide. The architect is Mr. Street. The cost of the undertaking is estimated at £5,000. The new building, at which Lord Leigh, the Lord Lieutenant of the county of Warwick, presided, is in the Early Pointed style of Gothic architecture, and is constructed of red brick with stone dressings. The exhibition of Scottish art, got up by the Royal Scottish Academy and the Royal Scottish Society of Painters in Water-colours, in Edinburgh, closes this week. The Academy, in their annual report just issued, state that the receipts from the exhibition have been £3,000, which, though it has ever been congregated together in an exhibition gallery; and their financial position is highly satisfactory. The Academy intends to purchase and is founding such an institution as that just opened. The meeting was a most successful one, and was addressed by others.

The committee appointed to get up the exhibition of Irish manufactures, to be held in connection with the Dublin Exhibition, have drawn up a report on the probable income and expenditure. The council of the society have agreed to place the management of the exhibition in their Committee. The reports of both have been published. According to the report, the expenditure which must depend upon the undertaking is estimated to amount to £3740, and the receipts from all sources to £3989, showing a balance in favour of £249. But the estimated expenditure of the council differs materially from this, and exhibits a balance on the other side, amounting to £2475. The committee have agreed to hold the exhibition of Irish manufactures, and that the Shelbourne yard should be roofed over, on condition that it should be guaranteed against having to bear any part of the expense by a deed to that effect analogous to that which was signed by those who got up the exhibition of 1865.

The ship Arestul, outward bound from London to Adelaide, was abandoned on Oct. 19, the crew consisting of 35 persons, and were picked up. The ship and cargo are said to be insured for £60,000.

THE COURT-MARTIAL ON COLONEL CRAWLEY.

On Tuesday morning the court-martial on Colonel Crawley, who has been called upon to defend himself against certain charges in connection mainly with the death of Sergeant-Major Lilley, was opened in the large room of the clubhouse at Aldershott.

To enable those of our readers who have not followed the story of this vexed case to understand the matter, the following concise history may be useful:—

Lieutenant-Colonel Crawley was appointed, early in 1861, to the command of the 6th (Inniskilling) Dragoons, then at Ahmednuggur, in the Deccan. Going out fresh from home service, he set about introducing reforms with energy rather than with discrimination; and before long the regiment divided the regiment into hostile cliques. In less than a year from the time when Colonel Crawley assumed command of the Inniskillings the regimental sergeant-major—a singularly outspoken man—had been brought over before a Court of Inquiry, and subsequently before a court-martial. At the latter trial, known as the Mhow court-martial, there was heard sweeping and all sides of the Inniskilling mess, concerning the state of Indian military authorities, was quashed by the advice of the law officers in England, and the sentence of the court-martial was consequently never carried into effect. Nothing had been heard of Indignation. Shortly afterwards the officers of the regiment were ordered home, and were distributed over various stations. The evidence before the present Mhow court-martial were arrested by order of Colonel Crawley, and illegally kept in close confinement for forty-four days after the trial of Sergeant-Major Lilley. At the end of that time one of the non-commissioned officers had died, another was a lunatic, and the third, whose constitution must have been of iron, was relieved by order of superior authority. In the case of Sergeant-Major Lilley, who sank under the confinement, the circumstances were peculiarly distressing. He was alleged that he and his wife, who was in the last stage of consumption, were kept in the same room, and that the latter, removed the prisoner; and, after the strong expression of opinion in Parliament and elsewhere, ordered a court-martial on Captain Hall, of the 6th Dragoons, to sit upon about the witnesses—belonging, with two or three exceptions, to the 6th Dragoons—here in Aldershott, on Tuesday last.

The charges against the prisoner, divested of technicalities, are two:—

Firstly, that by the illegal arrest of Sergeant-Major Lilley, and his subsequent close arrest, was guilty of conduct unbecoming an officer and a gentleman.

Secondly, that he, the said Colonel Crawley, at the Mhow cantonments, in Malwa, Bengal, did, by the said illegal arrest, and by the subsequent close arrest, cause the death of Sergeant-Major Lilley.

Colonel Crawley, having been asked whether he would plead guilty or not guilty to the charges, replied that he would make a protest against being put upon to plead, because the charges were so limited that he would be unable to place the whole of the circumstances before the Court, and so prevent the public mind of the matters which had been stated to his prejudice. He (Colonel Crawley) stood as having been commanded by the cross both in India and England. He also read a lengthened correspondence between himself and the authorities at the Horse Guards, in which he had demanded that he be permitted to go into all the circumstances which led to the court-martial at Mhow.

The objection to prosecutor under the latter had been fully considered by the authorities, and that the Judge Advocate was of opinion that the charges on which the prisoner was to be tried were perfectly legal.

The Court then retired to another room, and on their again taking their seats the President announced that the opinion of the Court that they ought to proceed to trial on the charges as framed.

Colonel Crawley then pleaded "Not guilty."

Sir A. Horsford, as official prosecutor, addressed the Court, recapitulating the charges, and stating that he proposed to bring forward a body of evidence to prove them. It would appear perfectly clear that if Colonel Crawley had not himself been guilty of the commission of the crime with which he is charged he had not prevented others from being unduly severe, as it was his duty to have done.

The Court proceeded to hear evidence, and the first witness called was Adjutant Fitzsimon, who proved that when Sergeant-Major Lilley was first arrested on a charge of embezzlement, Colonel Crawley would not allow him outside his room, but afterwards witness was sent for by the Colonel, who ordered him to put him for the night, and it was his duty by particular desire, who was not to leave night or day. Witness, in consequence of what was said at the court-martial, had written to the prisoner a letter, and a message was made by Sir Hugh Rose with respect to his conduct, but was induced to withdraw it by the expressions of regret which he was given to him by Colonel and Adjutant-General, intimating that his letter was an act of insubordination.

Private Blake was next examined, and stated that he was a regimental orderly, according to the usual practice, and was arrested for doing so, and tried by court-martial for neglect of duty.

Sergeant Miles, who spoke strongly in favour of the prisoner, stated that he undue severity was used towards Sergeant-Major Lilley, and witness were posted in the usual manner. Sergeant-Major Lilley drank hard, but witness had never seen him drunk on duty.

Miles Scanlon, who was also associated with the prisoner, was examined by Major Chapman, and the production of documentary evidence in the case. The Major stated that the charges against the prisoner implied Sergeant-Major Lilley were not unfit for human habitation, but more comfortable places than were usually allotted to men in the ranks. He further stated that when Lilley's first rooms were wanted to be pulled down the Colonel made application to procure a still more comfortable room for him.

On Thursday Major Chapman was recalled, and said it was not true that Sergeant-Major Wakefield had been made at the time of his arrest. He returned to duty as a Sergeantbrevet, and in about a year returned home, on completion of service. Sergeant-Major Wakefield was then called and examined, and said the quarters of Lilley were not such as had been described. They were of a reasonable kind, but not with the luxuries which were as good as those occupied by the greater part of the regiment.

We shall give some illustrations in connection with this trial in future Numbers.

THE DISTRESS IN THE NORTH.

The number of persons receiving parochial relief in the cotton manufacturing districts continues to increase, and the failing off in the trade, as the last report is very slight—a little over 200. To meet the wants of the coming winter, which will be severely felt among the operatives, the Central Relief Committee have a balance in hand of rather over £170,000; the Mansion House Committee have £20,000; the Lord Mayor's (Sir Benjamin Hall's) fund £86,000; and the Liverpool Fund, £40,000. In addition to these sums there is a reserve of provisions, clothing, and other necessaries, to the value of about £218,370. Five packages of clothing had been received; and 136 barrels of flour, 100 of oatmeal, and 100 of rice had been sent to Preston.

The Mansion House Committee held its fortnightly meeting yesterday week, the Lord Mayor in the chair. The total amount received from the public to that time reached up to Thursday, including interest, was £372,410, of which £20,000 had been contributed by the Queen, and £35 being from the Sandwich Islands. The total amount already remitted to the distressed districts, including grants for emigration, was £300,000. Grants were made to the amount of £1,000, including £750 to Glossop and Hadfield, and £100 to Dalmellington.

THE COURTS.

The committee of the Orphan Working School have admitted sixty children into the school, and have now one hundred and fifty in the building for four hundred, and only about three hundred children are there, they have determined to admit no more children than can be received, and fill up the numbers as early as possible, not doubting that the public will support the efforts of the benevolent institution.

In the article on "The new Tribunal of Commerce at Paris," in our last Number, for "a solicitor" read "a barrister," and for "the Conseils des Prud'hommes corresponding to our Sheriffs Courts," read "in addition to the Bankruptcy Courts and to the courts corresponding to our Sheriffs Courts, the Conseils des Prud'hommes," &c. These, it is well known, to analogy between the Conseils des Prud'hommes and our County Courts.

The lighting a few days ago produced, according to the *Gazette des Tribunaux*, a curious effect upon the Church of St. Ayoulphe, in the city of Reims, to the south of France. It struck the roof and went through it, and then descended to the floor of the church, where it left a hole as large as a plate to the clock, and at the altar; and when the attendant at the church opened the door he found all the candles on the altar lighted just as they are when grand mass is celebrated.

THE CHATEAU DE PIERREFONDS, DEPARTMENT OF THE OISE, FRANCE.—SEE NEXT PAGE.

THE NEW ARCHBISHOP OF DUBLIN.

We briefly announced in our last Number that Dr. Chenevix Trench, Dean of Westminster, had accepted the archbishopric of Dublin; and we have now the pleasure of giving a Portrait of the Archbishop Designate, from a photograph by Mayall. Although an Englishman by education and settlement, Dr. Trench is an Irishman by birth and extraction, and his appointment is likely to meet with general favour on both sides of the Channel. The last edition of "Men of the Time," edited by E. Walford, gives us the following particulars of this eminent scholar, poet, and divine:—The Very Rev. Richard Chenevix Trench, M.A., is the second son of the late Richard Trench, Esq., brother of the first Lord Ashtown, in the Irish Peerage, by Melesina Chenevix, granddaughter and heiress of Dr. Richard Chenevix, Bishop of Waterford from 1745 to 1769. He was born on the 9th of September, 1807, and graduated at Trinity College, Cambridge, in 1829, without, however, obtaining honours in either the classical or mathematical tripos. He was soon afterwards ordained, and engaged upon a country curacy. It was not, however, as a scholar or a divine, but as a poet, that the name of Mr. Trench first became known. About the year 1837 or 1838, while holding the incumbency of Curdridge Chapel, a district in the extensive parish of Bishop's Waltham, Hants, he gave to the world two volumes of poems written rather in the simple style of Wordsworth. They were respectively entitled, "Sabbation, Honor Neale, and other Poems," and "The Story of Justin Martyr." These poems soon attracted the favourable notice of the press, and they were followed in succession by "Genoveva," "Elegiac Poems," and "Poems from Eastern Sources." Among those who took an interest in the author of these volumes was the Rev. Samuel Wilberforce, then Rector of Alverstoke, to whom Mr. Trench became Curate in 1841, resigning the incumbency of Curdridge. There he continued in the active discharge of his parochial duties till 1845, when his Rector was promoted to the deanery of Westminster, and Mr. Trench was presented to the rectory of Itchin Stoke, a living of the annual value of £380, according to the *Clergy List*, by the late Lord Ashburton, to whom he had become known at Alverstoke. Dr. Wilberforce, on his promotion to the see of Oxford, appointed Mr. Trench his Examining Chaplain. In 1845 and 1846 he was Hulsean Lecturer at Cambridge, and for a short time one of the select preachers. His chief publications during the last few years are the well-known volumes "Notes on the Miracles," "Notes on the Parables," "The Lessons in Proverbs," "The Sermon on the Mount — Illustrated from St. Augustine," "Sacred Latin Poetry," "St. Augustine as an Interpreter of Scripture," "Synonyms of the New Testament," "The Epistles to the Seven Churches of Asia Minor," "An Essay on the Life and Genius of Calderon," "Deficiencies in our English Dictionaries," "Glossary of English Words used in Different Senses," a work "On the Authorised Version of the New Testament, with Thoughts on its Revision," and a useful treatise on the modern English language, entitled "The Study of Words," being the substance of some lectures delivered at Winchester to the Diocesan Training College. About the year 1847 Mr. Trench became Theological Professor and Examiner at King's College, London, and continued to hold that appointment till 1856, when, on the death of Dr. Buckland, he was appointed Dean of Westminster. In 1832 Mr. Trench married his cousin, the Hon. Frances Mary Trench, sister of Lord Ashtown, by whom he has a numerous family.

THE RIGHT HON. AND MOST REV. RICHARD CHENEVIX TRENCH, D.D., LORD ARCHBISHOP DESIGNATE OF DUBLIN.

THE CHATEAU DE PIERREFONDS.

The department of the Oise possesses a considerable number of ruins of old castles, the construction of which was originally due to the frequent attacks of the Normans during the Middle Ages. The most majestic of these castles was the Chateau de Pierrefonds, rebuilt on a new site by Louis de Valois, from 1390, and considered one of the wonders of that time. It was a veritable fortress, and, in fact, sustained several sieges. It was in the possession of the Leaguers when Henri IV. caused it to be attacked successively, but in vain, by the Duke of Epernon and Marshal Biron. Subsequent events, too long for relation here, led to its dismantlement as a

GREEK PEASANTS ON THEIR WAY TO WELCOME KING GEORGE I.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PAGE 526.

stronghold and to its neglect as a habitation, till at length the Château de Pierrefonds came to be one of the most remarkable ruins known, ever presenting the curious and interesting appearance of a quite recent destruction or decay.

The neighbourhood of Pierrefonds itself is very attractive, being picturesquely situated on the border of the ancient forest; and during the annual autumnal sojourns of the French Court at Compiègne, a picnic or a déjeûner in the vicinity of the youthful-looking ruin has often furnished a day's distraction to the distinguished visitors. From a more exalted motive, no doubt, the Emperor of the French has taken the château under his august protection, and confided its renovation to the able direction of M. Viollet-le-Duc, the Imperial architect, who, during the last fifteen years, has restored to their pristine beauty so many invalidal buildings, and from whom we have just received the subjoined information as to the actual state of this fine archæological souvenir.

The works at the Château de Pierrefonds were commenced, by the Emperor's order, in 1858. The restoration comprises at present the seigneurial apartments (the donjon), two of the interior towers, and two of the large front towers. The staircase of honour is terminated, as well as that portion of the château which contains the three storeys of *grandes salles* and the entrance gateway. His Majesty's intention seems to be to restore this seigneurial domain to its primitive condition. The château might then well serve as a habitation, for the distribution of the apartments is very convenient; but its ultimate occupation is not yet decided upon, although it has been suggested to convert it into a museum for a collection of arms and military curiosities. At the rate the works have hitherto proceeded, the entire restoration cannot be accomplished before the end of 1868.

The Empress Eugénie, during her recent visit to Portugal and Spain, bore the title of Countess de Pierrefonds.

Our Engraving of the Château de Pierrefonds is from a drawing recently made on the spot by Felix Thorigny.

CALENDAR FOR THE WEEK ENDING NOV. 28.

SUNDAY, Nov. 22.—Twenty-fifth Sunday after Trinity. St. Cecilia, Virgin and Martyr (about 225). Purcell's "To Deum" and "Jubilate" first performed at the opening of Stationers' Hall, 1694. Henry Brougham created Lord Chancellor of England, 1830.

MONDAY, 23.—St. Clement, Bishop of Rome and Martyr (about 64 A.D.). Death of Thomas Tallis, musical composer, 1585.

TUESDAY, 24.—Death of the Scottish Reformer, John Knox, 1572.

WEDNESDAY, 25.—St. Catharine, Virgin and Martyr (about 305 A.D.). Death of Archbishop John Tillotson, 1694; of Dr. Isaac Watts, 1748. Full moon, 9h. 1m. a.m.

THURSDAY, 26.—The Duchess of Sutherland and other ladies sign an address to the women of America on slavery (afterwards signed by about 576,000 Englishwomen), 1852.

FRIDAY, 27.—Ferdinand Magalhaens (Magellan) passes the Straits bearing his name and enters the Pacific Ocean, 1520. Princess Mary of Cambridge born, 1833.

SATURDAY, 28.—Edward Plantagenet, Earl of Warwick, judicially murdered by Henry VII., after fourteen years' imprisonment, 1499. The election of Julius de Medici as Pope Clement VII. disappoints Wolsey, and thus hastens the English Reformation, 1523.

Supported by Miss Louisa Pyne, Miss Anna Hiles, Miss Emma Heywood, Messrs. W. H. Weiss, H. Corri, A. Cook, C. Patey, C. Lyall, J. Rouse, and W. Harrison. Conductor, Mr. A. Mellon. Commence at Seven. Box-office open daily from Ten till Five.

JULLIEN'S CONCERTS.—HER MAJESTY'S THEATRE—Every Evening at Eight. Vocalist, Mdlle. Volpini. Violin, Signor Sivori. The "British Army Quadrille," performed by the grand Orchestra and three Military Bands. Selection from "Faust." Full Orchestra, three Military Bands, and full Chorus. Conductor, M. Jullien. Promenade and Gallery, 1s.; Boxes, 2s. 6d.; Private Boxes, 10s. 6d., £1 1s., and £1 11s. 6d. Places may be secured at the Box-office. Mdlle. Trebelli, Signor Bettini, Signor Bossi, and Mr. Santley. Mdlle. Volpini and (Violin) Signor Sivori will appear on Tuesday next. Admission, One Shilling.

THEATRE ROYAL, HAYMARKET.—Mr. and Mrs. CHARLES MATHEWS EVERY EVENING. At Seven, the new and greatly successful Comedy of SILKEN FETTERS—Mr. and Mrs. Charles Mathews, Mr. Chippendale, Mr. W. Farren, Mr. Howe, Miss M. Harris, &c.; after which, THE GOLDEN FLEECE—Mr. and Mrs. Charles Mathews, Mr. Compton, and Miss Louise Keeley; to be followed by Mr. Charles Mathews (just translated from the French) in his most characteristic character of "Un Anglais Timide," otherwise COOL AS A CUCUMBER, recently performed by him in French at the Théâtre des Variétés in Paris, upwards of forty nights; concluding with LITTLE DAISY.

THEATRE ROYAL, DRURY LANE.—Managers, Messrs. Edmund Falconer and F. B. Chatterton. Great and continued success of the production of Lord Byron's MANFRED, generally acknowledged by the Press and the Public to be one of the most complete and legitimate triumphs of a combination of artistic capabilities achieved on the stage for many years.

On MONDAY, and during the Week, her Majesty's servants will perform a New and Original Farce, by John Oxenford, Esq., entitled BEAUTY OR THE BEAST; principal characters by Messrs. Addison, G. Neville, Barrett, Spencer, and G. Weston; and Mrs. Edmund Falconer and Miss R. Leclercq. After which, commencing at a quarter before Eight o'clock, and concluding about Ten o'clock, Lord Byron's Choral Tragedy of MANFRED. Mortals:—Manfred, Mr. Phelps; Abbot of St. Maurice, Mr. Ryder; a Chamois Hunter, Mr. A. Rayner; Manuel (an aged Retainer), Mr. Neville; Herman (a young Domestic in the Castle of Manfred), Mr. G. Weston; Retainers, Messrs. Bedford, Weever, Kirk, Wilson, Smith, and Edwards. Immortals:—Arimanes (Ruler of the Evil Agencies), Mr. Warde; Ariel (Spirit of the Ether), Miss Emma Heywood; Hesper (Spirit of the Stars), Miss Louisa Ritter; Undine (Spirit of the Waters), Miss Poole; Miserima (Spirit of Memory), Miss Cicely Nott; Auster (Spirit of the Storm), Mr. Swift; Astaroth (Spirit of the Earth), Mr. Meagerson; Nubes (Spirit of the Shadow of Night), Mr. Ryde; Titanos (Spirit of the Mountains), Mr. G. Spencer; Nemesis (Goddess of Vengeance), Mrs. Edmund Falconer; Clotho, Lachesis, and Atropos (the Three Destinies), Miss Emma Atkinson, Miss C. Weston, and Miss Murray; The Phantom of Astarte, Miss Rose Leclercq; the Witch of the Alps, Miss Eburne; Evil Agencies and Spirit Spectres of the Weird World, Messrs. T. Matthews, J. Morris, and J. Cormack; Miss Seymour, Miss Harfleur, Miss Green, Mrs. Melville, Mrs. Warlow, and the Ladies and Gentlemen of the Choir and the Ballet. Order and character of the Scenery:—Act I.—Scene 1. Studio and Gothic Gallery in Manfred's Castle. Scene 2. A Precipice and Glaciers nigh the summit of the Jungfrau. Act II.—Scene 1. The Chalet of the Chamois Hunter and Alpine Pass. Scene 2. The Steinbach, a Waterfall, in one of the Lower Valleys among the Alps and overhanging Cliffs, the Haunt of the Witch of the Alps.

The sunbow's rays still arch the torrent with the many hues of Heaven,
And roll the sheeted silver's waving column o'er the crag's perpendicular.

Scene 3. The Snow-capped Summit of the Jungfrau, by Moonlight. Scene 4. The Hall of Arimanes in the Nether World, painted by Mr. Danson and Son. Act III.—Scene 1. Terrace and Exterior of Castle. Scene 2. The Turret Studio, the Magian's Midnight Haunt, Shook and Illumined by a Thunderstorm, and finally Destroyed by Flashing Bolt and Crashing Avalanche. Last Scene. A Snowy Alpine Waste or Wilderness. Spectral illusions by Mr. Cox; and also Professor Pepper's adaptation of Dirck's invention, under the special superintendence of Professor Pepper. The whole of the entirely new scenery designed and principally painted by Mr. W. Telbin, assisted by his son, Mr. H. Telbin. The Hall of Arimanes painted by Mr. Danson and Sons. The increased orchestra and present arrangement of the music (originally composed by Sir Henry Bishop) under the direction of Mr. Barnard. The choir under the direction of Mr. Charles Beale. To conclude with the new and original farce by W. Brough and A. Halliday, Esqrs., entitled MY HEART'S IN THE HIGHLANDS. Principal characters by Messrs. Belmore, G. Weston, J. Neville, Warde; Miss Harfleur, and Mrs. Neville. Stage Manager, Mr. Phelps.

In preparation, a GRAND COMIC CHRISTMAS PANTOMIME, to ensure the scenical magnificence of which the exclusive services of the celebrated Artist Mr. William Beverley have been retained.

Private boxes, 10s. 6d., 21s., £1 11s. 6d., £2 2s., £3 3s., and £4 4s.; stalls, 6s.; dress circle, 4s.; first circle, 3s.; boxes, 2s.; pit, 2s.; lower gallery, 1s.; upper gallery, 6d. No half-price. Box-office open from Ten till Five daily. Doors open at Half-past Six; the performances commence at Seven o'clock, and terminate every evening at a Quarter-past Eleven.

ROYAL LYCEUM THEATRE.—Under the sole management of Mr. FECHTER.—THIS EVENING, MONDAY, and during the Week, a Comedietta by W. Gilbert, entitled UNCLE BABY—Messrs. Widdicombe, Shore, Charles, Miss P. Leclercq, and Miss Carlotta Leclercq. After which, at Eight o'Clock, BEL DEMONIO, a Love Story, in Twelve Tableaux. Principal character, Mr. Fechter; supported by Messrs. Jordan, Charles, Brougham, Emery, Raymond, Moreland, Collett, Miss Kate Terry, Lavenue, Mrs. Lee, and Miss Elsworthy. Box-office open daily from Eleven till Five.

NEW THEATRE ROYAL, ADELPHI.—Sole Proprietor and Manager, Mr. B. WEBSTER.—In consequence of the triumphant success of Miss Bateman in the character of Leah, EVERY EVENING, until further notice, at Eight, the Seventh Week of the New Drama of LEAH—Miss Bateman, supported by Messrs. Arthur Stirling, R. Phillips, Billington, Stuart, Eburne; Miss H. Simms and Mrs. Billington. Performance to Commence at Seven with THE TRAGEDY QUEEN—Mrs. Stirling; and to conclude with THE IRISH TIGER—Mr. Stephenson and Miss K. Kelly.

PRINCESS' THEATRE.—HERRMANN, PRESTIDIGITATEUR.—Herr Herrmann's last appearance.—The Performances will commence EVERY EVENING at Eight. Half-price to all parts of the house at Nine. Constant change of programme. Celebrated Ring, Hat, Fish, and Money Tricks each evening. Commence at Eight.

NOW READY,
Price One Shilling, beautifully Printed in Colours,
THE ILLUSTRATED LONDON ALMANACK FOR 1864,
containing Fresh-Water Fish, from Paintings by H. L. Rolfe, with interesting descriptions, by James G. Bertram, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine-Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Headings to the Calendar, by F. W. Keyl.
It contains also Lists of the Royal Family of Great Britain; the Queen's Household; her Majesty's Ministers; and Public Offices and Officers; Law and University Terms; Fixed and Movable Festivals; Anniversaries and Remarkable Events; Times of High Water at London and Liverpool; Tables of Stamps, Taxes, and Government Duties; the Christian, Jewish, and Mohammedan Calendars; Astronomical Symbols and Abbreviations; and a considerable amount of useful and interesting information, rendering the ILLUSTRATED LONDON ALMANACK an acceptable and elegant companion to the library, boudoir, or drawing-room; whilst, as regards price, it is the cheapest Almanack published.
The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.
Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, NOVEMBER 21, 1863.

AMONG the evils of the war which has called out all the violent passions of our American relatives is the generation of a habit of what we are describing in the mildest language when we call it profanity. No person of honest nature would be too hard upon a man who at a time of fierce excitement should be too much moved to be very careful of his tongue. When directing the "currents of a heady fight," neither Napoleon, Wellington, nor Clyde, was particular as to the form of emphasis in which hasty orders were delivered; and a good deal of expletive may, under such circumstances, be thought no more of than the noise of the powder that is projecting the ball. But it is really another thing when preachers in the pulpit and statesmen on the platform think it necessary to be impressive by dint of appeals and allusions which are offensive to people of taste and painful to people of religion. American speakers and writers on both sides have been a great deal too ready to claim the direct superintendence and approbation of Providence; and those who would affect to see the blasphemy of such a man as Suwarrow, for instance, who rhymed on "Glory to God and to the Empress" after the butchery at Ismail, are ten times as prompt with similar tributes at every fresh slaughter in the course of a fratricidal war. We do not propose to annoy our readers by illustrations of this practice, as those who have read the documentary history of the struggle will recall a mass of such sins against propriety and religion; but even those who have noticed the clerical menaces of Greek fire and worse, by the Federal preachers, and have seen Mr. Lincoln's telegram, in which he invited one of the Generals to stand still and see the salvation—we scarcely care to copy the rest of the messsage—will not have been prepared for Mr. Seward's last outbreak. This, for mingled folly and profanity, perhaps outdoes most of what has preceded it. And this is the utterance, not of a soldier in the fierce heat of a fight, or even of a fanatic preacher blatant for the sake of pew-rents, but the deliberate oratory of the leading statesman in the Cabinet of Washington.

Mr. Seward, the Palmerston and Russell of the Lincoln Ministry, has been making a speech in which he declares that there can be no peace until Mr. Lincoln shall be President of the whole United States. Then, that is to say, when the flower of the Southern soldiery shall have been slaughtered—when the cities are garrisoned by Federals, and scores of Butlers are holding the people in an iron clutch—when the sword and the fire have done their work, then, cries Mr. Seward, "There will be peace, and the angels in Heaven may tune their harps to the symphony of such a peace."

Suwarrow, the Russian savage, is fairly outdone by Seward, the Federal statesman and philanthropist. The idea which he calls up is too painful to be regarded lightly, though the ridiculous blends with it to an extent which makes it difficult to repress a smile. If he had been content to be only portentously magniloquent instead of profane; if he could have remained outside the barrier, and not rushed in where those he invokes fear to tread, it would have been well. Could he have been satisfied with the music of the spheres and let the morning stars sing together, rejoicingly "Hail, Columbia!" the sentiment would have been American, and not altogether impious. But the picture which he has sought to draw is so audacious that we should have hesitated to reproduce it, but that it is well that English readers should understand the sort of madness which has judicially laid hold of the men of the North.

Leaving it, and forgetting as far as we may do the profane part of the idea, we should much like to know Mr. Seward's idea as to some of the steps with which it would be necessary to follow up the peace, whenever it is made. If it were possible that the South could be dragooned into submission, what next? We do not think so ill of the Federal Statesmen as to believe that they desire to rule the nine millions of the South as Mr.

Seward's idol, the Emperor Alexander, is ruling the Poles. We do not even suppose that he desires perpetual garrisons over the South, martial law, and a reign of terror. The idea probably is that if the South can once be subdued it will accept the humiliation, and take the goods the North provides it, and that in time ill-feeling will subside and institutions begin to work again. If these improbable events are ever to come to pass, it is not too soon for Mr. Seward to have begun to consider the sources of the misfortunes that have wasted the States, and what remedial measures should be adopted to prevent the recurrence of such miseries. And as, even if the North should have to make peace on other terms, and should have no occasion to include the concerns of the South in any Washington legislation, the same hints may be as useful, or perhaps more so (as Federal interference under the present system will be more difficult than heretofore), we should like to ask him respectfully whether these are among the rearrangements which he meditates.

Has he been convinced by the events of the last two years that universal suffrage is a mistake? Has he learned that to hand over the Government to the control of mere masses, without real cohesion or mutual understanding, is a blundering and dangerous process, as the result has shown? Does he think that this horrible war would have never occurred had the American representative system been rational instead of the reverse, and if educated men and persons of property had really had a voice in the country? What can be a more terrible sarcasm upon the whole system than the mode in which the Chief Magistrate is chosen? The Americans are obliged, when attempting to elect their President, to eliminate every man of mark or notoriety, and the only man who has a good chance owes it to his utter obscurity—to the fact that, whereas something is known of other candidates, nothing is known to say good or evil of him. It was to his being nobody that Mr. Lincoln—an attorney—owed his being placed at the head of a great nation. And what is the consequence of such election—if it be not an abuse of language to apply the word to the most blundering way of filling up the highest office? You get a mediocrity, or something worse, and he governs as might have been expected, and as would have been expected had anything been known about him. Mr. Lincoln, with some good intentions, has done more mischief than any ruler since Europe (except Napoleon I.) who ever reigned. How can it be otherwise, when election is but mob acclamation? The intermediate electoral body makes matters no better, because it is fairly represents the constituency, which is the worst conceivable. Is Mr. Seward prepared to abolish universal suffrage and of coming to a property qualification? We hope so, for to this complexion he or his successors must come at last.

Then, has he considered why the State is so ill served in America? He will hardly deny that it is so, in the face of the universal testimony of the American press, that the civil and military service is a mass of jobbery and incapacity. Has it occurred to him that while the wicked and foolish arrangement which leaves every office-holder at the mercy of a party change must effectually prevent office-holders from being anything else A man knows that he has but a limited term to serve, and then he must once more seek his fortune. He would be something better or worse than a man if he gave much thought to anything save getting into office, and, when in, making, by fair means or foul, as much provision as he can against the day of his extrusion. And this is just what the public servant in America does. He has managed to get his place, and, having learned by long experience that the only view to discharging them in the best manner, and, it may be, improving the system of which he is a part—as so many of our own public servants do—that is out of the question. He has to feather his nest, and he has not much time for the pitifulness. So the young and vigorous men of the country are either plundering it or are engaged in intrigue in order to have a chance of plundering it when a political change comes. Will Mr. Seward propose to make offices permanent, except, as here, when the Administration is discredited? If not, and he can carry his point, he will create a new service, and the affairs of the country will be managed in a new way.

If Mr. Seward will consider that by abolishing universal suffrage and by making offices permanent he may do much to elevate his country, and if he will frankly plan to be offered when peace shall come, he will be a better patriot than he has hitherto shown himself. And if he will do this, and leave off talking profusely about the angels, we do not know that he would be the worst President that could be chosen to succeed Mr. Lincoln. But we doubt his courage. He is brave enough to be profane, not to be patriotic.

At a Privy Council meeting held on Tuesday, at Windsor, Parliament was ordered to be further prorogued beyond Dec. 1.

The Queen has appointed the following gentlemen, now attaches at the undermentioned places, to be third secretaries in her Majesty's diplomatic service:—The Hon. Henniker Heaton, Le Vert Brooke, Frederick Hen Audley Charles Golgligh, Stockholm; Mr. Henry Nevill Dering, Berne.

An order, under the hand of Sir George Grey, is published in Tuesday's Gazette, extending the time during which it is prohibited to take ralmon in the Fowey and Camel and their tributaries, in the county of Cornwall, from the 1st day of February to the 1st day of September.

Mr. Howitt, a brother of the celebrated Australian explorer of the same name, and a son of William and Mary Howitt, the well-known authors, died on Monday, owing to the upsetting of a canoe on Lake Brunner, in the western district of Canterbury, New Zealand.

Some specimens of English verse in classic metres, by the Poet Laureate, will, we understand, appear in the next number of the *Cornhill Magazine*. Mr. Tennyson will also contribute to it a translation, in blank verse, of one Ibsen of Homer.

Messrs. Edmonston and Co., of Paternoster-row, whose excellent and expeditiously-issued maps of North America have been from time to time noticed in the *Illustrated*, have brought out a Map of Europe, showing the railways, submarine telegraphs, and latest political boundaries, and containing much useful information regarding the several States; they have likewise produced a Railway and Commercial Map of England and Wales, based on the Ordnance survey. Both maps are coloured. They are characterised by accuracy of drawing and clearness; and, finally, they are cheap enough to be popular.

THE COURT.

The Queen continues at Windsor Castle in good health.

On Saturday last her Majesty, accompanied by the Crown Princess of Prussia, drove in the grounds adjacent to the castle. The Duke of Cambridge, attended by Colonel the Hon. James Macdonald, arrived at the castle. Viscount and Viscountess Sydney also arrived. The Right Hon. Sir Charles Wood had an audience of her Majesty.

On Sunday the Queen, the Crown Princess of Prussia, Princess Helena, Princess Louisa, and the Princess of Hohenlohe, attended Divine service in the private chapel. The Hon. and Very Rev. the Dean of Windsor officiated.

On Monday the Queen, accompanied by Princess Beatrice, drove out in a carriage and four. The Crown Princess of Prussia, attended by Countess Holstein and Count Seckendorff, visited the Queen in the morning to meet the Crown Prince of Prussia upon his arrival from the Continent. The Crown Princess met his Royal Highness at the Garter Gate, and conducted him to the Queen's apartments. He proceeded to the Waterloo station and travelled by special train to Windsor, arriving at the station at Clewer, where he was received by an audience of the Queen to deliver the insignia of the Order of the Garter sent to him by her Majesty.

On Tuesday the Queen, accompanied by Princess Louisa, drove in the castle grounds. Subsequently her Majesty held a Council, which was attended by the Lord Chancellor, the Duke of Argyll, Viscount Palmerston, the Right Hon. Sir G. Grey, and the Right Hon. W. Gladstone. The Queen's Speech Parliament was ordered to be further prorogued from Tuesday, the 1st of December. Mr. Helps, Clerk of the Council, attended. Earl Granville and Viscount Palmerston had audiences of the Queen.

On Wednesday her Majesty, accompanied by the Crown Princess, drove out. Princess Helena and Princess Louisa, attended by Lady Mrs. Bruce and Colonel Ponsonby, went to Oxford to-day and inspected many of the objects of interest in the University. Their Royal Highnesses were the guests of Dean Stanley. After leaving the school of Natural Philosophy, the Princesses proceeded to witness the final heat of the University four-oar races between Trinity and University. Their Royal Highnesses on leaving Christ Church Meadows, where the boats started, were received with loud cheers. The Princesses returned to Windsor at five o'clock by the express train. The Queen and the royal family took an airing in carriages in the vicinity of the castle.

The Queen has honoured Mr. Frith with a sitting for his picture of "The Prince of Wales's Marriage."

The Crown Princess of Prussia has graciously consented to lay the foundation-stone of the new Cottage Hospital which is being erected at Windsor on this day (Saturday), the twenty-third anniversary of her Royal Highness's marriage. The ceremony will take place at the hour about half-past twelve o'clock, will be attended by the Bishop of Oxford and the Clergy of Windsor, the Mayor and Corporation, and the members of the Castle and Eton and Colleges of Freemasons. Lord Cremorne has succeeded Lord De Tabley as Lord in Waiting.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales arrived at Sandringham House.

On Thursday week the Prince attended by Lieutenant-General Bentinck, Major-General Knollys, Colonel Keppel, and Mr. Oliphant, went to the Castle Rising estate, and spent the day shooting, with Lord Alfred Paget and other noblemen, invited to meet his Royal Highness. Mr. Olo Russell left Sandringham House for London.

On Friday week the Prince and Princess walked in the grounds adjacent to the house.

On Saturday last the Prince and Princess attended by the Countess of Morton, Colonel Keppel, and the Rev. A. Hervey, went to Lynn, where the Prince joined the West Norfolk hounds for a day's hunting. The Princess drove a pair of greys, proceeding in the direction the fox had taken, and came to a standstill in the Park at the entrance of A. Fountaine, Esq., where her Royal Highness alighted. The Prince and Princess returned to Sandringham House in the evening.

On Sunday their Royal Highnesses, attended by the Countess of Macclesfield, Lieutenant-General Knollys, and Major Teesdale, drove to Castle Rising, and attended Divine service in the parish church of St. Lawrence. The Rev. Charles Walter Bagot, Rector of the parish, officiated.

The Princess takes daily walking and driving exercise in the vicinity of Sandringham. The Prince spent the afternoon very much high, in consequence of the death of the late King of Denmark. It is reported that on the arrival of the Prince of Prussia to an evening party at Holkham Hall, on the 23rd instant, is postponed in consequence of this event.

PRINCE ALFRED.

Prince Alfred continues at Holyrood Palace.

On Saturday last his Royal Highness, accompanied by Prince William of Hesse, Mr. Fredrick Seymour, and Mr. Ponsonby, and William of Holstein, left Holyrood Palace for Dalkeith Palace on a visit to the Duke and Duchess of Buccleuch. The Royal party arrived at Dalkeith Palace shortly before eleven o'clock, when they were received by the Duke and Duchess of Buccleuch, the ladies Victoria, Margaret, and Mary Scott, and a distinguished circle invited to meet their Royal Highnesses. After partaking of breakfast the Royal party proceeded to the Home Park, where they succeeded on a shooting excursion. Luncheon was served in the park, after which the party returned to the house. The party returned to the Palace shortly after five o'clock, having succeeded in bagging seventy-five head. Dinner was served at half-past seven o'clock, after which Prince Frederick of Holstein and his son left for Edinburgh, accompanied by Robert Scott, Esq., of Rosebery.

On Sunday, the Prince and Prince William of Hesse attended Divine service at Lasswade Church, Midlothian. The Rev. Rev. Jas. Lamont preached. In the afternoon their Royal Highnesses attended Divine service in the Duke of Buccleuch's private chapel. The Rev. Dr. Bisshop officiated.

The Prince and Prince William of Hesse, after having been duly introduced to the Lord Provost, Magistrates, and Council, on Monday night as members of the Speculative Society, Edinburgh, and initiated throughout the debate.

The Crown Prince of Prussia, attended by Captain von Schweinitz, arrived at Queenstown Cahir, on Monday at four o'clock. The Royal Highness was met on landing by Colonel Ponsonby, Equerry to the Queen. The Prince left for Londonderry, en route to Windsor, at half-past four o'clock, by the mail-train on the South-Eastern Railway.

His Royal Highness the Count de Paris has left Southampton on board the Peninsular and Oriental Company's steam-ship Ellora, en route for Egypt.

His Excellency the Austrian Ambassador and the Countess Apponyi have arrived at Claridge's Hotel.

His Excellency Baron de Gros left Albert-gate House on Sunday for Paris.

His Excellency the Saxon Minister has arrived at the residence of the Legation, in Hobart-place, from Saxony.

The Queen has appointed his Highness Seramudi Rajahye, Hindoon Rajah of Travancore, Knight Grand Cross of the Most Exalted Order of Joyeeo, and His Highness Furmud Dilhuni Rasekool Itabgud Dowlut-i-Sulehie Rajah of Sattara, Knight Grand Commander of the Most Exalted Order of the Star of India.

The Bow Street Police Inquiry into the cause of the accident to the Conard steamer Africa has resulted in the suspension of Captain Stone's certificate for six months. The Africa, it will be remembered, struck on a rock near Cape Race on the night of the 12th of October, but by able management she was got afloat, and safely reached at St. John's. The suspension of Captain Stone's certificate has excited a good deal of disapproval in Liverpool. A meeting of "Shipowners, captains, and others interested in the mercantile marine of the port" has been held to that town, at which resolutions were passed condemning the present official Courts of Inquiry, and pledging those present to use every possible effort to obtain the immediate restoration of Captain Stone's certificate. Captain Judkins and Captain Paton, of the Great Eastern, were amongst the speakers at the meeting; and the former, who spoke with the authority of a man who has crossed the Atlantic one hundred times, declared that the mishap to the Africa was due not to neglect "in the use of the lead, but to "an unaccountable under-current."

METROPOLITAN NEWS.

A meeting of the governors of St. Thomas's Hospital was held on Tuesday, and, notwithstanding some protests from parishes in the south-east of London, they agreed in a resolution to adopt the Stangate site for the hospital, and to give £50,000 for the ground, subject to the approval of the Court of Chancery.

The 132nd session of the Society of Arts was opened on Wednesday by an address from Mr. William Hawes, chairman of the council, when the Prince Consort's gold medal was awarded at the last examination, and those allotted to the successful competitors for the wood-carving prizes in June last, were distributed.

A meeting of the Royal Geographical Society will be held on Monday evening next, when papers on the Niger and other geographical papers will be read:—1. Communication from Mr. Hutt, British Consul at Fernando Po, on the west coast of the Wahle Nile. 2. Journey of Colonel Felly on the shores of the Persian Gulf.

The chrysanthemums in the Inner and Middle Temple Gardens, brought through the severe frosty between the metropolitan headgardeners, Messrs. Broome and Dale, to a high degree of excellence, have drawn to them large numbers of lovers and gentlemen of the public from these gardens; which, as stated, have courteously been thrown open to the public. Shortly the present weather continuing, the flowers can be a protection for a few days longer.

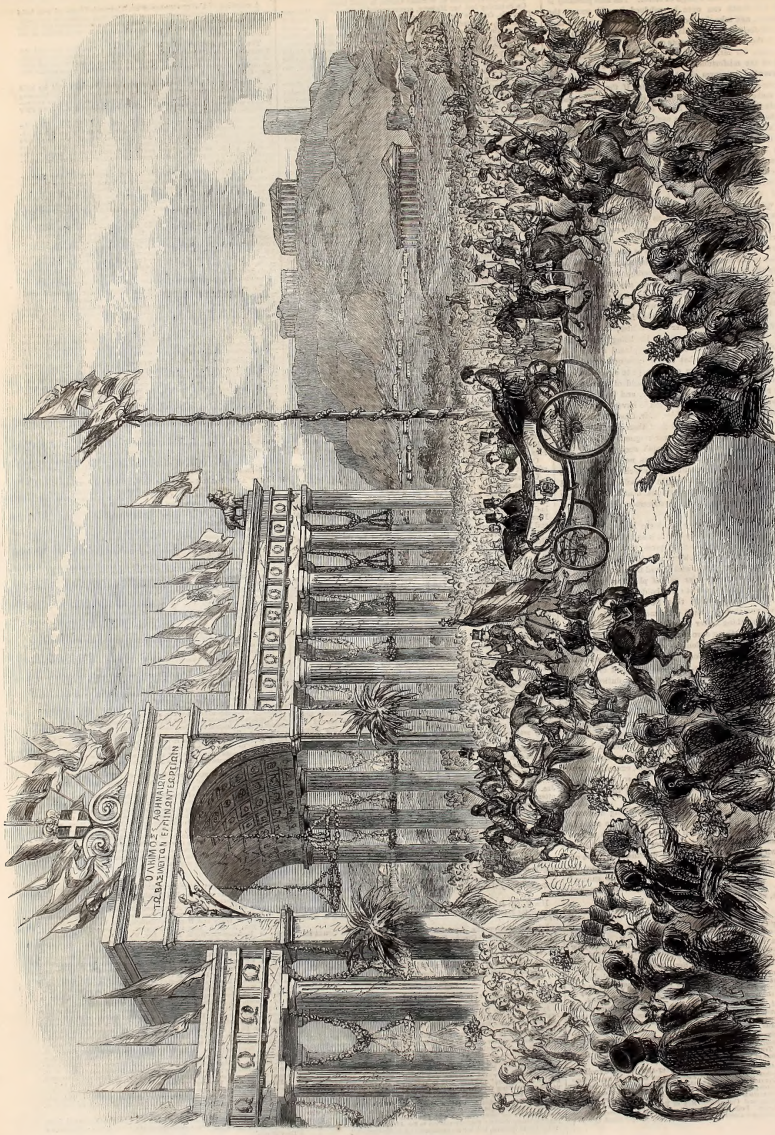
The winter course of lectures to the members of the Young Men's Christian Association was commenced on Tuesday evening by Professor Owen—his subject being "On some instances of the Power of God, as manifested in His Animal Creation." The lecture was concluded with a brief review of the progress of science, in advancing and guiding especially, as the lawgiver caused to all seekers for truth to approach its investigation with minds perfectly unfettered with preconceived notions.

Last week the births of 2061 children—1066 boys and 995 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number was 1,911, which was 161—nearly 8 per cent—less than the number registered in the first week of the current month to 1487 in that which ended last Saturday, notwithstanding nearly twenty years of time have increased from 721 to 757; those at sixty years and upwards from 99 to 276. The average number of deaths in ten corresponding last weeks was 1,264, the forty-sixth week of the years 1853-62 is, with a correction for increase of population, 1,379. A yellow dust at the age of fifty-four years was registered as the cause.

The ceremony of nominating the Sheriffs for England and Wales took place on Tuesday morning, in the Court of Exchequer, at Westminster. The Lord Chancellor was present, the Barons of the Exchequer, and the Chancellor of the Exchequer, in the Queen's Office. The writ was then brought in containing this the following:—There are three names on the list for each county, and the present Sheriffs of the office were struck off, and fresh names were added in their places. In January next one of the three names will be "picked" for the office, and will be sworn in during that year's term as the top of the list; so that the gentleman nominated will, as a rule, have two years to prepare for the arrangements of his office.

A public meeting was held yesterday week to decide upon the most appropriate means to be suggested to the town for the late Field Marshal Lord Clyde, and to take steps for providing the funds for the same. The Lord Provost presided, and the Lord Justice Clerk, and upon the platform were Earl De Grey and Ripon (Secretary for War), the Duke of Wellington, the Duke of Argyll, the Earl of Rosebery, the Earl of Haddington, Sir Charles Wood (Secretary for India), the Earl of Lauzan, the Earl of Cacklgan, Lord Murray, Sir R. Richardson, Sir R. Anstruther, Sir R. Airey, and a number of other gentlemen officially or otherwise connected with the military and civil services of the country. The body of the hall was crowded. The Lord Provost said the chief posed a high eulogium on the merits of Lord Clyde, tracing his career from his entry into the army as a gentleman and unknown, to the time when he attained a position which it will be difficult for another to occupy. He mentioned speeches in which the same sentiments were also made by Earl De Grey, the Duke of Argyll, the Earl of Hillsborough, Lord Stanley, and others. It was resolved that a statue to the celebrated warrior should be raised in the metropolis, and that a general subscription should be invited.

LAW AND POLICE.—The estate of the Aberdeen came on for hearing on Tuesday in the Court of Exchequer. Sir Hugh Cairns in an elaborate address urged that the estate should be sold out to the highest bidder of the late levy. He commented at great length on the meaning of the Foreign Enlistment Act, which, he said, had not been intended for the construction of the Alexandra. Mr. Karslake followed for the defendants. An interesting point was made by the Attorney-General. The case had not concluded when we went to press with our country edition.



Some days have been occupied in the Chancellor Wood's Court this week by the arguments in connection with a bill filed by Colonel Brownlow Knox, M.P., against Mr. Gye, lessee of Her Majesty's Italian Opera House, for a partnership and praying for a settlement of accounts on that footing. Some interesting facts in the history of the opera during the last twenty years were disclosed in the course of the case. In September, 1849, after the failure of the previous year, Mr. Lumley and Mr. Gye obtained a lease of the house for seven years. Colonel Knox, who was an intimate friend of Mr. Gye, offered to lend him £6000; Sir William Tite, another intimate friend of the latter gentleman, was likewise induced to contribute, and the result of the negotiation was by the end of £18,000 to Mr. Gye by Messrs. Coutts, the bankers, on a bond by which Mr. Gye himself agreed to be liable for £3000, Colonel Knox for £3000, and Sir William Tite for £2000. The year 1851, the Exhibition year resulted in a profit. Messrs. Coutts were paid off, and Sir William Tite died. Between March, 1852, the same bankers made another advance of £10,000 on the security of the lease and the bond of Mr. Gye and Colonel Knox. In the arrangements for the Wagner season of 1852 was the reverse of profitable, and, as more funds were required, Mr. Anthony H. Beresford-Hope was induced to join in the enterprise, and advanced £12,000 on the understanding that he was to be entitled to one third of the profits. At the season of 1853 matters went better than before, and Colonel Knox began to be uneasy, asked for security, and suggested an introduction of another partner. Mr. Lumley, who was in the Queen's Bench, entered into the Crimea, and died there in 1858, having left his share to the sister of Mr. Gye. Next year the latter gentleman and Colonel Knox were set down as a contributor towards the re-edification to the extent of £5000. The Colonel, however, declined to be to be a trustee for the extravagant Mr. Gye, and his son and Mr. Gye followed, resulting in this appeal to Chancery. After going into the accounts, the Vice-Chancellor intimated that he should order a dissolution of partnership. The question as to the amount to be received by Mr. Gye, beyond being that if there were a loss he must be borne, if a profit Colonel Knox's money must be first returned, was not then decided. The plaintiff's bill must be dismissed with costs; but the rest of the case might stand over, with leave to amend, and as to Messrs. Coutts' bill the decree must be made that Colonel Knox was a proprietor.

An unsuccessful attempt was made in the Court of Queen's Bench on Monday to remove the judgment and execution obtained against the Great Eastern by one of her creditors for £1000.

The inquest on the bodies of Mrs. Hunt and her two children, who were murdered in a cab, was brought to a close on Monday night. The jury found a verdict to the effect that all three were poisoned by prussic acid, administered to them by Samuel William Hunt, "whom they believe to be now insane on Monday at midnight.—The Coroner's inquest on the body of Hunt was held yesterday week, and resulted in a verdict of *Felo de se*. The jurors elected several facts which tend to account for some of the apparent contradictions which the circumstances of the case have presented, especially amongst the most important was the evidence of a bailbroker, who stated that the deceased purchased a waterproof a day or two before the committal of the murder. This fact supports the story of the cabman.

PREFERMENTS AND APPOINTMENTS IN THE CHURCH.—The Rev. T. Bentley, Rector of Monk's Risborough, to be Rural Dean of Aylesbury. Rev. J. Bramley, Rector of Bishopsbourne, to be Rural Dean. Rev. A. L. Brenchley to be Honorary Canon of Peterborough. Rev. R. D. Green, incumbent of Bromsgrove, to be Surrogate for Cheshire. *Benefices*: Rev. F. B. Bourjeo to Withy and Hargham, Norfolk; Rev. W. C. Hunt to Odell, Bedford; Rev. J. E. Kempe to Wittersham, Kent; Rev. Alfred Allnutt, Vicar, Wye, Bayles to Foxton-de-the-Wolds, Hull; Rev. W. M. Parley to Cottingham, near Wetherby; Rev. Edward Ryle to Ely. *Vicarages*: Rev. Frederick Anderson; Rev. G. M. Pieth to Wiltshire, Yorkshire. *Complements*: The Rev. R. Forth, incumbent of St. Mary's, Bryanston-square, to be Chaplain to the Metropolitan Rev. C. A. Wetherall to the Forces, Fourth Class. *Incumbents*: The Rev. R. Crawley to Bishop's Norton, Rev. E. Forbes to Blakeley, Lancashire; Rev. Francis. *Perpetual Curacies*: The Rev. O. L. Chambers to Stock, near Ongar, Rev. J. Dixon to Hoe and Letheringham, Rev. F. Ellis to Lindfield, Sussex; Rev. Rev. P. J. Wales to Nether Wilton, Northumberland. *Curacies*: The Rev. W. Andrews to Attercliffe-cum-Darnall, Sheffield; Rev. J. Bell to Stretford in Christ Church, St. Leonard-on-Sea; Rev. W. C. Bompas to Holy Trinity, Leeds; Rev. D. Currie to Holy Trinity, Lancaster; Rev. J. Dixon to Cowthorpe to Fewey, Cornwall; Rev. H. M. Finney to Gotham and Radcliffe; Rev. W. Gordon to Bingley, Bradford; the Rev. T. H. Gregg to Trinity Church; Rev. A. Harrison to Digby, Lincolnshire; Rev. W. Hook to Denton, Wilts; Rev. J. Hunt to St. Anne's, Liverpool; Rev. J. Jones to St. Mary's, Lancaster; Rev. T. Kenyon to St. Mary's, St. Andrew's, Auckland; Rev. J. F. Nicholson to Milnthorpe, Southam; Rev. E. Parke to Blakeley, Lancashire; Rev. Rev. Rawdon to Hulton, Lancashire; Rev. T. C. Smith to Nantwich, Notts; Rev. W. B. Skelmore to Hambleton, Rutland; Rev. J. Smith to Bermondsey; Rev. Henry, Lincolnshire; Rev. H. Peter to Barrowby, Lincolnshire; Rev. W. G. Tarrant to Trinity, Bradford; Rev. W. Vernon to St. John the Evangelist, St. Pancras; Rev. R. Warwick to Bolton-le-Moors; Rev. A. Watton to Bishopsgate, Upton, Somersetshire; Rev. R. J. Webb to Milton Rees, Lincolnshire; Rev. T. C. Webster to St. Anne's, Lancaster; Rev. A. Wright to Bolton-le-Sands, Lancaster. The Rev. E. Y. Hall to be Lecturer of St. Peter's, Brighton. —*Guardian*.

A thank-offering of £100 has been sent to the National Life-boat Institution by a lady, "for preservation at sea during the awful storm of the 6th ult."

THE ARRIVAL OF KING GEORGE I. AT ATHENS.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PAGE 509.

OVERFLOW OF THE NILE: DESTRUCTION OF THE VILLAGE SEURAH-EL-MALAH.—SEE PAGE 520.

ECHOES OF THE WEEK.

OUR silent highway, which has so long been accustomed to make an occasional noise in the world, is this week familiar to the clinking of a hammer on iron on its own account. There is a Thames Tunnel, and a dozen or two of bridges cross the Thames; but the tunnel necessarily was never intended to touch the river, and bridges are no more than means of connecting land—in fact, an absolute defiance of the river's dividing power. But the Thames Embankment will positively touch it "by the bottom." The contract has been taken, and one cannot hardly have actually driven in—for built, no sand, or whatever the operation may be called—it seems fair to conclude that the work will proceed "steadily, steadily," with what the sailors call shows. True, legislators—amusingly divided into hereditary and enlightened—have sanctioned the undertaking, but thanks to Mr. Locke, the contract for London on both sides of the river know well that the southern shore is constantly submerged by a high tide, while the northern shore is up on a ship's berth. Of course the new Embankment will displace an immense body of water, which, instead of being suffered to flow in the new channel, will be forced into the present stream. Thus the new plight of Lambeth will be increased. The Bishop's palace will demand a bridge boat, and the muddy population, from eastern to western Sarah's, may have to take to the water, and, like the superfluous Chinese population, live in boats, junks, or sampans, as they are variously termed. Of course, perhaps, during the next four or five recesses will be time enough—Mr. Cowper must turn his navvies' labour for the newly-formed Park to that end. For want of houses on both sides it cannot properly be called a street; existing new granddisquoses must be found—Parade, for instance, Strand or Thames Parade; or, with the proper complement of trees, and with the word Avenue might be employed, as being at once elegant and novel.

While London is undergoing smiles in that quarter it is "cutting it" not far off. Certain new thoroughfares demanded that Lord Clyde's statue shall be placed in Trafalgar-square; and Lord Stanley was good enough to advocate the

Keeping a corner for something that's nice,

as Goldsmith says, in the shape of reserving the fourth corner of the Square for a statue to the Jolly Jack tar, whose last great deed shall be longer be able to balance himself in that or any other matter concerning air or good taste. With Sir John, happily, we at present have nothing to do: but we have in time to think of the statue of the Duke, whose black gentry on granite pedestals, who frighten little children into wave fits than policemen, are the very last thing we can see whatever in large nursery-maid population. Such gloomy memorials induce anything but pleasing remembrances of the dead: and the Duke, in public enough all that, when Abroad as New Zealander and Shelley's South Sea Islander come at last, they will be of opinion that their boasted progenitors have as the Patagonians at Exeter Hall, the ugliest body ever painted yet. The New Zealander suggests St. Paul's, where the recent sculpture has been in good taste; the Duke's statue, equestrian statues, and the Crimean bas-reliefs. By-the-way, in the latter work there is doubtless an objection to many representations of the sailors. So it was well of Burns in his aspiration that people might see themselves as others see them, probably, the Sandwich Islander, during the principal years of Dr. Johnson's life, would scarcely have cared to see himself as in Dr. Johnson's pocket. But a large language is about to be put seriously to the test in respect of the "Great German people, a race of thinkers and of critics," as Sir Edward Lytton styles them in one of his novels. Mr. Henry Morley has been for some years then taking notes, and "faith, has prent 'em." Through a somewhat singular, or, at least, dominant Morrison's glass (which, by-the-way, was a naval glass, showing pictures to the marines), or, say, by seeing through the "spectacles" of good-chests, it is safe to announce that the Germans are a certain set of whimsical, unreasonable, and unpleasant people, who have been studied and described so well. They are steeped in a kind of unconscious poverty, and, as Lord Dundreary would never willingly be the children, these strange people take great educational care of their offspring, and attach important halfpenny-worth consequences to them in the shape of immoderate potations of beer.

From Mr. Mayhew a book of travels must not be expected. He has, in Mr. H. Lucas's days, *Used Among Lions* the country. A five years' residence has given opportunity for seeing the people in and out of doors. At home, going by quarterly for infancies and for all the otherwise all-consuming pig. At the Universities, where no student's academical career is complete until he has received a sash-corded sword-gown over the right cheek, or had the tip of his nose slashed off to be eaten up by the attendant dog, or sewed on again by the providential surgeon. Throughout the continent there is no lodging-house without the food worse. The author does not hesitate to speak of the miseries of German people, and he goes deeply into the causes. And all this is done, not in dry statistics, but in that manner, which has caused him to be acknowledged as one of the most readable writers of the day. No one has always sought subjects by many readers considered to be unreadable. Many of the national customs, from birth to marriage, and last even, will be found curious and interesting, as also will not the pale of observation jealously guarded by "Murray's Handbook." Then the "Contrast of "German Life and German Books" turn upon an occasional contrast with corresponding institutions in England, and, after perusal, the question will be for many more than the German to become proxy and sentimental over his Fatherland. But yet the Germans live comfortably. They have but little to cripply their purses. And they have no rent and increasing rates, as they consume with a passion sufficient to raise another King James and a second Gunpowder Plot.

And England bears as the most honoured people on its soil a family not altogether unlike German Princes in all but the title of Duke. The Court abandons tobacco. Throughout the length, breadth, rotundities, and heights of Windsor Castle every cigar and all weeds pipewards have been banished. The Prince of Wales has not smoked on the meanest hind in the palace in respect to tobacco. The walls are said to be covered with printed warnings, framed and glazed, against violating Majestical behests. Is this custom to spread, out of that most practical species of Radicalism—economy? Will Mr. Gladstone resist, just after having halved the duty on manufactured tobacco, confident in his proved theory that decreased taxation leads to increased consumption. British Americans may again be becoming nervous concerning the maintenal fragrance of curtains, and British husbands may again be thinking of going to the club.

People take different views of the last of things. Modest people hesitate sorrowfully over the last square of bread, which is eaten by eating; whilst old English gentlemen never fail to impress upon youth the propriety of "buzzing" the bottle. Marmion also entertained a desire, "last of his name," to get the papers, under the demoniacal title of "More Shame for Him," describe how Mr. So-and-so died, and the daily female specimen of the small grouse who had paid a visit to Unst, the most northern point of the Shetland Isles. That the bird was certainly not the last of his race may be presumed; but it may also be presumed that he was the only one within hail of swan shot. He met his fate, and undoubtedly deserved it as much as any other bird. The addition to the dinner matters little—the importance to ornithology may be great. It is difficult to see why the last of a thing or things should not be sacrificed, always excepting that celebrated remainder biscuit after a voyage, because in its case the difficulties of mastication must be considerable. But if the only bird present is to be preserved, surely the ultimate dodo of the Mauritius, sent in 1628, deserves to be immortal.

The Hon. Francis Leveson Bertie has been appointed a clerk in the Foreign Office.

MEMBERS OUT OF PARLIAMENT.

WHEN the present Ministry was formed it professed to represent a piece of political mosaic: that is to say, it was to be composed of materials generically alike, but of different shades of colour, as curiously and carefully joined that it should present at least a smooth surface. The Liberal party was to be represented in the Cabinet in that fit of variegated work. The Peelites were to show in the lightest shade; the Whigs were to be rather darker in colour; while the Manchester Radicals were to be the most pronounced in dye of all. As a matter of course, the colour that was most decided required to be used most sparingly, in order to avoid overpowering the others. Hence, in the allocation of places in the Cabinet—to drop metaphor—two members of the Manchester School were admitted to the Ministry. Mr. Bright was appointed to rule Mr. Milner Gibson is undergoing the process of gilding Ralticism and favour-seeking Conservatism, and Mr. Bass is to be Liberal. Now, in the case of Mr. Milner Gibson, and it would also have been the case with Mr. Cobden if he had accepted office, the same rule was tried to be applied. Mr. Cobden, it is thought, is to be "king of France not because last in spite of his being a Bourbon, might have been appointed. They were chosen for the Cabinet, not because of, but in spite of, their extreme political opinions. They were Radicals, pure and simple. The Bourbons had learned nothing and forgotten no villies. No doubt he has been always found in the van of certain popular movements, and he professes very pure Radical views on the subject of Reform; while, as a basis to the anti-corn-law agitation, he did great service. It has, indeed, often crossed one's mind that Cobden would have been a very good Minister for India, or perhaps completely a representative man as Mr. Gibson is, or Mr. Bass, or indeed any other Liberal Minister, regarded on the membership for Wolverhampton—for, of course, that is the way to put it in Queen's Park. About £1,000 a year, including leaders' and tenons needs, will be given in prizes, and it was also decided to continue the prizes for ploughing matches. Ploughing matches in Downs are still on an equality with the Chevriots, Leicesters, and Shorthorns, and Mr. Druce cuts a very fine figure which they can't take. For blood horses there is no prize, but the agricultural horses have £600 allotted to them.

"Are pigs profitable stock?" has formed the subject of a good discussion at the Croydon Farmers' Club, in the course of which some curious experiences were related. One gentleman stated that by no much struck with the mode of fattening Aylesbury ducks, by putting them in the dark, that he had got to prevent their feeding about that he had tied up some of his pigs with chains round their necks, and found the experiment answer. He also ascertained upon weighing, that a very half-hundred weight of food they made 14 lbs. of flesh, whether they were fed upon rice or Indian meal. He added that he had also found it useful to put it in straw-yard, as it had more nitrogen than any of them, and therefore made the best manure. Another breeder said he was highly of the confinement system of fatting, but laid down this rule thereto, "Do not put a pig to feed a pig." He did not, however, approve of washing the pigs. Mr. Streeter's experience was in favour of pulped swedes and mangolds, mixed with ground corn, but he did not recommend the latter. During the whole process of fatting, as the fat would boil out in cooking, which would not be the case if the meal was given to them raw, a little salt in the meal was thrown out to the effect that it was better to keep pigs for your men, and sell it to them at half or under market price, than to let them keep pigs for themselves, and thereby save the temptation of robbing the farm for their stye supplies. The necessity of warmth was enforced by all the speakers, who seemed to be pretty generally agreed that pigs are profitable.

SCIENTIFIC NEWS.

ROYAL INSTITUTION OF GREAT BRITAIN.—The lectures for the ensuing season will include a course on "Experimental Optics," by Professor Tyndall: "The Metallic Elements," by Professor Frankland: "The Chemistry of Combustion," by Professor Odling: "Animal Life," by Professor Marshall; "On the Antiquity of Man," by Mr. John Lubbock; "The Natural Law of the Conservation of Force," by Professor Grove; "Electricity in Relation and Meteorology," by Mr. Alexander Herschel; and "The Electric Telegraph," by Mr. Latimer Clark, Mr. Willoughby Smith, and Mr. Sabine. The lectures adapted to a juvenile audience, will be given by Professor Tyndall—"On Electricity as Real and Realizable Force."

A NEW COMET was observed on the 6th inst, by M. Tempel, at Marseilles, in the constellation Andromeda, and it is moving with such declination. It has a tail extending two degrees, and the nucleus is as bright as a star of the fourth magnitude.

TUBING MADE OF COLD STEEL.—We learn (from *Les Mondes*) that at Cologne a machine has been constructed which, weighing thirty tons, is able to exercise a pressure of 600 tons, destined for the manufacture of tubes. It is said that the force of this pressure is such that a steel bloom of cylinder fifty millimetres (nearly two-tenths of an inch) thick is reduced more than a hundred times in length, and becomes in this state more than capable of passage through the machine. This method may possibly be applied to the manufacture of cannon. The steel tubes are of a peculiar quality; the cast steel of Messrs. Hawksworth has succeeded well.

THE APPLICATION OF SUNLIGHT TO THE MICROSCOPE has been made by Mr. Woodward, U.S. Army, who employs direct sunlight, receiving the rays upon a concave mirror, and thus enlightened the object placed in the focus of the microscope. In order to moderate, if it often the excessive brilliancy, he placed the green and red glasses of his sextant in such a way that the rays passed through the two glasses successively. He states that the most delicate objects, such as the circulation of the sap in the cells of plants, are seen with a charming splendour. *Scientific American*.

PURIFICATION OF AIR BY THE VAPORISATION OF WATER. In a communication to the Academy of Sciences, M. Fremy states that during his studies on ventilation his attention was especially drawn to the disengagement of the fetid gases. This disengagement made for sacrificing the air by steam before permitting it to enter, both in winter and summer. He was led, in consequence, to attribute a valuable effect to the air in the presence of watery vapour dissolved in the air; possibly due, like the rain in storms, to the condensation of the vapour. He has consequently (confirmed by the experiments of Saussure and Pouillet), which modifies the air and produces active oxygen, so efficient in destroying the miasmatic principles of the putrefactive. M. Morin accordingly caused experiments to be made at the Conservatoire des Arts et Métiers, which he considers to favour his views, and has accordingly calls upon the medical profession and sanitary commissions to examine the question.

WITH REGARD TO THE CLEANSING OF ANCIENT PAINTED GLASS and M. Gerspach's process for removing the white opaque surface of defaces a warning letter, stating that great care must be taken in dealing with this glass, since, although the process may treat on the glass of the twelfth and thirteenth centuries are generally well enough vitrified, yet sometimes the glass of the fifteenth and sixteenth is of fire so ill as to crumble off with the finger nail. It would, then, be highly dangerous to wash them with muriatic acid. In respect to the glass of the fifteenth and sixteenth centuries, he denies that the beautiful effects are due to chance and to the accidental ruptures of the colours in the glass, &c., and asserts that they are due to the intuitive knowledge which the artists possessed of the laws of the contrast of colours so ably enunciated by Chevreul many years ago.

AZULENE is the name given by Mr. Septimus Piesse to a new body discovered by him in the products of the caustic soda test for coal naphtha. Being read on Saturday on the 5th of November, Mr. Piesse stated that, though the substance so designated by him is the blue oil that is a short distillation of otto of patchouli, he has since found it to exist universally in essential oils in larger quantity as the oil passes consecutively, giving, in fact, the colour by which each oil is distinguished. Pure azulene has a beautiful blue colour, and it is to the presence of small quantity of azulene that blue oil of chamomile owes its azure tint; and hence the name given to the new body. It is now ascertained that brown-green, yellow-green, and green oils owe their colour to a portion of azulene and a yellow resin, varying in proportion, as optically indicated. At the meeting Dr. Hoffmann objected to the name, as likely to be confounded with azaline, a blue colouring matter obtained from coal tar. Dr. Gladstone stated that he himself had separated the blue produce from otto of patchouli, but was not yet satisfied with its purity. He proposed the name cærulein, and stated that in a short time he would be prepared to read a paper on the subject. The editor of the *Chemical News* says that the name cærulein has been appropriated to a new mineral blue.

NATIONAL SPORTS.

Mr. Topham seems to have the knack of giving us bad meetings in the spring and summer, and good in the autumn. Out of season, as all racing seems to be, when the Newmarket stands are closed, there was plenty to be seen at Aintree, and a more slashing handicap finish than that between Blithfield, Golden Pledge, and Fairwater has not been fought out this year. Catch-'em-Alive, with Challoner in the saddle, could not "act" through the heavy ground. Lord Stamford (whose sale is postponed till Dec. 3) won four races during the week, in three of which his second jockey, James Mann, wore his colours. The November entries are generally good, and that for the Two Thousand of '65 a rather remarkable one. Out of the ninety nominations twenty-eight are contributed by six owners. Stockton keeps up its numbers well, and it has received a good ally in Mr. Thomas, who enters several of the Eltham Park foals.

The *Life* states that there were 80,000 people present on the two days of the Constantinople meeting, and that, owing to its success, it has been decided to form a jockey club there. Her Majesty's Vice-Consul was starter and judge on the occasion; and the Sultan's son was presented with a 2lb. racing-saddle, which caused extensive orders of the same article from wealthy Turks. [An Engraving and a description of the races at Constantinople are given in this Impression.]

The battues seem as large as ever this year. At Weston Colvile, near Newmarket, 1260 pheasants were shot in two days, and 1137 hares were the formidable item in the three days' return at Dapplin Castle, Perthshire.

A novel match has been made for the Copenhagen grounds on Dec. 14, when Lang, the champion runner, is to contend against "Spicer's donkey," for £10 a side, the quadruped receiving a quarter of a mile out of four miles.

The most remarkable coursing event since our last has been the success of Mr. Gavin Steel's kennel at the Coquetdale Club. He did not run anything in the Dog Puppy Stakes, but divided the corresponding stake with his Scheweppe and Spray, ran up to Agility for the Netherton Stakes with Spencer, and won the Biddleston Stakes with little Spider, own sister to the three. Scheweppe and Spray belong to a litter of eleven, all of them alive and over the distemper. The cross of Seagull and Sourocks seems likely to be as lucky as that of Beacon and Scotland-Yet, and the third and last litter consists of seven, of which one has been, unfortunately, stolen. Little Spider, who ran so well at the Waterloo last year, is one of the gamest and plainest greyhounds of the day. As a three months' puppy she broke one of her hind legs, and she has lost nearly nine inches of her tail, which gives her a very bulldog appearance. The meetings for next week are Wolverhampton (O), Swarland, Coquetside Club, North Somercotes, Metropolitan Club's Champion, Dranor Club (O), Jed Forest, Dumfries Club, West Herefordshire, and Scarborough (O).

SHREWSBURY AUTUMN MEETING.—Monday.

Shobdon Court Stakes of 10 sovs.—Lord Burleigh, 1. Welland, 2.
Queen's Plate.—Blithfield, 1. Bally Edmund, 2.
Newport Gold Cup.—Gemma, 1. Despair, 2. Lady Louisa, 3.
Racing Plate.—Foreteller, 1. Jessie, 2. Highland Mary, 3.
Carnival Nursery Handicap of 10 sovs.—Caroline, 1. Nucleus, 2. Diviner, 3.
Foregate Stakes of 10 sovs.—Cassidia, 1. Summerside, 2. Cuckoo, 3.
Abbey Handicap of 3 sovs.—Overture, 1. Redpole, 2. Bohemia, 3.
Battlefield Handicap of 5 sovs.—Liston, 1. Reindeer, 2. Zora, 3.
Hurdle Race of 7 sovs.—Serious Case, 1. Pot Pourri, 2. Shan Van Vocht, 3.

TUESDAY.

Salopian Stakes.—Caroline, 1. Alphæus, 2.
Shorts Handicap Selling Race.—Southport, 1. Vigil, 2. Sapper, 3.
Scurry Stakes.—Prescription, 1. Neilgherry, 2. Rest, 3.
Shrewsbury Cup.—Donne Canne, 1. Blackdown, 2. Odine, 3.
Severn Stakes.—Corsica, 1. Fanfreluche, 2. Belle of the Vale, 3.
Handicap Plate of 50 sovs.—Farfalla, 1. Reindeer, 2. Redskin, 3.
Handicap Sweepstakes of 5 sovs.—Juliet, 1. Spicebox, 2.
Stewards' Cup.—Knave of Trumps, 1. Suburban, 2. Despair, 3.
Handicap Sweepstakes of 5 sovs.—Fravola, 1. Zora, 2. Don't Come Late, 3.

WEDNESDAY.

Handicap Sweepstakes.—Rest, 1. Coronet, 2. Bosh, 3.
Handicap Plate.—Dolphin, 1. Miss Julia, 2. Biondella, 3.
Anglesey Nursery Handicap Plate.—Pegasus, 1. Tomfoolery, 2. The Tailor, 3.
Wynnstay Cup.—Buckland, 1. Zelle, 2. Lord Burleigh, 3.
Column Handicap.—Bathilde, 1. Cadiz, 2. Jack of Hearts, 3.
Longleate Handicap.—Queen Elizabeth, 1. Pupil, 2. Fravola, 3.
Acton Burnel Stakes.—Spicebox, 1. Jessie, 2. Douche, 3.
Monkmoor Handicap.—Peignoir, 1. Leontes, 2. Confederate, 3.]
Handicap Plate of 50 sovs.—Zelle, 1. Bernice, 2. Tornado, 3.
Nursery Handicap.—Bradamante, 1. Fauconberg, 2. Antoinette, 3.

THURSDAY.

Herbert Handicap.—Tornado, 1. Captain Crow, 2.
Groby Stakes.—Hesper, 1. Fravola, 2.
Altingham Park Stakes.—Neilgherry, 1. Antipodes, 2.
£40 Handicap Plate.—Despair, 1. Juliet, 2.
Sweepstakes.—Virginia, 1.
Handicap Plate.—Dolphin, 1. Gazelle, 2.
Copeland Nursery Handicap.—Blarney, 1. Confederate, 2. Nucleus, 3.
Autumn Steeplechase.—Arbury, 1. Thomastown, 2. Medora, 3.
Longner Hall Steeplechase.—Brian Borohoime, 1. Nereus, 2. Inkerman, 3.

At Madras Sir Charles Trevelyan has offered a prize of 500 rupees for the best essay on the following thesis:—"Compare the influence of Greek learning on the Arabs under the Abbasside Caliphs of Bagdad and the Ommiyade Caliphs of Cordova with the subsequent influence of Arabian learning on the reviving European mind after the dark ages; and from the comparison infer the probable influence which the mature intellect of Europe should exercise in its turn, now that it is once more brought in contact with the Mohammedan mind in India." Professor E. B. Cowell, Moulavi Mohammad Wajih and Abdul Latif Khan Bahadur are the judges.

A scientific expedition, headed by the Rev. H. B. Tristram, recently passed through Malta for Syria, for the purpose of investigating the geology, zoology, and botany of the Holy Land. This region has been little explored by naturalists, to whom it is a sort of *terra incognita*, and promises therefore to afford a very productive and highly interesting field of observation. The *Malta Times* states that the expedition is abundantly furnished with every requisite for the objects it has in view, in the way of scientific instruments, traps for catching the smaller mammals and reptiles, nets for fishing in the Jordan, &c., and includes on its staff a skilled taxidermist from the Zoological Society. A photographer also accompanies the expedition, the results of whose exertions will doubtless afford a valuable adjunct to the labours of the party, which, if the state of the country permit, are intended to extend over a period of six or eight months.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The continued drain of bullion from the Bank of England for export purposes, and the unfavourable accounts from most of the Continental Bourses, have produced considerable inactivity in the market for Home Securities. Sales of stock for money have rather increased, and the quotations have ruled lower—Consols, for Transfer, having declined to 92⅝ ½.

Under the impression, on the part of the mercantile community, that money will become dearer—more especially as the Bank of France has lost about £300,000 in specie since the last return was made up—the demand for accommodation has increased, and, in the open market, the lowest quotations for the best commercial paper are as follow:—

Thirty days' bills	6 per cent.	Four months' bills	6½ per cent.
Sixty days' bills	6 ,,	Six months' bills	6¾ 7 ,,
Three months' bills	6 6¼ ,,		

At the usual meeting of the directors of the Bank of England held on Thursday, no alteration was made in the rates of discount. The week's return shows a decrease in the stock of bullion of only £44,163.

Throughout the Continent money is in active request, with only moderate supplies on offer. The Bank of Russia has declined to draw bills upon England, except for very limited amounts; and it is announced that the Bank of France will shortly commence the issue of notes of £2 each to relieve the present pressure. The rates of discount in the leading cities are as under:—

	Bank rate, per cent.	Open market, per cent.		Bank rate.	Open market.
Paris ..	7	7	Amsterdam ..	4½	4½
Vienna ..	5	5 6	Turin ..	8	8
Berlin ..	5	5	Brussels ..	5	5
Frankfort ..	5	5	Hamburg ..	—	6
			St. Petersburg	6	12

The imports of the precious metals have been on a moderate scale, and the whole of them have been taken for the Continent. About £200,000 has been withdrawn from the Bank for Egypt.

We understand that the contemplated Swedish Loan will not be brought forward for some time.

The Council for India have disposed of £500,000 in bills on the various Presidencies. The minimum prices were unaltered, and the applications within the limits amounted to £1,700,000.

Some of the Continental exchanges have become rather more favourable, and there is still a small profit on the import of gold from New York.

Terms for the amalgamation of the London, St. Katharine's, and the Victoria Dock Companies have been agreed upon.

On Monday, Home and Indian Securities were flat. However, prices were steady:—Consols, for Money, realised 92⅞ ¾; Bank Stock, 236; Reduced and New Three per Cents, 90⅞ ¾; Red Sea Annuities, 21 1-16; India Five per Cents, 108⅞ ¾; Ditto Four per Cents, 100½; the Four per Cent Rupee Paper, 99¾; the Five-and-a-Half per Cent, 115; the Bonds, 7s. prem.; Exchequer Bills, 4s. to 8s. dis. The quotations were somewhat drooping on the following day, with a heavy market:—Consols left off at 92½ ⅜; Ditto, for the 3rd of December, 91½ ⅝ ex div.; Reduced and New Three per Cents, 90¾; Bank Stock, 237; India Stock, 226; Ditto, New, 108⅝ ⅞; Rupee Paper, 104½ to 105½, and 114½ to 115½; India Bonds, par to 10s. prem.; Exchequer Bills, 8s. to 3s. discount. On Wednesday no change of importance took place in prices; but the market generally was somewhat heavy:—Consols closed at 92⅜ ½; Reduced and New Three per Cents, 90½ ⅝; Bank Stock, 237; New Two-and-a-Half per Cents, 76; Long Annuities, 14⅜; India Stock, 223 to 221; Ditto, New, 108⅞; Ditto Four per Cents, 100½; Ditto, Five-and-a-Half per Cent Rupee Paper, 114¾; Exchequer Bills, 3s. to 8s. dis. On Thursday the market was somewhat firmer, and Consols marked 92⅜ to ½ for Money, and 91½ to ⅝ ex div. for Account; the Reduced and New Three per Cents sold at 90⅜ ½; and Exchequer Bills, 8s. to 3s. dis. Bank Stock realised 237; India Stock, 221; and India Five per Cent Stock, 108½ ⅞.

American Securities have been heavy, and drooping in price. Virginia Six per Cents have sold at 36½; Illinois Central Seven per Cents, 73; Ditto, 100 Dollar Shares, all paid, 70½.

The market for Foreign Securities has ruled heavy, and prices exhibit an almost general decline from last week. Brazilian Four-and-a Half per Cents have marked 89½; Buenos Ayres Six per Cents, 92½; Equador, 14; Egyptian, 99½; Ditto, second Issue, 93¾; Greek, 31; Ditto, Coupons, 14¾; Mexican Three per Cents, 39; Peruvian Three per Cents, 1853, 86½; Portuguese Old Three per Cents, 49; Ditto, 1862, 48⅜; Ditto, 1863, 48⅞; Russian Old Five per Cents, 91; Ditto Three per Cents, 54½; Ditto Five per Cents, 1862, 87½ ex div.; Spanish Three per Cents, 53¾; Ditto, Passive, 34⅞; Ditto, Certificates, 13⅞; Turkish Old Six per Cents, 90½; Ditto, 1858, 69¾; Ditto, 1862, 70⅞; Venezuela Six per Cents, 55½ ex div.; and Italian Five per Cents, 71½. Portuguese Scrip has sold at ⅞ to 1 premium; Brazilian, ⅞ dis.; and the Confederate Loan at 60 to 62. Turkish Consolidés have realised 47¼ to ½.

Joint-Stock Bank Shares have been dealt in to a moderate extent. Annexed are the leading quotations:—Alliance, 47½; Anglo-Austrian, 6¾; Australasia, 75¾; Bank of Egypt, 26½; British North American, 47; Chartered of India, Australia, and China, 35⅞; Colonial, 40½; English, Scottish, and Australian Chartered, 23; Imperial, 2 ¼; Imperial Ottoman, 17½; London and Brazilian, 60⅞; London Chartered of Australia, 29; London and County, 51½; London and Northern, 10; London and South African, 26½; London and Westminster, 80; Oriental, 58½; Provincial of Ireland, 92½; Union of Australia, 58; and Union of London, 39½.

A fair average business has been transacted in Colonial Government Securities:—Canada Six per Cents have sold at 103; Ditto Five per Cents, 92¾; Cape Six per Cents, 1890-1, 110⅞; New Brunswick Six per Cents, 104½; New South Wales Five per Cents, 101⅞; and Victoria Six per Cents, 109⅞.

The Miscellaneous Market has been moderately active:—British Indian Tea Company's Shares have sold at 3⅜; Crystal Palace, 38½; Egyptian Commercial and Trading, 4⅜; General Credit and Finance of London, 7½; Great Ship, ¼; Hudson's Bay, 14½; International Financial Society, 10½; Italian Irrigation Six per Cent Bonds, 87; Joint-Stock Discount, 6⅜; Ditto, New, 2¼; London Financial Association, 23½; National Discount, 9¼; Oriental Inland Steam, 2; Peninsular and Oriental Steam, 84; Ditto, New, 51; Royal Mail Steam, 77; Regent's Canal, 26; Berlin Waterworks, 9; East London, 132½; European Gas, 15⅞; Imperial, New, 74; London, 87; Westminster Chartered, 87; Commercial Union Insurance, 8½; Guardian, 51; Imperial Fire, 350; London, 48½; Marine, 96; Ocean Marine, 17⅞; Thames and Mersey Marine, 6½; Pelican 52½; Phœnix, 149 ex div.

The Railway Share Market has been in a depressed state. Prices, generally, have given way, and the supply of stock has increased to some extent. The following are Thursday's official closing quotations:—

Ordinary Shares and Stocks.—Edinburgh and Glasgow, 96; Great Eastern, 49½; Great Western, 63⅜; Lancashire and Yorkshire, 108⅜; London and Brighton, 110; London, Chatham, and Dover, 44⅞; London and North-Western, 103½; London and South-Western, 101; Manchester, Sheffield, and Lincolnshire, 48⅜; Metropolitan, 119⅞; Ditto, New, 6⅞; Midland, 127½; North British, 52; North-Eastern—Berwick, 101⅜; Ditto, Leeds, 58½; Ditto, Stockton and Darlington, 37½; North Staffordshire, 76½; South-Eastern, 93⅞; Victoria Station and Pimlico, 170.

Preference Shares.—Great Western Four per Cent, 90; Ditto, West Midland—Oxford, 121; London and Brighton Seven per Cent Stock, 155½; Midland Four-and-a-Half per Cent, 102½; North-Eastern—Stockton and Darlington, A, Five per Cent, 28⅜.

Lines Leased at Fixed Rentals.—London and Greenwich, 62½; London, Tilbury, and Southend, 100½; Nottingham and Grantham, 96.

British Possessions.—Cape Town and Dock, 102½; East Indian, 107; Ditto, G Extension, 107⅞; Grand Trunk of Canada, 2nd Preference, 65; Ditto, 3rd Preference, 48; Ditto, 4th Preference, 28; Great Indian Peninsular, 108½; Great Southern of India, 104; Scinde, 106½; Ditto, Punjaub, 105½.

Foreign.—Antwerp and Rotterdam, 9; Bahia and San Francisco, 18½; Copenhagen, 2½; Great Luxembourg, 12⅜; Namur and Liege, 8⅞; Sambre and Meuse, 9½; San Paulo, 9; Ditto, 21⅜; South Austrian and Lombardo-Venetian, 20⅞; Turin and Savona, 15.

The return of the Bank of England for the week ending Nov. 18, shows the following results, when compared with the preceding statement:—

A decrease of circulation of ..	£337,069	An increase of other securities of	£424,483
An increase of public deposits of ..	837,511	A decrease of bullion of	41,163
A decrease of other deposits of ..	260,369	An increase of rest of	14,713
A decrease of Govt. Securities of ..	159,033	An increase of reserve of	236,192

The total circulation is £21,776,354. Public deposits amount to £6,451,850, and private deposits to £13,403,412. Securities are £31,407,245, and the stock of bullion is £13,119,602.

THE MARKETS.

Corn Exchange, Nov. 16.—The supply of English wheat on sale here to-day was only moderate, and the general condition of the samples was by no means fine. Selected qualities of both red and white moved off freely, at full quotations; but other kinds met a dull inquiry, at late rates. The show of foreign wheat was extensive, and most descriptions moved off freely, at extreme currencies. Floating cargoes of grain were steady in price. Malting barley was quite as dear as last week. In the value of grinding and distilling sorts no change took place. The malt trade was tolerably healthy, at full prices. There was a good consumptive inquiry for oats, at 6d. per quarter more money. Beans and peas, however, were a dull sale, at the late decline in value. The flour trade was in a healthy state, at very full prices.

Nov. 18.—Wheat, barley, and oats were in steady request, at full prices; but other kinds of produce moved off slowly, at late rates.

English.—Wheat, Essex and Kent, red, new, 40s. to 45s.; ditto, white, 41s. to 47s.; Norfolk and Suffolk, red, 40s. to 45s.; rye, 32s. to 34s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 33s.; malting ditto, 28s. to 38s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 57s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 16s. to 22s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 22s.; ditto, white, 16s. to 23s.; tick beans, 28s. to 30s.; grey peas, 32s. to 34s.; maple, 36s. to 38s.; white, 36s. to 37s.; boilers, 36s. to 38s. per quarter. Town-made flour, 37s. to 40s.; town households, 34s. to 36s.; country marks, 27s. to 30s. per 280 lb.; American, 19s. to 25s. per barrel.; French, 36s. to 39s. per sack.

Arrivals this Week.—English and Scotch: Wheat, 950; barley, 2470; malt, 1780; oats, 60; flour, 610. Irish: Oats, 1600. Foreign: Wheat, 1100; barley, 2410; oats, 3330; flour, 660 sacks.

Seeds.—Canary seed commands very full prices, with a fair demand. Most other seeds move off slowly, at previous currencies. Cakes, both English and foreign, are inactive.

Linseed, English, crushing, 62s. to 66s.; Calcutta, 62s. 6d. to 64s. 6d.; hempseed, 44s. to 48s. per quarter; coriander, 14s. to 16s. per cwt.; brown mustard seed, 10s. to 13s.; white ditto, 10s. to 12s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed, 62s. to 65s. per quarter. Linseed cakes, English, £9 10s. to £10 10s.; ditto, foreign, £9 10s. to £11; rape cakes, £5 to £6 per ton; canary, 42s. to 56s. per quarter; red clover seed, 33s. to 78s.; white ditto, 54s. to 72s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 6½d. to 7d.; of household ditto, 5d. to 6d. per 4lb. loaf.

Imperial Weekly Averages.—Wheat, 39s. 10d.; barley, 34s.; oats, 18s. 9d.; rye, 25s.; beans, 36s. 6d.; peas, 34s. 1d.

The Six Weeks' Averages.—Wheat, 40s. 2d.; barley, 34s. 1d.; oats, 18s. 10d.; rye, 23s. 5d.; beans, 36s. 3d.; peas, 35s. 2d.

English Grain Sold last Week.—Wheat, 112,544; barley, 111,530; oats, 10,453; rye, 55; beans, 3889; peas, 1752 quarters.

Tea.—There is a full average business doing in most kinds, and prices are well supported.

Sugar.—Nearly all raw qualities are in good request, at a further advance in the quotations of from 1s. to 2s. per cwt. Barbadoes has realised 41s. to 46s.; and fine Demerara, 45s. 6d. to 46s. 6d. per cwt. The stock is now 88,738 tons, against 76,799 tons last year. Refined goods move off freely, and common brown lumps are worth 51s. to 51s. 6d. per cwt.

Coffee.—No quotable change has taken place in prices; but the market continues in a sluggish state. Stock, 9746 tons, against 9608 tons in 1862.

Rice.—All kinds are a dull inquiry, at about previous rates. Stock, 43,315 tons, against 66,687 tons.

Provisions.—The butter trade continues firm, and the quotations have an upward tendency. Bacon moves off slowly, yet prices are supported. Most other provisions rule about stationary.

Tallow.—The market is quiet, at about previous rates. P.Y.C., on the spot, is selling at 43s., and for March only, 44s. 9d. per cwt. Stock, 67,223 casks, against 49,606 ditto in 1862. Rough fat, 2s. 2½d. per 8lb.

Oils.—Linseed oil sells slowly, at 40s. 6d. per cwt. on the spot. Rape is quoted at from £40 to £43; olive, £53 to £59; cocoa-nut, £45 to £48; and fine palm, £37 to £37 10s. French turpentine, 70s. per cwt.

Spirits.—Rum is in good request, at 1s. 5d. per gallon for proof East India, and 1s. 6d. for Leewards. Brandy is offering at from 3s. to 11s. 4d.; Hambro' spirit, 1s. 4d. to 1s. 5d.; English ditto, 1s. 8d. to 1s. 10d.; Ditto, rice, 1s. 4d. to 1s. 5d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 5s.; clover, £4 to £5 10s.; and straw, £1 5s. to £1 10s. per load.

Coals.—Best house coals, 19s. to 20s.; seconds, 16s. 9d. to 18s.; Hartley's, 14s. 9d. to 15s. 9d.; and manufacturers', 14s. to 15s. 6d. per ton.

Hops.—Most kinds are in fair request, at full prices—viz., from 100s. to 160s. per cwt.

Wool.—The market is very firm, and the quotations are well supported.

Potatoes.—The supplies are moderate, and the trade is steady, at from 70s. to 100s. per ton.

Metropolitan Cattle Market (Thursday Nov. 19).—The supply of beasts on sale in our market to-day was only moderate, and the quality of the stock was very middling. All breeds moved off slowly, at Monday's currency. The top figure was 5s. per 8 lb. We were rather scantily supplied with sheep; nevertheless, the mutton trade was inactive, at late rates. The best Downs sold at 5s. 8d. per 8 lb. The sheep came to hand in good condition. Although the supply of calves was limited, the veal trade was heavy, and, in some instances, the currencies had a drooping tendency. Pigs and milch cows were very dull, at last week's prices. Per 8lb. to sink the offal:—Coarse and inferior beasts, 3s. 4d. to 3s. 8d.; second quality ditto, 3s. 10d. to 4s. 4d.; prime large oxen, 4s. 6d. to 4s. 10d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 10d. to 4s. 2d.; second quality ditto, 4s. 4d. to 4s. 8d.; prime coarse-woolled sheep, 4s. 10d. to 5s. 4d.; prime Southdown ditto, 5s. 6d. to 5s. 8d.; large coarse calves, 3s. 8d. to 4s. 4d.; prime small ditto, 4s. 6d. to 4s. 8d.; large hogs, 3s. 4d. to 4s.; neat small porkers, 4s. 2d. to 4s. 4d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 19s. to 26s. each. Total supply:—Beasts, 1180; cows, 130; sheep, 4120; calves, 190; pigs, 380. Foreign: Beasts, 550; sheep, 1100; calves, 176.

Newgate and Leadenhall.—Prime beef and mutton are in good request, at full prices. Otherwise, the trade is heavy. Beef, from 2s. 8d. to 4s. 2d.; mutton, 3s. 6d. to 4s. 6d.; veal, 3s. 4d. to 4s. 2d.; and pork, 3s. to 4s. 4d. per 8 lb. by the carcass. Robert Herbert.

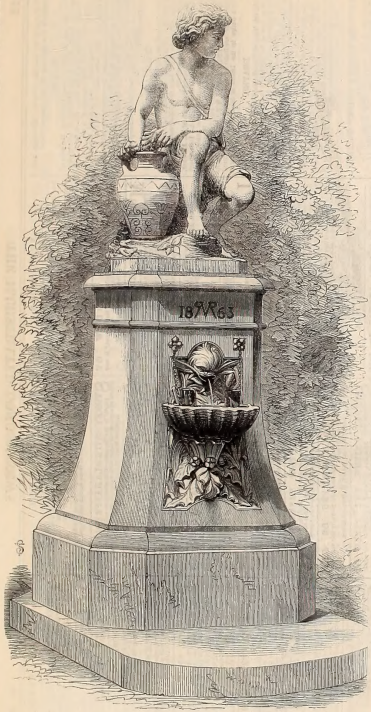
FOUNTAINS AND STATUES IN THE METROPOLITAN PARKS.

The London public owe a debt of gratitude to Mr. Cowper for the great improvements made and in course of being made in our public parks. During the last few years handsome walks amid new flower-gardens and plantations, and a number of ornamental arrangements have been quietly and unostentatiously made in Kensington Gardens, Battersea, St. James's, Victoria, Hyde, and Regent's Parks. In August last we engraved one of the last of these improvements—the beautiful gardens between rows of trees flanking the principal broad walk of Regent's Park, and which are to be followed by corresponding gardens on the opposite side of the walk. These and some other of the recently-formed promenades are laid out with what are called in the language of the gardener's art "dressed" or "geometrical gardens." In the public parks and promenades of Continental cities gardens of this description are almost universal. But though such gardens are common enough in this country surrounding the mansions of country demesnes, they are rarely elegant or in good taste, and hitherto they have been held in little estimation, probably on account of the extreme formality of the clipped trees and the prim, heavy arrangement of the parterres in the many gardens formed after the Dutch taste of the William III. period. In landscape gardening proper we have, however, been eminently successful; so much so, indeed, that the art of imitating picturesque natural scenery has come to be considered abroad distinctively English. A rather out-of-the-way part of the gardens of Versailles, irregular in its formation but charmingly picturesque, has, for example, always borne the name of *Jardin anglais*. On the other hand, from our inferiority in the construction of such gardens as those attached to the palaces of France and the villas of Italy, a dressed or geometrical garden is often said, with us, to be a French or an Italian garden. For the comparison to quite hold good, however, we should have the architectural and sculptural accompaniments of balustraded terraces and temples, statues, vases, &c.



The artistic propriety and beauty of geometrical gardens near houses or streets, notwithstanding some English prejudices against them, is not seriously to be doubted for a moment—has, indeed, long been felt, though only beginning to be fully appreciated. Such ornamental gardens harmonise far better with the formal lines of architecture, particularly those of the Italian or pseudo Classical styles so prevalent among us. They lead the eye, by a gradual and agreeable transition, from the symmetrical and artificial to parts which may bear a nearer resemblance to the wildness of nature. For this reason the lately-formed gardens in Regent's Park are to be commended; though the vases placed at intervals in the beds are open to the charge of clumsiness.

Another geometrical garden has not long been constructed in Hyde Park, nearly opposite Grosvenor Gate. This, though comparatively diminutive, is altogether satisfactory, and replaces a hideous reservoir that formerly occupied the spot. The garden is circular in form: the sloping sides are planted with shrubs and clipped trees, beds of flowers and evergreens, and the upper walk is provided with comfortable seats. Stone steps lead down to the central area, where has just been erected the simple and massive fountain, with its group of a boy and dolphin surmounting the basin, the work of Mr. Alexander Munro, which we have engraved. This is much the largest and most important of the fountains hitherto erected by the Government. We understand that the group—colossal of course—of the boy and dolphin, in Carrara marble, is six feet high. It is placed on a block of red granite chiselled to represent a rock. The basin, of polished Sicilian marble, is nine feet in diameter, and is believed to be the largest basin of a single block of marble in England. This rests on a square plinth of Dove marble, leading up to which are three circular steps in grey granite, the lowest step being eighteen feet in diameter. The whole work is upwards of twelve feet in height. The group represents a sturdy boy, a young Hercules, if you will, wrestling with almost impish delight with a dolphin, and striving to hold the agile creature on the rock on which he stands. His left leg is firmly planted on the fish's back; with his right hand grasping the dorsal fins, he presses its great head down, while with the left arm he hugs the tail high in the air, the fins flapping above his head. The action of this group is very spirited, and its execution as vigorous as anything we have seen by Mr. Munro. The "motive" also is quite original. The water will issue in jets from the nostrils of the dolphin—a more natural source for water than the lion's mouth, which is so often used. It may be interesting to mention that a group of a "Boy and Dolphin" (now in the possession of Sir H. K. Bruce) was sculptured by Raphael. This, with the "Jonah Sitting on a Whale," in the Chigi Chapel of Sta. Maria del Popolo, at Rome, being the only works in sculpture the great painter is known to have executed. Passavant, in his "Life of Raphael," says that the "Boy and Dolphin" illustrates a story taken from Ælian. Amongst other stories of the affection borne by dolphins to the human race Ælian tells us one of a boy of Iasus who was on terms of great friendship with a dolphin, which would carry him out to sea on his back. The boy one day wounded himself mortally with one of the dorsal spines of the fish, and the faithful dolphin carried him to shore and expired by his side. The people of the city erected a monument and struck coins to commemorate the circumstance.

The second drinking-fountain engraved has no special arrangement of its *entourage* to give it effect, nor is its situation very prominent, being on the south side of St. James's Park, near Storey's-gate. It is, however, backed by trees—always a favourable condition for viewing sculpture. And, though unpretending, and by a sculptor—Mr. R. Jackson—not very widely known, we seldom see a contemporary work in marble to which we should feel disposed to give such unmixed praise. The statue represents a boy or youth seated, with a pitcher at his side, and holding an escalop shell as if about to dip into his pitcher and offer some of its contents to one towards whom his head is slightly turned. The gesture is perfectly expressive, the movement full of grace, and nothing could be more simple and appropriate. The forms are those of well-selected nature; and the carving is truthful and conscientious. On the front of the granite pedestal there is a relief of bullrushes and other water plants, and from the mouth of a dolphin's head the water trickles into a conch shell.

NEW DRINKING-FOUNTAIN IN ST. JAMES'S PARK, SCULPTURED BY R. JACKSON.

FOUNTAIN IN HYDE PARK, SCULPTURED BY ALEXANDER MUNRO.—SEE PAGE 512.

*** The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTHS.

On the 12th inst, at Sidcup-place, Footecray, the wife of Colonel J. H. Smyth, C.B., Royal Artillery, of a daughter.

On Friday morning, the 13th inst., the wife of I. B. Torry, Esq., Shrubb's-hill, Sunningdale, of a son.

On July 9, at Christchurch, New Zealand, the wife of James Field, jun., Esq., of a son.

On the 11th inst., at Stoke, Devonport, the wife of the Rev. W. Sykes, Chaplain to the Forces, of a daughter.

On the 8th inst., at the British Legation, Dresden, Lady Augustus Hervey, of a son.

On the 2nd inst., at Rome, the wife of Shakspere Wood, Esq., of a daughter.

MARRIAGES.

On the 17th inst., at the old parish church, Kensington, by the Rev. W. F. Stocken, Lord William Lennox, to Maria Jane, eldest daughter of the Rev. Capel Molyneux, Incumbent of St. Paul's, Onslow-square.

On the 17th inst., at the parish church of St. Alphage, Greenwich, by the Rev. R. R. Cousens, B.A., Incumbent of New Buckenham, Norfolk, brother to the bride, James Chaston, Esq., of Brundish Lodge, near Framlingham, Suffolk, to Julia Atkins Sanders, only surviving daughter of the late Captain William Cousens, H.E.I.C.S., and granddaughter of the late Robert Leech, Esq., Member of Council and Civil Judge in the Island of St. Helena. No cards sent.

DEATHS.

On the 6th inst., at Elm Grove, Peckham, Edward John Eliot, Esq., late of her Majesty's Customs, and formerly of the 27th Regiment of Foot, aged 80.

On Oct. 22, at Westfield Pen, Spanish Town, Jamaica, Helen, the beloved wife of William Robertson Myers, Esq., Secretary to the Executive Committee and Clerk of the Privy Council of that island.

On the 16th inst., at the Rectory, Odiham, the Right Hon. the Dowager Lady Bolton, in her 87th year.

On the 3rd inst., at Radford House, Leamington, Mary, widow of the late Charles Campbell Morris, Esq., of Loddington Hall, Leicestershire, aged 58.

THE POOR CLERGY RELIEF SOCIETY.

COMMITTEE.

The Right Rev. Bishop Chapman, D.D., Eton College.

The Right Rev. Bishop Boone, D.D., Missionary Bishop to China.
The Venerable Archdeacon Bentinck, M.A., Canon of Westminster, Dean's Yard.
The Venerable Archdeacon Robinson, D.D., Canon of Rochester, and Master of the Temple.
The Venerable Archdeacon Ffoulkes, M.A., Rector of Llandyssil.
The Venerable Archdeacon Paul, M.A. (late of Nelson, New Zealand), Pembury, Tunbridge.
The Rev. J. E. Cox, M.A., F.S.A., Vicar of St. Helen's, Bishopsgate.
The Rev. J. M. Clarke, M.A., Incumbent of Christ Church, Forest-hill.
Rev. T. K. Abbott, M.A., Fellow of Trinity College, Dublin.
Rev. T. Blackburne, M.A., Rector of Clothall, Baldock, Herts.
Rev. J. Browell, M.A., Incumbent of St. James's, Muswell-hill.
J. C. Colquhoun, Esq., Chartwell, and 8, Chesham-street.
J. A. Cahusac, Esq., F.S.A., Temple Lodge, 2, St. George's-road, Kilburn.
G. W. Franklyn, Esq., M.P., Level Hill, Windsor.
Rev. J. Ford, M.A., Prebendary of Exeter, Torquay.
Colonel Jervis, Surbiton, Kingston-upon-Thames, S.W.
R. P. Long, Esq., M.P., Dolforgan, Newtown.
Rev. H. P. Measor, M.A., Vicar of Kingston-upon-Thames, S.W.
Rev. G. Thornton Mostyn, M.A., Incumbent of St. John's, Willesden.
Rev. R. Parrott, M.A., Amwell Vicarage, Ware.
Rev. J. Stewart, M.A., The Elms, Norbiton, S.W.
(With power to add to their number.)

CHAIRMAN OF COMMITTEE.
The Rev. J. E. Cox, M.A., F.S.A.

DEPUTY CHAIRMAN OF COMMITTEE.
The Rev. J. M. Clarke, M.A.

HONORARY SECRETARIES.
The Rev. H. P. Measor, M.A.
The Rev. G. Thornton Mostyn, M.A.

TREASURER.
J. A. Cahusac, Esq., F.S.A.

PROFESSIONAL AUDITORS.
Messrs. Alison and Waddell, Basinghall-street.

BANKERS.
London and Westminster, St. James's-square.

SECRETARY.
Mr. R. T. Piggott.

The Committee of the Poor Clergy Relief Society invite attention to its objects. Established in the year 1856, it has been the means of dispensing upwards of £6000 for the relief of about 700 applicants, consisting of clergymen, their widows, and orphans. The cases which have been brought under their notice have undergone full investigation, the result of which has been to convince the Committee of the great value of such an agency as their Society affords.

Deeply thankful for the kind sympathy their work has already elicited, the Committee feel that the Society needs only to be more extensively known to obtain increased support. For such support they would earnestly appeal both to the clergy and laity. The former can afford them much valuable aid by introducing the Society to the notice of their parishioners or by allowing its claims to be advocated from their pulpits.

Donations and subscriptions are thankfully received daily, from Eleven to Four, at the Office, 32, Southampton-street, Strand, W.C.; or by J. A. Cahusac, Esq., to whom Post Office orders and cheques are made payable.

On behalf of the Committee,
JOHN EDMUND COX, M.A., F.S.A., Chairman.
J. A. CAHUSAC, Esq., F.S.A., Treasurer.

THE AUSTRALIAN MORTGAGE, LAND, and FINANCE COMPANY (Limited).

Capital, One Million.
First Issue £500,000, in 20,000 Shares of £25 each.
Deposit on application £1 per Share, and a further payment of £1 on allotment.

DIRECTORS.

Sir Charles Nicholson, Bart., 19, Portland-place, late Speaker of the Legislative Council of New South Wales, and President of the Legislative Council of Queensland.
W. A. Rose, Esq., Alderman, M.P.

MR. CHARLES LEVER'S NEW SERIAL,
In Monthly Parts, 1s.,
LUTTRELL OF ARRAN.
By CHARLES LEVER.
(No. 1, Dec. 1.)
CHAPMAN and HALL, 193, Piccadilly.

Will be ready early in December,

YOUNG ENGLAND. Two volumes in one, in handsome cloth, price 5s.; in bevelled boards, full gilt, 6s. 6d.

Suitable for Libraries, Family Reading, Indoors Companion, New-Year's and Birthday presents, and presents at any time for intelligent youth. Present your young friends with this book, and you will have their thanks. It is full of pictures—pictures of natural history, portraits, &c. It is a book to delight young people, and is sure to become their inseparable companion. Give them this book and they will keep good company; it is made, like Handel's music, to do them good.

"We rise in the scale when we come to 'Young England.'"—Blackwood's Magazine, Article "Cheap Literature."
Sold Monthly, price Twopence.
London: W. TWEEDIE, 337, Strand.

The Public are invited to call and inspect, although they do not advertise them. Their Premises are NOT in the Strand, but in the City, and they are the largest Manufacturers in London of Lamps, Chandeliers, &c. They pay no rent, and can therefore sell to the public at the lowest market price, delivered free in London or the suburbs.—Deane and Co., The Monument, London Bridge. Established A.D. 1700.

FURNISH YOUR HOUSE with the best obtainable at DEANE'S. Illustrated Furnishing Catalogue post free. Established A.D. 1700. New Illustrated Catalogue and Priced Furnishing List gratis and post-free.
DEANE and Co., The Monument, London Bridge.

MARRIAGE NOT A LA MODE.—See "Temple Bar" for November, page 316. Extract:—"There is a firm of Messrs. HOWARD and SONS, 25 and 27, GARRICK-STREET, which is the HEADQUARTERS of HIGH-CLASS FURNITURE. Messrs. Howard are one of the best stocks in London, and some of their specialities are to be seen nowhere else. Let me turn in their 'spacious' direction, and 'furnish' their list. Not to be excessively minute, the 'reasonableness' of the prices is remarkable. Messrs. Howard are the manufacturers as well as the retailers of cleaner, or rather cheaper, ware, which costs twenty-nine pounds. A 'complete set of furniture for a newly-married couple for twenty-nine pounds.' Messrs. Howard guarantee the rest; and believe me when I tell you that you shall have no reason to regret your visit to 25 and 27, Garrick-street."—HOWARD and SONS, 25 and 27, GARRICK-STREET, W.C. (Limited), 34 and 35, Baker-street, W.
Complete Illustrated Catalogues free on application.

DR. DE JONGH'S (Knight of the Order of Leopold of Belgium) LIGHT-BROWN COD-LIVER OIL, prescribed by the most eminent Medical Men throughout the world, as the purest, most efficacious, and most effectual remedy for CONSUMPTION, CHRONIC COUGHS, ASTHMA, DIGESTION, RHEUMATISM, GOUT, GENERAL DEBILITY, and all DISEASES OF THE SKIN, SCROFULA, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS.
Is incomparably superior to every other remedy.
SIR C. MEDICAL OPINION.
SIR HENRY MARSH, Bart., M.D.,
"I consider Dr. de Jongh's Oil the finest I have ever used in my practice."
Physician Extraordinary to the Queen in Ireland.
Dr. de Jongh's Light-brown Cod-liver Oil to be a very pure Oil, not tainted by rancour, and a therapeutic agent of great value.
DR. GRANVILLE, F.R.S.,
Author of "The Spas of Germany."
"Dr. Granville has found that Dr. de Jongh's Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not nauseate the stomach and digestion too often commences on the administration of the Pale Oil."
EDWIN CLAYTON, Esq., F.R.C.S.,
President of the Medical Society of London, &c. &c.
"I have frequently tested Dr. de Jongh's Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of Cod-liver Oil, and have accordingly had a view to use their relative superiority."
DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial Capsule Bottles, at 9d., 1s 6d., 2s. 6d., 4s. 9d., and 9s. each, labelled with his Signature and Stamp, without which none can possibly be genuine, by respectable Chemists and Druggists throughout the World.

SECONDHAND PIANOFORTES. CHAPPELL and CO., have a large Stock of SECONDHAND PIANOFORTES for SALE, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, New Instruments of every description. Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to Small Rooms, Yachts, Boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action and all the latest improvements.
Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood or Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to many of the tuners. In elegant rosewood case, with full fret, similar in every respect to other instruments at 50 guineas, price 35 guineas; in walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut 60 guineas. This instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich; and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase) at the new Showrooms of CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 60 guineas; other varieties at 25 and 35 guineas. Illustrated Catalogues of Pianofortes and Harmoniums upon application to CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM, by ALEXANDRE, with five octaves, two footboards, and in oak case. These instruments are lower in price and superior to all other cheap Harmoniums. Descriptive lists on application to CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 13 stops 4 rows of vibrators, and Venetian swell, worked by the heel of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in walnut, French polished:—"We have had occasion to examine a new description of Pianoforte manufactured by Boosey and Sons, which combines quality and cheapness in a degree which has not previously been ever attempted. When heard it creates such surprise as would be caused by a child 'discoursing most eloquent' music with the voice of a full-grown man. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room; and the whole mechanism of the instrument seems to be firm and durable. No piano at so small a price has ever before been presented to the public."—Vide ILLUSTRATED LONDON NEWS, Feb. 28, 1863. This Piano is well adapted for the cabin of a ship or an extreme climate.—Boosey and Sons, 24, Holles-street, London.

PRATTEN'S SEVEN-GUINEA PERFECTED CYLINDER FLUTE, old system of Fingering. This Instrument, the result of many years' experiments, possesses all the reputed advantages of the Cylinder Flute on Boehm's and other principles, without changing the familiar Fingering of the old 8-keyed Flute, in addition to which, through Mr. Pratten's ingenious improvements in its construction, the manufacturers are enabled to produce this instrument at one third of the expense of any cylinder flute hitherto sold.
An Illustrated Prospectus may be had on application to the manufacturers, BOOSEY and SONS, 24, Holles-street, London, W.

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street (the largest in Europe). The most varied selection of Pianofortes are to be found in this Gallery.
The quality of every instrument may be relied upon as at least equal to representation. Pianofortes of the very inferior class are carefully excluded from the stock. Every facility is afforded to exchange, without loss to the buyer, any time within six months, should an instrument of a higher class, or by a different maker, be thought desirable.
Pianofortes by every maker of eminence will be found in the Gallery.

CRAMER'S NEW 7-OCTAVE SEMI- OBLIQUE PIANOFORTES. Price 45 guineas in Rosewood, and 50 in Walnut.
In introducing this Instrument prominently to the notice of the public, Cramer and Co. may be permitted to observe that it is alike remarkable as regards power and quality of tone, firmness and elasticity of touch, durability of tuning, and the capacity to develop its resources. The tone may be forced by the powerful finger of the artist, or drawn out by the less-accustomed hand of the amateur; in the one case there is no harshness, and in the other its charmingly vocal qualities are produced with little effort.
The action, or mechanism, is of the very best description, being somewhat similar in its principle of construction to that of the semi-grand. The stringing is complete, there being three wires to each note, like the full grand.
Cramer and Co. guarantee these Instruments for any reasonable length of time, and forward them to all parts of the country without risk to the purchaser and at a very trifling cost.
Pianoforte Gallery (the largest in Europe), 207 and 209, Regent-street.

CRAMER'S ENGLISH PIANETTE, 22 guineas.—Cramer and Co. manufacture this capital small instrument. It has all the requisites of the best Pianoforte—check action, solid touch, agreeable tone. The case is of polished ash or pine. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose in the key and worn in the hammer. In rosewood, 25 guineas; in walnut, 26 guineas.
Purchasers are particularly requested to observe that this instrument has not the common or single action, but the double or check action; and that Cramer and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

PIANOFORTES by Broadwood, Collard, or Erard, for SALE or HIRE—At CRAMER'S PIANOFORTE GALLERY (the largest in Europe), 207 and 209, Regent-street.

CRAMERS INDIAN PIANOFORTE. CRAMER and CO. manufacture for India a superior COTTAGE PIANOFORTE, in solid Mahogany, with metallic bracings and all other appliances necessary to resist the effect of extreme climates. Nothing has been left solely to the glueing. The mechanism of the Instrument as well as the Case has been secured throughout by screws. Unusual skill and attention have therefore been bestowed upon the manufacture, and they have obtained the highest commendations for their excellent quality of tone and durability.
Cramer and Co. deliver these Instruments f.o.b., packed in cases lined with zinc, at any home port, for 50 guineas. Size:—Height, 3 feet 11½ inches; width, 4 feet 4½ inches; depth, 2 feet 1¼ inch. Pianoforte Gallery, 207 and 209, Regent-street, London.

CRAMER'S ARTIST'S CONCERTINA, selected by Richard Blagrove. In purity of tone, delicacy of touch, noiseless rapidity of articulation, and general perfection of mechanism these instruments are altogether unrivalled. The vibrators are of tempered steel, and retain their perfect tuning in any climate. Price 12 guineas, including case. Cramer and Co., 201, Regent-street.

DEBAINE'S HARMONIUMS, from Six Guineas. Detailed Lists forwarded on application. CRAMER, WOOD, and CO. (Agents), 201, Regent-street.

ENGLISH CONCERTINAS, by LACHENAL, Full Compass, with all the latest Improvements, warranted for Hot Climates, and to keep well in Tune, from Two guineas, with Case, Lock and Key, &c. HOPWOOD and CREW, 42, New Bond-street.

MUSICAL BOX DÉPOT, 48, Cheapside, London.—Messrs. KEITH, PROWSE, and CO., importers, have just received from Messrs. Nicole Frères another assortment of their newest boxes, some of which are with flute, bell, and drum accompaniments, the expressive effects of which upon the ear are exceedingly novel and beautiful. The ordinary boxes (4 to 12 airs) at one guinea each air. Four of the finest overtures, inclosed in an inlaid case, with glass cover and patent winding-key, £17 6s. 6d.

RACES AT CONSTANTINOPLE, IN THE VALLEY OF DJENDEREH-BOGHAZ, NEAR THE SWEET WATERS OF EUROPE.—SEE NEXT PAGE.

OPENING MEET OF THE QUORN HOUNDS AT KIRBY GATE, LEICESTERSHIRE.—SEE NEXT PAGE.

RACES AT CONSTANTINOPLE

THESE races, of which we give an Engraving, came off on the 23rd and 24th ult. in the valley of Heyderch-Boghaz, near the Sweet Waters of Europe. Long before the hour appointed for the first start crowds of equipages bursting their passengers close to the bridge adjoining the new Imperial kiosk, whence a fifteen minutes' walk conducted the lively and polyglot throng to the scene of the day's sport—close by the village of Kiathaneh. Trains of carriages of every variety of build, from that of the guiant old bullock-arabs of other days to the gaudy Viennese broughams or chariots of the present, rolled on towards the same destination; one stream from Stamboul, round by Eyoub and the western bank of the Golden Horn, the other from the other side of the long height leading from Ferikeui and Pera. Mingling with these pranced, cantered, or galloped horsemen, and, on the Pera side, a few horse-women in every sort of mount, from modern English side-saddle to Arab pattiles and English "bloods;" whilst troops of pedestrians, of every race and tongue between Galway in the East, trudged lovally on through the dust time plentifully raised on both sides of the classical stream.

The valley chosen for the day's sport is a beautiful amphitheatre, hill-locked on every side but that which opens on the village to the west. Here, on the southern end of the enclosure, the inclosing hills of high ground suddenly rises first to a short plateau, on which stands an old dismantled windmill, and then into a long, sloping ridge of a much higher elevation, that winds round the valley back to the very bank of the one dry river-bed. The course, as marked on this line of as flat as a bowling-green, and without the expenditure of a shilling furnished a racecourse which no amount of artificial labour could have surpassed or improved. It is but simple justice to the committee to say that, excellent as was their ground, their use of it was not less so. Though little more than twenty hours were available for the whole of the preparations, an elegant kiosk for the reception of the Sultan—designed by Mr. Hutchinson and built by Messrs. Burnaus and Duff; a smaller pavilion for the Imperial Princes, and a commodious and strongly built "Grand Stand," had all been constructed in that time, entirely of the fine building-pine of the course, and the pitching of a small encampment of tents for the accommodation of the attendants, naval and military, foreigners of rank, and the refreshment purveyors. The Imperial kiosk, seen from a distance, resembled a theatre chalet; it was a single room, rising out of the centre of the roof, supported a slim flagstaff, from which waved a span-new Imperial standard, the silken folds of which flapped sluggishly in the light autumn breeze. The scene that met his Majesty's eye from this bijou pavilion was animated and picturesque. In front, across the narrow space which was left by the gaudy Turkish carriages, emblazoned with all the colours in the rainbow, and filled with yashmacked women, the long equipages of gorgeous as their locomotive cages, was drawn up close to the ropes. Slightly behind these were pitched the committee's marquee and the weighing-tent, and beyond these again—added to the picturesque—were ranged the scores of multiform vehicles which represented the most available locomotion between the city of Pera and the Bosphorous villages could muster. Away, beyond all, at the southern end of the valley, these vehicles were massed against the whole slope of the curving hill-line as thick as locusts—some on horseback, a few in the old bullock arabas, but the large majority squatted in front of the carriages, from the right of the course up to the very brow of the plateau. Of these, again, the fair sex formed a large minority; and the white yashmacks and light-coloured feredjees of many a gigantic-smoking and sweetmeat-eating group added largely to the vividness of the picture. The "Grand Stand," adjoining the Imperial kiosk, was well but not inconveniently filled with Porte functionaries, members of the diplomatic and consular bodies, and the invited spectators. Here, as in every other part, the ropes were sparsely Stambouliote.

Punctual to the minute fixed for the first start, a flourish of trumpets announced the approach of his Majesty, who drove up in an open carriage attended by a brilliant escort of his new "noble guard." As he alighted, the Imperial band struck up the "Sultan Abdul Aziz," which was followed by a round of native and operatic airs by another military band in front of the committee's tent.

The first run was for the Ismal Stakes, which was won by Mr. W. F. Pearson's Black Prince, by the Military Pasha's Ali Baba, Velly Bey's Bunghier; the Sultan's Cup, the great contest of the day, by Sefer Pasha's Phœnix; the Ladies Cup, by Mr. F. Gunracaino's Jennuet; and the day's proceedings with a round of the Hurdle race, in which Emin Bey's Chapkin came in first.

His Majesty the Sultan was present also on the second day, when the following running took place:—The Rouneleun Stakes, won by Mehemet Aga's Fundak; the Selling Stakes, by Mr. F. Gunracaino's Jennuet; the Ministers' Plate, by Sefer Pacha's Phœnix; the Bahean Stakes, by Rifart Bey's Bosina; the Committee's Cup, by M. Van Lennep's Mazeppa; the Consolation Sweepstakes, by Mr. Hayward's Ottis; and the Suvedji Scurry, by Mehemet Aga's Fundak. With this last run the Constantinople season of races closed.

The above account is abridged from a full description of the races in the *Levant Herald* and our view of the racecourse is from a sketch by Mr. Hingston Harvey, of Constantinople. We have also received a photograph of the racecourse from M. Devein, photographer, of Constantinople.

FIRST MEET OF THE QUORN AT KING GATE.

LEICESTERSHIRE.

AT the commencement of the hunting season we take the opportunity of presenting our readers with an illustration of the first meet for the season of the premier pack of foxhounds in England. In no other county is foxhunting carried on to the extent it is in Leicestershire, and Melton Mowbray is the grand nucleus where its most distinguished votaries are to be found for the greater part of the year.

Kirby Gate, about two miles from Melton, has from time immemorial been the first meet of "The Quorn;" and on the appointed morning all the roads leading to the rendezvous are full of hacks, from the handsome carriage-and-four to the huckster's cart. The quaint old house, standing just inside the park, has an air of comfort and repose, and belongs, with the park and other land in the vicinity, to Mr. Burdett family, and was formerly used as a hunting-seat by the late Sir Francis Burdett, who is said to have had the largest stud of any peer, one of his reform letters, pervious to the great Manchester meeting, in 1819, being actually called the "Peterloo Address." The house which letter Sir Francis was imprisoned for three months in the King's Bench.

The Quorn hounds were first brought into notoriety, about a hundred years ago, by Hugo Meynell, Esq., a distinguished sportsman, and since that time various sportsmen have held the mastership, among whom Thomas Assheton Smith, Sir Richard Sutton, and Earl Stanhope have been the chief. The last-named nobleman vacated the mastership at the end of last season, having provided the hounds and horsed them with the largest stud ever known at Quorn for several years at his own expense; as, indeed, did also the late Sir Richard Sutton, who was as fine a sportsman as ever crossed a saddle. The hounds are now under the management of S. W. Clowes, Esq., a son-in-law of Sir Richard, and a keen sportsman. The turn-out on the first Monday in the month at Kirby Gate was all that could be desired, and there is every reason to believe that Mr. Clowes will fully sustain the well-earned reputation of the Quorn hunt.

Old sportsman may not perhaps at the first glance at the Engraving recognise the locality, as the old tollhouse, which was a very plain building, has been pulled down, and the "Gothic" one used and replaced by the present structure, which is more in keeping with the style of the old house.

The text is published in the *Gazette* of a convention between the Governments of Great Britain and of Tunis relative to the holding of real property by British subjects in Tunis. The documents was signed, in the English and Arabic languages, at Tunis, on the 10th ult.

A letter from Quebec (says *Galignani*) states that the statue of Victory sent out by Prince Napoleon to be erected on the heights of Abraham in memory of the French and English soldiers who fell in the battle of April 28, 1760, has just been inaugurated on the spot on which the battle took place. At the hour which attended the inauguration the crowd shouted the cries of "Vive l'Empereur Napoleon!" and "Vive la Reine Victoria!"

ARRIVAL OF KING GEORGE AT ATHENS.

(From our own Correspondent.)

THE prompt departure of King George from Paris almost took me by surprise, although I was fully prepared for a fair start, in accordance with the strict injunctions received from the administration of the ILLUSTRATED LONDON NEWS. No sooner did I become acquainted with his Majesty's intended departure for Toulon than I made straight for the Paris and Lyons station, with arms and baggage, accompanied by our artist Mariani, whose drawings in this and future Numbers will present to the eyes of our readers the arrival of the youthful King among his impatient subjects. Our route was from Paris to Marseilles, thence to the Piræus in one of the steamers belonging to the Messageries Impériales. We arrived at Lyons in a few hours at Meaulas, where we should be sure to overtake the slowergoing Royal squadron, but were prevented by the vagaries of our wishes.

Oct. 23. The journey from Paris to Marseilles was quick but unpleasant, owing to the crowded state of the carriages. However, on reaching Marseilles we soon forgot our fatigue, for, notwithstanding the late autumn, there was a shining brightness in the "Queen of the port of the Mediterranean," and everybody was still dressed in summer costume.

Oct. 24. A telegraphic message received at our hotel (the Hotel des Empereurs on the Canebière) informed us that the Royal party had left Toulon at two o'clock p.m. in his frigate Helas (Captain Sactori), accompanied by the English steamer Revenge (Vice-Admiral Rivertz) and the French ship Algérine (Vice-Admiral d'Harbingham), and therefore at once proceeded on board the Indus, a fast vessel belonging to the Messageries Impériales.

Oct. 25. About one o'clock this day we sighted Bouffacio, and steamed through the narrow passage between Corsica and Sardinia, and in all appearance, but of golden and arrow colours extremely beautiful in their effects. At three we quitted the strait between Caprera and Cape Per (Sardinia), and soon found ourselves in the midst of the large war-steamers that had passed through the strait in a more leisurely manner than ourselves. These steamers consisted chiefly of the squadron of King George, and our captain at once ordered a salute to be fired, and where the Indus presented on her way, it was less than four knots of the Royal squadron.

Oct. 26. At nine o'clock this morning we came in sight of the island of Ulea or Andros, in a northerly direction; and subsequently, in succession, of Alicudi, Folicudi, Salina, and Stromboli, which we passed at three o'clock. Here the Royal squadron began to be dressed with a cap of clouds in the form of plumes—no doubt by way of souvenir of the Isle of Elba, which we passed at four o'clock—and Lipari, the land of pumice-stone: and quite so as the man on the look-out signalled the light of Cape Faro, the ancient Charybdis (of which a vivid description is given in Homer's "Odyssey" and ILLUSTRATED LONDON NEWS). Night being come, nothing more was seen after this light, which we left on the left, and which is the entrance to the port of Messina. We entered the port about nine o'clock, and slept the hours of darkness under the shade of Etna.

Oct. 27. At seven o'clock this morning the King's squadron arrived in front of the port. There was, of course, great excitement amongst the Messinese, and on a more or less extensive scale under similar circumstances. About half-past eight the authorities of Messina proceeded in a gaily-ornamented steamer to congratulate the King. The steamer was covered with National Guards, so well dressed as to encourage the belief that they were soldiers of the regular army. Whilst, at the same time an outbreak of trombones and ophicleides struggled for a hearing above the sound of the cannon from the fortress. The English vessels now entered the port, and the first impression of a fresh nautical demonstration; at a short interval followed his Majesty's barge, with the King and Queen standing in the centre, and a host of cannon from the forts and from the decks of the Revenge, the Indus having left during the previous night, made answer to the salute. After a promenade through the town, the Royal party went on board the Helka, to continue his voyage to the land of Pericles without further delay, and the Indus was ordered to get under weigh at Athens before his Majesty, and to be prepared to fulfil our pictorial mission satisfactorily. At 11 P.M. we left Messina, and soon passed along the Calabrian coast, dotted with villages clustered on rocks that made us wonder how they could be reached. Shortly after having sighted Cape Spartivento the day declined, and was succeeded by a beautiful clear night.

Oct. 28. As the day advanced we distinguished an blue line ahead, indicating the mountains of Arcadia. In another hour we were in the Archipelago, and at the entrance of Navarino Bay. As we left it to lighteanent, the former home of civilisation and refinement! The coasts appear arid, without wood, and almost bald; but they have preserved their beautiful lines and magnificent outlines. Here and there sails glided slowly by as nearer to the land, with birds playing about their masts. Soon after midday Cerigo was sighted, and shortly after that we could only just distinguish Cape Matapan, the southernmost point of the Morea (Peloponnesus).

Oct. 29. At sunrise this morning we entered the Gulf of Egina, or of Athens. Several Greek steamers came to meet us to inquire whether the King was on board, and their salutes could scarcely be recognised as mere salutes, but as the commencement of the feu de joie that was destined to be continued the next day. Soon after we passed the island of Egina, and with our telescopes we could distinguish Athens and its glorious Acropolis. Then we passed the entrance of Port Piræus, and saw a low rock which stretches out into the Gulf; but our entrance into it was not long retarded, and immediately the vessel was surrounded by a crowd of small boats filled with fine carpeted bows. The boats soon made on board the Indus and carried off our baggage, thus depriving us of our liberty for some hours, and we landed in the midst of a crowd. Their appearance was not altogether reassuring, and under the circumstances we were not a little surprised at having to pay an octroi dues the ordinary charge for landing. All around the Piræus was decorated with flags and garlands for the reception of the young Sovereign, and I must congratulate the city on the effect it produced upon the heavy Greek, with a perfect arsenal in his belt, offered to drive us to an hotel in Athens. The distance is about seven miles, and accordingly we accepted, in spite of the broken-down state of his conveyance, drawn by two wretched horses. Having taken our seats with due respect for the fragile appearance of our vehicle, we were immediately started off at an intimation gallop on a route so dusty that we resembled a pair of millers. Fortunately we had not far to go, and we soon arrived before reaching Athens, where other machines awaited us. All the roads were crowded with people, and the Hotel de Grande Bretagne, or Grand Hotel at Paris in its busiest times—30f., 40f., 50f. a day per head were asked for a simple bedroom and two ordinary meals; and the latter were procured at the hotel kept by Madame Hill, who determined on taking up our quarters at the Hotel d'Orient, and, on seeing the Indus arrive in the harbour, we went on board ourselves installed. We were a long time in relieving ourselves of the classic dust which had settled upon our persons and clothes during our drive, as at length succeeded in restoring the outer and the inner man to a condition of respectability, when, whereupon we paid a hasty visit, armed with our credentials, to the English Vice-Consul, Mr. Wagner, from whom we received a most cordial welcome and valuable information as to the preparations for the approaching festivities that are to be held in Athens on the morrow.

Oct. 30. (Friday morning) morning the King arrived in the Piræus in good health, and *without having suffered from sea-sickness*; this is regarded as a good omen. The late King Otho was notoriously the greatest sufferer from the sea of any person that ever crossed it, and it would appear that his subjects never entirely pardoned him this unpleasant weakness. The Piræus was in the greatest state of motion, and the mixed population from the islands and from the environs of the capital presented a very unique and picturesque joyful appearance. Remembering the day (Friday the inauspicious), I observed to a splendidly-dressed Greek whom I heard speaking French, that the King would, perhaps, defer his entry into Athens till Saturday, Friday being generally considered an unlucky day. He replied, with some simplicity, "It may be a bad day for the King, but for us it is without importance; in Greece, Tuesday is the unlucky day of the week, and on that day we would not have allowed his Majesty to make his entry." The city was now extremely gay, and the weather glorious; bands of music, playing the Marseillaise, the English National Anthem, and other patriotic airs, paraded the streets, which were crowded with groups in varied attire. Although a portion of the upper classes have adopted the Parisian costume, the majority of the people still wear the national dress of Greece, which is elegant and graceful, and often covered with gold and silver embroidery. The balconies of the houses were for the most part occupied by Grecian ladies, forming a splendid exhibition of those remarkable types of Oriental beauty so highly appreciated by artists of all times, by whom the Greek women are justly famous indeed upon as the nearest approach to perfection in the form divine. It was known that the King had landed in the Piræus at two o'clock, and that an address to be read to him by the municipal authorities would occupy a short time. Notwithstanding, impatience was depicted upon every countenance. Towards mid-day the cannon placed upon the Hill of the Nymphs signalled the King's approach, and in a few minutes immense clamour and a whirlwind of dust announced the advent of the Royal cortège. Immediately afterwards, several *Pallicares*, or national representatives, gaily-dressed, followed by a detachment of lancers and the carriage of King George the First, Queen Olga, and Prince Nicholas. His Majesty wore the uniform of a Colonel of the National Guard, with the sash of Greece. On his left was the President of the Assembly, and opposite his Majesty the President of the Provisional Government; the fourth personage was a Danish officer in attendance. A crowd of Greek horsemen in splendid costumes escorted the Royal carriage. Immediately after the municipal arch erected at the entrance to the city of Athens, while the Mayor read an address of welcome to the new Sovereign of the Hellenes. (This scene forms the subject of our Illustration at page 516.) It would be impossible to give an idea of the delirious outbreak of enthusiasm, when, upon the termination of the address, the Mayor presented to the King the keys of the Acropolis as a sign of respect and fidelity. In reply his Majesty uttered a few affectionate words, which were followed by a most melodious chorus sung under the triumphal arch by a band of young girls dressed in white, after which the cortège entered the classic city amidst the liveliest demonstrations of universal joy. The line of procession was kept by the National Guard, and in certain parts by simple Greek citizens without arms. Altogether the events of the day passed off most propitiously; the religious ceremony was very imposing; and the universal joyful feeling attained its climax at the spot represented in our Engraving, the site of which—with the Acropolis in the distance, the Temple of Theseus on the right, and, above, the glorious Acropolis in all its majesty, with the Parthenon towering in the centre—in the sun's radiance—was well calculated to inspire a feeling of pride for the past, and to give birth to hopes for the future of Greece under the mild government of the young and virtuous Sovereign who has undertaken the task of regenerating a land over which antiquity has thrown a halo of imperishable interest.

GREEK PEASANTS ON THEIR WAY TO WELCOME THE KING.

IN all great political changes the favourable opinion of the peasantry is a matter of great importance to the "powers that be;" and it must therefore have been a most gratifying consolation to the newly-elected King of the Hellenes to have met on his passage through the Grecian capital so many representatives of the different parts of his newly-gained dominions. It may be that some were animated by the expectation that the new reign would be characterised by brighter material future; but many of them have undoubtedly higher aspirations; and the "men of the Isles," the peasants from the interior, where "Nature still is fair," are, as Byron engaged, like the most patriotic Athenians, to

Dream withal the time is nigh,
That gives them back their fathers' heritage.

However this may be, the pictorial element of the late Royal reception at Athens does not appear to have been overlooked, as witnessed a portion of their "fathers heritage" in the way of costume. In the Ionian Islands the ancient Greek costume is rapidly disappearing, but the turban has been abandoned for the fez, usually fastened by a rolled handkerchief or coloured cotton cap, a jacket, a waistband, and Turkish shoes complete the dress of the "man of the Isles." On the Greek continent the *fustanella*, or short white petticoat, fastened round the waist by a silk embroidered girdle, is universal. The waistcoat and the jacket vary indefinitely in colour and ornament, according to the taste or fortune of each individual. The latter is usually of rich velvet, sometimes open at the sleeves, and richly embroidered with gold and silver lace, often abundantly decorated. Some of their belts are furnished with pistol-pouches, and even small guns. The Greeks thus armed, and thus dressed en *militaire*, have taken the field in numbers, or heroes, "the living" to welcome their son to the National Guard, but form a separate corps.

Our Engraving represents a group of these peasants on their way from the march towards Athens by a mountainous road to welcome their new Sovereign. As previously necessarily hurriedly sketched, it is a faithful delineation of several of the groups collected by our artist in the vicinity of Athens on the day preceding the King's arrival. The procession comprises a large body of rich peasants, placed in the rear a priest. When the Greek peasants travel they never stop at an inn, but make short halts at the houses of their friends or acquaintances. In order to render the duties of hospitality less onerous, they carry with them such a collection of useful articles as would lead to the supposition of a permanent absence. Their horses are laden with bedding, clothing, meat, wine, fruits—in fine, a little of everything; the whole equipage with ornaments which may serve for purchases in case of need. The husband surmounts the whole, or the wife and children take his place, when circumstances require.

The ordinary salutation of the country people consists in a movement of the head towards the heart; and many of the men wear a cross or a heart on their fez.

THE OVERFLOW OF THE NILE.

(From a Correspondent.)

CAIRO, Oct. 25.

Some exaggerated reports of the damage done by the overflow of the Nile having gone the round of the European papers, a few words as to the actual state of affairs may not be uninteresting.

It will be remembered that, in 1861, the river broke through its banks and ravaged a very large tract of land, sweeping away in its course many villages, and destroying the railway in two places—one on the Cairo side of the Wasta Canal, Lamlum division, leaves a warning could not be disregarded, and the Government enforced the annual repair of the banks of the river and the canals, which has caused the strengthening of those which appeared exposed to extraordinary pressure.

Notwithstanding these precautions, the dykes have again failed to keep the river within bounds. Between the 20th and 25th of last month the river suddenly rose to an unusual height, causing much alarm; but satisfactory accounts being received from all quarters that the banks were in good condition, and that the dykes themselves still remained, people congratulated themselves that the danger was passed. On or about the 28th of last month, however, the water began to rise with a village half way between Kafr-el-Zayat, the said railway station, and Cairo, and is situated on the weakest portion of a bend of the river. Fortyeight hours after the 28th the water made its appearance in the neighbourhood of the railway between Kafr-el-Zayat and Tantah. The railway engineer of the Delta Railway Company, who happened to be upon the spot with a host of men, and, although doubting in his own mind the possibility of saving the railway, did his best to save as much as possible of it. The bridges and culverts on the line being found totally inadequate to carry off the enormous column of water of twenty feet miles in breadth, which was then running at the rate of nine miles an hour. An attempt was made to divert the current, but it did not succeed. The embankment fell in, carrying with it the top of the existing one, of from four to five feet in height, but the water rose so rapidly as the earth was laid, and at one time was four feet above the level of the metals. A portion of the bed began to crack and sink, and, on the 29th ult., finally broke up in large masses.

Every effort had been made by the central and local authorities to avert this disaster. Two thousand men, of whom the majority were soldiers and the rest fellahs (peasants), collected from the neighbourhood, were quickly concentrated on or about the scene of action. Three thousand soldiers were also employed repairing the embankment at Nasbi, the object of the Government being to relieve the peasantry as much as possible during this most trying time. The people laboured with their usual alacrity, and are enabled to carry on their agricultural pursuits without molestation.

In the mean time all the available Nile steamers and barges were employed in carrying stone and material to close up the gap at Nadir, which they succeeded in doing, but unfortunately too late to save the county. The district inundated is estimated at from forty to fifty miles in length and six in breadth, running parallel with the river; other portions of the delta have suffered in like manner and from a similar cause. The distress caused by the inundation is but trifling in comparison to the fearful loss to the agricultural population, by the destruction of the cattle through disease; many villages have not a buffalo or bull left. This disease has extended to the upper country, and has attacked the buffaloes as severely as the oxen, the former having always been considered as exempt from such attacks. Field work has now to be performed almost entirely by manual labour, except in the case where a man more fortunate than his fellows possesses a camel, mule, or donkey, and these may now be met with drawing the plough. Notwithstanding these calamities, I am assured, on excellent authority that the export of cotton will reach, if not exceed, that of the last year. It is estimated that one third of the inundated districts may be sown cotton upon it, of which one half may be saved, but not all wholly lost. Indian corn and all kinds of cereals, the mainstay of the population, have been destroyed, and the food of every description is about double the price it is in England. The Government have endeavoured to alleviate the distress by importing oxen, sheep, and horses.

Herewith I send you some sketches, which I hope will be found interesting. One represents the construction of the railway embankment (engraved on page 520). The tent in the foreground belongs to Messrs. Craig, Elliott, and Co.'s line of railway. It is destined for Suez, in connection with their Mediterranean line. The representatives in Egypt of these eminent contractors lost no time in establishing a station at each end of the branch-line railway, and sending messages by means of fast-sailing boats, so that the public lost very little by the temporary disconnection of the telegraphic communication. The position of the operators in such a situation could not be very cheerful or desirable, surrounded by moving pandemonium, in the midst of the waste of waters; but in the interest of the public service men make great sacrifices. To the mercantile class, Messrs. Glass and Elliott's well-conducted telegraph is an unmitigated boon, and great praise is due to their employes for their exertions in re-establishing the communication, which was effected on the 24th of October.

The passenger traffic between Alexandria and Cairo, which was interrupted by the destruction of the bridge of boats, is conducted in a former channel—viz., by river; the authorities met their difficulties with becoming promptitude and energy, and speedily organised a staff of steamers to meet the mails at Kafr-el-Zayat and Atfeh, the railway continuing to work between Kafr-el-Zayat and Alexandria; on this wharf, somewhat small, arrived the Indian mail, passengers experienced very little delay in their transit. The trip from Alexandria to Cairo is made in about sixteen hours; the boats are found a heap of ruins, on which the poor people were clustered; they were rescued by Government launches and conveyed in safety to Cairo. It is impossible to arrive at any certain conclusion as to the loss of life, which must have been very great. Many villages were swept away the same fate as Shubrah-Namiah; but I have noted this care particularly, as it occurred within hearing of the people at work on the rail-way, but they could render no assistance to the unknown above mentioned.

[A third sketch sent by Mr. George, showing the remains of a village, was engraved in our last Number.]

CAIRO, NOV. 1.

Since my last report the water in the neighbourhood of the railway has subsided so rapidly that the engineer and his party have been able to push forward the work of reparation with great vigour. The great anxiety of the Viceroy for the restoration of the line acts as a powerful stimulant on all the authorities, and I am informed that if the work proceeds at the same pace as it is doing now the engineer continues to take a train over the entire extent of the 175th of this month, which will be about the time the Calcutta outward and homeward mails should be passing through. [A telegram received from Egypt reports that the railway communication between Cairo and Alexandria is restored. About 1500 soldiers are engaged upon the work. Nearly six miles of the line are to be relaid and maintained for at least a month after by constant labouring and lifting. The cattle disease is still raging in the upper country, and has not quite left Lower Egypt. The cotton-ginning factories—and their name is legion—have commenced work all over the country. The cotton coming in—the first picking—is over the average in both quality and quantity. Trade is very active. The recent rise in cotton caused great excitement here, and much business was done for speculation, but little for export. The importation of machinery is almost incredible, principally for cotton factories. Indeed, agricultural machinery is also finding its way into the country. Prince Halim Pacha, a very large landed proprietor, introduced machinery on his estate some time back, and has no doubt reaped a rich harvest since, as he is constantly increasing his stock. The wealthy proprietors are following in the wake of this Prince, and the price of the cattle have almost disappeared, the demand for machinery is most active.

THE PITMEN'S STRIKE.

This is a fine country, in which, happily, employers and employed can serve each other for the preservation of their own interests their separate interests. The relations in which capital and labour here stand to each other are the very reverse of those which prevail in the Southern States of North America would recognise as good. The late Secretary of the Treasury at Washington, Mr. Howell Cobb, proposes a highly ingenious theory for the settlement of strikes between these forces. "*By making the labourer himself capital*," he says, "*the conflict ceases, and the interests become identical.*" Without adopting this very American specific for all disputes in the labour market, we apprehend that the men on strike in Durham, and their masters also, would have things as they are, with all the unpleasant consequences attending them.

But although we prefer liberty for the individual, be he master or servant, it must be borne in mind that every one is responsible for the use he makes of his acquirements. No one can be allowed to put his liberty in an arbitrary manner. On becoming enrolled members of the social system, each one forfeits somewhat certain abstract rights. If we did not mutually give and take society would, indeed, be impossible, and we should soon revert to life in the woods, in which every man's hand would be against his fellow. Every man will it may be, therefore, for the employer and the employed to be able severally to combine, they are bound to consider how far the rights of their side and the greater liberty they possess the greater caution should they use not to infringe each other's rights. If the men were to have it all his own way, we might end in slavery; and were the labourer to have his way we should end in the fool's holiday and national bankruptcy. But were the Christian principle "Do as you would be done by," "Love thy neighbour as thyself"—made the basis of the relationship between capital and labour—instead of the law of supply and demand unmitigated by the law of kindness, strikes would never be heard of.

The strike of the pitmen is a totally different affair to the builders' strike which occurred in 1861-2. When commencing upon that event, our sympathies were entirely with the masters; now, however, we somewhat side with the men, whose cause, as it originally stood, is good, and whose conduct has been admirable. There are, doubtless, faults on both sides, which will be increased rather than diminished if the contest be protracted. It is always difficult in cases like this to strike the balance; but, confining the question to its original merits, we will at once state our belief that the Messrs. Strakers and Love would have best consulted their own interests and those of their workpeople by yielding to what was a very moderate and righteous demand.

Now that an amicable settlement has been postponed, and busy mischief-making agitators have got to work and are stirring up the discontent of the district, who knows where this affair may end? Likely enough, this beacon of disaffection may be sighted in Wales, where a strike is impending, and the community be called upon to suffer from a dearth of fuel at a season when the chilly blast robs the body of its natural heat.

The following are the main circumstances connected with the strike. South of the city of Durham lie four low-seam coalpits, owned by Messrs. Straker and Love. These are known as the Brancepeth, Brancepeth, Oakenshaw, and Sunnyhow pits. The men who work them, to the number of 1500, have hitherto been under certain oppressive regulation, not enforced in the adjacent collieries, demanded in unmeasured length. This demand originated with the Miners' Union, the Colliery Union formed a month or two since, the masters at once rejected. The seams of coal worked at these pits do not average more than 18 in. in height. In this height, the coal when it is in a very confined space. He picks down the coal, fills his tub, and sends it off to the bank. The tub is of the capacity of a ton weight, about 74 cwt. *Measure*, however, is the criterion; and an overlooker is appointed to see that the measurement is full. Now the men have to crawl beneath the tubs and heave them about "till their backs are raw." When the tub is filled at the bank, a certain number of the tubs will be declared in full measure when they get to the journey's end. If the tub is not filled, it is returned level it is confiscated, and the workman loses the value of his work.

We are informed that the average of tubs thus lost to each miner throughout the year is ten per week, equivalent to £20 per annum to the masters' benefit by this system of fines; but the masters have other benefits by the same system. The men are paid by the tub, and the number of tubs sent to the bank, and that they should be paid by the actual weight of coal they send to the bank. This is manifestly the fairest method. In this demand was subsequently made by the men in the shape of a request for an advance of wages amounting to 5 per cent on their earnings, which, at the average of £80 per year, is £4 per annum. But the Unionist busybodies, who will do what they can to widen the gap, put forward a demand for 10 per cent, and as wages on average wage, this demand is simply absurd and untimely.

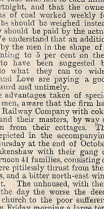
On both sides there have been many unwise steps taken of special circumstance. In the first place, the men, aware that the firm had contracted to supply the North-Eastern Railway Company with coke, have chosen the time for the strike, and consequently the way of repriasl, have forcibly ejected the men from their cottages. The scene of one of these ejectments was engraved in our Supplementary Illustration (page 528). One dreary Thursday at the end of October, the police arrived at the village of Oakenshaw with their gang of workmen, and by four o'clock in the afternoon had got the unloading of 51 men, 40 women, and 137 children, were pitilessly thrust from their homes. The men, standing in groups around a bitter night-wind with fledged the shaft and sharpened its point. The unhoused, with their furniture, were huddled in the open field by the roadside for the dead. The Rector and his Curate opened the church to the poor sufferers, and by the arrival of the small hours on Friday morning a large tenth was erected, the women and children were housed in it. Since then, however, being hastily fired, gave way before the wind, as shown in the Supplement. Provisions for the men were conveyed to the encampment, it must be said, with great care; and the pitmen watched the removal of their effects with perfect order. No opposition was attempted. On the day previous, in most inclement weather, thirty-eight families were ejected from their cottages at Sunnyhow, the police being in no way resisted. Those of the latter class of fortitude were not driven down near the village, and twenty more in a field near Willington. The same tents are now described as occupying the field in such weather a tent, even where provided, is a miserable shelter for women and little children. None of special hardship will occur at such places. The innocent suffer with the guilty. When the men refuse to work they must expect to relinquish their houses to those who will. Mr. Mc Laren, M.P. for Durham, in the fancy in which his employees exercised at such a time by those who were known to have the right to dispose of their property, has given notice to quit to the percentage of wrong which are now funded into desperate antagonism. Since then the eviction have been carried on in a better spirit, and the men have been offered a gratuity to quit their houses.

Several meetings have been held, from which delegates have been sent to other districts to solicit aid. First the miners were paid 5s. when they wavered; and, finally, they gave way to the following arrangement, which was agreed to on Saturday last:—That the men work the same time insisting on a standard tub, in order to avoid the loss that would ensue were the weight of the tubs to fall off in any great degree, namely, that the masters should be at the expense of weighing would be incurred for light as for heavy loads. They have agreed to allow the men 2½ per cent on the price of coal, and to deduct the firm's weight-man to pay for all overweight; and not to confederate in any such way as the Miners' Union, or any other, to raise the price of dispute now is, *what shall be the standard?* "The masters will accept the average of six tubs filled in the workings without rocking; the men demand that the standard of a tub shall be filled "one inch full" on the pit heap." To this demand "which would practically amount to an addition to the extent of 5lb. to 10lb. per tub-load," Messrs. Straker and Love return a negative. Here the matter at present rests, but the men are out, the pit ropes are motionless, the forge struck; and fifty-eight families, we hear, were evicted at the Spennymoor Colliery, belonging to the West Hartlepool Railway Company, the men thrown out on the 16th of last month, for refusing terms, for some weeks. Disaffection seems to be rapidly spreading, and the movement is rather alarming. This is a time for the pitmen, by the reasonableness of their demand and their orderly conduct, have secured the sympathy of the public generally, and should they, acting on the advice of those whose interest it is to keep the strife alive, refuse to avail themselves of the concessions of the masters, the good opinion they have gained will be lost to them. Let us hope for a termination which may prolong this strike—Messrs Straker and Love refuse to employ the Union men, and say that they will not until the dispute is raised, "Shall these men, who have fought your battle, be sacrificed?," The cause is now appealed to their fellow-workmen throughout the country, and we trust that the point upon which a settlement shall turn; while the masters may think it imprudent to yield to the dictation.

WILLS AND BEQUESTS.

The will of Sir William Bellairs, Kt., late of Malbarton Lodge, Norfolk, and of Oakley-square, London, was proved in the principal registry by the oaths of Lady Bellairs, the widow, Sir George Augustus Cooper Bellairs, Bart., and William Bellairs, Esq., also an executor. The personalty was sworn under £140,000. To his son he leaves his real estates, situated in Essex, Hertfordshire, and elsewhere, and all the residue of his personal property. To his two daughters are left legacies in addition to their settlements on marriage, and to each of his nine grandchildren a legacy of £2000. Legacies are also left to several other members of his family and to personal friends.

We find that the statement of Mr. Stewart Marjoribanks's will contained in our Impression of the 31st ult. was in some respects incorrect. Mr. Marjoribanks's personal property was sworn, as stated, under £100,000; and by his will he bequeaths legacies of £2000 each to the daughters of his brother, the late Sir John Marjoribanks, Bart., Mrs. Edward Marjoribanks; and, after making some few specific bequests to other relations and to some old and valued servants, he divided the residue of his estate property between his nephews, Edward Marjoribanks, Edward Marjoribanks, jun., and Dudley Marjoribanks, M.P., Bushey Grove. The latter property is of the value of £100,000, or thereabouts.



OBITUARY OF EMINENT PERSONS.

THE KING OF DENMARK.

Frederick VII. (Charles Christian), King of Denmark, Duke of Schleswig-Holstein and Lauenburg, died at Copenhagen on Sunday morning, the only son of Christian VIII., King of Denmark, and at one time King of Norway, by his consort, Princess Caroline Amelia, daughter of Frederick, Grand Duke of Mecklenburg-Schwerin. He was born the 6th of October, 1808, and succeeded his father as King of Denmark on the 20th of January, 1848, thus coming to the throne just previous to the great European revolutionary outbreak of 1848 which overthrew the Monarchy of Louis Philippe in France, and many important subjects, and particularly by the decline for a new Constitution, which was eagerly demanded by the Danish people. His rule by a decree that all proceedings and trials for political crimes and offences against the press should be conducted before the Criminal Courts should be abandoned. Two days afterwards his Majesty nominated as his successor to the throne of Denmark his uncle, Prince Ferdinand Christian Frederick, and on the 28th of May, 1851, the whole treaty-death has prevented this intention from being carried out. King Frederick VII. married, first, on the 1st of December, 1828, Princess Frederica Caroline Wilhelmina Dorothea, daughter of Frederick William, Duke of Schleswig-Holstein-Sonderburg-Glücksburg, now Christian IX., King of Denmark, who, by his consent, became heir to the Danish throne. Landgrave of Hesse-Cassel, has issue, Frederick, now Hereditary Prince; George, King of Greece; Princess William Alexander, Princess of Wales, and now Princess Royal of Denmark; and the Princesses Dagmar and Thyra.

LORD CHESHAM.

The Right Hon. Charles Compton Cavendish, Baron Chesham, of Chesham, in the county of Bucks, was the fourth and youngest son of the late Lord George Augustus Henry, and brother of the present Duke of Devonshire, Earl Cavendish of Compton, Baron Eske of Charles, seventh Earl of Northampton, and was the grandson of Sir William Cavendish, K.G., fourth son of the Fifth Duke, and uncle of Sir Frederick Cavendish, K.G., second Earl of Burlington and seventh and present Duke of Devonshire. He was born on the 19th of August, 1793, and became, soon after coming of

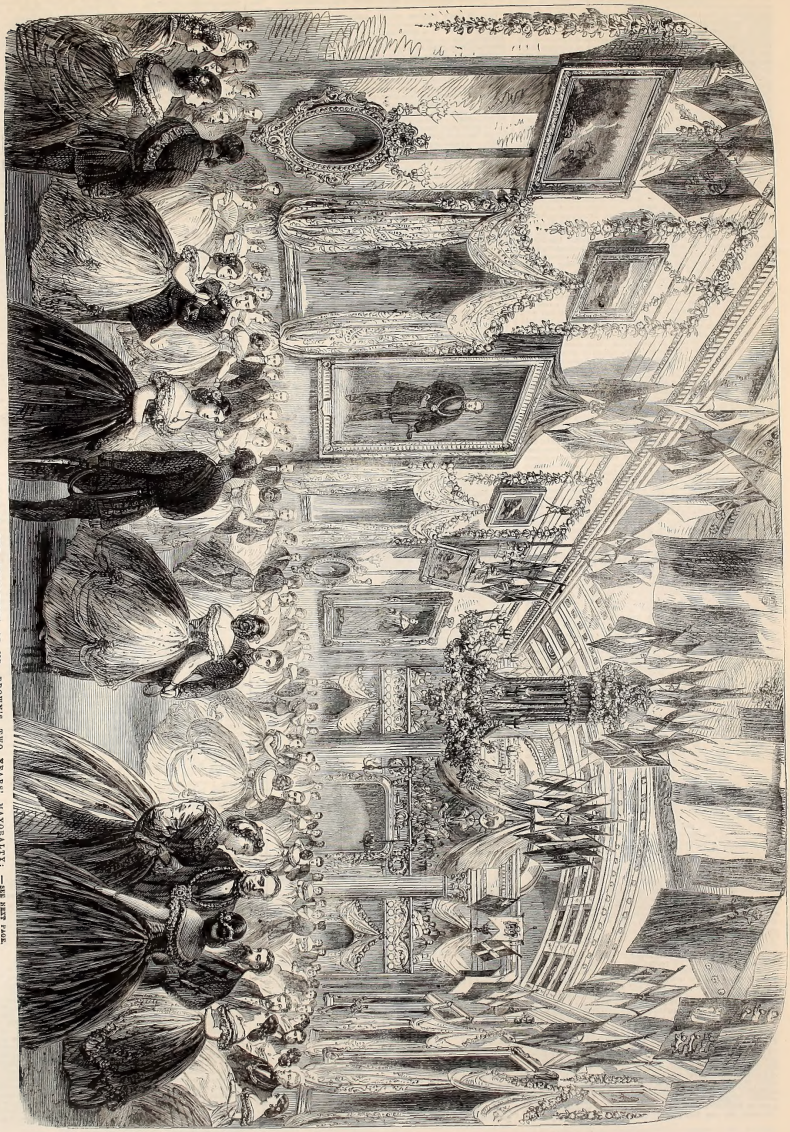
majority, a member of the House of Commons. He sat first for Newton, from 1814 to 1818, for Derbyshire, from 1818 to 1820, for Malton from 1818 to 1841, for Yorkshire from 1841 to 1847, when he was returned for the Northern Riding, and continued to fill the representative of that constituency with Mr. Cabden George De Yre and the Right Hon. Benjamin Disraeli, until his elevation to the Peerage, which took place on the 14th January of that year, he was created Lord Chesham. His Lordship was a Whig in politics, and was a steady ally of Lord Melbourne's Administration from 1830, and retained that disposition endeared him to all who knew him, and made him deservedly popular. Lord Chesham married, first, Lady Lucy Isabella Cavendish, on the 11th inst. He married, June 16, 1814, Lady Catherine Susan Godolphin, elder daughter of Francis, seventh Duke of Leeds, by whom, who survives him, he leaves (with two daughters, Lady Dacre, and the Countess of Stradford) an only son, William Cavendish, now Lord Chesham, who is Lord Lieutenant of the county of Buckingham, who was born Oct. 29, 1815, and married, July 24, 1839, Augusta Mary Elizabeth, daughter of Hugh Elis, Viscount Clifden, and Lady Amelia, M.P., and granddaughter of Henry, second Earl of Harewood, and has three sons and three daughters.

THE REV. PROFESSOR M'CAUL, D.D.

The Rev. Alexander M'Caul, D.D., Professor of Hebrew and Divinity, of King's College, London, Archdeacon of Colchester, Rector of Cathcart, and Rector of St. Magnus the Martyr, London Bridge, was the eldest of a highly respectable Irish family, and was born in Dublin in 1799, and graduated at Trinity College, Dublin, in 1819, and M.A. in 1831, and eventually became a D.D. He entered into holy orders in 1822, and after serving a curacy, received employment from the London Society for the Conversion of the Jews, and many years was a missionary to the Jews in Poland. It was in office for which his profound knowledge of German rendered him peculiarly fitted. On Dr. M'Caul's return to England he was appointed Minister of the Jews Episcopal Chapel in Palestine-place, Bethnal-green, and head of the London Society's Hebrew Institution. In 1841 he was made Professor of Hebrew and Rabbinical Literature in King's College, London, in connexion to the Bishop of Jerusalem, and was made Rector of Barkingchurch, Essex, in 1842, by which he had himself declined. In 1846 the theological degree of D.D. was conferred upon him by Trinity College, Dublin, and in 1849 he was appointed Professor of Divinity and of Old Testament Exegesis, while retaining his professorship of Hebrew. In 1850 he resigned the rectory of St. Magnus and Professor of Rabbinical History. He had, in 1840, been made Archdeacon of Colchester, and in 1841 he resigned the rectory of St. Mary Matfelon, alias Whitechapel, with St. Margaret, Fish-street, and St. Michael, Crooked-lane. Dr. M'Caul was very able, and his loss will be severely felt not only by the Jews in England and perpetual writer. Among his works may be mentioned "The Old Paths; or, A Dissertation on the Right Interpretation of Scripture, in which the Jewish Rabbinical Interpretations of Scripture and Words of Scripture Addressed to the House of Israel;" "The Iqqarim of the Jews and the Gentiles under the Christian Dispensation;" "The Old Testament Revised;" and several in favour of marriage with a deceased wife. Two of his essays appeared in the "Essays and Reviews" volume, entitled "Aids to Faith," and "Archbishop of York. The titles of these essays were "Prophecy" and "The Mosaic Account of the Creation." In 1860 he published "Colenso Examined," a small volume giving "Some Reasons for Believing in the Authenticity and Divine Origin of the Pentateuch." He was one of the most active members of the Committee of Convocation which condemned Dr. Colenso's book on the Pentateuch. He married, in 1826, Miss Levin, by whom he had issue the Rev. Joseph Benjamin M'Caul, King's College, London, Archdeacon to the Bishop of Rochester, and Assistant Librarian of the British Museum; and another son, the Rev. Alexander Israel M'Caul, M.A., of St. John's College, Oxford, is Lecturer on Divinity in King's College, London.

The use of tobacco for smoking purposes within the precincts of Windsor Castle has been prohibited by command of her Majesty. Guns, framed and glazed pictures, and all articles of the like kind in the castle, have been hung in the private rooms of the lords in waiting and equerries of the Royal table, and the use of tobacco is not to be permitted. Notice has been served upon the Prince of Wales. The servants and workmen of the castle are also prohibited from smoking within the walls, by command of her Majesty.

A paragraph has appeared in the newspapers stating that the University of Cambridge was about to admit girls to the local examination, and to offer them the degree of Associate in Arts. This, however, is not the case. The University of Cambridge does not admit the degree of Associate in Arts at all, and the question of admitting girls to the local examinations has scarcely been discussed, much less decided. Meanwhile, as an experiment, the syndicate appointed to conduct the examinations have authorised the issue of certain of the papers for the next examination for the use of some girls in London, under the care of a committee of ladies and gentlemen interested in the question; but the decision of the syndicate was not requiring more than is a matter of private arrangement between that committee and the examiners, and the results will not appear in the University class lists or report.



THE STRIKE OF COLLIERS IN DURHAM.

OAKENSHAW, ONE OF THE VILLAGES WHERE THE PITMEN WERE EJECTED FROM THEIR COTTAGES.

GREAT MEETING OF PITMEN ON THE BATTS, BISHOP AUCKLAND.—SEE PRECEDING PAGE.

BALL AT THE CUTLERS' HALL, SHEFFIELD, TO CELEBRATE THE COMPLETION OF MR. BROWN'S NEW WORKS. — SEE NEXT PAGE.

FINE ARTS.

WHO DISCOVERED PHOTOGRAPHY?

To M. Daguerre and Mr. Fox Talbot the honour has long been assigned of having discovered, in 1839, and simultaneously in France and England, the means of rendering photographic effects comparatively permanent, the first on silvered metal plate, the second on paper. The camera has been invented upwards of three centuries, and scientific men have, at various periods, observed and experimented in the manner upon the action of light on the salts of silver (which is the most common basis of photographic pheenomena), but all were thought to have failed in rendering the pictures so produced permanent.

Of late, however, it has been rumoured that specimens of photography are in existence dating so early as towards the close of the last century. On the 3rd inst. several of these were exhibited, and a full meeting of the London Photographic Society, and accompanied with most interesting particulars of their discovery by Mr. F. J. Smith, Secretary of the Ramsgate Harbour Improvement Office, a gentleman who spent a large fortune in obtaining the adoption of the screw principle of propulsion in navigation, and who, in a very few days, when very insufficiently rewarded by Government. Mr. Smith, shortly after, was joined by Mr. Benjamin Barnes, Birmingham, of Matthew Boulton, the founder, whom James Watt joined in partnership, and where they established the famous engineering manufactory. Mr. Smith's position, being specially fitted for his museum Watt's first engine. Here, also, the Lunar Society, called the Lunatics by the latter, met from time to time, sometimes like meetings on the night of every full moon. This society numbered among its members many of the most eminent scientific men of the age, including Boulton, Watt, Dr. Priestly, Sir W. Herschell, Sir Joseph Banks, Dr. Smith; Dr. Johnson, of Lichfield; Josiah Wedgwood, the famous pottery; Benjamin Franklin, &c. In this house Boulton resided until his death, in 1809. His library remained unopened for about fifty years, but on the removal of documents, and books were taken out about seventeen or twenty years ago by Mr. Price, agent to the Soho Estate, now near Birmingham, and his family had held for two or three generations). From these papers Mr. Price had preserved two pictures on paper and two on silvered plates, which he showed to Mr. Barnes, thinking they might be worthy a place in the Patents Museum, as from what he had seen and heard, he believed they must have been taken by the camera; and from Boulton's documents it was evident that pictures had been "transferred" to paper, copper, iron, &c. (the latter process was very cheaply (some as low as 7s. 6d.)—so that many more probably still exist. Other paper pictures we are told see afterwards found, and have the same characteristics, being mostly of copies of designs by Angelica Kauffmann, West, and other popular artists of the day. The first object presented in all had been a piece of pearl, resembling mezzotint; and the designs are evidently *reversed*, the figures appearing left-handed. The paper is semi-opaque, porous foolscap with a "Whatman" watermark, without date, indicating that it was made about a hundred years ago. The paper is coated with a varnish-like substance, but it is full of minute cracks. On damping the surface with the finger, both picture and varnish may be entirely removed. We have carefully examined these pictures by daylight, and (having a practical knowledge of almost every branch of engraving which is executed in connection with ordinary painting) we may add our opinion to that of several of the first authorities in London, that such copies could not possibly have been made by hand, but that they have been produced by some process entirely different from any known at the present time. When Mr. Smith's interest in these pictures had been thoroughly aroused, a search was commenced, and at the house of an auctioneer (who had kept a lumber shop) where some of the articles had been brought to him as waste paper from the house at Soho, was found also a large figure-picture, after West, on two sheets of paper, each about 2 ft. by 1 ft. 6 in., and irregularly cut so as to fit a frame, and which more successfully concealed. A very old man who had been employed by Boulton, and who died a few years ago, was also found, and his documentary evidence to prove that he was correct, that Mr. (afterwards Sir William) Beechy painted a portrait of Boulton about 1794, and, when the artist was at Soho, the carpenter made several copies of pictures was shown to him; whereupon he was so apprehensive of the injury they might do as to what he had been employed to do as a number of artists, and presented to Boulton and the Lunar Society, begging that to stop the manufacture became, as soon as the process was known, it would ruin the artists. Several letters by a person who appears to have been taken by the hand and employed by Boulton refer to the ordinary colouring, the hand and varnish which was added to the transfers when in what was called their "dead-colour" state, the person's name was Francis Eginton, and that he was attributed the discovery, or at least the possession of the secret, from about 1791 for Sir John Dalrymple actually petitioned Parliament to obtain for him a Government pension, on condition that he ceased working it. This was not effected, however, through, it seems, a letter (a copy of which is preserved), written by Boulton to the Lord Dartmouth, in which he says that such a pension would be "impolitic as it would keep Eginton from recommencing the business. Boulton goes on to suggest that, by his influence, he could more surely effect the discontinuance of the manufacture of the article, and—without, be it observed, himself claiming the invention—he hints that he (Matthew Boulton) ought to be rewarded for his cutlery. It is probably more than a coincidence that the number of these pictures ceased near the time this letter was written. Precautions seem all along to have been taken to prevent the invention becoming generally known. In the papers preserved many portions are removed or cut; and nothing revealing the secret has yet been discovered. The search should certainly be renewed with all possible diligence among the *three tons* of papers, &c., still, or up to very lately, in the charge of Mr. Price. Francis Eginton, who died (?) became a glass-painter of celebrity; and in Nagler's "Künstler Lexicon" they important window in the Lutheran church at Ingolstadt in Magdalen College, Oxford; St. Paul's, Birmingham; Salisbury Cathedral, Arundel Castle, Wanstead Church, &c. He died in 1905, aged sixty-eight.

It is a singular fact, and should perhaps be mentioned here, that in the course of the research on foot there was found the discovery of these pictures, a catalogue has been found of an exhibition of the "Polygraphic Society" in the Society of Arts, and a number of copying pictures by a "chymecal" and mechanical process invented by Mr. Joseph Gough. The catalogue calls attention to the extreme cheapness; to many duplicates of the same engraving being placed together in order to prove *the pencil has not been employed*; and it announces that the pictures would be ready for delivery during the summer—the latter, at least, smacking strongly of photography. Mr. Gough was a portrait-painter, resident of Lewisham, Kent, and he obtained an Act of Parliament enabling him to secure a patent right during a certain period. In the British Museum (pressmark 1044d) is a small address to the public on the subject, signed by Booth, published in 1788, but it does not contain the slightest clue to the means of producing the pictures.

Returning to the paper pictures found at Soho, we would observe that it is certainly not by any process known at the present time. One of the best means of testing the probability of their having been so produced will, of course, be to submit them to the most rigid comparison with the originals, which we have every reason to believe done. Meanwhile, the following additional discoveries and evidences seem very plain: to indicate that the Lunar Society was or as it "form" of photographic experiment. In the course of Mr. Price's examination of the contents of Boulton's library also found a number of the two silvered plates already mentioned were found. These are each about 7 inches by four inches; they are in all respects like those used by Daguerre in the early days of photography; and on each is a faint representation of a house, which the best authorities on the photographed direct from nature by means of a camera. A memorandum attached to one of these plates when found, states, upon the authority of Boulton's sister-in-law, that it is a sun-picture of the house taken before certain alterations made in 1791. The other plate is very much scratched; but part of the present new roof of the house is still discernible. A camera of a size corresponding with these plates had been found in Boulton's library; but it was given away to a photographer, s he used but soon after lost it. The search for the missing camera is still going on, and it is thought that it may yet be found in the neighbourhood, perhaps converted into a salt-box. Lastly, the old man already referred to asserted that Price that the view of the old house at Soho on the silvered plate was taken in front of the house by Mr. Boulton and some of the members of the Lunar Society. The members, or "the great men," as the old man called them, "used to have pictures on the table—not the pictures themselves, but the *likenesses* of the pictures." He also said that they were in a *dark* tent, with nothing but a picture on the table, and he described an instrument exactly answering to a camera. More direct evidence of Boulton's library having remained entirely during the fifty years named above, therefore, nearly all that is required to render it in the highest degree probable that what have since been called daguerreotypes were taken seventy years ago! As regards the paper pictures, it is proved that they were produced by photography it will follow that a process of remarkable permanency was executed as well as early period, of which we are entirely ignorant; for, though they seem to have been produced directly as "positives," chemical analysis has proved they do not contain a trace of silver!

The surprise of these discoveries rendered still more remarkable by the fact that Thomas Wedgwood, a son of Josiah Wedgwood, the potter, and member of the Lunar Society, was at the very date assigned to these paper and silver pictures (1791), in conjunction with Sir Humphry Davy, experimenting in photography, as is shown by bills and entries for chemicals and apparatus. Moreover, that Thomas Wedgwood was also very successful would be proved if two paper photographs exhibited at the same meeting of the Photographic Society were, as stated, taken by him. If so, it is proved that the appearance of a faded silver print, represents a carefully-laid Hesketh-Hall, and Miss Meteyard (who is writing the "Life of Josiah Wedgwood") says that it "undoubtedly represents the breakfast-table at Etruria Hall, and that the cups and saucers are adorned with the cameo-work of the usual kind." Against this we have to set the admission made by Sir Humphry Davy, in 1802, that they had failed in their efforts to fix images by the Camera Obscura, however, it is contended that there may have been set aside, when very faint, as failures, and that subsequently they were developed.

In reviewing the whole mass of evidence, direct and collateral (of which we have endeavoured to give a brief summary), it seems difficult to avoid exclaiming, "There is nothing new under the sun"! That, if these photographic pictures are genuine, an art of so much attractiveness and promise, pursued successfully by several persons, some of whom were eminent in their day, should have been allowed to die out is, perhaps, the least marvel of these singular discoveries. A yet it need only remind us that most discoveries have, so to speak, come before their time and have had to be re-discovered or disinterred.

A Fine-Arts Gallery is to be added to the Great Exhibition of Irish Manufactures at Dublin next year.

Mr. Foley, R.A., has been intrusted with the design and execution of the Prince Albert Memorial for Dublin.

CHESS.

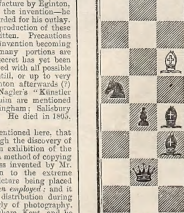
TO CORRESPONDENTS.

H. DICKSON.—Hyndsbix's work with the accompanying volume of plates, is very scarce in this country. You should apply to some bookseller connected with chess, such as Mr. Ransom on sale at St. King-street, Strand.

J. M. C.—We imagine the following would way to destroy the club in question than by such an unsatisfactory.

W. R. Sandwich.—Problem appears to be defective, inasmuch as White may mate in five moves, beginning—1. Kt to K 3rd, &c. Solution No. 1019 is correct. Problem 1020 is wrong, as K to R 3rd. Is it not so?

W. S. S.—If ever there is a player advances to the 8th square he may demand a Queen, whether his original Queen is on the board or not.



W. H. Sandwich.—Problem 1020 is wrong, as the bishop last now. One of the best of those letters which we have seen for many days. Solution received from A. K. Keeps some time ago.

White. Black.
1. P to K 4th. Bt x K 3rd and Q to Kt 5th. Bt at Q to Kt sq and Q Kt 6th.
2. Q to Kt 3rd and Q R 6th; Pat K R 2nd, K Kt 6th and Q 3rd.
3. P to K Bt 4th, Q x P (ch), P x Q, and K to Kt 5th. (a) 4. Kt to K 3rd; Pa at K 2nd, K Kt 6th, Q 4th, and Q R 6th.

(a) If Black play other moves White will play to destroy the club in question than by such an unsatisfactory.

(b) If Black play Queen moves White will play to Queen's Rook Square.

PROBLEM No. 1020.
By the Rev. G. M'ARTHUR, M.A.
BLACK.

White to play, and mate in four moves.

SOLUTION OF PROBLEM No. 1020.

THE MAYOR OF SHEFFIELD'S SOIRÉES.

OUR Engraving on the preceding page represents the Cutlers' Hall, Sheffield, on the occasion of two superb soirées given by John Brown, Esq., on his retirement from the mayoralty after a two-years' tenure of office. The decorations, which were by Mr. Mercer, of Ecgate, were of the most lavish and costly description. The staircase by which the guests entered was richly carpeted, hung with pictures, and crimsoned with statuary and rare exotics. During the afternoon and evening the bells of the parish church rang forth a merry peal. The visitors, who comprised the elite of the society of the town and county, began to arrive at eight o'clock, and were received by the Mayor and Mayoress. The introductory interval—a half-past ten was occupied by promenading, chatting, &c., and listening to the performance of an admirable selection of music. At twelve the guests retired from the ball-room to the supper-table supper, the tables were tastefully supplied with every delicacy and ornamented with large candelabra and plate. A prominent feature in the decorations of the hall was the full-length portrait of Mr. Brown, recently presented to the Town Council by the local complimentary subscription by his townsmen. Around the wall were placed magnificent mirrors, the interstices being hung with richly-embroidered white lace, in beautiful contrast with which were wreaths and festoons of artificial flowers. The wood roof of the orchestra and the pillars supporting it were similarly decorated, the centre of the latter being encircled with wreaths of delicate shades of mauve placed behind them. Banners were suspended from the centre, and from the centre of the room, and floated over the capitals of the pilasters all round the room. The appearance of the room when thronged with its gay and fashionable occupants was charming in the extreme.

Whilst Mr. Brown, as the head of the celebrated Atlas Steel and Iron Works, has attained a world-wide reputation, he is universally esteemed at home. On the 9th inst. he retired from the civic chair of the borough, having filled the post of Mayor for two years—a circumstance unparalleled in the municipal history of the borough. Recently, Mr. Brown was placed on the permanent commission of the peace, an honour which the local unanimously recommended he might receive. Within the past eighteen months he has been visited by Lord Palmerston (who stayed some days at his residence, Shrel Hill,) by the Lords of the Admiralty, and by all the neighbouring nobility, whom to the large business he has transacted in connection with the Atlas Works. All the distinguished engineers and scientific men of the day, foreign as well as English, have likewise visited the Atlas Works, and during the late visit of the Great International Exhibition, at which Mr. Brown most ably represented Sheffield as president of the jury on iron and steel and steel manufactures. During his term of office as Mayor, Mr. Brown's munificence to all the various denominations and charities of the borough has been almost unbounded, and he has proved by his influence to raise the character of the town in proportion to the impulse which he has given to its trade. But for the many noble deeds which he and others have introduced to the neighbourhood, there would no doubt have been a much greater amount of public stagnation caused in other branches by the American war. The new Town Hall, for instance, had the effect of almost clearing the workhouses of able-bodied paupers. Mr. Brown's loyalty was manifested in the rejoicings consequent upon the marriage of the Prince of Wales. His Worship's reception was great, for the Queen in England put on a graver appearance than Sheffield on the day of the marriage of the Prince, and there was evinced the spirit which he threw into the proceedings. To the appeal made for the relief of the Lancashire distress he made a ready response, took the management of the subscription, and by his skill as a man of liberality was the means of collecting a very large sum in Sheffield. We should add that the present member of the eldest son, which he held by his townsmen, that nearly three thousand of the electors of the borough have already promised to support him. The question is often himself for election as their representative in Parliament at the first general election or vacancy, and there is little doubt but the desire will be consummated.

MUSIC.

The whole English public, musical and not musical, still remember with interest the famous Promenade Concerts carried on for many years by Mr. Louis Jullien. They were the first popular musical entertainments ever introduced into this country; and, now that they have been revived by Mr. Gye, they promise to be as popular as ever. M. Louis Jullien began, at HER MAJESTY'S THEATRE, a series of concerts which were called upon him by the unexampled success, hitherto, has been of the most brilliant description. The late M. Jullien was a very extraordinary person. Possessed of great musical attainments, and of a fertile genius, united to a degree of energy and perseverance, without which he could not have surmounted the difficulties which he encounter, he was destined to be misunderstood and misjudged, treated as a charlatan, and exposed to the incessant ridicule of the popular satirists of the day; but, while they amused their readers by making game of the eccentric peculiarities of costume and manner, the public flocked to his concerts—many of which, it must be said, were of a character to enjoy a brilliant and animated kind of music which they found very pleasant to hear. The secret of M. Jullien's success during the object he had at heart from the beginning—an object which at first, probably, was not perceived by anybody. That object was to improve, step by step, the taste of the public for music. Because this improvement, he began by seeming entirely to concede to it. His earliest concerts were of the most trivial kind. They consisted almost wholly of showy and brilliant dance-music, quadrilles, waltzes, polkas, &c., calculated to catch the most unmusical ear. But he began to mingle this familiar music with things of a higher order: movements (short at first) from the symphonies of Haydn, Mozart, or Beethoven; fragments from the finest Italian and German operas. But these innovations, cautiously as they were made, were not always received with favour. They were often received by the denizens of the promenade, not merely with impatient inattention, but with a kind of murmuring disapprobation. But still Jullien went on, gradually increasing wholesome doses, till his treatment of his patient (the public) at length proved to be a fact that Jullien knew what he was about. He will live in our musical annals as the name of a distinguished man, who had the merit of, in some degree at least, leading a whole individual in promoting the progress of his art in this country. His son, we are glad to observe, is treading in his footsteps, and he has an advantage which his father did not enjoy. The way has been paved for him, and he has had only to begin where his father stopped. The concert which he has given, though similar in character, are really superior in substance to those given by his father at the most high and palmy period of his career. M. Louis Jullien's concerts are given, as has been said, at HER MAJESTY'S THEATRE, which has been altered and fitted up for the purpose by Covent Garden, and by his father's time. The pit is boarded over on a level with the stage, so as to form a spacious promenade, in the centre of which the orchestra is placed; and the boxes have been refreshment-rooms, retiring rooms, amply supplied with English and foreign journals, and periodicals of every kind. The theatre has been tastefully decorated, and looks brilliant, gay, and comfortable. The orchestra is numerous and powerful, consisting of about eighty of the best in the firm, decided, and somewhat demonstrative manner in which he wields the baton. The first concert took place on Saturday, the 7th inst., and its programme was substantially adhered to during the following week. The dance music, which once to be the whole of the Promenade Concerts, was now confined to a small compass. It consisted only of the late M. Jullien's quadrille from "Fra Diavolo" and the favourite British galop, "Hurrah!" both admirably played in their way, especially the latter, which is a truly animated and spirit-stirring piece, and was given in a manner sufficient to gratify the most cultivated taste. Music like this must be a feature of every promenade concert. The more "classical" portion of the entertainment consisted of Mendelssohn's overture to "Ruy Blas;" Mozart's symphony in E flat, performed entire; Verdi's aria, "Saper vorreste," from "Un Ballo in Maschera," beautifully sung by Mdlle. Volpini; an ample selection from the opera of the day, Gounod's "Faust," and several miscellaneous vocal and instrumental pieces. Among these were Arditi's favourite song, "Il Bacio," charmingly warbled by Mdlle. Volpini; and a solo on the flute (an air with variations), played by M. Sweinden, one of the most accomplished performers of the day. It is worthy of note that M. Sweinden used Clinton's cylinder flute, which gained the prize medal at the International

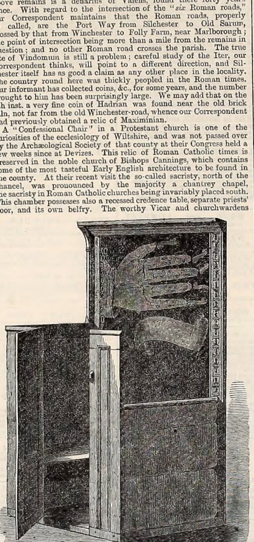
Exhibition, an instrument possessed of remarkable advantages in regard to tone and execution, and therefore coming into general use among flute-players. Meyerbeer's great Coronation March, from the "Prophète," formed the finale to the concert. On Monday evening last Signor Sivori, who has now revisited England after an absence of five years, made his appearance, and was welcomed by an overflowing audience with unbounded enthusiasm. We need scarcely tell our musical readers that Sivori has no superior among living violinists, that he is the pupil and representative of Paganini, and the only performer who gives the public of the present generation a complete idea of the powers of that wonderful, that incomparable artist. Sivori, we believe, is engaged for the whole series of these concerts; but we take it for granted that his appearance will not be confined to them.

The thirty-second season of the Sacred Harmonic Society began at Exeter Hall (as usual) on Friday evening, the 13th inst. The oratorio chosen for this occasion was Costa's "Eli." It was, on the whole, admirably performed, though its effect was impaired by the absence of Mr. Sims Reeves, prevented by indisposition from singing. Mr. Wilbye Cooper appeared at very short notice, and exerted himself with zeal and ability; but the tenor part in this oratorio was written so expressly for Reeves, and calls into action his peculiar powers in such a manner, that his place cannot be filled by any other performer whatever. The other principal singers were Mdme. Rudersdorff and Mdme. Sainton-Dolby. The performance was much applauded by a crowded audience.

Balfe's new opera, "Blanche de Nevers," is to be produced at the Royal English Opera this evening. Report speaks highly of its merits, both as a drama and a musical work.

Master Willie Pape, the youthful American pianist, gave a concert on Wednesday, last week, at Chatham, respecting which the *South-Eastern Gazette* speaks thus:—"Although not yet fourteen years of age, Master Pape not only takes rank with musicians of riper years, but he out-distances nearly all. In the concert of Wednesday the programme was made up of selections from Beethoven, Liszt, Prudent, and other composers, introducing the various compositions of the several schools, in order to show the extraordinary ability of this gifted youth. The first piece performed was the 'Moïse,' by Thalberg; and the manner in which the variations were given, and the artistic display of the entire piece—one of the most difficult by Thalberg—stamped this juvenile performer as a living wonder. His most astounding performance, however, was Beethoven's Grand Sonata, op. 26, and this, undoubtedly one of the finest works of this great master, was executed in the most perfect manner. Taken as a whole, such a pianoforte recital has probably never before been heard at Chatham."

THE THEATRES.



Haymarket.—Mr. C. Mathews is indefatigable in producing new pieces, in support of his engagement; and, whatever their subject, is so successful, by reason of his personal vivacity, that the public appear utterly to disregard any inquiry either into their morality or reasonableness. Scarcely has "The Bull in a China Shop" had time to reflect on the confusion that he had produced than he is superseded by an adaptation of M. Scribe's elegant drama, "Une Chaine," under the title of "Silken Fetters," from the pen of Mr. Leicester Buckingham, who has most adroitly relieved the subject of much that was incidentally objectionable. The part taken in this piece by Mr. Mathews is that of the lawyer—here called Mr. Caleb Codicil—whose bustling air of business is always amusing. The Admiral Earl of Windermere was capitally acted by Mr. Howe, and the more serious sorrows of the Countess of Windermere were interpreted by Mrs. C. Mathews with an earnestness and effect for which we were not altogether prepared. There is also an excellent little part for Miss Maria Harris, who, as Clara Hazelton, sheds an ingenuous light on the scenes in which she appears. Mr. Chippendale has a good part in Mr. Hazelton, and Mr. W. Farren was also well fitted with the character of Herbert Trevanion. We have also to notice a petite drama, by Mr. T. J. Williams, with which the business of the evening now opens, and entitled, "Little Daisy." Miss Maria Harris is, of course, the heroine—the daughter of a woodcutter in the New Forest, whose loyalty to Charles I. and his family makes them discontented with the successes of Cromwell. Here, too, resides Sir Matthew Aylesbury (Mr. Braid), who has in concealment one of the Princesses. Little Daisy's sympathies are aroused, and she secretly conveys to the Aylesbury retreat the frugal fare intended for herself and Diggory Dawdlegrass (Mr. Clark)—much to the perplexity of the latter, who cannot be made to believe that he has consumed the rations himself. At length the Protector's troops arrive at the woodcutter's cottage, commanded by Mark Langdale (Mr. Howe), who happens to be Daisy's cousin, and is a new adherent of the Commonwealth. Formerly a Cavalier, he is disposed to serve the family of the deposed Monarch, but meets with difficulty from Ephraim Curtspeech, the Puritan Corporal (Mr. Coe). Daisy, not having met her cousin since they were children together, escapes recognition, and, slipping out of the cottage, exchanges her red cloak for the Princess's attire; and thus the latter is enabled to pass for a peasant, and Daisy is taken into the Sergeant's presence as the Royal fugitive. Ultimately, the trick is discovered by Langdale; but he is so much pleased with it that he proposes to become Daisy's husband, who, of course, consents. The acting of Miss Harris in this agreeable little piece was as charming as it was simple. The young lady is a rising artiste in a class of parts for which her petite form renders her peculiarly eligible.

Surrey.—On Saturday a new drama, called "The Game of Life," was produced. The title sufficiently shows the class to which it belongs. It is, in fact, a piece adapted from the French by Mr. Vollaire and Mr. H. P. Grattan, and, as announced, arranged for the stage by Mr. Shepherd, who is, in fact, the hero's representative. It is almost impossible to describe the plot of a drama so elaborately constructed, composed of such conflicting materials and extending over so large a period of time. The story, in the first instance, relates to a Count Max de Treves, who has a mistress and believes that she has a child, to whom he is about to leave his fortune by will. But another lady claims the child, and charges the Count's mistress with having robbed her of it. Before, however, the Count can alter the will which he has made, he is shot by his mistress's brother. And then, after a lapse of twenty years, it is discovered that the real mother of the child has become a ragpicker, and that the mistress who claimed it is still living in splendour; but neither has found the child. The latter is, in fact, wandering about Paris with her foster-brother, and at length falls in with the ragpicker, and finds a home for her. Achille Verdier, a former lover of the lady courtesan, but now a decrepit old miser, determines on vengeance for the neglect of his suit. This purpose he pursues as the great end of his life, and with it the young girl from the country who is the object of general search, and who, in the end, turns out to be the daughter of the cousin of Count Max, and the rightful heiress of his estate. A new burlesque followed the melodrama, and is entitled "Mad Fred," in reference to Lord Byron's sceptical drama-poem. It is clever, and proceeds from the pen of Mr. Duttnall, who has made it a medium for allusions to divers dramatic matters, besides its immediate theme. Thus we have Pepper's ghosts, Miss Bateman's Leah, Stella Cola's Juliet, Punch, The Comic News, and the casinos in Holborn and elsewhere. Mad Fred is a flunkey, partial to spirits, who summons old Bob Ridley, Leah, and Astarta to his lonely back room, ascends the roofs of some houses near old Hungerford Bridge, and is rescued from danger by Hawkseye, "the Strand Boys' Hunter." The success of the piece depends on the scene, which we have just indicated, and which has been painted by Mr. Johnson most effectively. Its principal feature is the view of St. Paul's in the distance, the spectator's imagination being assisted with suggestions of the new bridge, the railway, and the Thames' embankment, which form the topics of Mad Fred's rather long discoursing. Miss Esther Jacobs and Mr. T. Thorne, as Astarta and Mad Fred, not only sing and act with smartness, but cock-crow with a persevering vehemence which compels the audience to uproarious merriment, as fitting chorus to the Balcony-scene of the French actress. With these intimations of the contents of the burlesque, the reader will readily gather a notion of its general character and positive effect.

COLUMN FOR THE CURIOUS.

We have received from a Correspondent, for many years resident at Andover (about two miles from Enham), a note in correction of the statement referred to in our Column of Oct. 31. Our informant allows that the usual débris of Roman occupation—tesseræ (but very coarse), broken pottery, and, the labourers say, remains of wells—have been found at Enham, but not at all distinguishing it from other undoubted Roman sites in the neighbourhood; and if such remains denote a Roman *station*, several similar instances may be found within as many miles of the place. The coin called "Antoninus" was not found at Enham, but at several miles distance, and is not a coin of the Emperor Antoninus, but of Caracalla, who always appears as "Antoninus Pius" on his coins. Neither was the coin of Constantine found at Enham, but at Eastantown. The only coin known by our Correspondent to have been obtained on the site of the above remains is a denarius of Valens, found there forty years since. With regard to the intersection of the "*six* Roman roads," our Correspondent maintains that the Roman roads, properly so called, are the Port Way from Silchester to Old Sarum, crossed by that from Winchester to Folly Farm, near Marlborough; the point of intersection being more than a mile from the remains in question; and no other Roman road crosses the parish. The true site of Vindomun is still a problem; careful study of the Iter, our Correspondent thinks, will point to a different direction, and Silchester itself has as good a claim as any other place in the locality. The country round here was thickly peopled in the Roman times. Our informant has collected coins, &c., for some years, and the number brought to him has been surprisingly large. We may add that on the 4th inst. a very fine coin of Hadrian was found near the old brick kiln, not far from the old Winchester-road, whence our Correspondent had previously obtained a relic of Maximinian.

A "Confessional Chair" in a Protestant church is one of the curiosities of the ecclesiology of Wiltshire, and was not passed over by the Archæological Society of that county at their Congress held a few weeks since at Devizes. This relic of Roman Catholic times is preserved in the noble church of Bishops Cannings, which contains some of the most tasteful Early English architecture to be found in the county. At their recent visit the so-called sacristy, north of the chancel, was pronounced by the majority a chantrey chapel, the sacristy in Roman Catholic churches being invariably placed south. This chamber possesses also a recessed credence table, separate priests' door, and its own belfry. The worthy Vicar and churchwardens

"CONFESSIONAL CHAIR" IN BISHOPS CANNINGS CHURCH.

courteously welcomed the archæologists, who greatly admired the exquisite proportions, solid masonry, and stained glass of the church. The old chair stands in the transept; its purpose is an open question. Mr. Edward Waylen, of Lyecroft, calls it a "confessional chair," despite the grave authority of the late venerable Archdeacon of Wilts, who surmised it to be a "carrel;" "though," says Mr. Waylen, "the admonitory sentences on the painted hand at its back, and the attitude of the latter, plainly indicate the priestly act of conveying absolution to a penitent." "But," adds Mr. Waylen, "some will ask, how came a confessional to be retained in a Protestant church? The answer to which is supplied in the appointed offices of that church, which provide for the continued use of the tribunal of penance, as well as in the practice of many, both divines and laics, who, since the era of the Reformation, have resorted to it. Show me the statute or canon which abolished the Confessional in the Church of England." Mr. Waylen thus describes the inscriptions on the chair:—

Sentences on the hand:—On the thumb and the attached scroll—"Thou knowest not how much; thou knowest not how many times—thou hast sinned."

On the fore finger—"Thy end is bitter; thy life is short; thou art born—with sin."

On the second finger—"Thou shalt take away with thee nothing but what thou hast done; Thou canst not lengthen thy life; Thou canst not escape thy death—Thou shalt die."

On the third finger—"Thou knowest not *where* thou shalt go; Thou knowest not *how* thou shalt die; Thou knowest not *when* thou shalt die—The hour of thy death is uncertain."

On the fourth finger—"Thou shalt soon be forgotten by thy dear ones; Seldom will thy heir do anything for thee; Those to whom thou leavest thy goods will do little for thee—Thy state is miserable.

And on the large scroll under the fingers—"Thou shalt not be a man to others (*non homo cœteris*) if abundance flows to thee; Thou shalt not always be here; Remember that thou shalt die; Wealth shall vanish away; What thou hast here another shall have (*quod habes hic alter habebit*); Thy body shall rot; What thou doest shall remain with thee."

Here we have the *Manus Meditationis.* That it could not be meant for a priest is evident. Priests held no property except in trust, nor had heirs. Other things in its construction support the obvious conclusion to my mind that the Cannings folks possess one of the veritable confessionals at which their Catholic forefathers shrived.

There was at the meeting some demur as to Mr. Waylen's conclusions, by the Rev. Mr. Baron, on the ground that the position of the pointed hand differed from that of a priest in the act of pronouncing absolution, which, the rev. gentleman said, was with two fingers only extended. Mr. Waylen replied that that position of the hand accompanied the act of priestly blessing; but not when he makes the sign of the cross in consecrating the Host, &c., and absolving penitents. The only difficulty lies in the absence of a grating on the right side of the chair; but there might have been one originally, and the present wooden panel inserted in its place; or, had there not been a grating, the door, being on that side, could have been opened when a penitent approached for the performance of his duty. However, the opinions of the archæologists at their late meeting upon the chair seemed to be evenly balanced.

The Royal Mint has commenced a coinage of gold, which will occupy all the resources of that establishment up to February, 1864.

CURRENT LITERATURE.

Picked Up at Sea. By William J. Stewart. (3 vols. Sampson Low, Son, and Marston.) The title of this story will no doubt of itself suggest the nucleus round which the events of the narrative cluster; for it is in the main the history of one who, picked up at sea in his babyhood, through namelessness and countless difficulties wins his way by the force of his manhood to the name which is his by birth, the position which is his by inheritance, and the wife who is his by her own choice and his desert. Thus far there is, perhaps, no great originality of conception; but in the characters by whom the hero is surrounded, in the scenes wherein he is made to play a part, and in the choice of places for the enactment of those scenes, there is displayed an inventiveness of no mean order. There is, moreover, in the first volume, a freshness of tone and a vigour of style of which the modern novel affords but few examples. The plot is skilfully complicated and not unskilfully disentangled; and if it should seem, in the perusal of the tale, that more interest attaches to the underplot—to the loves of Rhoda and Colonel Le General—than to the main plot, involving the fortunes and misfortunes of Lilian Shirreff and George Garrison, the same may be said of many standard novels. But Captain John Critchett is the character in the book whom it is evident the author loved the best. He is without fear and without reproach—a simple sailor, frank of speech and guileless in heart; small of stature, but lithe withal; no brawler, but ready to strike when occasion warranted; full of tenderness, and truth, and courage, and manliness. Indeed, it is probable that the author's admiration for muscularity has led him occasionally to over-estimate the advantage of settling matters by the arbitrement of the fist; for, unfortunately, in this wicked world physical force is as often as not—we had almost said more often than not—on the side of him who wrongs his brother. The scene of the novel, though it shifts to London, to Canada, and to other portions of North America, is laid at the commencement on the banks of the beautiful Orwell, and many a spot thereby has been sketched in vivid colours. The actors in the various scenes are nearly all more or less connected with the Hudson's Bay Company or with the Canadians, to whom the company's monopoly was an intolerable grievance, and this fact enabled the author to weave into the web of his story schemes and counter-schemes which tend to the temporary retardation but ultimate development of the main issue. Here and there is observable a tendency towards the melodramatic; and now and then may be noticed a discrepancy, for which the circumstances we have alluded to sufficiently account. But with its merits, which are many, and its imperfections, which are few, it will be read with pleasure and admiration. Very painful were the feelings with which we proceeded to touch upon this book. A kindly face which we shall see no more came vividly before us, and we were moved by the recollection of a warm heart which had ceased to beat. The hand which wrote the words we read is cold in death; the active brain which wove the plot is quiet in the grave; and the soul which speaks in the printed page has returned to Him who gave it. Bear with us, reader, whilst we make our moan, and pay our tribute to the dead. The author was taken from our midst before his prime—before he had reached the earlier half of his three score years and ten. Yet already he had won his spurs in the close-fought fields of literature; and he was struggling bravely to the front. Several untoward events, as the preface tells, combined to delay the publication of this, the last—the posthumous—work of the author. Serious illness—but not so serious as to preclude fair hope of recovery—had fallen upon him as he laboured conscientiously to reshape where it was advisable and revise where it was necessary the fabric he had all but completed; and, even whilst he suffered from one disease, another took him suddenly away. The fell disease which lurks about the heart and stops its beating in a moment of time removed him when his last chapter was still unfinished. But a friendly hand has supplied the deficiency; and the novel bears evidence, under all its disadvantages, that a star has dropped from the firmament of fiction.

A Day's Ride: a Life's Romance. By Charles Lever. (2 vols. Chapman and Hall.) If ever any man earned a right to do as he pleases in the way of literature, Mr. Lever is assuredly that man. The readers of his earlier works must have received from them so much pleasure as to feel bound in gratitude to find no fault with, even if they cannot go so far as to read, whatever he chooses to set before them. We are in that predicament. Having so often laughed at his fun; having so often read with 'bated breath his stories of perilous adventure; having felt our pulse throb with excitement and emulation at his descriptions of heroic achievements; having taken impossible leaps in his company; having made the wildest love to the most charming maidens under his guidance; having fought the most gentlemanlike but most desperate duels under his tuition; having played the most outrageous tricks under his protection; and having shared the most glorious repasts on his introduction, we hardly feel at liberty to express a doubt about the excellence of any of his romances. But it may be allowed, perhaps, to the most fervent believer in "Harry Lorrequer" to "hint" (as Mr. Chucks would have said) "in the most delicate way in the world" that Mr. Lever's last work—the last, at least, that we have seen—is scarcely worthy of the genius of Mr. Lever. Let it not be for a moment supposed that there are no evidences of that wonderful genius; there are scenes and descriptions, not few but many, which rejoice the heart and tickle the fancy. But we have been accustomed to devour the whole of his books; and to find oneself obliged to leave some and force some down is a sensation as disagreeable as it is uncommon. The explanation of the phenomenon, however, is easy: the author has chosen an unpalatable hero, who is a liar, a coward, a braggart, a greenhorn, and everything which is contemptible. Now, however tolerable and even amusing a character of that description may be when he only pops up now and then, he is utterly unbearable as the principal actor; and however ludicrous and grotesque the scenes into which his qualities drag him, your inclination to laugh is overpowered by disgust. It is useless for Mr. Lever to employ, as he does, his pleasantest syle, and introduce the most delightful episodes; you are haunted all the while by an appalling dread of the reappearance upon the stage of Algernon Sydney Potts. Mr. Lever certainly teaches a truthful, but we hope, for humanity's sake, not a very useful, lesson; still, the "disgusting example" is so very disgusting that you sicken at the sight, and can scarcely pardon so black an Ethiopian when he changes his skin and sings *peccavi* to sweet Kate Herbert.

Social Life in Munich. By Edward Wilberforce. (1 vol. W. H. Allen and Co.) The outside is, according to our author, pleasanter than the inside of Munich; which fact, considering that it is the inside more particularly of which he has undertaken to discourse, is, as he pertinently remarks, a matter of regret. It was hoped that, when King Maximilian had succeeded King Ludwig, and Lola Montez had ceased to act Egeria to the Bavarian Monarch's Numa, social life in Munich would be quite unexceptionable; but Mr. Wilberforce has bitter fault to find with its habits, manners, and customs. His remarks upon illegitimacy represent that social sore as being in a very bad state. This he attributes to the stringent restrictions exercised over marriages by the Government, which, according to his account, would seem to preclude from entering the holy state of matrimony all those who cannot give the almost impossible assurance that they will be able to support a wife and any amount of family with which it may please Providence to visit them. Marriage is no doubt an important feature in social life, and Mr. Wilberforce was quite right to give a whole chapter to the laws which in Munich regulate it; but it is almost the only feature of what is generally considered social life which he has treated of in the manner one would have expected. His book is principally made up of observations which might have occurred to any foreigner unadmitted to the private family circles of Munich; of remarks which he has heard from others; of quotations from books; of criticisms upon the public buildings; of dissertations upon art; of anecdotes concerning King Ludwig; and of matter which might have been easily gathered together by a chance traveller through Bavaria. It is due to him, however, to say that his style is such as to make his book extremely readable, though its title may lead to some disappointment.

A Cincinnati paper complains of the number of young ladies who, excited by the numerous stories of women soldiers in the army, will persist in appearing in public in that city in male attire.

NEW BOOKS.

THE NEW NOVELS.—Now ready at all the Libraries,

THE WIFE'S EVIDENCE. By W. G. WILLS, Author of "Notice to Quit," &c. 3v.

BARBARA'S HISTORY. By AMELIA B. EDWARDS, Author of "My Brother's Wife," &c. 3v.

QUEEN MAB. By JULIA KAVANAGH, Author of "Nathalie." Second Edition. 3v.

THE BROWNS AND THE SMITHS. By the Author of "Anne Dwyer." 3v.

RUNNY and BLACKETT, Publishers, 13, Great Marlborough-street.

Now ready, in 1 vol. 8vo, with Illustrations, 14s.

MAJOR GENERAL CAMPBELL'S HISTORICAL MEMOIRS of the SEPOY MUTINY, with a Narrative of his Personal Adventures, for the Suppression of Disaffection.

MEMORIAM CAMERON, FEMALE CONVICT. Syrian Author of "Female Life in Prison." 2v. 21s.

THE CHRISTIAN ANNUAL, AS DEDICATED IN PROPHECY. By the Rev. J. CUMMING, D.D. 7s 6d. (Just issued).

RUNNY and BLACKETT, Publishers, 13, Great Marlborough-street.

Demy 8vo, extra sd., 6s. 6d.; bd. mor. 12s.; mor., 18s.; free by post.

LIFE: its Nature, Variety, and Phenomena. By the Rev. JAMES HINTON.

Mr. Grindon is evidently a thinker of great originality."—Rock (Quarterly Review).

THE ILLUSTRATED LONDON NEWS.

No. 1233.—VOL. XLIII. SATURDAY, NOVEMBER 28, 1863. WITH A SUPPLEMENT, FIVEPENCE

THE ALEXANDRA.

THE court in which pleas between the Crown and the subject are tried has been for many days the scene of an elaborate forensic exercitation; and though the matter in question has been a dry point of law—the construction of a single word in an Act of Parliament—public interest has been as strongly represented by a crowd of eager listeners as if some sensation trial was on hand. At least, the subject involved in the case of the Alexandra has the attraction of novelty. In itself contracted within a very narrow circumference, and affecting a right which can concern but a very limited class of persons, and under very peculiar circumstances, yet it is associated with such vast national and international interests—it bears within it the seed of such great events—that thinking men must feel that its importance cannot be over-rated. In a single phrase in a statute, which has lain rusting so long that the oldest Judge on the Bench confessed himself inexperienced and perplexed with regard to it, are comprehended questions of duty and honour, as between this nation and another, on which may depend issues of peace or war, which are viewed in this country with special consideration. Averse as Englishmen are to war for any idea, they view with particular aversion hostilities with America. They, at least, have not ceased to regard such a contest as one which would partake of an internecine character; and they have therefore borne with creditable patience all the bluster of the North and, so to speak, the feminine petulance of the South, while endeavouring consistently to observe that neutrality which they conceive to be a simple duty. In considering this subject of the Alexandra—that is, the fitting-out of ships in this country which may be used in the service of either of the American belligerents—it seems to us that the object which we in England should have solely in view is the preservation of neutrality. When eloquent lawyers have refined for days, to that issue the matter must come at last.

The gist of the question—indeed, the whole question—is contained in the seventh clause of our Foreign Enlistment Act; and

THE CROWN PRINCESS OF PRUSSIA (PRINCESS ROYAL) LAYING THE FIRST STONE OF ALL SAINTS' CHURCH, AT WINDSOR, ON SATURDAY LAST: THE ASSEMBLY SINGING THE 84TH PSALM.—SEE PAGE 525.

to this test all the arguments must be brought, and by it all the decisions guided, reference being always had to the manifest spirit and purport of the Act. By that seventh section certain things are declared to be illegal and to subject the doer of them to the penalties of a misdemeanour. The cause for this enactment is stated in the statute to be that such acts may be prejudicial to and tend to endanger the peace and welfare of the kingdom, and, because the laws in existence are not sufficiently effectual for preventing such acts, it is necessary to supplement them by this special enactment. If proceedings to which the seventh section applies are not illegal or are calculated to have the dangerous tendency thus specified, and could not have been prevented by any provision of the existing law, it is obvious that it was the aim of the Legislature to repress this mischief by means of newand particular legislation. In this instance our common and statute law, as well as international law, were insufficient to meet a case which had arisen, and one which involved the principles and the practice of neutrality. It is this supplementary municipal law that is now on its trial; and it remains to be seen whether, assuming as it does a special offence, it can be construed with sufficient clearness and definiteness to put an end to all uncertainty on points which, under the peculiar circumstances of the case, are likely to be constantly cropping up.

With all respect for the great skill and ability which have been exhibited by the advocates on both sides we venture to think that much of their labour has been practically thrown away. The real object to be attained is to explain and give a practical bearing on the facts, of the language of the statute. For this purpose the defendants' counsel entered into elaborate conjectures as to what the intentions of the Legislature were; and the very singular, not to say unusual, course was adopted of referring to the Parliamentary speeches of statesmen who took part in the discussions during the passing of the Foreign Enlistment Act. In this range of argument continual reference was made to a similar measure which was passed by the United States, and to the interpretation which was put upon it by American Judges. For purposes of philosophical illustration this was all very well, but it certainly expanded the compass of the argument in a somewhat unreasonable degree. In a few words, the real matter in issue seems to be that the Crown lawyers found themselves unable, if not altogether, on the intent with which vessels were built for one set of belligerents at war with another set with whom we are at peace, and the purpose for whom they are working; while, on the other hand, the case of the owners of the vessels was made to depend on the nature of the acts by which it is alleged that the law has been broken. Stripped of all redundancy and reduced to simple propositions, these have been the subject-matter of the lengthy arguments in the Court of Exchequer.

From those who have paid the least attention to the case are probably aware that the section in question prohibits the knowingly being concerned or aiding in the "equipping" of any vessel, with the intent that it shall be employed in the warlike service of any foreign State with which we are at peace with this country. In the construction of this little word "equipping," taken with its context, is the point, apparently so knotty, which is to be determined. The argument for the Crown is that, given the intent, any equipment, though not overtly warlike, and even if it is only preparatory, no bellicose fitting until it passed into the hands of a foreign Power, would be sufficient to bring the case within the statute. Prove the intent, and the misdemeanour is complete. Now, as far as we are able to judge, it seems to be admitted that the Alexandra was intended for sale to the Confederate States; and, that being so, what have her builders and equippers to say for themselves. They affirm that the equipment, to come within the Act, must be patently warlike, and that the intent is not to be gathered from any other than fact. May, further, they even urge, and it is not denied, that a ship of war may be openly built in this country and offered for sale to any person who may choose to purchase it; and yet such a proceeding would not come within the prohibition of the Foreign Enlistment Act. But it is quite possible that in such a case, and without any actual contract with a belligerent State for the fitting out such a vessel, it may be surrounded by circumstances which might enable the Crown lawyers to come down upon it with their cry of intent, and, if they could prove their inferences would satisfy a jury, to enforce the law as it now stands. It is, we will not say easy, but possible, to suggest cases which would be equally breaches of neutrality in theory and practice with that particular Act with which we are now dealing; but that may arise from the imperfection of law; and it is no argument to say that because the law does not touch one offence it cannot or ought not to reach another which may be more specifically indicated. Every one knows that the meshes of Acts of Parliament are not always effectual to hold every fish which they were designed to entangle; but when one of the interstices is powerful to capture it would not be cast aside in deference to its more lax companions.

In considering this subject to the best of our ability, we venture to hold with the Crown, and to think that, looking, as we have already said, to the spirit and intention of the Act of Parliament, if there is sufficient evidence of the intent to convey the Alexandra, for warlike purposes, into the service of the Confederates, mere justice has been done by her seizure. The great object for which we contend *quoad* the Americans in their terrible struggle is, neutrality pure and simple on the part of England—"True, Tyrrione." Federal or Confederate, without exactly saying "a plague on both your houses!" Let us not meddle in any way in their quarrel by comforting or assisting either of them. No doubt there is a good deal of prate about large supplies of guns and warlike stores being allowed to be sent to the Federals with impunity; but the moment a ship is built for the Confederates a partial Government interferes. But it should be remembered that in all cases of contraband of war the parties who engage in the traffic do so at their peril. The Confederates are acknowledged belligerents, and they may capture any articles contraband of war they find in British vessels destined for Northern ports, and no redress could be even asked by the losers; while the owners of vessels attempting to run the blockade of the Southern ports know exactly what they are doing. This is no question of sympathy or sentiment; it is no question of the rights or wrongs of the belligerent parties; but it is one of neutrality or duty on the part of this country. If in the event the decision of the Courts should be adverse to the Crown in the case of the Alexandra—if her seizure has not been justified by existing law in the interests of strict international neutrality, we contend that what we conceive a defect in the Foreign Enlistment Act should be supplied by legislation.

FOREIGN AND COLONIAL NEWS.

FRANCE.

There are good grounds for believing that no European congress will take place. The new King of Denmark, the Swiss Confederation, and the Queen of Rome have, however, in a general manner, accepted the proposition of a congress. The Sultan, who has views favourable reply to the Emperor's invitation, expressing at the same time his intention of being present thereat in person. Lord Cowley delivered, last week, the reply of Queen Victoria, stating that, as a Constitutional Sovereign, her Majesty was obliged to leave decision in the hands of her advisers; and it is now certain that, if there be a congress, England will not be represented thereat. The last Cabinet Council on the subject, held on Wednesday, the reply was finally settled, and it was decided that England will take no part in the proposed congress.

A bill has been submitted to the French Council of State asking supplementary credits for 19,000,000f. to be voted in addition to the expenses of the Mexican expedition.

The Corps Législatif, lately removed from the Place Vendôme, having been cleaned and repaired, has been placed on its new pedestal in the Rue de Bourgogne. It is more than 40 metres in height of only 30 ft. from the ground, it looks to greater advantage than it did in its former position at a distance of upwards of 100 ft.

Prince Charles-Napoleon Bonaparte, grandson of King Joseph, and son of Charles-Lucien Bonaparte, the well-known naturalist, has just left Paris for Algeria with the rank of Captain in the Foreign Legion.

The Academy of the Beaux Arts has elected Mr. Donaldson to be a foreign corresponding member in the room of Mr. Cockerell, deceased.

A new garden for the recreation of the working classes is about to be opened at Asnières, Clichy, Batignolles, one of the northern suburbs of Paris. This new garden, or, more properly, park, will be the largest within the fortifications of Paris, covering a space of fifty acres—nearly double the area of the Champs Elysées, which it will much command the finest view. It is to be, like other public gardens, planted with trees and forming a miniature forest, like the botanical gardens of La Muette, near Auteuil.

The new iron-plated steam-frigate, called the Numancia, was launched on Thursday week at La Seyne, near Toulon. This leviathan is an iron frigate completely plated over a teak sheathing, and carries 40 guns of the largest calibre. Ferol being the only Spanish dockyard *en barbette* on her upper deck. She is to be rigged as a sailing-frigate, and her sails, in a single piece, were brought from the forests of California. Her machines are nominally of 1000-horse power, but the power may be increased to 4000 horse. Her coal-bunkers contain 1000 tons, and her crew will consist of 700 men. Her length on the deck is 280 ft., her breadth 52 ft., her draught of water 23 ft. Her two pilots are 13 centimetres thick, and weigh 1,200,000 kilogrammes. Her armour has been tried against the heaviest shot, and is supposed to be bullet-proof. Notwithstanding her great weight, which exceeds 7000 tons, it is expected that this frigate will possess extraordinary velocity, and will be capable of manœuvring in spite of the immense power of her screw, as well as from her admirable lines.

SPAIN.

In the Senate the Minister of the Interior stated, on Saturday, that the vices of the civil, military, and religious organisation had provoked the insurrection in San Domingo. A rumour has reached Madrid that the insurrection is spreading. Of two American ships laden with arms and munitions for the San Domingo insurgents.

The question of the limits of Gibraltar has been decided. Moley Abbes orders the indemnity of the proprietors of the lands.

PORTUGAL.

The King and Queen have left Lisbon for Oporto, to make a short tour in the south.

There has been a great fire in Lisbon. It broke out on Thursday se'nnight in the building of the Bank of Portugal, and spread to the Municipal Chamber, the Fidelity Insurance Office, and the adjacent shops and houses. Several lives were lost. The records of people in the bank was saved, except several documents in the Municipal Chamber.

ITALY.

King Victor Emmanuel returned to his capital on Sunday, having on the way stopped at Bologna to call upon General Cialdini.

The King has contributed a sum of 200,000f. out of the civil list towards the erection of the new hospital at Naples.

There has been a debate in the Chamber of Deputies on the commercial and financial treaty concluded with Austria. The Chamber rejected a proposal for the suspension of these treaties.

PRUSSIA.

A Royal decree has been published, at the instance of the Ministry, in conformity with article 63 of the Constitution. The decree withdraws the order of the 1st of August relating to the prohibition of newspapers and periodicals.

In Tuesday's sitting of the Chamber of Deputies a Government bill was laid on the table relative to military service. With the exception of some changes in the wording, it is the same measure as was presented last Session. The active stipulation of three years' service is maintained.

In Monday's sitting of the Lower House, Herren Stavenhagen and Virchow, in the name of the Liberal factions, made the following motion:—"The general interests of Germany demand that all German States should support the rights of the hereditary Prince Frederick to the duchies of Schleswig and Holstein."

GERMANY.

The King received the assembled Rigsraad yesterday week. His Majesty thanked the President for his address, and stated that the new common Constitution for Denmark and Schleswig has only just been sanctioned because it was an important step, that he had been desirous of carefully weighing, as the Rigsraad had also done. Great cheering proceeding from large numbers of people, the King and his family stepped out upon the balcony and bowed their thanks.

The coronation of King Christian will take place, according to the Copenhagen journals, in the Danish capital early in January.

THE KING'S MANIFESTO.

The following is the text of the Royal proclamation, read by the President of the Council in the Rigsraad:—

We, Christian IX., by the Divine favour King of Denmark, address our Royal salutation to the Rigsraad.

Our predecessor on the Throne, King Frederick VII., of glorious memory, died yesterday at the chateau of Lyckesborg, and with him is extinguished the male branch of the dynasty of Frederick III., who with justice and clemency has swayed the sceptre over this country. In the midst of facts full of danger Frederick VII. found his strength in the love of his cherished people and, remaining to the end of his days faithful to his word, he has made the liberty of his kingdom a monument which will be preserved with blessings until the last remote times.

In according the Throne conformably to the law of succession given to the Danish monarchy, we have, by oath, given the pledge that the maintenance of the common prosperities, and a communication to that effect will be made to the Rigsraad.

We pray the Supreme Being to succeed us by force for that work, full of responsibility, to which he has called us, so that we may be able to inherit the confidence with which, during difficult times have been the support of our predecessors of immortal memory.

Averting the sadness of the Royal Funeral of our Father, we recommend you to God.

Done at our chateau of Christiansborg, Nov. 16, 1863. CHRISTIAN IX.

The Rigsraad responded to the proclamation by cries of "Long live the King!"

THE SCHLESWIG-HOLSTEIN QUESTION.

The enemies of King Christian, in his capacity of Duke of Schleswig and Holstein, are actively besirring themselves.

Some of the Schleswig-Holstein party attempted to hold a meeting in Hamburg, but were dispersed by the police. They succeeded, however, in holding meetings in a neighbouring village, and voted addresses to the Prince of Augustenburg and to the Duke of Saxe-Coburg.

Twenty-four members of the Holstein Diet have addressed a petition to the Germanic Confederation in support of the claims of the Prince of Augustenburg.

The committee of the National Verein have issued an address to the German Princes and people calling on them to maintain the rights of Germany and the duchies.

The Upper Chamber of the Saxon Diet has passed a strong resolution in favour of the independence of the duchies.

A resolution to the effect that the honour and interests of Germany require all German States to support the Prince of Augustenburg's rights to Schleswig and Holstein has been moved in the Prussian House of Deputies.

In Tuesday's sitting of the Chamber of Deputies at Darmstadt it was unanimously resolved to request the Government to maintain the right and integrity of Germany by the recognition of the Prince of Augustenburg as Duke of Schleswig and Holstein.

Prince Frederick of Augustenburg has notified to all the Governments composing the German Confederation that he has assumed the dukedom of Schleswig-Holstein, and has appointed a representative at the Diet.

The Federal Diet is preparing to consider proposals made by several German Governments respecting the Holstein and Schleswig "succession question," and the effect that Austria and Prussia have the new Constitution of Denmark and Schleswig.

Meanwhile South Holstein is vigorously preparing to resist any attempt to dismember the monarchy, has called out 11,000 soldiers to complete the war establishment of the army, and has ordered a squadron to be fitted out.

SWEDEN.

Orders have been dispatched to Carlscrona to prepare screw ships for sea, and to recall the Swedish war-steamers from the coast of Gefle from the Atlantic. In Monday's sitting of the Diet the Government applied for an extraordinary credit of 3,000,000 thalers for military armaments.

THE POLISH INSURRECTION.

The National Government has published four addresses, bearing 250,000 signatures, protesting against the addresses of loyalty extorted by Count Mouravieff, and expressing entire devotion to the National Government.

The proclamation of the National Government has just been issued at Warsaw denying the rumours proceeding from Russian sources that the Poles were on the point of laying down their arms. The proclamation announces that the object of the war is the means of saving the country. It also states that the forces of the insurrection are so formidable that the Russians have all themselves unable to govern otherwise than by fire and sword.

Official accounts announce a victory of the Polish insurgents over the Russian troops in the palatinate of Lublin.

AMERICA.

There had been no general engagement in Virginia, though energy-thing bokened the likelihood of a terrible struggle at no very distant period. The whole Confederate army, which is said to have been surprised by the sudden advance of the Federals to the Rappahannock, had retired across the Rapidan. During the operations of the 7th, 8th, and 9th inst., including the capture of the Confederate works on the Rappahannock, General Meade had, according to his official report, taken 2000 prisoners, four guns, 2000 stand of arms, and some waggons. At the latest dates from Virginia it was strongly intrenched south of the Rapidan, and General Meade's army was posted between the Rapidan and the Rappahannock. It was believed some forces on the north side; for Kilpatrick's camp, near Stevensburg, had been shelled by the Confederates.

Official accounts of the 13th inst. from Chattanooga and Knoxville represented that "all was quiet," and the information concerning the forces of General Burnside was apparently superseded by the statement by General Foster, was said to be "favourable." Previous despatches stated that General Longstreet, with 16,000 Confederates, had been detached from General Bragg's army for the purpose of entering East Tennessee, and that his progress in the direction of Knoxville was marching against General Burnside, who had concentrated his troops at Knoxville. These outposts had been overwhelmed by superior numbers at Rogersville, some sixty miles from Knoxville; and, as we had already been informed, 600 prisoners and four guns there fell into the hands of the Confederates, who may probably be about to advance from Virginia.

The Federals were keeping up a slow bombardment on Fort Sumter, and apparently with very little effect.

No very vivid has been received from General Banks's expedition since it sailed from New Orleans, and it was consequently thought that General Banks might have proceeded to the mouth of the Rio Grande instead of Sabine Pass.

The Federal Texas expedition had received a check, and was returning to Galveston.

Lord Lyons had communicated to the Government at Washington the fact that a Confederate privateer had been discovered in Canada. The object was to seize the steamers on Lake Erie, liberate the prisoners in Fort Johnson, and burn the lake cities. Precautionary measures were at once taken.

The Supreme Court of Pennsylvania, by a majority of its Judges, had declared the Conscription Act to be unconstitutional.

The workmen's strike in New York was assuming formidable dimensions, and causing much uneasiness.

CHINA.

A telegram by way of Suez brings news from Shanghai to Oct. 9. An attack on Soochow was imminent, reinforcements having been sent to the attacking force.

Some years ago it was almost doubted whether the existence of the reported city of Hsi-ning-fu, in the Kan-Sing, was not a myth—a pet invention of the Jesuit missionaries. A description, by Captain Alexander Hill Gage, R.N., in the Shanghai *North China Herald*, has just come down the Yang-Tse from Hankow, in a British ship of a thousand tons, drawing upwards of nine feet of water, and full of tea, shows how vastly things have changed in that quarter of the globe with reference to European intercourse. We are told—

The voyage is not attended with greater risk than that up and down the river by which we reach Calcutta. In this far-away city in the centre of China there is at this day a space of ninety acres cleared for British residences. From fifteen to twenty British hongs—we should call them palaces in Pall-Mall—are rising; the coolitudes are tracing out the lines of a church, and are approving plans of a clubhouse; and "the municipal council" are engaged in laying out public walks and in constructing roads. There are some difficulties about the anchorage; but four ships of large tonnage have sailed laden with tea this season, and it seems more than probable that our British ships will take up their cargoes of teas to the very emporium to which all the markets of

China are but tributaries, and will bring them home, bulk unbroken, to the Thames. In less than five years the river has been buoyed, lit up, and mapped with as accurate a survey as we have of the Mersey or the Medway; and as the great ships float swiftly down, laden with their precious freights, and pass the ruined haunts of the Taepings, they ask for nothing but a fair protection from piracy to make the intercourse between the centre of China and the port of London direct and secure.

JAPAN.

The news from Japan is indefinite but unfavourable. Armed men were appearing at Nagasaki, and Prince Satzuma and other Princes were preparing for war.

Despatches from San Francisco, conveying news from Hakodadi to the 6th of October, state that the Japanese authorities at Nagasaki had ordered all foreigners to quit Japan, but that the foreigners had, of course, refused to obey the order. Several of the Tycoon's ministers had been dismissed because they were desirous of preserving peace with foreign nations.

A telegram from Hong-Kong, under date the 26th ult., states—A French officer had been murdered by the Japanese; immediate reparation was demanded, and war by the combined French and English force was generally expected.

CHURCH AND UNIVERSITIES.

The Archbishop of Canterbury has conferred the degree of Doctor of Divinity on the Rev. John Kidger Tucker, the agent on behalf of the British and Foreign Bible Society for the Australian Colonies.

The Rev. Dr. Trower, the recently-appointed Bishop of Gibraltar, arrived at Malta on the 7th inst., by the mail-steamer Vectis, from Marseilles. He was accompanied by Mrs. Trower and three daughters.

The new church of Holy Trinity erected at Lee by Mr. Lewis Glenton, of Blackheath, at a cost of £10,000, was on Thursday consecrated by the Bishop of London, assisted by the clergy of the diocese.

The corner-stone of the new chapel of All Saints, in connection with the County Lunatic Asylum, at Morpeth, was laid on Saturday. Lady Elizabeth Grey officiated; and the proceedings were witnessed by a large and influential assemblage.

The Rev. J. A. Major, Head Master of the Carmarthen Grammar School, has been elected to the mastership of the Crypt Grammar School, Gloucester, in the place of the Rev. T. E. Brown, who has accepted the second mastership of Clifton College. There were ninety candidates.

On Tuesday week was consecrated the Church of St. John the Evangelist, Colchester: it is intended by the Incumbents of Myland, Ardleigh, All Saints', St. Botolph, and Greenstead, Colchester, for outlying portions of their parishes. The Rev. J. T. Round, the Rector of All Saints', having died before the commencement of the building, the chancel and a portion of the nave have been erected with a fund raised to his memory, amounting to £900.

On Wednesday week the Bishop of Oxford consecrated the Church of All Saints, at Great Bourton, in the parish of Cropredy, which has just been rebuilt, under the direction of Mr. William White. The old building had been desecrated and secularised. It stood on a picturesque mound by the roadside in the midst of the village, and still retained somewhat of its original form and detail. Entire rebuilding was necessary, but every feature of the old portions has been preserved.

An effort is being made to place the English church at Baden-Baden on a better footing. Hitherto the services have been conducted under great inconvenience and difficulty. Services have been held in the summer in the Hospital Church, which is also used by the Roman Catholics and German Protestants. In the winter the dining-room of the Hotel d'Angleterre is the only available place. It is proposed to build a suitable church at a cost of £2000. The site is granted by the town; nearly £1000 has been subscribed, and a loan of £500 is offered by the Society for the Propagation of the Gospel.

The following testimonials to clergymen have recently been presented:—To the Rev. J. B. Heard, on his resigning the pastorate of Percy Chapel, Charlotte-street, Fitzroy-square, an elegant inkstand and blotting-case, also a purse containing forty guineas. To the Rev. T. Wilkins, Ecclesfield, a beautiful black silk gown and a timepiece, by the ladies of his congregation. To the Rev. R. Smythe Hopkins, late Curate of Lydbrook, Gloucestershire, by his congregation, a handsome marble timepiece, on the occasion of his promotion to the incumbency of Hilderstone, Staffordshire.

On the 10th the parish church of Swanbourne, Bucks, was reopened after extensive repairs and a general restoration, under the direction of Mr. Wilkinson, the architect. The chancel, which is a fine specimen of Early English architecture, has been entirely reproduced at the cost of the lay impropriator, Sir Thomas Fremantle, Bart. The remainder of the church has been well restored by the aid of a considerable sum borrowed on security of the church rates, assisted by local and other contributions, which the Vicar of the parish, the Rev. J. Niven, has been mainly instrumental in raising, he himself and Mrs. Niven being also large subscribers.

The sixth annual report of the Poor Clergy Relief Society, recently issued, is favourable to its progress. An increase of income is shown, the contributions having been considerable, and the total receipts from all sources amounting to £3866 19s. 3d. for the year. The expenditure during the same period was £2706 6s. 11d.; and the "balance in hand" is set down as £1060 12s. 4d. This, however, includes £840 forwarded to meet special cases, the total in hand for ordinary purposes thus being £220 12s. 4d. The sum disbursed to 234 recipients during the year was £2025, in addition to which large parcels of clothing have been sent out weekly to a number of applicants.

The parish church of Cherhill, Wilts, after having been under repair for more than six months, was reopened for Divine service on Sunday by the Hon. and Ven. Archdeacon of Wilts, assisted by the Rev. W. C. Plenderleath, Incumbent, and several other of the neighbouring clergy. The recent restorations comprise the building of a new vestry and the entire refitting of the interior of the church, which has been done at the expense of Mr. G. H. Walker-Heneage, the lord of the manor. A new open-work roof has also been put upon the chancel at the expense of the Incumbent, aided by a contribution of £21 from the Marquis of Lansdowne.

Preferments and Appointments.—The Rev. H. Bailey, B.D., Warden of St. Augustine's College, to be Honorary Canon of Canterbury Cathedral. *Rectories:* The Rev. E. B. Mynor to Ashley, Duchy of Lancaster; Rev. J. Cox to Wickersley, York; Rev. C. Warner to Henley-on-Thames; Rev. R. M. White to Fairstead, Essex. *Vicarages:* The Rev. M. R. Barnard to Margaretting, Essex; Rev. J. M. Bury to Tickhill; Rev. C B. Coney to Fleet, Dorset; Rev. E. Eliot to Norton Bavant, near Heytesbury; Rev. T. M. Jackson to Osbournby, Lincolnshire. *Incumbencies:* The Rev. J. Booker to Benhilton, Sutton; Rev. C. Campe to Christ Chapel, St. Marylebone. *Chaplaincies:* The Rev. F. V. Mather, St. Paul's, Clifton, to the Lord Bishop of Gloucester and Bristol; Rev. G. Thomson to St. James's Home, Whetstone. *Perpetual Curacies:* The Rev. T. Beamish to St. Saviour's, Harome, Helmsley; Rev. G. Beardsell to All Saints', Preston; Rev. C. E. Bowdon to Bardsea, near Ulverstone; Rev. W. Duckett to Branksea, Dorset; Hon. and Rev. W. S. T. W. Fiennes to Wentworth; Rev. W. Basil Jones, Canon of Grindhall, York, to St. Mary, Haxby, near York; Rev. A. H. Sitwell to St. Peter's, Stepney; Rev. W. F. W. Torre to Headingley; Rev. P. J. Watts to Nether Witton. *Curacies:* The Rev. R. V. Blathwayt to Folke; Rev. L. M. Carter to St. John, Toxteth Park, Liverpool; Rev. E. V. Hall to the Parish Church, Brighton; Rev. W. Horne to St. Ann, Limehouse; Rev. O. C. Huntley to Chislehurst; Rev. F. W. Janvrin to Coombe-Keynes with Wool, near Wareham; Rev. J. Kennedy to Gorton; Rev. B. Lambert to Hillingdon; Rev. F. Lewis to Wotton Fitzpaine; Rev. C. Lock to Puddletown; Rev. E. H. Lloyd to Dinton-cum-Teffont Magna; Rev. J. Mansell to St. Thomas, Portman-square; Rev. W. V. Palmer to Compton Abbas; Rev. G. A. Poole to Melcombe Regis and Radipole; Rev. G. P. Pownall Dean of Perth, Western Australia, to Isleworth; Rev. S. Pratt to Darrington; Rev. F. Randall to Hemingbrough; Rev. J. Reece to Handsworth Woodhouse; Rev. F. E Smith to Harlington; Rev. J. Swainson to Scawton; Rev. C. Voysey to Healaugh; Rev. W. Warren to Trowbridge; Rev. O. Wilkinson to Little Munden; Rev. A. Withers to Birkin-cum-Chapel, Haddlesey.—*Guardian.*

We have from time to time briefly noticed the doings of the St. Clement Danes' Mission House, one of those institutions which noiselessly work their way, remote from public gaze, yet accomplishing a world of good. This mission house is situated in St. Clement's-lane, Strand. It originated with the Rev. R. H. Killick, Rector of St. Clement Danes, and some Christian friends, in a desire they had entertained of providing some central establishment, where it would be possible so to concentrate the varied benevolent operations of the parish as to bring them to bear with greater force on the surrounding neighbourhood. The home was commenced on Feb. 17, 1862, being opened by the Bishop of London, and had for its object, not only to combine the numerous agencies at work in different parts of the parish for the benefit of the poor, but also to open up additional sources of usefulness. Among the projects set on foot at the mission house, and now in full operation, are a needlewomen's home, and a home for female servants out of place, a laundry, and a clothing club. Sunday and night schools are held here, and cottage lectures are given on Sunday evenings. Not the least important item of the mission house is its kitchen. From two hundred to three hundred dinners weekly are disposed of among the labouring classes only—a wholesome, substantial, and tastefully-prepared dinner being provided for fourpence. The bread baked in the home is also much valued, as it is thoroughly good and supplied to the poor at the lowest possible price. Unhappily, the funds have by no means kept pace with the useful work going on here, and have not yet been sufficient to set it free. Increased means would result in increased usefulness, freeing the Rector, on whom the chief, if not the sole, responsibility of the home rests, from pecuniary anxiety, and enabling him proportionably to extend the benefits of this unostentatious and excellent institution.

LATEST NEWS FROM ABROAD.

The following telegrams were received yesterday (Friday) through Mr. Reuter's office:—

The Schleswig-Holstein Question.—Berlin, Nov. 26. At the sitting of the Prussian Chamber of Deputies to-day Herren von der Heydt, Wagener, and Blankenburg proposed the following resolution, on behalf of the Conservative party:—"In the present position of the succession to the duchies of Holstein, Schleswig, and Lauenburg the House declares itself ready to place all requisite means at the disposal of the Government, for the energetic guardianship of all the rights of the German Confederation."

Dresden, Nov. 26.—In to-day's sitting of the Chamber of Deputies the proposition relative to Schleswig and Holstein recognising the rights of the Prince of Augustenburg, and promising the Government the support of the Chamber, was unanimously adopted.

Denmark.—Copenhagen, Nov. 26.—His Royal Highness the Prince of Wales has been created a Knight of the Order of the Elephant. The *Dagbladet* of to-day says:—All the Custom-house officers and the Post-office and telegraph officials in Holstein, all the members of the Government in Plöen, together with the sub-employés and all the Prefects of Holstein have taken the oath of allegiance to the King. Several of the most prominent members of the Holstein nobility have arrived here and been received by the King.

Revolt of the Arab Tribes.—The Paris papers of Nov. 26 publish the following telegram from Alexandria:—"Djeddah, Nov. 15. The Bedouins in the vicinity of Mocha have revolted, pillaging the coffee crops and other produce. Djeddah and Mecca are quiet. Ismail Pacha is in Upper Egypt."

METROPOLITAN NEWS.

Earl Powis was on Tuesday installed as High Steward of the University of Cambridge, at his mansion in Berkeley-square.

John Hibbert, Esq., of Braywick Lodge, Maidenhead, has given a further donation of £100 to the University College Hospital, which makes £1000 altogether that has been given by this gentleman to the institution.

Charles Dickens, Esq., has consented to preside at the anniversary dinner of the Printers' Pension Society, to take place on the 6th of April next; and the Sheriffs of London have signified their intention of being present on the occasion.

A boy, last week, picked up a lump of something that looked like sugar-candy, in Rochester-square, Camden town, at the door of a physician who was removing his furniture. He put it into his pocket, and, it proving to be phosphorus, ignited from friction, and the lad was so burned that he died.

The site to be occupied by the memorial to the late Prince Consort is hoarded off in Hyde Park, the spot selected being a plot of turf between Rotten-row and the Kensington-road, opposite the conservatory in the gardens of the Horticultural Society. The site has been selected mainly because it was that of the Great Exhibition building of 1851.

The improvement committee of the Corporation of London have awarded premiums of £250 and £150 respectively to Mr. Richard Bell and Mr. T. C. Sorby, for the two best of a class of designs for raising Holborn valley; making honourable mention, at the same time, of the designs of Mr. Frederick Wallen, Mr. Lewis H. Isaacs, Mr. F. Marrable, Professor Kerr, Mr. J. Wormald, and Mr. Henry R. Newton.

A valuable addition has just been made to the Hunterian Museum by Henry Christie, Esq., F.L.S., of Victoria-street, in the perfect skeleton of the manatee (Manatus Australis), better known to our English sailors, and by the Portuguese and Spaniards, as the sea cow and woman fish, and by the French as bœuf marin and vache marine, and by the Dutch as the little, bearded man.

A meeting of the shareholders of the Great Ship Company was held on Tuesday. The directors reported that they had been unable to raise the money which was necessary to free the vessel from her difficulties. A good deal of conversation took place, and resolutions were proposed; but it appeared that, as the company was now in Chancery, they had no power to adopt any of them, and the meeting separated without having come to any formal conclusion. The Master of the Rolls has refused to rescind a provisional order for the winding up of this company. On the 14th of January next (says the *Times*) Messrs. Cunard, Wilson, and Co., of Liverpool, will offer the steam-ship Great Eastern for sale by auction by order of the mortgagees.

Notices have been issued that it is intended in the next Session of Parliament to apply for an act for a new bridge to cross the Thames between Chelsea railway-bridge and Fulham. It will be constructed for the transit of carriages as well as of foot-passengers, and will form a communication between Wandsworth and Fulham, from York-road on the Surrey side to Britannia-road, in the Fulham-road, on the Middlesex side. It is intended to form several new roads in conjunction with the bridge, one of which will extend to the high road leading from Wandsworth to London, and the high road Wandsworth, to the new Wandsworth station of the Crystal Palace and West-end railway; and the other will join the Britannia-road with Fulham.

Dr. Letheby, in his quarterly report on the sanatory condition of the City for the quarter ending the 30th of September last, states that the officers had condemned rather more than thirty-one tons of meat and 239 head of game and poultry in the City markets and slaughter-houses as unfit for human food. The amount of meat condemned in the corresponding period of last year was less than half of the quantity seized during the last quarter. The excess is said to be chiefly due to the circumstance that on two occasions a large quantity of meat became putrid during its conveyance to London, in consequence of the heat of the weather; but, independently of that, there had been a considerable increase in the dead and diseased meat condemned in the City markets, and legal proceedings had in several cases been taken against the persons concerned.

The births of 1970 children—999 boys and 971 girls—were registered in London last week. In the ten corresponding weeks of the years 1853-62 the average number (corrected) was 1861.——The deaths in London last week were 1475. A considerable increase of mortality has recently occurred. In October and the first week in November the weekly deaths were less than 1300, but in each of the two subsequent weeks they were considerably above 1400. The increase is both amongst young and old, but chiefly in the latter class. The deaths in the present return are less than the corrected average by twenty-eight. There were 20 deaths from smallpox; 119 from scarlatina; 68 deaths occurred from typhus and typhoid fever. Phthisis was fatal in 161 cases, bronchitis in 158, and pneumonia in 114. Pulmonary complaints have become more fatal within the last fortnight. Fifty persons died at the age of 80 years and upwards, among whom were six nonagenarians. A widow attained the age of 97.

Law and Police.—Wednesday was the last day of term, and on Thursday the sittings after term commenced.

The arguments in the Alexandra case were continued on Saturday in the Court of Exchequer by the Solicitor-General, who occupied the whole day with his argument for a new trial. He, as well as the Attorney-General, criticised the short-hand writer's report of the Chief Baron's charge, while his Lordship, as before, refused to be in all respects bound by it. The Chief Baron, on his part, complained that on the former trial he got no assistance from the late Attorney-General, which, of course, the present law officers of the Crown declined to admit. On Monday the case was brought to a close, the Court being addressed by the Queen's Advocate, Mr. Locke, Q.C., and Mr. T. Jones, in support of the case for the Crown. The Court reserved its judgment.

The right of the Jockey Club to warn persons off Newmarket Heath, disputed in the case of the sporting correspondent of the *Morning Post*, was argued in the Court of Queen's Bench yesterday week. The Court refused to admit the defendant's plea, that all persons had a right to be on the heath while races were run. There are, however, other pleas in the case that remain to be disposed of.

Miss Reynolds, horse-trainer, of Brompton and Brighton, said to be the most accomplished equestrian in the world, sued the Earl of Dudley in the Court of Common Pleas, on Saturday, for £49 7s.—charges, at the rate of 30s. a week, for breaking in a horse for his Lordship. The claim was resisted as excessive; but the jury found a verdict for the full amount.

The city of London applied through Sir Fitzroy Kelly to the Court of Queen's Bench, on Monday, to obtain a rule calling on the governors of St. Bartholomew's Hospital to show cause why they did not elect Lord Mayor Rose to the office of governor of that institution. After some discussion the Court granted a rule *nisi*.

At the Middlesex Sessions, yesterday week, Jane Henderson, the lady's-maid in the service of Lady Domville charged with stealing jewellery worth £2000 at various times from the rolls brought by Mr. Hancock's shopman for her mistress's inspection, was convicted and sentenced to four year's penal servitude. Lady Domville being an invalid always in bed, it was of necessity that the prisoner was intrusted with the jewellery brought by the shopman for her mistress to select presents from, and in such quantities that he was not able to keep strict account of it.

In accordance with a requisition, the Attorney-General, Sir Roundell Palmer, has invited the members of the Bar to meet him in Lincoln's-inn Hall, on an early day in December, "for the purpose of ascertaining the opinion of the Bar as to the existing system of law-reporting, and with a view to its amendment."

The application of Colonel Waugh for release was granted on Wednesday, the assignees having on the previous day withdrawn their opposition. The detaining creditor, however, still kept up his opposition to the release, and in consequence the order is not to take effect for a fortnight, in order to allow an appeal to the Court of Queen's Bench.

COUNTRY NEWS.

The colliers of the Wigan district have decided to demand an increase of wages to the extent of 10 per cent.

Mr. G. E. Ewing has been commissioned to prepare a marble bust of the late Lord Clyde for Paisley, similar to that presented to Glasgow by Mr. Dalglish, M.P.

Three incendiary fires at Butterwick, on the Yorkshire wolds, on Wednesday se'nnight, destroyed farming stock, including 700 quarters of corn, to the value of £2000.

The Mayor of Plymouth has inflicted heavy penalties on Lord Charles Beresford and one of his companions for having mounted the roof of a cab and shot peas on pedestrians of both sexes.

The *Birmingham Journal* notices the death, on Saturday, of Mr. Samuel Lines, a drawing-master and painter of great local celebrity. He was one of the founders of the Birmingham Society of Arts, and for many years treasurer and curator of the Society of Artists.

It is said that the Government have given orders for the detention of a fine vessel of 1000 tons called the Pampero, lately launched on the Clyde, and which is supposed to be intended for the service of the Confederates.

The Lord Mayor of York (Mr. R. W. Hollon) has presented to the National Life-boat Institution the cost (£250) of a new life-boat to be stationed at Filey, on the Yorkshire coast, in lieu of the old life-boat which is there at present. The boat is 33 ft. long and 8 ft. wide, and rows twelve oars, double-banked.

On Wednesday two large vessels built of steel were launched from the building-yard of Messrs Jones, Queggan, and Co., at Liverpool. One was a sailing-ship, named the Formby, of 1271 tons, built for the East India trade; the other a paddle-wheel steamer, named the Hope, of 1492 tons. We intend giving an Engraving of one of these vessels in a future Number.

The trustees and managers of the Birmingham Savings' Bank have determined, by a majority of two, to transfer the deposits held by them (amounting to upwards of half a million) to the Post Office Savings Bank. This step appears to have been taken in consequence of the increased responsibility imposed upon trustees by Sir H. Willoughby's Savings Bank Act.

On Wednesday, the Archbishop of Canterbury, assisted by the Bishop of Winchester, laid the foundation-stone of the Surrey County Middle-class Schools, at Crawley, near Guildford. The object sought is the provision of a sound, plain education, based on the principles of the Church of England, and on the public-school system, for the sons of farmers and others engaged in commercial pursuits.

The opening of an additional wing to the Radcliffe Infirmary, Oxford, took place last Saturday—the Duke of Marlborough (the president of the institution), the Bishop of Oxford, and the Dean of Christ Church taking part in the proceedings. A very influential assemblage was present, including the Duchess of Marlborough, Lady Alan Churchill, the Vice-Chancellor (Dr. Lightfoot), and most of the University dignitaries, with many clergymen and gentlemen of the neighbourhood.

Robert Hales, the Norfolk giant, died of consumption, at Great Yarmouth, on Sunday last, aged forty-three. He stood 7 ft. 6 in. high, weighing 452 lb. His father was 6 ft. 6 in., his mother 6 ft. His brothers averaged 6 ft. 5 in., his sisters 6 ft. 3½ in. One of his sisters, who died at twenty, was 7 ft. 2 in. Hales was stout in proportion to his height, though somewhat clumsily put together. When in his prime he was 64 in. round the chest, 62 in. round the waist, 35 in. across the shoulders, and 21 in. round the calf of the leg.

The famous Roman grave-mounds known as the Bartlow Hills, in Essex, after having been spared by the plough and the harrow for more than one thousand years, have at length been condemned to destruction in order to accommodate a feeder of the Great Eastern Railway. The subject having been brought under the notice of the council of the Archæological Institute, that body at once addressed a remonstrance to the railway directors; and it is to be hoped they will succeed in preserving these interesting vestiges of antiquity, which are indubitably among the most singular relics we possess of a very early and obscure period in the history of this country.

The sixth annual meeting of the Worcestershire Union of Educational Institutes was held at Stroud on Thursday week. The proceedings of the day included a business meeting of delegates and officers at noon, a dinner in the afternoon, afterwards an exhibition of microscopic and other objects, with a soirée; and in the evening a general meeting. The following statistics show the progress of the union:—1858, pupils in classes, 342; 1859, 293; 1860, 697; 1861, 851; 1862, 1457; 1863, 1418. At the evening meeting Sir John Pakington, Bart., M.P., and the Right Hon. E. Horsman, M.P., were present, and delivered addresses, which were devoted to educational matters.

The soldiers who have, in consequence of the threatened Guy Fawkes riots, been quartered at Guildford for some time, returned on Thursday week to Aldershott. The result was a riot on Saturday night. Eighteen or twenty men, armed with bludgeons and dressed as "guys," paraded the town, smashing windows, and asking for money. At length they disbanded for the night, throwing away their bludgeons and even their dresses. A constable named Sutton sustained dangerous injuries during the disturbance. A reward of £200 has been offered for the apprehension and conviction of the principal rioters.

MR. COBDEN AND MR. BRIGHT AT ROCHDALE.

On Tuesday night Mr. Cobden addressed a large meeting of his constituents at Rochdale, M. J. Robinson's foundry, in Millrow-road, being temporarily fitted up for the occasion. Mr. Bright was also present. The audience could not have numbered less than 3000 persons, amongst whom were many ladies. Mr. Stott, the Mayor, presided.

Mr. Cobden, after some introductory observations, said that the next Parliament would have to be endowed with new principles at the next general election. Some people said that there was a political apathy with regard to politics, and he must confess that the people of England just now much more anxiously attended to the proceedings of the other countries in the world than to those in their own country. It was as if, rather than their own affairs, the Rochdale Town Council discussed those of Blackburn, Preston, Manchester, or any other place. When he was last here before them, he told them, notwithstanding that which was said to the contrary, both then and at present, he did not believe that the American war would issue in the achievement by the South of their so-called independence. Still, up to this moment, nineteen-twentieths of society in London—that was to say, the upper ten thousand—were of a contrary opinion. How far their wish was father to the thought he could not tell; but, if they really simply thought as they spoke, he could only regret that their knowledge of America was so limited. The newspapers displayed a vast amount of ignorance on the question, looked at even from a geographical point of view, judging by what they said of the capabilities of the American rivers, and so forth. He had never believed, nor did he now, that there would be two nations of Americans in America. He considered such a state of things was absolutely impossible; and, if the intelligent people of this country had not been misled as to the cause and origin of the war, they would have thought with him too. The fact was, this civil war in America was nothing but a war waged for the purpose of extending and perpetuating human slavery, and not to defend it as it existed. It was a war to establish a slave empire, of which slavery should be the corner-stone. Well, then, he said, God pardon those who in the year of grace 1863 would establish such an empire! The fact was, it was the aristocracy of the South fighting against the democracy of the North. Wherever an aristocracy had done that elsewhere they had never succeeded, and so it must be with the struggle in America. If such a thing as a division of America should happen, it would be fraught with a great loss to human progress all over the world. Already we could see what the struggle had led to in Mexico and St. Domingo. If it had not been for the American war the French would not have made the Mexican mistake, nor Spain the attack on St. Domingo. The hon. gentleman then alluded to the Polish question, and said we had misled the Poles and aroused the Russians against us en masse. As to the proposal to hold a congress touching European affairs, he disapproved of it altogether, unless they proposed to disarm. The only benefit, so far as he could see, that was to be derived from a congress was that which would arise from a general disarmament. Diplomacy would be a failure, as it had been hitherto. The hon. gentleman then went on to speak of the burning of Kagosima, which he characterised as great a barbarity as that of the burning of Polish villages by the Russians. In fact, he looked upon our doings in the East—in China, for instance—as on a par with those of Cortes and Pizarro of old. He therefore altogether dissented from our Eastern policy, which was a disgrace to us. The hon. member concluded by recommending that we should attend to our own domestic affairs rather than those of other nations, more especially as we required that attention. He advocated an extension of the franchise, and was sure that for granting that no better time than the present one of quietness could be selected. The hon. gentleman resumed his seat amid loud and prolonged cheering.

A vote of thanks, expressing renewed confidence in Mr. Cobden, was proposed, seconded, and carried with one dissentient.

Mr. Bright, M.P., addressed the meeting at considerable length. He urged that if the question of free trade and protection was settled there yet remained to be discussed the great questions of taxation and Parliamentary reform. He strongly advocated that the masses should be admitted to the franchise, and while doing so he gave a somewhat humorous and historical sketch of the late attempt at Parliamentary reform. His speech was loudly applauded.

The Duke de Luynes, say the French journals, is on the point of starting on a scientific excursion as far as the banks of the Dead Sea.

The municipality of Florence has decided that the centenary recurrence of Dante's birthday shall be celebrated by a public festival in the month of May, 1865. The poet was born at Florence, in May, 1265.

THE PRINCE OF WALES'S CHALLENGE CUP.

On Saturday last the members of the 21st Middlesex (Civil Service) Rifle Volunteers competed at the ranges at Wimbledon for a challenge cup, value 100 guineas, presented by his Royal Highness the Prince of Wales, as honorary Colonel of the regiment. The shooting was under the direction of Ensign Halliday, the officer instructor of musketry, and Sergeant-Major Stevens. Throughout the contest there was a strong wind from the left front. The ranges were 200 and 600 yards, ten shots at each distance. Private Burrough, of the 2nd (Whitehall) company, proved the winner, by making 50 marks. The next highest scores were—Private Plasket, Audit Office company, 48; Sergeant Godby, Inland Revenue Company, 44; Private Freer, Inland Revenue company, 43; and Corporal Taylor, Whitehall company, 43 marks.

The cup, which was designed and manufactured by Messrs. Elkington and Co., is of an elegant form, relieved by oxydising and part gilding. It has been highly approved of by his Royal Highness. The figures on the top represent the Colonel, a captain, and a private, of the Civil Service Rifle Volunteers. The arms of the Prince are on a shield below the body of the cup; and beside it is another shield bearing the arms of the Princess. A third shield, on the opposite side, bears the plume, motto, and monogram of the Prince. On a silver plate inserted in the black pedestal on which the cup stands is inscribed:—"Challenge Cup presented by his Royal Highness Albert Edward, Prince of Wales, honorary Colonel of the Civil Service R.V., to be held for a year by the best shot in the regiment." The names of the annual holders of the cup are to be engraved on a silver plate at the opposite side of the pedestal.

CHALLENGE CUP PRESENTED TO THE 21ST MIDDLESEX (CIVIL SERVICE) RIFLE VOLUNTEERS BY THE PRINCE OF WALES, HONORARY COLONEL OF THE REGIMENT.

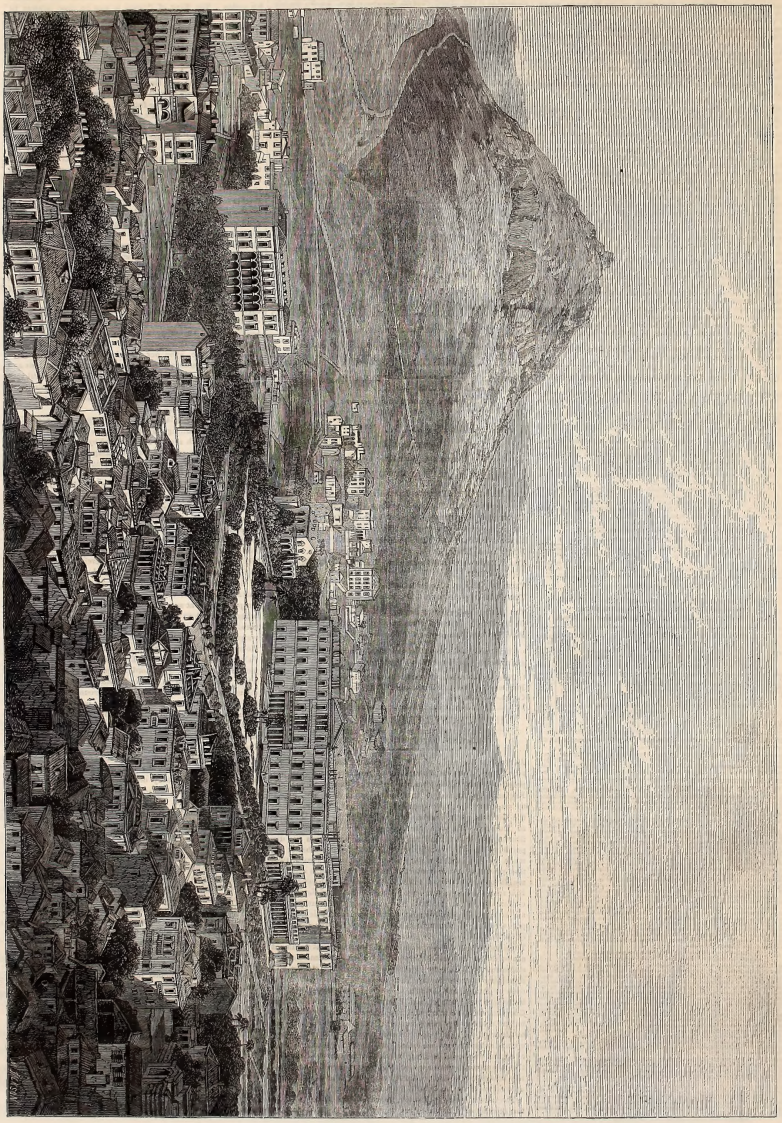
BEL DEMONIO.

THE theatrical adaptation of Paul Feval's stirring work under the above title continues attractive. Mr. Brougham's clever manipulation of the story no doubt tends greatly to the result. But the new system of building the scenes is not without a considerable effect. By its means theatrical illusion has been brought—thanks to Mr. Fechter's enterprise—to a state nearly approaching perfection. The ordinary conventionalities of the stage are thus frequently superseded by the new necessities created. Against many of these Mr. Fechter protested as an actor, and he has now an opportunity, as manager, of accomplishing a variety of reforms. In attempting these we shall always be found cordially assisting, whether relative to the stage or the drama. To the latter, in particular, our own views are directed; but the reform of either has a natural tendency to re-act on the other, and thus advance and progress are secured. Managers, like other men, must be permitted to conduct their business according to their own sympathies, tastes, and knowledge. The utmost that can be required is that intelligence should be manifested. Of this essential element of success Mr. Fechter possesses abundance, and has proved his possession of it, not only by the success of his efforts, but by the obvious power with which those efforts, whether as actor or manager, have been carried out. In the appointments of the stage Mr. Fechter is profuse, as may be proved by a glance at our Illustration, which represents Angelo, or Bel Demonio (act iii, scene 9), bearing away his bride in triumph from the altar just as Lena is about to be forced to take the veil. The bustle and terror consequent on the rejected marriage are capitally expressed by the various and novel groupings. Such a method of placing a play on the boards is far superior to the meagre appointments of a previous time. Willingly, therefore, we accept this as an earnest of the reforms intended to be introduced by Mr. Fechter, in the hope that in future seasons his ambition may rise to a higher flight and attempt for the drama what he has so well accomplished for the theatre.

ARRIVAL OF KING GEORGE AT ATHENS.

(From our own Correspondent.)

WHETHER it be that King Otho had forgotten the matter, or had never found time to organise it, no police system had been introduced into Athens by the late ruler of Greece. During the fêtes and ceremonies attendant upon the arrival of the new Monarch, "George I., King of the Hellenes" (the allusion to the right Divine has been totally suppressed), the National Guard was charged with the preservation of order—an easy task, moreover, for the population behaved throughout with perfect mildness and urbanity, notwithstanding the extreme pressure in the crowded thoroughfares through which the Royal cortège had to pass. The attitude of the masses, and especially of the country people, was indeed altogether exemplary.



On the evening of the King's entry into Athens there was a general illumination, continued for three nights. I was not altogether tranquil concerning the *coups de feu* usually fired off here as a sign of joy, for, the guns being loaded with ball, accidents are frequent. At a recent fête four persons were killed and six wounded. Fortunately, the English Minister addressed a recommendation to the Government on this occasion, which was considerately attended to. The Greek authorities urged the breach of this dangerous custom, and were so far obeyed that I did not hear a single explosion of firearms during the fêtes. The only reports were official ones—to wit, those produced by the cannon and by the *feu d'artifice* displayed on the Sunday after the King's arrival. This ready obedience is an agreeable infatuation, full of good import, of the *entente cordiale* existing between the governors and the governed.

REVIEW OF THE NATIONAL GUARD.

On Monday, Nov. 2, there was a grand review. At ten o'clock the National Guard of Athens and the environs, as well as a certain portion of the army, began to arrive, with their bands playing gay music, on the Champ de Mars. At twelve precisely the King, escorted by a numerous état-major, made his appearance on the ground, amidst the liveliest demonstrations of joy on the part of the assembled soldiers. His Majesty, who is a graceful horseman, wore the costume of a Colonel of the National Guard, and rode through the ranks on a beautiful chestnut charger. The King afterwards took up his position for the défile, which forms the subject of our Illustration at page 540. The National Guard there represented, *drapeau en tête*, is not altogether dressed in a style purely Grecian; but it is not less picturesque on that account, and has a sufficiently soldierly aspect. The regimental flags are ornamented with a cross on the top of the staff, which used to be lowered on passing the Sovereign. From a delicate religious

SCENE FROM THE NEW PLAY, "BEL DEMONIO," AT THE LYCEUM THEATRE: ANGELO (FECHTER) CARRYING OFF LENA (MISS KATE TERRY) FROM THE CONVENT.

THE ROYAL PALACE AT ATHENS.

motive, easily appreciated, the youthful Monarch gave orders for this custom to be discontinued. This innovation, and several others indicative of a refined feeling of modesty on the part of the new Sovereign, have produced a most favourable impression on the Greek population. None of the officers in his Majesty's escort wore any orders. This, I learnt, arose from the circumstance that the decorations are undergoing alterations required by the new régime, inaugurated under such promising auspices.

The execution of the manœuvres at this popular review was, perhaps, not altogether perfect; but the troops made up for any slight defect in this respect by their ardent and enthusiastic acclamations as they passed the King, who, immediately on his return to the Royal Palace, issued an order of the day complimenting the six battalions of the National Guard, the University Phalanx, and the troops of the garrison on their patriotic behaviour and satisfactory ppearance.

THE ROYAL PALACE AT ATHENS.

Our other Greek Illustration (at page 537) is from a photograph, so complete in all its details that our Artist thought he could not do better than forward it for our use. The Royal Palace is the large mass of building on the right. Its construction was commenced in 1836, four years after the accession of King Otho, and terminated in 1843. It is at the foot of Mount Lycabettus, the rocky pyramid that stretches out towards the left of our Engraving. The palace is built of Pentelican marble, but is somewhat monotonous in its aspect. The southern façade, with its Ionic portico, is the best architectural feature of this Royal palace. As regards the interior, the ballroom, decorated in the Pompeian style, is the most worthy of mention; the ordinary apartments have nothing particularly remarkable about them. The space on the south and on the east of the palace is occupied by an English garden, the creation of which involved considerable expense, as the soil of Athens is absolutely arid. On the site the remains of a Roman villa and of an immense mosaic pavement were discovered. The latter has been used for ornamenting a grotto and some *cabinets de verdure*. The garden is open to the public.

During the later years of the reign of King Otho, besides the ordinary guard, there was in the interior of the palace a second guard, composed of gendarmes, who served as a body-guard on duty near the apartments of the Sovereign. His Majesty King George, on learning the object of the service of these gendarmes, observed that it would be better to send them into the provinces to aid in the suppression of brigandage, and that he proposed relying for his personal safety on a guard which he looked upon as invincible—the love of the people who had placed him on the Hellenic throne. As a necessary result of his Majesty's wise remark, *Messieurs les gendarmes* have been withdrawn from the palace.

The large building, with a portico, just in a line beneath the summit of Mount Lycabettus, is the French School.

CALENDAR FOR THE WEEK ENDING DECEMBER 5.

SUNDAY, Nov. 29.—Advent Sunday. Death of Clovis, the real founder of the French Monarchy, 511. Beginning of the Polish Revolution at Warsaw, 1830.

MONDAY, 30.—St. Andrew, Apostle and Martyr, A.D. 69. Anniversary of the Royal Society of London (first kept in 1663).

TUESDAY, Dec. 1.—Henry I., Beauclerc, dies at Rouen, 1135. Princess of Wales born, 1844.

WEDNESDAY, 2.—Napoleon I. crowned Emperor, 1804: his victory at Austerlitz, 1805. Abdication of Ferdinand, Emperor of Austria, and Accession of Francis Joseph, the present Emperor, 1848. Coup-d'état of Louis Napoleon, at Paris, 1851; declared Emperor, as Napoleon III., 1852.

THURSDAY, 3.—Election of Nicholas Breakspeare, the only English Pope, as Adrian IV., 1154. Moreau's victory over the Austrians, at Hohenlinden, 1800. Moon's last quarter, 0h. 14m. p.m.

FRIDAY, 4.—King James I. rebukes certain inquiring, "fiery, popular, and turbulent spirits," in the Lower House, 1621. The English Navy Office founded, 1644. James, Duke of York, destroys the Bordeaux fleet, 1664.

SATURDAY, 5.—Columbus discovers Hispaniola (now Hayti), 1492. Death of the great composer, Mozart (aged only thirty-six), 1792.

THEATRE ROYAL, DRURY LANE.—Managers, Messrs. Edmund Falconer and F. B. Chatterton. Great and continued success of the production of Lord Byron's MANFRED, generally acknowledged by the Press and the Public to be one of the most complete and legitimate triumphs of a combination of artistic capabilities achieved on the stage for many years.

On MONDAY, and during the Week, her Majesty's servants will perform the new and original farce by W. Brough and A. Halliday, Esqrs., entitled MY HEART'S IN THE HIGHLANDS. Principal characters by Messrs. Belmore, G. Weston, J. Neville, Warde; Miss Harfleur, and Mrs. Neville. After which, commencing at a quarter before Eight o'clock, and concluding about Ten o'clock, Lord Byron's Choral Tragedy of MANFRED. Mortals:—Manfred, Mr. Phelps; Abbot of St. Maurice, Mr. Ryder; a Chamois Hunter, Mr. A. Rayner; Manuel (an aged Retainer), Mr. Neville; Herman (a young Domestic in the Castle of Manfred), Mr. G. Weston; Retainers, Messrs. Bedford, Weever, Kirk, Wilson, Smith, and Edwards. Immortals:—Arimanes (Ruler of the Evil Agencies), Mr. Warde; Ariel (Spirit of the Ether), Miss Emma Heywood; Hesper (Spirit of the Stars), Miss Louisa Ritter; Undine (Spirit of the Waters), Miss Poole; Miserima (Spirit of Memory), Miss Cicely Nott; Auster (Spirit of the Storm), Mr. Swift; Astaroth (Spirit of the Earth), Mr. Meagerson; Nubes (Spirit of the Shadow of Night), Mr. Ryde; Titanos (Spirit of the Mountains), Mr. G. Spencer; Nemesis (Goddess of Vengeance), Mrs. Edmund Falconer; Clotho, Lachesis, and Atropos (the Three Destinies), Miss Emma Atkinson, Miss C. Weston, and Miss Murray; The Phantom of Astarte, Miss Rose Leclercq; the Witch of the Alps, Miss Eburne; Evil Agencies and Spirit Spectres of the Weird World, Messrs. T. Matthews, J. Morris, and J. Cormack; Miss Seymour, Miss Harfleur, Miss Green, Mrs. Melville, Mrs. Warlow, and the Ladies and Gentlemen of the Choir and the Ballet. Order and character of the Scenery:—Act I.—Scene 1. Studio and Gothic Gallery in Manfred's Castle. Scene 2. A Precipice and Glaciers nigh the summit of the Jungfrau. Act II.—Scene 1. The Chalet of the Chamois Hunter and Alpine Pass. Scene 2. The Steinbach, a Waterfall, in one of the Lower Valleys among the Alps and overhanging Cliffs, the Haunt of the Witch of the Alps.

The sunbow's rays still arch the torrent with the many hues of Heaven.
And roll the sheeted silver's waving column o'er the crag's perpendicular.

Scene 3. The Snow-capped Summit of the Jungfrau, by Moonlight. Scene 4. The Hall of Arimanes in the Nether World, painted by Mr. Danson and Son. Act III.—Scene 1. Terrace and Exterior of Castle. Scene 2. The Turret Studio, the Magian's Midnight Haunt, Shook and Illumined by a Thunderstorm, and finally Destroyed by Flashing Bolt and Crashing Avalanche. Last Scene. A Snowy Alpine Waste or Wilderness. Spectral illusions by Mr. Cox; and also Professor Pepper's adaptation of Dirck's invention, under the special superintendence of Professor Pepper. The whole of the entirely new scenery designed and principally painted by Mr. W. Telbin, assisted by his son, Mr. H. Telbin. The Hall of Arimanes painted by Mr Danson and Sons. The increased orchestra and present arrangement of the music (originally composed by Sir Henry Bishop) under the direction of Mr. Barnard. The choir under the direction of Mr. Charles Beale. To conclude with a new and Original Farce, by John Oxenford, Esq., entitled BEAUTY OR THE BEAST; principal characters by Messrs. Addison, G. Neville, Barrett, Spencer, and G. Weston; and Mrs. Edmund Falconer and Miss R. Leclercq. Stage Manager, Mr. Phelps.

In preparation, a GRAND COMIC CHRISTMAS PANTOMIME, to ensure the scenical magnificence of which the exclusive services of the celebrated Artist Mr. William Beverley have been retained.

Private boxes, 10s. 6d., 21s., £1 11s. 6d., £2 2s., £3 3s., and £4 4s.; stalls, 6s.; dress circle, 4s.; first circle, 3s.; boxes, 2s.; pit, 2s.; lower gallery, 1s.; upper gallery, 6d. No half-price. The Number will contain Illustrations of the London Cattle Shows and several Fine-Art and News Engravings.

Price of the whole—Number, Two Supplements, and Coloured Picture—One Shilling Unstamped; Twopence Extra for Stamped Copies.—198, Strand, W.C.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, NOVEMBER 28, 1863.

ALTHOUGH the reply of the Emperor of the French to the requisition of other Powers for a programme of the proposed congress has determined several of them, and specially England, not to accept the invitation, it does not appear to us that the new question which has been raised by the German party can be left untouched by the Monarchs of Europe. We own that, if the Emperor desired an illustration of the small regard which some persons are disposed to show to treaties, he could not have had a better one made to his hand for the strengthening of his case than that presented in the conduct of such of the German rulers as are favourably inclined towards the Duke of Augustenburg. It is scarcely eleven years ago since the Treaty of London, in confirmation of the protocol previously issued, solemnly bound all the great Powers, without restriction or condition, to support the King of Denmark in the possession of the dominions of which Christian IX. has just been proclaimed King. The signatures of Austria, Russia, and Prussia to that document are patent to the eyes of Europe. Yet at this moment German statesmen and German journalists are adducing clumsy and shambling arguments by the score to show that it is open to Prussia and Austria to contend that they signed as individual and independent Powers, not as members of the Germanic Confederation, and that therefore they are entitled to lend moral and physical support to Germans who are seeking to throw off a Danish yoke. We do not wish to speak coarsely upon a subject which has called out the feelings and passions of a great number of persons; but this German mode of viewing the case seems to us to approach the ingenuity which occasionally brings its possessor, if a private person, under the unfavourable notice of twelve of his fellow-countrymen.

The Germans may, we think, make up their minds, with all the celerity of which they are capable, to this fact—namely, that England, for one, will be no party to treaty-breaking. It is not because the King of Denmark happens to stand in a close relation to our Crown that the English Cabinet will maintain his rights. The King of Prussia is also in close relation to our Crown, and yet we have not shown that the circumstance has rendered us unjust to those who have to complain of the King of Prussia. This Danish business is one which involves common honesty and fair dealing; and the case is so clear that every man, woman, and child in England can comprehend that both are violated by the course which it is now proposed that Germany should take. And although it is true that, as we have said, the Emperor of the French may find a good argument in the fact that at this moment two great and honourable nations are being urged to commit an act of dishonesty, and that the Emperor may say, "See how much treaties are worth," England has the still better reply, that she has always rested upon the inviolability of treaties; that at the councils at which they have been framed she has always been the loser rather than the gainer; but that her mission has ever been in favour of order, law, and right, and that she will lend no countenance to a scheme for the further repudiation of solemn arrangements, and the teaching the nations and their rulers that treaties hold good only until a favourable opportunity for breaking them shall occur. We know of no incident in modern political history that is so calculated to damage the faith of Englishmen in the honesty of the Continental mind as this proposal to recognise a double existence in a Sovereign who signs a treaty. All that has been charged against the Jesuits and the doctrine of mental reservation fades into the whitest of lies in presence of a declaration that the King of Prussia, as such, may sign a treaty guaranteeing another King his dominions, and may then go away and, as one of a Diet or Confederation, encourage and even assist those who seek to dismember those dominions. The Germans may pour their volleys of abuse upon our "insular and brutal stolidity of honesty which renders us blind to political metempsychosis and sympathetical development;" but this we must bear until they can convince us that it is a right thing for a man to bind himself individually to support that against which he proposes to act in co-operation with others.

We trust that England will avail herself of this excellent opportunity of showing why she objects to such meetings as the congress to which she has been invited by the Emperor. She is not prepared to regard treaties as things to be trampled under foot. She will not hear of the reopening of the question of the Schleswig-Holstein duchies as portions of the Danish dominions. This is a question of principle, and the Government will have the people with it. Earl Russell has an excellent chance of setting himself right with his countrymen on the Danish business, touching which he was not thought to have exercised a specially wise discretion when the papers were last laid before the public. There ought to be no loss of time in signifying the disbelief of England in the possibility that great and honourable Sovereigns can be parties to the disgraceful course which is marked out for them by some of the smaller Principalities and Powers. Nor is this one of the cases in which the convenience of Sovereigns and the desire for pacification at any price induced a settlement of a question without regard to justice. The succession arrangement was considered long and solemnly. Russia, never too prompt to resign anything, made formal surrender of her claim to Holstein, and a protracted negotiation, of which Lord Palmerston took charge for England, though the final ceremonial was performed by Lord Malmesbury, ended in a treaty which was designed as the conclusion of a most deliberate discussion. There are, therefore, no grounds for saying that the treaty was unjust, or conditional, or obtained without regard to the interests of persons mainly concerned.

The agitation against Denmark speaks for itself, fortunately, and leaves Europe in no doubt as to the character of the parties. The German hatred of Denmark breaks out whenever a chance is given; and though German rulers themselves may be too wise to share in the spiteful and ridiculous feeling, they are not too strong to find it necessary occasionally to pander to the unworthy sentiment of their peoples. This remark applies with least force to Austria, who would probably take much the same course as England, but for Bavaria, who has always been opposed to Denmark in the matter. The small Powers, which we may trust to see some day consolidated into one decent little kingdom, that shall substitute one voice, if a weak one, for half a dozen simultaneous yelps, ought not to be permitted to trouble the peace of Europe; and, but for the strong anti-Danish feeling to which we have adverted, their puny efforts would be laughed at even in Germany. At Hamburg the German party has passed a resolution that if Holstein will not show herself patriotic to fatherland and cast off the Danish yoke, she shall be made to do so, which is certainly an advance in statesmanship, and very like the proceedings at the earlier part of the French Revolution, when nations were abused for their adherence to old forms, and menaced with the vengeance of the Republic if they did not become more enlightened and begin to hang their nobility. It is well that the sudden fury of the Germans should have compelled them to splutter out their wrathful intentions as they have done, as there is nothing like knowing the whole case and design of your adversary. This anti-Danish agitation—this attempt to rob Christian IX. of what has been solemnly assured to him by treaty—is very discreditable and dishonourable; but, as the German Monarchs are not yet committed to it, we trust that the remonstrances of England will suffice to keep them from giving overt encouragement to the illegitimate pretender.

The trunks of two trees have been sent from the battle-field of Gettysburg for the Massachusetts and Pennsylvania Historical Societies, one of them having 250 bullet-holes in the space of 21 feet, and the other 110.

THE COURT.

The Queen continues at Windsor Castle, in the enjoyment of excellent health.

On Saturday last her Majesty, accompanied by Princess Helena, walked and drove in the castle grounds. The Crown Prince and Princess of Prussia, Princess Louisa, and Prince Arthur were present at the ceremony of laying the first stone of the new church about to be erected at Windsor, of which we give a description on our first page. Her Royal Highness was attired in a mauve silk dress, black velvet mantle, and mauve bonnet with white feather. The suite in attendance consisted of Baroness Rehenlau, Baroness Bodenseck, Lady Caroline Barrington, the Hon. Horatia Stopford, the Hon. Harriet Phipps, Miss Hildyard, Count Pourtalesnau, Major von Schweinitz, Major-General the Hon. A. N. Hood, and Colonel H. Ponsonby. Subsequently, the Crown Prince and Princess of Prussia, Princess Helena, Princess Louisa, and Prince Leopold, honoured the Windsor Theatre with their presence to witness the "Ghost Illusions," as exhibited by Professor Pepper at the Polytechnic Institution. The Right Hon. Sir G. Grey and Dr. Stanley arrived at the castle.

On Sunday the Queen, the Prince Consort and Princess of Prussia, Princess Helena, Princess Louisa, Prince Arthur, Prince Leopold, and the Princess of Hohenlohe, attended Divine service in the private chapel. The Rev. Dr. Stanley officiated.

On Monday, the Queen, attended by the Countess of Caledon, the Hon. Horatia Stopford, and Major-General the Hon. A. N. Hood. The Crown Prince and Princess of Prussia, and the Princess of Hohenlohe, went to London to-day, returning in the evening; and Prince Arthur, attended by Major Elphinstone, left the castle for Cirencester Park. Mr. Calcraft, Solicitor to the Post Office, Mr. Carey, Bailiff of Guernsey, were this morning presented to the Queen by Sir George Grey, and received the honour of knighthood. Lord Cremorne and Major-General the Hon. A. N. Hood were the Lord and Equerry in Waiting.

On Tuesday, the Queen, accompanied by the Crown Princess of Prussia, drove in the grounds of the castle. The Prince and Princess of Wales arrived at the castle that evening.

On Wednesday the Queen, accompanied by the Princess of Wales, walked and drove in the Home Park. The Prince of Wales and the Crown Prince of Prussia went out shooting.

The Queen and Royal family take daily walking and driving exercise in the vicinity of the castle. During the past week Mr. Frith has been honoured with sittings from the Queen, the Crown Prince and Princess of Prussia, Princess Helena, Princess Louisa, Princess Beatrice, and the Crown Prince of Denmark, for his picture of "The Prince of Wales's Marriage." The Queen left Windsor Castle on Monday, of submitting his picture of the "Railway Station" to the Queen at the castle.

The Court were ordered to go into mourning, on Sunday last, for the late King of Denmark. The ladies to wear black dresses, white gloves, black or white shoes, and white fans, jewels of Prussia or plain gold or silver ornaments. The gentlemen to wear black Court dress, with black swords and buckles. The Court to change the mourning on Sunday, the 6th of December next,—viz. The ladies to wear black satin, with coloured ribbons, flowers, feathers, and ornaments, or grey or white dresses, with black ribbons, flowers, feathers, and ornaments. The gentlemen to continue the same mourning. And on Monday, the 16th of December next, the Court to go out of mourning.

The Duchess Dowager of Mount-Edgcumbe has succeeded the Countess of Caledon as Lady in Waiting, and Lieutenant-Colonel F. Cavendish has succeeded Lieutenant-General Sir H. Bentinck as Groom in Waiting to the Queen.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales attended by the Hon. Mrs. F. Stonor, Lieutenant-General Bentinck, the Hon. Charles Grey, and Captain Seymour, left Sandringham House on Tuesday en route for Windsor Castle. Their Royal Highnesses were received at the Wolverton station by Mr. Robertson, General Superintendent, and Major Palmer, one of the Directors of the Great Eastern Railway. The Prince and Princess travelled by a special train, which left Wolverton at one o'clock, arriving at Windsor at forty minutes past four o'clock. Their Royal Highnesses remained at once to the castle, where they will remain a few days, after which they will proceed to Frogmore, where they purpose staying for a short period.

On Friday se night the Prince accompanied by Mr. H. Villebois and attended by Major Teesdale, left Sandringham House about half o'clock and drove to Burnham, for the purpose of hunting with the West Norfolk hounds. Several foxes were "found," but the day proved a blank, as none could be made to "break away." The Princess, attended by the Hon. Mrs. F. Stonor, drove to the "field" with a party of equestrians.

On Sunday the Prince and Princess, and Admiral the Hon. Sir Henry Keppel, attended Divine service on Sandringham Church. The Rev. G. B. Meson, B.A., officiated.

Additional improvements are about to be made at Sandringham House, and the Norwich gates will be temporarily fixed on the site of the present gates at the principal entrance of the park. It is not intended to them permanently: the extension of the park is only contemplated. The park has been prepared for deer, with which it will immediately be stocked.

HIS ROYAL HIGHNESS THE DUKE OF CAMBRIDGE.

His Royal Highness the Duke of Cambridge left town on Monday on a visit to the Earl and Countess of Derby, at Knowsley.

His Excellency the Italian Minister has arrived in town from visiting Lord Lansdowne, at Bowood.

His Excellency the Swedish Minister and the Countess Wachtmeister are expected at the residence of the Legation to-day (Saturday) from Paris.

The Duke and Duchess of Wellington left Apsley House on Monday for Stratfield Saye, Hants.

The Duke and Duchess of Manchester left Great Stanhope-street on Tuesday en route to Congleton.

The Duke and Duchess of Argyll have arrived at Stafford House.

The Duke of Somerset left the Admiralty on Saturday last for Sion or Park, Devonshire.

The Marquis and Marchioness of Normanby left Queen's Gate Terrace a few days since for Mulgrave Castle, Yorkshire.

The Marchioness Dowager of Lothian and Lady Alice Kerr left town on Wednesday for Scotland.

The Marquis of Camden and the Ladies Pratt have left the Wilderness, near Sevenoaks, on a tour of visits.

The Marquis of Lansdowne arrived at Lansdowne House on Tuesday from Bowood.

The Marquis of Abercorn arrived on Tuesday at Chesterfield-house from Baron Court.

The Marquis of Bath left Thoma's Hotel on Monday for his seat, Longleate, Wilts.

The Earl and Countess of Westmoreland have left Curzon House on a visit to the Emperor and Empress of the French at Compiègne.

The Earl and Countess of Shaftesbury and Lady Victoria Ashley left town on Wednesday for their seat, St. Giles, Dorsetshire.

The Earl and Countess of Cardigan left Portman-square on Wednesday for Tom Park, Northumberland.

The Countess of Jersey has arrived in town from Paris.

The Earl of Brecknock has arrived at Holkham Hall, Norfolk.

Viscountess Palmerston has issued cards for a dinner and evening party this day (Saturday) at Cambridge House.

The Right Hon. Sir George Grey returned to town on Monday from Windsor Castle.

On Saturday the marriage of Lady Susan Ramsay, eldest daughter of the late Marquis of Dalhousie, with the Hon. Robert Bourke, third son of the Earl of Mayo, took place by special license in the private chapel, Lambeth Palace. The Archbishop of Canterbury, assisted by the Hon. and Rev. George Vernon Harcourt, Rector, performed the ceremony.

The marriage of Lady Alice Cuffe, daughter of the Earl and Countess of Desart, with the Hon. Otho Major Hamilton, eldest son of Lord and Lady Hamilton, will take place early in January next.

MEMBERS OUT OF PARLIAMENT.

IDENTIFICATION with one's case, apparent or real, is the perfection of advocacy: identification with one's Government and with one's department is a special quality in no means. In this respect there has been no greater success in modern times than that of Lord Clarence Paget, Secretary to the Admiralty, by grace of being a naval officer, who has filled since the date of the Home Administration, if not from belief that no member of the Palmerston Ministry, prize, secondary, or subordinate, did more for the Government in the last three years of his term than the Secretary to the Admiralty, the representative of the department in the House of Commons. Although the responsibility attached to that position, it also conveyed to a great *prima facie* weight; in Lord Clarence's case, amongst all the expectations and hopes which accompanied the Palmerston Ministry into office, the rose of expectancy bloomed brightest. A sailor and a practical naval reformer, he had pointed out in a recent number, how a million of money might have been saved in the administration of the affairs of the Admiralty. His facts were unanswerable; and the Government have been unable to refute them. The person, when in office, the country stood to win just so many millions. Well, it was barely conceivable to imagine that a mere Secretary could really effect such a feat; and so, in a short time, the country and the House forgot him, but he had incurred in consideration of his working very hard, and doing his work, according to his opportunities, very well indeed. In a short time Lord Clarence began to exercise right of office. He was the Secretary. A ready or effective speaker, he began a kind of eloquence of his own, which consisted in the statement of the naval improvements he contemplated—he seen in the effects it produced; for, in reality and on strict examination, it would have been found that the statements which he exhibited bore about the same proportion to the official reticence as an ounce does to a pound. But it was the manner of the thing. It was as if he was explaining to a friend, and Sidney Herbert, and Jervis to bear witness to the honesty of a true British sailor, who always expected that, if he did his duty, the country and the House would be equally honest. Lord Clarence's manner was the sheerest over-the-beckie style. Bluff, but tender, he wooed members as William might be supposed to have wooed Black-eyed Susan; and he was a favourite with the House. Nothing was left undone, somehow, though, in the last Session, we fancied that we discovered a diminution of the zeal of the first year, and a little concealed jocosity, and even peevishness. It struck one that there were occasions when there were symptoms of the Secretary's temperament. Such ideas of Joseph Surface were arising in the minds of members in connection with him; and that the next step would inevitably be the adoption of his manner by the House at large. Such was the case at the close of his prototype. Whether Lord Clarence, with his wonderful tact and perception, clogged the wheels of his own chariot, we know not; this, or whether, as he intimated and his looks indicated, he was in the office heartily against his will, and that he had only undertaken the office in his department he left the labouring oar mainly to him, and gave that gentleman an opportunity of showing that a philosophical mind and a practical experience could be united in the Secretary, and could make as practical a speech—taking the opposite extreme—as Sir Wilfrid Lawson or Mr. Bernal Osborne. We should not like perhaps too long disquisition on a somewhat remarkable Parliamentary career. Lord Clarence Paget, Lord Clarence Paget, has recently appeared at a public meeting at Deal, where he made one of his most characteristic speeches. There he showed how it was that Lord Palmerston's administration was the best the country possibly could have had for the country; how proud a thing it was to be associated in office with such a statesman as Lord Palmerston; how the last Japanese affair at Kagosima, was not in the least to blame, because he (Lord Clarence) had himself been in command, or should have administered by the fleet; while, as to the Admiral, if it had not been that his men had been disturbed at their dinners by those nasty natives, he would have given them a thrashing they would never have fled a shot. To be sure, it was ascertained that a little property had been destroyed, and a few natives killed, but it was very questionable whether that was lost amongst the population of the city, which should it not have been for the fleet, was quite ready for the submission of bad gunnery on the part of British sailors thereby involved. Pleasant colloquy, faithful official, tender and true to the department, ever ready always to take the responsibility on his head and considerate to thee an thou eve not to them.

We hope, as the new Conservative element in the composition of this resolutory column, has ever been to bring modest Parliamentary merit out of the shade, by reflecting it in the metropolis and the country generally for the shining members in their respective spheres. We willingly we have delayed longer than we wished in paying our respects to Lord Clarence Paget, the Secretary to the Admiralty, who, with his colleague, Mr. Walker, has been giving his constituents of Hastings a taste of his quality as a member of the Government, and to Colonel Edwards in his character as a member, for it is not his fault if he is not a Government member, and a Government house. In the first place, he has taken the 'cute course of appropriating a particular seat to himself, which always marks a man in the house; then he has, as a Government member, been extremely modest about rising late and at critical moments in debates; and, more in a word, he has by his whole bearing and conduct shown that those little rows which the House always makes in moderation, for caution say that he knows exactly what he is about. Perhaps what his decisive manner indicates that he is very stanch in his principles, and that Conservatism, and hunting, and church rates, and the constitution, and the land, and the Land Act, and the Game Act, the reformatory cavalry (he commands a really fine promissory corps in the West Middlesex Militia, and is a first-rate officer) and the glory of the country gentleman to stand by, will be supported by him with something more than ordinary zeal. Perhaps, considering that he comes with a mercantile firm. In fact, however, he is sufficiently bucolic in Yorkshire for the principle he advocates and the character he adopts, and is reported to have "a heap" of his property lying about in most places where good Conservatives roost.

It would appear that the honour of Parliamentary repairs of the member that one of his qualifications should be that he is a master of "winged words." In the period between 1852 and 1856 the constituency of Hastings (a Conservative borough) had returned Mr. Phillimore, who always spoke like a rushing, but not exactly a mighty wind. Mr. Phillimore, in Parliamentary phraseology, was eloquent, if words is seldom to be witnessed as characterised the oratory of that voluble but not very luminous gentleman. Mr. Phillimore, which never clearly appeared, at the next general election Mr. Phillimore found that he was nowhere, we will not say in the estimation, because that would be rude, but in the suffrages of the electors, and the seat which he had done much to keep continually, by keeping himself continually before the public, was filled by Mr. Brand, who duly got elected, and Leominster passed from the Liberal to the Conservative side of the House. Mr. Brand was considered a rising man, and was expected in Westminster Hall before he entered Parliament, and, being the son of a former member of the House who was universally esteemed in his day, Mr. Hardy came into the world of Parliament with every prestige in his favour. Soon found to be a good business man, he was appointed to the position that he now fills, and passed at last came into office it was with no surprise, and in most cases with pleasure, that he was found to have been selected for the office of Under-Secretary for the Home Department. He discharged his functions with the greatest ability and tact, and naturally and properly assumed a front place in the Opposition when the Derby Ministry succumbed to one of those curious untrips of the Liberal party which are so remarkable a feature in modern times. Conservative Government is discovered to be in a fair way to out-reform the reformers. There he has been busy and useful, assisting with excellent effect at the great "Conservative Wednesdays," and making several speeches of great ability and importance. We ought to have said before that he took a considerable part in the debates which occurred in the struggle for power between the two parties after the general election of 1859; and we well remember his warning the House to no small excitement on that memorable occasion by a speech which, if we remember right, was the first of a very nervous personified; conviction seems so to abound within him that he cannot speak but he must speak, and that he has a fair claim to our suggestion of the fondness of Leominster for tremendously rapid speakers. Sir George Grey himself, whose mode of speaking has been likened to the speed with which a whirlwind might be supposed to pursue a hurricane, scarcely exceeds Mr. Hardy in the swiftness of his utterance; and it is fortunate that the political Paris have placed them in different parties, for if they had chanced to hold office together in the Home Department there might have been produced slightly indirerous effects, arising out of the cognate talking of the Chief and the Under-Secretary. Mr. Hardy resides in Kent, and has been discharging at Maidstone lately on education, a subject on which much in his Parliamentary career entitles him to speak with a certain authority. He has also some special authentic notion about beer and beerhouses, but already we do not profess to know exactly what it is, he brings in an annual bill on that subject.

It would hardly be fitting to close Parliamentary dignity to bring in a dissertation on a grand demonstration on Tate and Lyle-square ground by Messrs. Cobden and Bright at the fag end of this chronicle; and this must be an excuse for not saying more than the fact, that, though, in truth, we do feel some difficulty in suggest ng any novel illustration of these members when out of Parliament.

THE FARM.

ARDINGTON left off the Christmas fat shows with great spirit on Monday last; and, after a very great struggle, Mr. Thomas Gibbs, of Lee, for the best beast in the yard, was awarded to Mr. J. Phillips's first prize ox, just beating Mr. W. Aldworth's first-prize steer. In the fat-cow class, Mr. C. P. Duffield beat Mr. Phillips. Mr. W. Batson's capital pen of five tegs, "to be drawn from the flock not more than one mile before the show," beat Mr. C. P. Duffield's tegs for the best pen of sheep in the yard; and Mr. G. B. Morland swept the pig prizes with some superlative pens, and took the second at Islington. Mr. R. Benyon, M.P., took a large number of root prizes, as well as that for mulling barley. It is intended next year to add "acres" to the ploughing match, so as to present a pretty comprehensive one, as there are two prizes for fat calves under fourteen months for the best shown which we do not meet with elsewhere.

The whole of the Birmingham Show, with the exception of the poultry, will be open to the public on Monday next, when the low shillings to see public judging, and continue open at reduced rates for four days next week. We are sorry to hear that one of the Aberdeen prize cattle has received a severe injury in the mouth. An odd but pretty safe challenge has been put forward by Mr. F. Hall, of Dartford, who offers to show his fat shorthorn steers, bullock and free mastin, of three years and five months, against any similar pair in the kingdom, for £50 a side, at York, Leeds, or Darlington. We learn by telegram that the fat prize at the Rugby Show has been won by Mr. R. Winmerton's four years and four months' old red shorthorn ox. It was bred by Mr. Cheshire, and is half brother to that gentleman's last gold-medal steer. It won the first prize in its class, and the £20 as the best animal in the yard at Spalding last September.

There are sad accounts of disease among sheep and cattle from many parts of England, and the fear of it has made business very dull at many of the recent fairs in Scotland.

Mr. Douglas has just sold his three-year-old heifer, Isabella Rose 2nd, by Sir James the Rose from Isabella Hopewell (the dam of Isabella Hopewell 2nd), to Mr. Hutchinson, of Beaston, for a large price. The Queen of Athelstane and her July calf, Princess of Athelstane (by Tarr's Watchman), have also changed hands, the property of Lord Feversham, of Duncombe Park, who has previously disposed of Nell of Rise—a neat white bull, who was second in his class at Kelson, and is at present used in the herd, which was made of twenty cows in four bulls. Among the most noteworthy of those which have not been named in the list is the handsome Bessborough Placida, by a son of Jack Birthright from a Crusade cow. With this exception, she may be said to have nothing but Bessborough blood in her veins, but a very pretty pell proven. Mr. Mitchell has sold his Kelso winner, Conqueror, to go to Australia; and his well-known prize cow, Mistletoe, has had another calf. Mr. Stirling Crawfurd's Bessborough Duchess winner, which have been supplanted at Keevil by Webb's Englishman, are to be sold at Mr. Thomas Longcroft's sale. Among the landowners on the point in the Times, and those complaints against *Punch* wrooked of in labourer nourishing and thus preventing to the pig that it beats him to nothing in house accommodation.

A new church is about to be built at Shoeburyness, near the line of railway in course of formation between Pentwood and Netley Hospital.

The Law amendment Society is about to be amalgamated with the Association for the promotion of Social Science.

There are 20,000 friendly societies in England, of which not much more than half are registered.

During the last week the divers employed on the sunken wreck of the American packet-ship Amazon sent up fifty bars of railway iron and a quantity of coal. The divers report that they can feel the outline of the iron knees and other rubbish, which have fallen in. When this has been cleared away they expect to get at the specie.

The contemplated change in the spring and summer circuits of the Judges has been settled. The Home, the Western, and Oxford Circuits remain as now, but the Northern will be joined by some members of the Northern, and the Norfolk is increased by four counties from the Midland. The Midland circuit can no longer be called the one of most repute.

Mr. Frederick Hughes having been advertised in the Australian papers as the first discoverer of the gold deposits found in Victoria, where he worked as a woodcutter. Having lately broken his leg, he has been in Melbourne Hospital, where he received another notice of the Benevolent Asylum. His wife, being a person of superior education, opened a school, and by that means contributed to support the family.

COTTON FROM BUSHIRE.—A paper was read to the Royal Geographical Society on Monday, by Mr. Ross, "On the Cotton Plant of Bushire." On the Geography and Productions of the Countries around the Persian Gulf." The chief cotton-producing country in the vicinity is the Indian telegraph, which from Bushire to Bushire is subsantic. Sir H. Rawlinson said that this country could well was one of the most fertile well-watered districts in the world, and that, in soil, climate, and facilities for water carriage, it was unsurpassed by any country in the world. He stated that samples from the neighbourhood of Bussorah could not be distinguished from the finest Sea Island staple. Between 60,000 and 70,000 bales are sent to England from Bushire, and this season double the amount may be expected, as 100 miles of the road between Bushire and the Tigris and Euphrates, capable of being easily irrigated and devoted to cotton culture.

The Governor of the Wedding, a tale, by A. Tenisl, native of Cyclon, was read at a meeting of the Ethnological Society on Tuesday evening. The Weddas are supposed to be descendants of the original inhabitants of Ceylon, who took refuge in the forests of the interior, on the invasion of the Singhalese. They are a race of savages, who live entirely by the chase, build themselves in the jungle, and fast associated with the other races inhabiting the island. The males hunt the elephant, deer, buffalo, boar, and other wild game. They are good marksmen with the bow and arrow, destroying human life at a distance of thirty yards. They are, however, quite unacquainted with the use of firearms. Recently they have begun to cultivate the land, and to practise clothing. The women are very modest, and endeavour to conceal to approach their villages is resisted. Their principal deity is the tortoise Bohe, to which they make offerings on occasions of sickness or childbirth. Scarcity are the females secluded, even amongst themselves, that a father does not see his daughter when she has attained the age of womanhood, nor a mother her grown-up son. If a male person does not recover after the offerings made to the deity Bohe, he is abandoned, and the unattended, the corpse remaining unburied. The Weddas subsist generally on the flesh of wild animals found in honey, or, in times of scarcity, on roots and wood apples. The paper, an article of barter, they place a higher value on salt than on silver. The Weddas are divided into two classes, the Nomadic and the Village Weddas. Their language is a dialect of the ancient Singhalese, mixed with Tulengu, and is quite intelligible to the natives, even at distant parts of the island.

ARRIVAL OF THE KING OF THE GREEKS AT ATHENS: HIS MAJESTY REVIEWING THE NATIONAL GUARD.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PAGE 536

THE COURT-MARTIAL ON LIEUTENANT-COLONEL CRAWLEY IN THE LARGE ROOM OF THE CLUB-HOUSE, AT ALDERSHOTT.—SEE NEXT PAGE.

THE COURT-MARTIAL ON COLONEL CRAWLEY.

The proceedings in this remarkable trial drag their slow length along. A considerable portion of Thursday, and the whole of Friday and Saturday, last week, were devoted to the cross-examination of Lieutenant Fitzsimon. Attempts were made to show inconsistencies between his evidence in chief and in cross-examination. The witness stated that he did not know that at the time the Sergeant-Major was under arrest Mrs. Lilley, so far from being ill and confined to her home, was able to go about the camp, and did, in fact, go about and converse with her friends. Of course, if Mrs. Lilley had been up and about, the witness could have gone to her house to post the sentries without inconveniencing her. With respect to the second bungalow being bombproof, he should say that it would be more unhealthy than if it was not. In writing the letter of remonstrance to Colonel Crawley, the witness obtained the assistance of Quartermaster Wooden. He showed it to several officers. He never gave the letter or a copy of it to Captain Smales; and, having withdrawn the charges he made against Colonel Crawley, he only renewed them when the matter attracted the attention of the Horse Guards. A letter was put in and read, from Colonel Crawley to the Adjutant-General, dated the 10th of November, 1862, which called attention to the remonstrance of the Lieutenant. When that letter was read to Mr. Fitzsimon he withdrew his charges against his Colonel, but only, as he explained, because his letter was declared by General Farrell to be an act of insubordination.

On Monday the prosecution made some further progress in the charge. Several commissioned and non-commissioned officers testified to being present when Colonel Crawley gave the order that the sentry should not lose sight of Lilley night or day, and, in reply to remarks that the prisoner was married and that his wife was sick, said he did not care—married or single, his orders must be carried out. One of the sentries, however, stated that the orders were that the sentries should not go into Mrs. Lilley's bedroom. Tuesday was chiefly occupied in cross-examining the witnesses who had been called for the prosecution on the preceding day. They were mostly the officers of the regiment, and the object of Colonel Crawley was to show that they bore a grudge against him, and had been reprimanded for the animus they showed in the course of their examination on the former trial. Several witnesses, including Colonel White, spoke most highly of the late Sergeant-Major. The evidence given on Wednesday was of an interesting though painful character. It related more directly to the treatment to which Sergeant-Major Lilley was subjected, and to the causes of his death. The medical witness deposed that Lilley died of heat-apoplexy, mainly induced by the treatment he had received. His impression was that Mrs. Lilley was inconvenienced by the nearness of the sentry to her bedroom. Letters written by Colonel Crawley about the time of the Sergeant-Major's death, and giving his version of the affair, were read. On Thursday Cornet W. T. Skinner Snell underwent a cross-examination by the prisoner, and stated that, whilst acting as Adjutant at Mhow, he had frequently asked Sergeant-Major Lilley whetherhe had any complaints to make, but he never made any. The Regimental Assistant Surgeon, in cross-examination, stated that though he was daily and nightly in Colonel Crawley's house, in consequence of illness in his family, yet he never made any representation, official or non-official, to the Colonel nor to any member of his family respecting Lilley or his wife; nor did he believe that Dr. Turnbull had mentioned their cases. From what he knew of Colonel Crawley, he believed that if any one had stated that the close confinement of Lilley was likely to prove fatal, steps would have been taken to avert the calamity. No one could have anticipated Lilley's death. It was stated in the court that Colonel Crawley had received an important communication from India pointing out some circumstances which may be of great use to him in conducting his defence.

The inquiry is being held in the large room of the Clubhouse at Aldershott, which has been fitted up for the purpose; and a clear notion of the scene and of the general arrangements of the court may be formed by a glance at the Engraving on the preceding page. The members of the court-martial (whose names we published in our last Number) occupy the long table, at the foot of which are the wooden models of the building in which Sergeant-Major Lilley and his wife were confined. To the left of this table is a smaller one for the officiating Judge-Advocate, Colonel J. Kennard Pipon; the Deputy Judge-Advocate, Mr. Denison, and Colonel Sir A. Horsford, the official prosecutor (who is represented standing); and their assistants. On the right a similar provision is made for the convenience of the prisoner (depicted standing) and his legal advisers, Mr. W. Vernon Harcourt, of the Common-Law Bar; Mr. Waller, of the Equity Bar; and Mr. Cocker, his solicitor. Colonel Henry Crawley, the prisoner's brother, also sits to advise him. A long table, extending the entire width of the apartment, accommodates the members of the press. A considerable space at each end of the room is parted off for those who are present as spectators. At the upper end seats are provided for officers and civilians of rank, and at the lower for the general public, who are represented by the military element entirely, principally commissioned and non-commissioned officers.

THE DISTRESS IN THE NORTH.

The weekly meeting of the Executive Committee was held at the Townhall Manchester, on Monday—the Earl of Derby presided.

The hon. secretary reported that £249 had been received during the week, and that the balance in the bank was £250,132. Nine packages of clothing had been received, and none sent out.

Mr. Commissioner Farnall reports that on the 14th inst. there was an increase in the number of persons receiving perochial relief in twenty-seven unions in the cotton-manufacturing districts, as compared with the number so relieved in the previous week, of 413. Since the 6th of December last a total decrease of 143,402 has taken place. There were on the 14th inst. 128,581 persons receiving parochial relief in the twenty-seven unions adverted to; in the corresponding week of 1861 51,413 persons; and in the corresponding week of 1862 248,764 persons were so relieved.

Mr. Farnall said there was no hope of a gradual increase of pauperism being obviated for some time to come, except by the Public Works Act being brought into active operation. At present, with unimportant exceptions, its provisions had not come into play. From preparations which were being made in Blackburn, Ashton, Bury, and other places, there was reason to believe that public works would speedily be progressing on a large scale, and a large amount of employment be thereby found for the distressed operatives. In reply to Colonel Patten, Mr. Farnall stated that, though application had been made for £1,400,000 under the Public Works Act, the amount actually granted by the commissioners was only at present about £500,000, and that sum would not be all paid at once.

Grants were made from the General Fund:—To Staleybridge, £400; Dukinfield, £400; Shuttleworth, £50; Horwich, £50; Glossop and Hadfield, £1750; Whitworth and Facit, £200; Walton-le-Dale, £150; Mottram, £100; Bolton, £700; Ashton-in-Makerfield, £25; Heywood, £700; Salford, £750.

The total amount collected in Staffordshire for the relief of the Lancashire distress exceeded £23,500.

It is stated that the will of the late Mdme. de Lamartine, which left all her property to her husband, has been declared void in England, owing to an informality in the execution. It will be remembered that she was an Englishwoman.

A statistician has had the patience to count the number of words employed by the most celebrated writers. The works of Corneille do not contain more than 7000 different words, and those of Molière, 8000. Shakspeare, the most fertile and varied of English authors, wrote all his tragedies and comedies with 15,000 words. Voltaire and Goethe employ 20,000; "Paradise Lost" only contains 8000; and the Old Testament says all that it has to say with 5642.

"John, Archbishop of Tuam," has addressed a letter to Mr. Gladstone, Chancellor of the Exchequer, on the subject of Irish emigration. "The systematic work of agrarian evictions," says his Grace, "artificial famines, and forced emigration, has now reached such a crisis as to terrify the British officials by whom it has been projected, as well as their Irish agents by whom it has been so zealously carried on." He then proceeds to enumerate the evils which he considers have reduced the Irish peasantry to a state of hopeless misery in their own country—high rents, evictions, the turning of arable land into pastures, and, above all, the "hideous evil" of the Established Church. The letter concludes:—"It is in vain, then, that landlords, now changing their tone, beseech their tenantry to stay; it is in vain that the obsequious scribes of a Government which so long treated them with cruelty implore of them not to go. Their resolve, however to be regretted, appears determined, as long as their just claims are so mercilessly unheeded. And hence the cool and stern indifference with which they leave a land that has lost for them the endearing character of a parent, and with it all the sacred attractions and security of home."

MUSIC.

Balfe's new opera, "Blanche de Nevers," was produced at the Royal English Opera, Covent Garden, on Saturday last. Its reception was attended with all the usual signs of success. The theatre was crowded to the doors; the applause during the evening was warm and continuous; several of the principal airs were loudly encored; and the principal performers, as well as the composer, were several times called for. Everybody knows, however, that the success of a first night is often more apparent than real. The *claque* system, though not so completely organised in London as in Paris, is practised among us to no small extent; and the art of packing the house with thick-and-thin applauders is so well known at all our theatres, that it is really impossible from first appearances to discover whether a theatrical piece has actually been successful or not. This can only be learned from its subsequent reception; and the result of this experience, in as far as it has gone, has in the present instance been favourable. During the past week Mr. Balfe's opera has drawn good houses, and has been well received, though not with the enthusiasm of the first night. Taking this into account, together with the intrinsic merits of the opera, we may anticipate for it a moderate degree of success, though by no means equal to that of some of the previous works of this deservedly popular composer.

We need scarcely tell our musical readers that "Blanche de Nevers" is merely a version of "The Duke's Motto," which, again, is merely a version of a French drama by M. Féval, called "Le Bossu;" both these versions being made by the same person—Mr. John Brougham. Is the English public doomed to feed for ever on these *rechauffées* of the stale meats of the Parisian stage? Have we no dramatist nowadays capable of serving up to us anything fresh and original? But we may thank ourselves for the fare to which we are reduced. Managers of theatres and opera-houses will find their account in keeping us to this sort of diet so long as we submit to receive it. "The Duke's Motto," though effective as a drama of the "sensation" kind, is by no means fitted for adaptation to the musical stage. An opera ought to be plain and simple in its story, and the enjoyment of the music ought not to be marred by efforts to follow the intricacies of the plot. Such is the case with all our best and most successful operas. But the plot of "The Duke's Motto" itself is complicated and obscure, and "Blanche de Nevers" is still more so, as the explanatory matter which facilitates the comprehension of the former piece is wanting in the latter. The opera, nevertheless, is inordinately long, and, though it has been shortened since the first night, it still occupies four hours in performance—a duration which proves too much for the patience of an English audience.

In regard to the music, we doubt whether it is calculated for lasting success. Mr. Balfe has again fallen into the error which injured his previous productions, "Bianca" and the "Armourer of Nantes." Balfe is our English Auber—he wishes, apparently, to make himself an English Meyerbeer. Forsaking his gay, sparkling style, he tries to adopt the grandiose manner and elaborate construction of the grand serious opera, and, as might naturally be expected, he has done so with but indifferent success. *Non omnia possumus omnes.* We hope that for his next opera he will choose a subject more congenial to his temperament, and will treat it in that light and brilliant style to which he owes his high reputation. At the same sime, Balfe's music must always be that of an accomplished artist. "Blanche de Nevers" has many beauties. Several of the concerted scenes are masterly in construction and highly dramatic, and some of the songs are graceful and melodious. The airs—in particular, "There is a void within my heart," sung by Miss Louisa Pyne; the duet, "Oh, what a boundless joy!" sung by Miss Louisa Pyne and Miss Hiles; the song, "Wilt thou think of me?" sung by Mr. Harrison; and the air, "As sunlight beaming on a summer lake"—are especially beautiful, and cannot fail to become popular.

The piece is splendidly got up and exceedingly well performed. Mr. Harrison is admirable as Henri de Lagardère, both in respect to acting and singing; and Miss Louisa Pyne gives much interest to the character of the heroine, and sings as she always does, charmingly. Mr. Weiss makes all that can be made of an ungrateful part; and the remaining characters are extremely well sustained by Miss Hiles, Miss Heywood, Mr. Rouse, and Mr. Corri. The costumes and decorations are rich and appropriate, and some of the scenery is beautiful.

The Monday Popular Concert of this week was very numerously attended. The principal pieces were Beethoven's quintet for stringed instruments, op. 4, one of his earliest and beautiful works; Schubert's pianoforte sonata in B flat, played by M. Hallé; a violin solo, composed by Vieuxtemps, and played by M. Lotto; and Mendelssohn's pianoforte trio in C minor. In the concerted pieces M. Lotto was the principal violin and M. Paque the violoncello, Signor Piatti having left England. The vocal music was selected from Benedict's fine cantata, "Richard Cœur de Lion," and sung by Mr. Wilbye Cooper and Mr. Santley. We are glad to observe that Mdme. Arabella Goddard is to appear at the next concert.

THE THEATRES.

Surrey.—On Saturday the tragedy of "Macbeth" was performed, and placed on the stage with excellent effect. The part of the ambitious Thane was carefully supported by Mr. James Anderson, who in many parts reminded us of Mr. Macready's manner of performing it. The character of Macduff received from Mr. Fernandez an intelligible and energetic interpretation. Lady Macbeth wanted more powerful treatment than Miss G. Pauncefort is capable of; but she laboured judiciously to reach the spirit and purpose intended by the great dramatist, and shadowed forth the same with laudable determination. On Monday Mr. Anderson undertook the part of Shylock in "The Merchant of Venice." The theatre has been well attended.

Strand.—A new and very broad farce was produced on Monday, entitled "My New Place," in which Mr. Wood, late of the Adelphi, made his first appearance in this theatre. The scene is a ladies' seminary, under the direction of Miss Virginia Verjuice (Mrs. Manders). Lovemaking and matchmaking will proceed, in spite of the severity of the spinster mistress; and Tom Larkspur (Mr. Wood) and Fanny Trentham (Miss F. Hughes) give her no little trouble. Tom disguises himself first in the clothes of a country lad, and next as an awkward servant girl, and thus aiding the young lady, who is confined on a bread-and-water allowance, earns a right to her heart and hand Mr. Wood was quite successful in the part; but the dialogue of the piece needs much correction.

MUSICAL PUBLICATIONS.

From the many works which have appeared during the last and since the beginning of the present publishing season we have selected a few which appear to be of special interest at this time to our musical readers, and to which, therefore, we wish to direct their attention.

Richard Cœur de Lion. A Cantata. Written by John Oxenford, composed by Jules Benedict. Of this cantata, which was performed for the first time at the late Norwich Festival, an edition in vocal and pianoforte score has been published by Messrs. Chappell and Co., of Bond-street. We have already had occasion to speak of this work, which is one of the happiest efforts of the composer's genius; and it only remains to add that this edition of it, for correctness and elegance, leaves nothing to be desired. Messrs. Chappell have also published a complete edition of Wallace's new opera, *The Desert Flower*, now running its successful course at Covent Garden. It is ably arranged for chamber performance by Dr. Rimbault.

Israel's Return from Babylon. A Sacred Oratorio. By Joseph Rodolph Schachner. This oratorio was performed with deserved success at the late Worcester Festival, and an excellent edition of it has been published by Messrs. Boosey and Sons.

Twenty-four Choral Songs. Composed by the late Robert Lucas De Pearsall, Esq., with an Accompaniment for the Pianoforte added by John Hullah. This very handsome volume, published by Messrs. Novello and Co., is of great interest to the lovers of English vocal harmony. The name of Pearsall is now well known as the author of some of the most beautiful madrigals and part-songs of the present time For some years they have been listened to with admiration at our best concerts, while nothing was personally known about their author save in the small circle of his private friends. It is only since his lamented death that he is known to have been a gentleman of family and fortune, an accomplished artist, and a voluminous composer. The volume now before us is a posthumous publication, its contents having been selected from his manuscripts, and prepared for publication by his friend Mr. John Hullah. The twenty-four pieces which it contains were all previously unknown to the public; they are madrigals and part-songs in four, five, six, and eight parts, designed for voices alone, without any accompaniment; Mr. Hullah's added accompaniment for the piano being *ad libitum*, and calculated for the facility of the singers. They ought also (as the title "Choral Songs" indicates) to be sung by a plurality of voices to each part, though this is not essentially necessary. They are, without exception, admirable. The composer has shown literary judgment in the choice of his poetry, which is generally from old English authors; and the music is not only melodious, flowing, expressive, and thoroughly vocal, but everywhere evinces the art of a profound harmonist, whose genius has been nourished by the study of the greatest English, Italian, and German masters. This volume, in short, is a treasure of pure and masterly vocal harmony.

Part-Songs (*Sacred and Secular*) for Two or Three Equal Voices, or Two Trebles and Bass, Composed and Adapted for Juvenile Classes by J. M'Murdie, Mus. Bac., Oxon. Addison and Lucas. This is a serial publication, of which the number now before us is the sixth. We have already spoken of this work with due encomiums on its merits, and its happy adaptation to the purpose for which it is intended by the author; and it only remains to notice in a few words the contents of the newly-published number. It contains, in the first place, a fine chorale, "St. Paul," originally composed by Mendelssohn, and now arranged for three equal voices. Then there is a hymn—"The spacious firmament on high"—adapted from a chorale of Bach. Next a part-song of Mr. M'Murdie's own, to the words "Under the greenwood tree," from "As You Like It," a charming composition, redolent of the woods and fields, and thoroughly Shaksperean in style and spirit. Though "comparisons are odious," one is necessarily reminded of Arne's setting of the same words; and, happily, M'Murdie's music is well able to stand the comparison. The last piece is a round, "Come, Anna, come!" the words by Kirk White. It is very ingenious, very pure, very pretty, and not at all difficult to sing. We hope Mr. M'Murdie will go on with this work; it is useful as well as agreeable.

Twelve Songs for Voice and Piano. Composed by Frank Mori. Davison and Co. Mr. Frank Mori is one of our most fertile as well as successful vocal composers. Of his numerous productions few have failed to attract attention, and many have gained great popularity. By the collection before us he has made a large addition to his published works, and none of his previous efforts are more calculated to do honour to his name. His success has been a good deal owing to his literary taste. He never falls into the common mistake of setting namby-pamby to music. His favourite English poet seems always to have been Charles Mackay—a poet well entitled to the favour of composers, for no *chansonnier* of the time, we think, has written so many lyrics that truly deserve that name—verses fit to be married to beautiful music. Of the twelve songs of which this collection consists six are from Mackay's pen; the remainder being by Kirke White, Longfellow, and Oxenford.

There never has been a time, we think, when female talent has been so conspicuous among our native musicians as it is now. Ladies have always distinguished themselves as singers and performers on the piano or the harp. But to these branches of the art their pursuits have been generally confined. They have produced pretty songs and light pieces for the piano; but it is only of late that they have grappled with the more severe and arduous forms of composition; a change to be ascribed to the great enlargement in the scope of female education, in music as in other things. Nowadays a girl who has genius and capacity has the same means of cultivating her talents as a boy has; and we have among us ladies, both amateurs and professional artists, who show themselves conversant with all the arcana of their art. This remark has been suggested by the number of works from female pens which we find among the publications of the day. At present we shall give a few instances of an interesting fact, the number of which we intend shortly to enlarge.

Trio in D Minor, for the Pianoforte, Violin, and Violoncello. By Kate Thompson. Davison and Co. The composer of this trio was formerly known to the public as Miss Kate Loder, one of our most distinguished pianists, and one, too, who promised to reach the highest honours of her profession—a promise she has not kept, having retired (under the happiest circumstances) into private life. She showed talents for composition at a very early age; and the extent to which these talents have been cultivated has been shown by numerous productions of her pen, and especially by this her latest. Every musician knows that a concerted piece for the pianoforte, with accompanying instruments—a trio, quartet, or quintet—requires a composer of high gifts and attainments; and that in such pieces Mozart, Beethoven, Hummel, and Mendelssohn have put forth the whole strength of their genius. Yet it is not too much to say of this trio of Mrs. Thompson that it is worthy of companionship with the works of those illustrious masters. It consists of an "allegro con brio" in D minor, an "allegretto" in B flat, a "scherzo" in D minor, and a "finale" in the same key. It is difficult, requiring a pianist such as the composer herself, with a violin and violoncello of corresponding powers; but, though such players are necessary for the complete production of its effects, yet it is not beyond the reach of well-taught amateurs, of whom many are now to be found in our social circles. Its most remarkable feature is its force and vigour. We would call it "manly," or "masculine," if these words could be used without implying anything unfeminine. On the contrary, it is from beginning to end refined, polished, and full of traits of exquisite grace and sweetness. It is remarkable, too, how thoroughly the composer is conversant with the genius and mechanism, not only of her own instrument, but of the violin and the violoncello, and with the happiest modes of employing them, whether as solo or accompanying parts. We may add that this masterly work is dedicated by the author to her friend Clara Angela Macirone, herself one of the most distinguished female musicians of the time.

From this lady's pen several vocal pieces of a high order have lately appeared:—Two four-part songs, *The Wounded Cupid*, and *Sir Knight, Sir Knight, oh, whither away?* (both published by Novello and Co.); and *Henry de Lagardière* a song (Chappell and Co.) The part-songs are among the most interesting contributions lately made to this delightful class of vocal harmony. They are elegant, graceful, and written in a style of classic purity. The song is in its subject a pleasing souvenir of the popular drama, "The Duke's Motto."

The Mourner's Hope, a duet, the words by Thomas Moore, composed by Mrs. Mounsey Bartholomew (Cramer and Co.) Mrs. Bartholomew is another of our thoroughbred female musicians who has gained laurels in the most arduous fields of her art. This duet is worthy of her high reputation. It is for two female voices, a soprano and contralto, and is remarkable, not only for the melody of the separate parts and the beauty with which they are blended together, but for the deep religious feeling with which Moore's fine verses are treated.

A Woman's Question, the words by Miss Adelaide Proctor, the music by Elizabeth Masson. *The Butterfly*, and *Now the toil of day is o'er*, composed by Mrs. Groom. These three songs, published by Messrs. Cock, Hutchings, and Co., are fine specimens of the genius of these accomplished ladies.

Letters from St. Petersburg, alluding to the naval and military preparations, state that the Imperial Artillery Committee had terminated the trials of various systems of manufacturing guns of large calibre, and decided in favour of Captain Blakely's principle. The Government, having approved the committee's report, were already actively engaged in carrying out its recommendations.

A lady who has just died at Torquay has left Mr. Disraeli, who was personally unknown to her, the sum of £40,000. A similar act is also recorded of a recently deceased barrister, Mr. George Blamire, who had willed the same amount to the late Sir James Graham, to whom he was an entire stranger, for abandoning his office and quitting his party, on principle, in 1834. The latter, however, having died first, the legacy has lapsed to the testator's relations.

NATIONAL SPORTS.

FORTY-EIGHT events, of which Lord Stamford won four and the Duke of Beaufort three, made up the return of the Shrewsbury five-day autumn meeting, which proves that it can hold its own without "grinding up the saplings" in a yearling race. As Nov. 15 (the last day allowed by the Queen's Plate regulations) fell on a Sunday, Mr. Frail obtained a day of grace, and began his meeting on Monday. Of the thirty-four Queen's Plates run for in England and Scotland during the present year, no less than fifteen have been won by Caller Ou, a feat never exceeded either by Fisherman or Rataplan, who were always, as the stables phrase it, "away on her Majesty's service." Asteroid and Gibraltar are each credited with three, Isoline and Bally Edmond with two, and The Lawyer, Jack of Hearts, The Knave, Miranda filly, Joey Jones, Gardener, Blithfield, Vinegar Hill, and Dictator with one. The November entries in the *Calendar* continue to promise well for next year. The Hopeful Stakes, at Doncaster Spring Meeting, to which the Corporation subscribe £100, has fifty-nine entries; and "The Champagne" has also done well with forty-six, which are contributed by thirty-five owners. In these, as in several other great stakes, Lord Stamford has paid a good parting tribute to the turf by engaging his yearlings heavily. His Lordship's sale takes place at Newmarket, on Thursday, and the forty-five race-horses and twenty yearlings are all to be sold, with their engagements, and without reserve. There is great speculation as to what Cambuscan will fetch; and it is thought that one Newmarket stable will not let him leave the town. Newcastle, Lady Augusta, Dulcibella, and a few other brood mares are alone retained.

The *Sporting Life* has given its annual list of winning jockeys. Fordham heads the "pigskin commons" with 103; and after winning the last race at Shrewsbury he took his "rest and be thankful" for the season, and got married the following morning to Miss Penelope Amelia Hyde, a niece of his first and earliest master, Mr. Drewitt, of Lewes. J. Grimshaw is second on the list with 76, and Challoner (61), Custance (59), and A. Edwards (55) rank the next. Among the other notabilities are Doyle (36), Goater (34), Wells (28), Osborne (25), J. Marson (21), Daley (19), Rogers (18), J. Mann (12), W. Boyce (8), Crouch (5), and T. Ashmall (3). Mr. G. S. Thompson (18) has twice as many wins to his name as Mr. H. Wombwell, the second among the "pigskin peers." The list consists of 215 jockeys and 103 gentlemen jockeys.

The Brewer and the David blood carried everything before them at the Amicable Club Home Park; and Lord Eglinton won both the stakes at the Ardrossan meeting, where the hares were scarce and wild. By very great exertion on the part of the Earl of Sefton's men the water was sufficiently pumped off the Altcar meadows to enable the club to meet there last week. His Lordship's kennel furnished no less than twelve runners to the Sefton and the Croxteth Stakes, which were won by Mr. J. Brundritt's Spider and Mr. Spinks's Sea Bird. Chloe, the winner of the last Waterloo Cup, kept up her prestige over these meadows in the Altcar Club Cup, and her own brother Cresswell also won the Altcar Stakes. Sea Pink did not meet Chloe, but was beaten by Justice, the runner up. The meetings for next week are Bridekirk, Ripon, Newmarket (O), Ridgway Club, Monastereven Club, and Thoresby.

The accounts from the hunting countries are satisfactory, in spite of wire fencing, which was not the cause of the Pytchley huntsman's severe accident. Her Majesty's hounds are having good sport, and Mr. Davis is much pleased with the work of the Pytcheley Jugglers, of which sort he has entered 5½ couple. The Duke of Beaufort's had a wonderful October cub-hunting, and there has been good average sport since then. They have already killed about 48 brace. The Belvoir killed 30 brace during their cub-hunting, and had a rare day on the 16th from Tipping's Gorse, killing their first fox, after 1 h. 5 min., in the open, and their second, after 50 min. from School Platts, in the streets of Grantham. The Quorn had rather a stormy opening week, but Goddard has succeeded in showing capital sport since then. They have had a capital day from Garendon Park, and a very fast fifty-three minutes from Cosby Spinneys, killing him in the open without touching a cover. The Grove have had a pretty good November, and the Milton have also got on well, despite the dryness of the country. A nine-mile run from point to point, ending with a kill in Conington Fen, is their best thing so far. Mr. Henley Greaves and John Treadwell are showing good sport with the O. B. H., although they are rather short of foxes in the woodlands; and the Berkeley have had one very first-rate day, and killed about as many foxes as the Badminton. Both cub-hunting and regular hunting have been alike good with the Heythrop—in fact, never better within the memory of Jem Hills; and the Brocklesby are showing some fair, steady sport.

LEAMINGTON AND WARWICKSHIRE HUNT MEETING.—TUESDAY.

Tally-ho Flat Race.—Little Lady, 1. Miss Clifton, 2. Sutton, 3.
Racing Stakes.—Disdain, 1. The Tyke, 2. Newsmonger, 3.
Great Autumn Welter Cup.—Lord Burleigh, 1. Tolurno, 2. Suburban, 3.
Nursery Handicap.—Welbeck, 1. Orphene, 2. Nucleus, 3.
Donnington Handicap.—Lord Burleigh, 1. Tolurno, 2. Farfalla, 3.
Free Handicap Hurdle Race.—True Heart, 1. Lincoln, 2. Sinking Fund, 3.

WEDNESDAY.

Scurry Handicap.—Tolurno, 1. The Flower Safety, 2. Somersault, 3.
Two-Year-Old Handicap.—Diploma, 1. Mary Ramsay, 2. Jewell, 3.
Handicap of 5 sovs each.—Disappointment, 1. Somersault, 2. Bernice, 3.
Selling Hurdle Race.—Jacob, 1. Pilot, 2. Edith, 3.
Leamington Grand Annual Steeplechase.—Portland, 1. Cheviot, 2. Ireley, 3.
Hunt Cup Steeplechase.—Sir William, 1. Church Militant, 2. It's All Over, 3.
Farmers' Steeplechase.—Harkaway, 1. Sutton, 2. Little Lady, 3.

THURSDAY.

Scurry Handicap.—Norma, 1. Rockley, 2. Lord of the Manor, 3.
Two-year-old Stakes.—Lifebuoy, 1. Diploma, 2. The Tyke, 3.
Handicap (half-mile).—Norma, 1. Newsmonger, 2. Flower Safety, 3.
Scurry Handicap.—Southport, 1. Lifebuoy, 2. Coronet, 3.
Winding-up Handicap.—Farfalla, 1. Disappointment, 2. Twilight, 3.
£50 Plate.—Disdain, 1. Quicksand, 2.
Hurdle Race.—Coronet, 1. Butterfly, 2. Peru, 3.
Military Cup Steeplechase.—Agnes, 1. Cheviot, 2.
Light-weight Steeplechase.—Redwing, 1. Medusa, 2.

Last month Sir Bartle Frere laid, at Poona, the foundation-stone of an hospital, to be built at the expense of Mr. David Sassoon, who gives £15,000 to endow it. It is to be open to people of all nations and creeds. [Our next Number will contain a Portrait of Mr. David Sassoon.]

At the ordinary meeting of the members of the Society of Arts, held on Wednesday night, Sir Chas. Nicholson, Bart., read a paper "On the Australian Colonies—Their Condition, Resources, and Prospects." Messrs. Crawfurd, Mackay, and Sydney having spoken, Mr. Jordan, the emigration agent for Queensland, spoke of the enormous capabilities of that country for cotton-growing.

The arrangements for holding a "Rifle Conference" to settle the basis for shooting-matches are being settled in a satisfactory manner. The council of King's College, Strand, have granted the use of their hall for the purpose of the meetings, which have been fixed to take place on the 12th, 13th, and 14th of January next. As the proposed congress is of considerable importance to volunteers in all parts of the country, invitations to attend will be issued to the representatives of the principal rifle associations.

The annual report of the chief superintendent of education in Canada shows an attendance in 1862 at the public elementary schools of 343,733 pupils in Upper Canada, and 139,474 in Lower Canada. Allowing for increase of population since the census, it is considered that this amounts to about 22 per cent of the population of Upper Canada, and about 11 per cent in Lower Canada.

A Madrid letter, speaking of the reception of the Annamite Ambassadors, says:—"The presents sent by the King of Annam to the Queen of Spain are forty-three in number. Among them are boxes and dressing-cases in ivory, mother-of-pearl, and different metals; six gold and five silver coins; a pound of odoriferous wood called tranmhuang; 5 lb. of cinnamon; forty rolls of silk, of different kinds, manufactured in the kingdom of Annam; 30 lb. of the flour of a tubercle called thuynhtinh; 200 lb. of white sugar; and 1000 lb. of powdered sugar."

Some particulars respecting our trade with Japan appear in Tuesday's *Gazette*. They are contained in a despatch dated Yokohama, Sept. 11, 1863, and received by the Secretary for Foreign Affairs from her Majesty's Chargé-d'Affaires in Japan. The returns are for the half-year ended June 30, when the situation of affairs was more menacing and alarming than at any previous period. The value of the export trade in British vessels had increased during the period referred to from £253,337 of the corresponding period last year to £561,120 for the first six months of this year. In imports we have, during the same time of the current year, £111,470 against £68,981 for the corresponding period. In this year's returns raw cotton also figures as an article of export for the first time. The quantity was 795,207 lb.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

THE stock of bullion in the Bank of France having somewhat increased, and the inquiry for gold on Continental account having fallen off, National Stocks were firm in price in the early part of the week. Since then, however, the market for them has been in a very inactive state, and the quotations have shown a tendency to give way. The Unfunded Debt has continued to sell at a discount.

There has been much less excitement in the Money Market. Both at the Bank of England and in Lombard-street the demand for accommodation has been less active; nevertheless, in the present uncertain state of things, the lowest rates for discounts are as follow:—

Thirty days' bills	..	5¾ to 6 per cent.
Sixty days' bills	..	6 „
Three months' bills	..	6¼ „
Four months' bills	..	6½ to — per cent.
Six months' bills	..	6½ ¾ „

The supply of capital is very large, and in the Stock Exchange short loans are now offered at 3½ to 4 per cent.

Throughout the Continent money still commands very full prices, with a good demand on the part of the mercantile community. We insert the rates in the leading cities:—

	Bank rate, per cent.	Open market, per cent.
Paris	7	6¼
Vienna	5	5
Berlin	4½	4½
Frankfort	5	5
Amsterdam	4½	4½
Turin	8	7 8
Brussels	6	5½ 6
Hamburg	—	5¾ 6
St. Petersburg	6	12

The demand for bar silver has become heavy, and sales have been made at 61½d. per ounce. About £80,000 has been withdrawn from the Bank of England, chiefly for transmission to Egypt, and about that amount has been imported from various quarters.

The Continental exchanges are somewhat unfavourable, and there is now very little profit on the import of bullion from America.

The following return shows the state of the note circulation of the United Kingdom during the four weeks ending Oct. 17:—

Bank of England	£21,544,213
Private Banks	3,331,715
Joint-stock Banks	3,013,250
Scotland	4,338,360
Ireland	5,690,410
	£37,847,948

Compared with the corresponding period in 1862 the above return shows an increase in the total circulation of £485,752. The stock of specie held by the Irish and Scotch banks was £4,267,968.

American Securities have fluctuated to some extent. Atlantic and Great Western Seven per Cents have been 76½; Illinois Central Seven per Cents, 23 dis.; and Panama Railway, 166.

On Monday Consols, for Money, were done at 92⅞ ⅞; Ditto, for Account, 91⅞ ½ ex div.; Reduced and New Three per Cents, 90¾ 91; Exchequer Bills, 7s. to 3s. dis.; Red Sea Annuities, 20 15-16; Bank Stock was 237 and 235; India Five per Cent Stock was 108¾ to 109; and Rupee Paper, 104 to 105, and 114 to 115. The Bonds sold at 2s. to 7s. premium. On Tuesday Consols marked 92⅞ ⅞; Bank Stock, 235 to 237; Reduced and New Three per Cents, 90⅞ 91; India Stock, 221 to 224; India Five per Cent, 108¾ to 109; Rupee Paper, 104 to 105, and 114 to 115; India Bonds, 5s. to 10s. prem.; Exchequer Bills, 6s. to 2s. discount. Prices were drooping on the following day, with a dull market:—Consols, for delivery, sold at 92⅞ ⅞; Reduced and New Three per Cents, 90¾ ⅞; Bank Stock, 237; India Stock, 221 to 224; Ditto, New, 108¾ to 109; Ditto, Bonds, 5s. to 10s. prem.; Exchequer Bills 6s. to 2s. discount. On Thursday the market was flat, at reduced quotations:—Consols, for Transfer, realised 92½ ⅝; for Account, 91⅛ to ¼ ex div.; Reduced and New Three per Cents, 90⅝ ⅞; Exchequer Bills marked 6s. to 2s. dis.; Bank Stock, 236 237; and India Five per Cent Stock, 108¾ 109.

The market for Foreign Securities has continued heavy. Generally speaking, the quotations have had a downward tendency, but they have not materially changed from last week. The Confederate Loan has been dull, at 54 to 56; Portuguese Scrip has sold at 1 to 1½ prem.; and Brazilian ¾ to ¼ dis. Brazilian Five per Cents have marked 99½; Ditto Four-and-a-Half per Cents, 1860, 89½; Buenos Ayres Six per Cents, 91; Chilian Six per Cents, 101; Ditto Four-and-a-Half per Cents, 84½; Equador, 14; Ditto, Land Warrants, 7¼; Egyptian, 99⅝; Greek, 31⅝; Ditto, Coupons, 15½; Mexican Three per Cents, 38¼; Peruvian Four-and-a-Half per Cents, 1862, 85½; Portuguese Old Three per Cents, 48¾; Ditto, 1862, 48⅞; Russian Old Five per Cents, 90¾; Ditto Three per Cents, 54¾; Ditto Five per Cents, 1862, 87¼ ex div.; Spanish Three per Cents, 53¾; Ditto, Deferred, 47½; Ditto, Passive, 31¾; Ditto Certificates, 14; Turkish Old Six per Cents, 90½; Ditto, 1858, 70½; Ditto, 1862, 70½; Dutch Two-and-a-Half per Cents, 63¼; Venezuela Three per Cents, 24; and Italian Five per Cents, 71¼.

Most Joint-Stock Bank Shares continue firm in price, and the amount of business passing in the market is of fair average extent. Alliance have marked 46¾; Ditto, New, 27½; Anglo-Austrian, 6⅞; Australasia, New, 47; Bank of Queensland, 14; Brazilian and Portuguese, 8½; Chartered of India, Australia, and China, 35½; Consolidated, 10; Continental, 0¼; East London, 8½; English, Belgian, and Netherlands, 3¾; English, Scottish, and Australian Chartered, 23½; Hindustan, China, and Japan, 27½; Imperial Ottoman, 17⅞; London and Brazilian, 53½; London Chartered of Australia, 20; London and Colonial, 8; London and County, 55½; London and Northern, 10; London and Westminster, 79½; National Provincial of England, New, 38¾; Ditto, 28½; New Zealand, 3½; Scinde, Punjaub, and Delhi, 5⅞; Standard of British South Africa, 23½; Union of Australia, 58; Union of Ireland, 19½; and Union of London, 39½.

Colonial Government Securities have been in moderate request, and very little change has taken place in the quotations:—Canada Six per Cents have been done at 103½; Ditto, Five per Cents, 92½; Cape Six per Cents, 1890-1, 109½; New South Wales Five per Cents, 1888 to 1892, 102½; New Zealand Six per Cents, 110; Nova Scotia Six per Cents, 106; and Victoria Six per Cents, 110½.

The Miscellaneous Market has been tolerably active:—Anglo-Mexican Mint Shares have sold at 20⅝; British Indian Tea, 3½; Company of African Merchants, 2½; Discount Corporation, 11¼; East India Irrigation and Canal 5; Egyptian Commercial and Trading, 4; English and Australian Copper, 1⅝; General Credit and Finance of London, 7½; Hudson's Bay, 13¾; International Financial Society, 10; Joint-Stock Discount 6⅞; London Financial Association, 23⅝; London General Omnibus, 2¼; Madras Irrigation and Canal, 22½; National Discount, 9⅞; Royal Mail Steam, 79; Trust and Loan Company of Upper Canada, 5⅞; London Gas, 87; Westminster Chartered, 87; Atlas Insurance, 13; Commercial Union, 8½; Globe, 115⅞; Guardian, 51; London, 48½; Marine, 95; Ocean Marine, 18½; Phœnix, 149 ex div.; and Provident Life, 40.

The dealings in the Railway Share Market have been very moderate, and prices have been somewhat drooping. Annexed are Thursday's official closing quotations:—

Ordinary Shares and Stocks.—Bristol and Exeter, 82½; Cornwall, 6¾; Edinburgh and Glasgow, 96; Great Eastern 49⅞; Great Northern, A Stock, 131½; Great Western, 63¼; Ditto, West Midland—Oxford, 40½; London and Brighton, 110½; London, Chatham, and Dover, 45; London and North-Western, 103½; London and South-Western, 101⅞; Metropolitan, 117; Ditto, New, 6⅞; Midland, 127½; Ditto—Birmingham and Derby, 95; North British, 52½; North-Eastern—Berwick, 101½; North Staffordshire, 77½; Scottish North-Eastern—Aberdeen Stock, 41; South-Eastern, 95⅞.

Preference Shares.—Great Northern Five per Cent, 111½; Great Western Four per Cent, 89; London, Chatham, and Dover, 100.

British Possessions.—Bombay, Baroda, and Central India, 106; East Indian, 107¾; Great Indian Peninsula, 108¼; Great Western of Canada, 9⅞; Madras Five per Cent, 106½; Scinde, 106½.

Foreign.—Antwerp and Rotterdam, 9; Bahia and San Francisco, 18½; Dutch Rhenish, 17⅝; Eastern of France, 19; Namur and Liege, Six per Cent Pref., 20; South Austrian and Lombardo-Venetian, 10⅞; Turin and Savona, 4½.

The return of the Bank of England for the week ending Nov. 25 shows the following results, when compared with the preceding statement:—

A decrease of circulation of	£621,102
An increase of public deposits of	588,684
A decrease of other deposits of	601,031
A decrease of Govt. Securities of	100,000
A decrease of other securities of	£477,029
A decrease of bullion of	51,270
An increase of rest of	8,150
An increase of reserve of	540,990

The total circulation is £21,154,252. Public deposits amount to £7,040,534; and private deposits to £12,802,411. Securities are £30,830,216; and the stock of bullion is £13,368,332.

THE MARKETS.

CORN EXCHANGE, Nov. 23.—The supply of English wheat on offer in to-day's market was only moderate. Good and fine samples moved off freely, at, in some instances, an advance in the quotations of 1s. per quarter. Other kinds were inactive, but not cheaper. There was a full average inquiry for most descriptions of foreign wheat, and the currencies improved 1s. per quarter. Floating cargoes commanded rather more money. Malting barley changed hands freely, at very full prices; but grinding and distilling sorts were a slow sale, at late rates. The malt trade was tolerably active. In the quotations, however, no change took place. Oats changed hands freely, at 6d. to 1s. per quarter more money. Both beans and peas were firm, and quite as dear as last week. The flour trade was firm, at very full prices.

Nov. 25.—Nearly all descriptions of produce were in fair request to-day, and Monday's quotations were well supported.

English.—Wheat, Essex and Kent, red, 41s. to 44s.; ditto, white, 42s. to 49s.; Norfolk and Suffolk, red, 41s. to 44s.; rye, 32s. to 33s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 31s.; malting ditto, 27s. to 39s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 55s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 22s.; potato ditto, 22s. to 25s.; Youghal and Cork, black, 16s. to 20s.; ditto, white, 16s. to 22s.; tick beans, 28s. to 30s.; grey peas, 33s. to 34s.; maple, 36s. to 37s.; white, 36s. to 37s.; boilers, 36s. to 38s. per quarter. Town-made flour, 37s. to 40s.; town households, 32s. to 34s.; country marks, 27s. to 30s. per 280 lb. French, 35s. to 37s. per sack. American 19s. to 25s. per barrel.

[[MARKETS_REST]]

porkers, 3s. 10d. to 4s. 2d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 20s. to 25s. each. Total supply:—Beasts, 990; cows, 135; sheep, 4130; calves, 120; pigs, 330. Foreign: Beasts, 320; sheep, 1400; calves, 70.

Newgate and Leadenhall.—The supplies of meat are good and the trade is heavy, as follows:—Beef, from 2s. 8d. to 4s.; mutton, 3s. 4d. to 4s. 4d.; veal, 3s. 4d. to 4s. 4d.; and pork, 3s. to 4s. per 8 lb. by the carcass.

ROBERT HERBERT.

THE LONDON GAZETTE.

FRIDAY, NOVEMBER 20.

BANKRUPTCIES ANNULLED.

J. GITTOES, jun., Great Barr and West Bromwich, Staffordshire, cement manufacturer.—J. VARTY, Wigan, Lancashire, builder.—S. HIRST, Bradford, woolstapler.

BANKRUPTS.

T. BUGDEN, Little College-street, City, late licensed victualler.—D. S. GREEN, West Wickham, Kent, tailor.—J. PERROTT, Reading, Berkshire, builder.—P. SEWELL, Canonbury-grove, Islington, commission agent.—G. SPINKS, Warren-street, Fitzroy-square, wood merchant.—W. MANLEY, Fieldgate-street, Whitechapel, hairdresser.—A. CUTLER, Sandham, Hertfordshire, and Avenue-terrace, Hackney Downs, gentleman.—S. CLEMENTS, Romford, Essex, dealer in pigs.—F. H. HARRISON, Upton-road, Kilburn, commission agent.—J. W. BARNES, Poland-street, builder.—C. WILLIAMS, Little Dean-street, Soho, lapidary.—G. B. KNIGHTS, Royal-road, Walworth, dealer in iron.—R. C. WARD, Mildmay-place, Ball's-pond-road, linendraper.—J. C. FLETCHER, Little Lever, Lancashire, stonemason.—T. HALLETT, George-lane, Eastcheap, and Three King-court, Lombard-street, carpenter.—SARAH TREVES, Shepherd-street, Spitalfields, grocer.—E. BENNETT, Norbiton, Surrey, bricklayer.—F. H. GOULD, Milton-next-Gravesend, designer to calico printers.—W. CLARK, Summerford-street, Whitechapel, horsehair manufacturer.—T. CRACKNELL, jun., Maida-vale, Paddington, house decorator.—J. BALDWIN, Buckland, Surrey, farmer.—T. C. HARLEY, Popham-terrace, Lower Islington, plumber.—J. STATUE BY J. H. FOLEY, R.A.

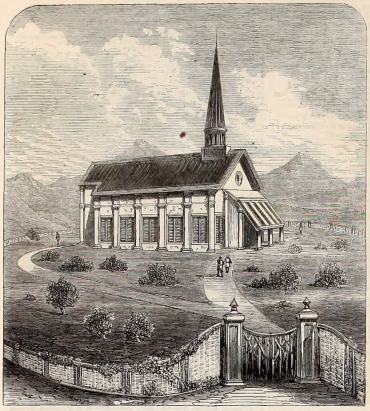
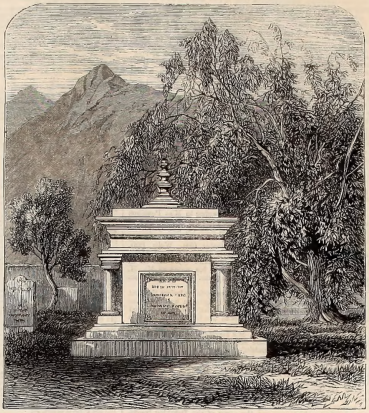
THE statue by Mr. Foley, R.A., of Manockjee Nesserwanjee (engraved on p. 545), was executed for the Oriental Spinning and Weaving Company at Bombay, of which this Parsee gentleman was founder and chairman. The company was, we believe, the first ever formed in India for the production of cotton fabrics. The statue, which is six feet high, will stand on a pedestal of fourteen feet high, and has been sent to Bombay. A cast of the statue is placed on the upper terrace of the Horticultural Society's gardens.

Like all Mr. Foley's portrait works, this statue bears unmistakable evidence of fidelity to character. More than this: it really seems instinct with life, and has a quality and degree of artistic excellence rare indeed in the sculpture of the present day. Even in the cast all may appreciate the truth of imitation displayed in the varied and discriminative modelling of the osseous, cartilaginous, and muscular surfaces of the face, the articulations, tendons, veins, and muscles of the hands. The latter are evidently as much a part of the portraiture as the face itself. They have the same character, and even the same sentiment. To explain the quiet vitality and the thoughtful unconscious dignity pervading, as it were, the very atmosphere of the figure, and to which all its parts are consentaneous, would be as difficult as to define the genius which produced it. The art seems lost in the subject; there is no effort, no display, no exaggeration—all is simplicity itself; hence the high and peculiar art-value and merit of the work.



TESTIMONIAL TO CAPTAIN SPEKE.

THE greatest esteem and sympathy are felt for Captain Speke, the discoverer of the source of the Nile, throughout his native county, Somerset. At the several entertainments which have there been given in his honour the utmost enthusiasm has been exhibited, and all have striven to show him that the successful issue of his last expedition is fully appreciated. We engrave at page 545 a testimonial presented to the gallant explorer by the tenantry of his father, W. Speke, Esq. The presentation took place on the 12th inst. at an entertainment given by Mr. Speke to the farmers and labouring poor of the three parishes in which the family estates are situated, on which occasion more than 800 persons sat down to dinner. The testimonial is a magnificent silver candelabrum, manufactured by Messrs. A. B. Savory and Sons, of Cornhill. It bears the following inscription:—"Presented to Captain John Hanning Speke, late of the 46th Regiment Bengal Native Infantry, by the tenantry of his father, William Speke, Esq., of Jordans, as a mark of their great admiration of his energy and perseverance in discovering the source of the Nile. Nov. 12, 1863."



THE NEW STATUE OF NAPOLEON I.

THE "little Corporal," in his traditional cocked hat and greatcoat, has just been removed *sans cérémonie* from his eminence on the top of the Column Vendôme at Paris, and replaced by the new statue of Napoleon in Roman costume, engraved in our present Impression. This is the third statue of Napoleon which has graced the same column. The first, raised in 1806, represented the great warrior in Roman costume also, and was that which in 1814 resisted the vain efforts of vast numbers of men and horses attached to ropes to pull it down. Eventually machinery employed for the purpose succeeded in removing the eyesore to the restored Bourbons, which was replaced by their fleur-de-lys, removed in its turn in the year 1830, of revolutionary memory. In 1833 Lepère, one of the architects of the Vendôme Column, and M. Hittorff undertook the erection of the statue of the legendary Napoleon, so dear to the memory of all French soldiers, and especially to such as had served in the Grande Armée; and the apparatus employed on that occasion was used again on the 4th of the present November, when the operation of lowering the *petit Caporal* and of raising his togaed successor was commenced and ultimately accomplished without the slightest detriment to the

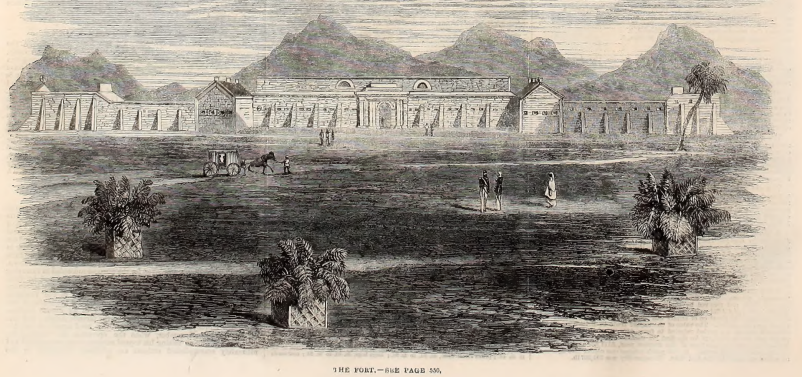
THE STATION CHURCH.

TOMB OF SERGEANT-MAJOR LILLEY IN THE STATION CEMETERY.



column. Without entering upon technical details, it may be interesting to mention that the machinery consisted of a powerful crane placed upon a platform erected on the summit of the column, and moving in grooves in such a manner as to enable the heavy statues (weighing each nearly three tons) to be brought to the position necessary to avoid injury to the column in the descent of the old and ascent of the new statue. The former operation occupied two hours and a half, the latter almost twice that time, owing to the precautions rendered indispensable by the continuous rain, which had disturbed the natural condition of the ropes and beams, and somewhat interfered with the calculations of MM. Hittorff and Dupré, the architects who superintended the manœuvres.

The new Napoleon is the creation of the celebrated statuary, M. Dumont, member of the Institute of France. Its material is a rich description of bronze, in which the statue was cast in the foundry of M. Victor Thiébaut, Mayor of the first arrondissement of Paris. The little figure of Victory surmounting the globe is curious as being the same as that employed to ornament the original statue of Napoleon in Roman costume. After the events of 1815 it was lost sight of completely, but was subsequently discovered in a shop in the Rue St. Honoré, and is now very appropriately, not to say triumphantly, restored to the position it occupied half a century ago.

The face of the new Napoleon is in Cæsar looks towards the gardens of the Tuileries; and on the same side an inscription, recording the date of the erection and other particulars, is being made on the base of the statue, which will be promptly completed in every respect, and soon become accessible to the closer inspection of the curious.

THE ARRIVAL OF SIR C. DARLING AT MELBOURNE.

SIR CHARLES DARLING, successor to Sir H. Barkly as Governor of Victoria, accompanied by Lady Darling and family, arrived at Melbourne on Sept. 9, by the Suffolk, which left Plymouth on June 28. When it became known in Melbourne (says the *Age*) that the vessel had passed the Heads, every preparation possible within the time before she would reach the bay was made by the authorities for the due reception of Sir Charles and family; while the citizens generally testified their favourable regards by decorating their premises with flags. As the vessel was expected to reach the bay about one o'clock, the railway pier by that hour was crowded with the inhabitants of Melbourne and the suburbs, anxious to see the new Governor, and, in testimony of their loyalty, to give him a cordial welcome as the representative of her Majesty. Before a berth could be cleared for her at the pier, the Suffolk arrived in the bay, and she had accordingly, to come to an anchor for a short time. She was quickly boarded by the Very Rev. the Vicar-General (the Dean of Melbourne), who thus had the honour of being the first to welcome Sir Charles and family. In a few minutes afterwards Brigadier-General Chute and Staff, and Captain Bancroft, Aide-de-Camp to his Excellency Sir Henry Barkly, arrived on board, and were followed by the Chief Secretary and the other members of the Ministry, who were also accompanied by his Worship the Mayor of Melbourne. About two o'clock the Suffolk weighed anchor, and was towed to the pier. When she was abreast of her berth the tug dropped alongside and took on board the Vicregal party, the members of the Ministry, and others, and conveyed them to the usual landing-steps. His Excellency on stepping on shore was officially received by the Mayor and members of the Corporation, and was heartily cheered by the crowds assembled on the pier. After an interchange of courtesies with the Mayor, his Excellency was conducted to the railway station, where a special engine and train were in waiting to convey him and his family to Melbourne. A guard of honour, consisting of about fifty members of the Royal Artillery, under Captain Purcell, were in waiting at the Flinders-street station, where his Excellency, on stepping from the carriage, was again heartily greeted by the crowd that thronged the

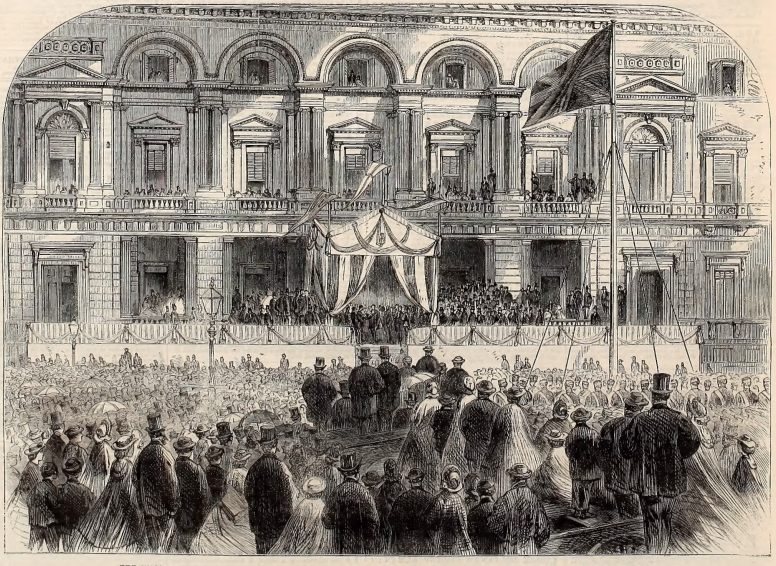
MARBLE STATUE OF MANOCEJSE NESSERWANJEE, BY J. H. FOLEY, R.A.—SEE PAGE 543.

platform. He then drove off in Sir Henry Barkly's carriage, which had been placed at his disposal, to the late residence of Mr. Rhden, in Collins-street, which had been prepared for his Excellency's temporary occupation, and where he still resides.

On the following Friday, Sept. 11, his Excellency was sworn in by his Honour the Chief Justice, in front of the Treasury buildings, where a large platform was erected for the occasion. The platform on which the ceremony took place was also occupied by the Hon. the President of the Legislative Council, the Hon. the Speaker of the Legislative Assembly, the members of the Ministry and the Executive Council, the members of both branches of the Legislature, the Mayor and members of the Corporation of Melbourne and members of the suburban municipalities, the representatives of foreign nations, the clergymen of various denominations, and others. Lady Darling, Miss Darling, and other members of his Excellency's family were also present. His Excellency was escorted to and from his residence by a company of the Prince of Wales Volunteer Light Horse, and a company of the Royal Artillery performed the duties of a guard of honour. In front of the Treasury there were between four and five thousand persons assembled, who heartily cheered his Excellency on his arrival and departure. The Engraving of Sir Charles Darling's installation is from a photograph taken by Messrs. Davis and Co., of Bourke-street, Melbourne.

TESTIMONIAL TO CAPTAIN SPEKE, PRESENTED BY HIS FATHER'S TENANTRY NEAR ILMINSTER, SOMERSET.—SEE PAGE 543.



THE NEW STATUE OF NAPOLEON I. ON THE VENDÔME COLUMN, PARIS.—SEE PAGE 543.

His Excellency, on the afternoon of Friday, Sept. 11, performed his first official act in proroguing the Parliament.

Sir Charles Darling held his first levée on the 16th. It was well attended, and the impressions created by his Excellency are stated to be greatly in his favour.

Sir Henry Barkly, the late Governor of Victoria, has left that colony for the Mauritius, where he succeeds the late Sir William Stevenson.

THE INSTALLATION OF SIR CHARLES DARLING AS GOVERNOR OF VICTORIA, IN FRONT OF THE TREASURY BUILDINGS, MELBOURNE.

*** *The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

DELICATE CHILDREN.—A Lady residing in a very healthy locality, at a short distance from Oxford, wishes to receive into her family TWO or THREE CHILDREN to bring up and educate with her own. They would receive the most careful, mental, and physical training, and their health and happiness would be promoted by every means. Their education, with strict reference always to their age and strength, would be systematically carried on under her immediate direction. Children requiring special care, from delicate health, or whose parents are abroad, would here meet with peculiar advantages. Address A. B. C., care of A. MacLaren, Esq., The Gymnasium, Oxford.

MAID, or YOUNG LADY'S-MAID.—Understands Dressmaking and Hairdressing. Good character. No objection to go abroad.
B. B., 16, Prestage-street, Blackwall.

PRIVATE TUITION.—A Gentleman and Lady wish to receive into their family a few Young Gentlemen, between the ages of Eight and Fourteen, to be educated with their own sons. The house is large, in a particularly healthy neighbourhood in the West Riding of Yorkshire, and situated within 40 acres of park land. Such an opportunity can be rarely secured for the careful education and training of boys. The highest references will be given and required. Address, for particulars, "Tutor," 21, Parliament-street, Westminster, S.W.

DR. DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD-LIVER OIL,
prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S.,
President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

FURNITURE, CARPETS, and BEDDING (CARRIAGE-FREE), see our ILLUSTRATED CATALOGUE, containing Prices and Estimates for Furnishing Houses of different classes, which will be forwarded gratis. This book is universally allowed, for its practical utility, to be unique. LEWIN CRAWCOUR and CO., Cabinetmakers, Upholsterers, and Bedding Manufacturers, 73 and 75, Brompton-road, Knightsbridge, London.—N.B. Fifty Drawing and Dining Room Suites, from 12 to 100 guineas. An assortment of Old Oak Furniture. Established 1810.

COSTLY FURNITURE for DRAWING ROOM, DINING-ROOM, and BEDROOM.—The BELGRAVE FURNISHING COMPANY, No. 12, Sloane-street, Belgravia, have for Disposal (part of the contents of a Mansion) three Suites of Furniture of a most superb, recherché character. The drawing-room is complete, in the style of Louis Seize, richly gilt, and covered in silk brocade; also includes three truly beautiful and very large chimney-glasses, with console and girandoles to match. The dining-room is equally magnificent, in Oak, consisting of all the usual requisites. The bedroom is likewise very superb, and comprises all the necessaries, in rich Italian walnut. This is an opportunity rarely offered.

SECONDHAND FURNITURE for Drawing and Dining Rooms.—Two complete Suites are offered for sale an unusual bargain. They are of superior manufacture, in excellent condition, modern design, and embrace all the usual requisites suitable for a fashionable residence. The drawing-room is of fine Italian walnut, price 45 guineas; and the dining-room, Spanish mahogany, 30 guineas. Also, a magnificent walnut COTTAGE PIANO, nearly new, price 25 guineas. On view at the BELGRAVE FURNISHING COMPANY, 12, Sloane-street, Belgrave-square.
JOHN READ, Manager.

FURNITURE.—A first-class SUITE of second-hand walnut-wood DRAWING-ROOM FURNITURE, comprising lounge, two easy and six chairs covered in rips, a large chiffonier, with glass doors and back, and marble top, elegant centre and sofa tables, large and handsome gilt chimney-glass, two papier-maché chairs, and a whatnot, to be DISPOSED OF for £42, at BARTHOLOMEW and FLETCHER'S, 217 and 219, Tottenham-court-road. Illustrated Catalogue free by post.

OAK DINING-ROOM FURNITURE.—A perfectly unique suite, in the Tudor style, comprising twelve chairs, two easy ditto, sofa, dining-table with screw, and elegant 7 ft. sideboard, to be seen at BARTHOLOMEW and FLETCHER'S Warehouses, 217 and 219, Tottenham-court-road; and 9, Alfred-place. EASY-CHAIRS, SOFAS, and COUCHES, best quality only, made to any shape, on approval, at T. H. FILMER and SON'S Manufactory, 31, 32, and 34, Berners-street, Oxford-street, W. An Illustrated Priced Catalogue sent post-free.

MARRIAGE NOT A LA MODE.—See "Temple Bar" for November, page 518. Extract.—"There lies before me the price-list (illustrated) of A GENERAL FURNISHING and UPHOLSTERY COMPANY, whose premises are in one of the best streets in London, and some of whose things are about me as I write. Let me turn to their 'japanned deal bedroom furniture' in their list. Not to be unnecessarily minute, the 'complete set' costs ten guineas. Of course there figures another set handsomer, but not one whit better, or cleaner, or really nicer-looking, which costs twenty-nine pounds. A 'complete set of furniture for a servant's bedroom' costs five guineas. From these figures guess the rest; and believe me when I tell you that you shall furnish your fifty-pound house for two hundred and fifty pounds."
GENERAL FURNISHING AND UPHOLSTERY COMPANY (Limited), 24 and 25, Baker-street, W.
Complete Illustrated Catalogues free by post.

ATKINSON and CO., CABINETMAKERS. Showrooms separately arranged for Drawing-room, Dining, and Bed Room Furniture in all designs.

WATCHING FOR THEE, THE SIREN RIVER, CLEAR AND COOL. 3s. each. New Songs by C. A. DANCE.—ROBT. W. OLLIVIER, 19, Old Bond-street, W.

PRATTEN'S SEVEN-GUINEA PERFECTED CYLINDER FLUTE, old system of Fingering. This Instrument, the result of many years' experiments, possesses all the reputed advantages of the Cylinder Flute on Boehm's and other principles, without changing the familiar Fingering of the old 8-keyed Flute, in addition to which, through Mr. Pratten's ingenious improvements in its construction, the manufacturers are enabled to produce this instrument at one third of the expense of any cylinder flute hitherto sold.
An Illustrated Prospectus may be had on application to the manufacturers, BOOSEY and SONS, 24, Holles-street, London, W.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in walnut, French polished:—"We have had occasion to examine a new description of Pianoforte manufactured by Boosey and Sons, which combines quality and cheapness in a degree which has not previously been ever attempted. When heard it creates such surprise as would be caused by a child 'discoursing most eloquent' music with the voice of a full-grown man. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room; and the whole mechanism of the instrument seems to be firm and durable. No piano at so small a price has ever before been presented to the public."—Vide ILLUSTRATED LONDON NEWS, Feb. 28, 1863. This Piano is well adapted for the cabin of a ship or an extreme climate.—Boosey and Sons, 24, Holles-street, London.

SECONDHAND PIANOFORTES. CHAPPELL and CO. have a large Stock of SECONDHAND PIANOFORTES for SALE, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, New Instruments of every description.
Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to Small Rooms, Yachts, Boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action and all the latest improvements.
Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood or Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to many of the tuners. In elegant rosewood case, with full fret, similar in every respect to other instruments at 50 guineas, price 35 guineas; in walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut 60 guineas. This instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich; and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase) at the new Showrooms of
CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 60 guineas; other varieties at 25 and 35 guineas. Illustrated Catalogues of Pianofortes and Harmoniums upon application to
CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM, by ALEXANDRE, with five octaves, two footboards, and in oak case. These instruments are lower in price and superior to all other cheap Harmoniums. Descriptive lists on application to
CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 13 stops, 4 rows of vibrators, and Venetian swell, worked by the heel of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street (the largest in Europe). The most varied selection of Pianofortes are to be found in this Gallery.
The quality of every instrument may be relied upon as at least equal to representation. Pianofortes of the very inferior class are carefully excluded from the stock. Every facility is afforded to exchange, without loss to the buyer, any time within six months, should an instrument of a higher class, or by a different maker, be thought desirable.
Pianofortes by every maker of eminence will be found in the Gallery.

CRAMER'S ENGLISH PIANETTE, 22 guineas.—Cramer, Wood, and Co. manufacture this capital small instrument. It has all the requisites of the best Pianoforte—check action, solid touch, agreeable and powerful tone. The case is of polished ash. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose in the key and worn in the hammer. In rosewood, 25 guineas; in walnut, 26 guineas.
Purchasers are particularly requested to observe that this instrument has not the common or single action, but the double or check action; and that Cramer, Wood, and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

THE NEW PIANOFORTE.—CRAMER'S Seven-Octave Semi-Oblique Pianoforte, 45 guineas in Rosewood and 50 in Walnut.
Advantages to the Pianiste.—Power and refinement of tone; susceptibility of touch; full scale of seven octaves.
Advantages to the Vocalist.—Height diminished to 4 ft. 8 in.; freeing the voice from interruption; width enlarged to 4 ft. 6 in.; affording increased convenience to the accompanyist, together with greater elegance of position.
In introducing this instrument prominently to the notice of the public, Cramer, Wood, and Co. may be permitted to observe that it is alike remarkable as regards power and quality of tone, firmness and elasticity of touch, durability of tuning, and the capacity to develop its resources. The tone may be forced by the powerful finger of the artist or drawn out by the less accustomed hand of the amateur. In the one case there is no harshness, and in the other its charmingly vocal qualities are called forth with little effort. The action, or mechanism, is of the very best description, being somewhat similar in its principle of construction to that of the semi-grand. The stringing is complete, there being three wires to each note, like the full grand. Cramer, Wood, and Co. guarantee these instruments for any reasonable length of time, and forward them to all parts of the country without risk to the purchaser, and at a very trifling cost.
Pianoforte Gallery, 207 and 209, Regent-street
(the largest in Europe).

CRAMER'S INDIAN PIANOFORTE. Cramer, Wood, and Co. manufacture for India a superior COTTAGE PIANOFORTE, in solid Mahogany, with metallic bracings and all other appliances necessary to resist the effect of extreme climates. Nothing has been left solely to the glueing. The mechanism of the Instrument as well as the Case has been secured throughout by screws. Unusual skill and attention have therefore been bestowed upon the manufacture, and they have obtained the highest commendations for their excellent quality of tone and durability.
Cramer, Wood, and Co. deliver these Instruments f.o.b., packed in cases lined with zinc, at any home port, for 50 guineas. Size:—Height, 3 feet 11½ inches; width, 4 feet 4½ inches; depth, 2 feet 1¼ inch.—Pianoforte Gallery, 207 and 209, Regent-street, London.

PIANOFORTES by Broadwood, Collard, or Erard, for SALE or HIRE—At CRAMER'S PIANOFORTE GALLERY (the largest in Europe), 207 and 209, Regent-street.

SECOND-HAND PIANOFORTES. CRAMER, WOOD, and CO. have a number of INSTRUMENTS, by Broadwood, Collard, and Erard, at greatly-reduced prices.
It is often difficult for a purchaser to ascertain the precise state of a secondhand instrument, whether or not the hammers have been renewed, &c. Cramer, Wood, and Co. give this information without the slightest reserve, and warrant every instrument they sell.
207 and 209, Regent-street.

REPAIRING PIANOFORTES. CRAMER, WOOD, and CO. give great attention to this Department of the Business. The most skilful workmen only are employed. Every care is taken to renew defective or worn mechanism.
207 and 209, Regent-street.

TUNE YOUR PIANOFORTES by the YEAR: 15s., 20s., 25s., according to instrument. CRAMER, WOOD, and CO.'S staff of experienced TUNERS are well known to the Musical Public.
207 and 209, Regent-street.

HIRE of PIANOFORTES.—CRAMER, WOOD, and CO. Hire Pianofortes by the Night, Week, or Month, and take Yearly Contracts on very reasonable terms. A very large number of entirely new Instruments now ready to be sent out.
207 and 209, Regent-street.

PIANO MÉCANIQUE.—CRAMER, WOOD, and CO. supply Debain's Piano Mécanique. Any one can play upon it. Price 55 guineas. If with a keyboard, enabling it to be used by a Pianist like an ordinary pianoforte, 90 guineas. The instrument is very strongly made, and warranted to stand any change of climate.—201, Regent-street.

SIX-GUINEA HARMONIUMS.—CRAMER, WOOD, and CO. supply the best of this size that is manufactured. Unlike the ordinary Paris Instrument, it is put together in a substantial manner. The tone is charming in quality, and of remarkable power. Polished oak case.—201, Regent-street.

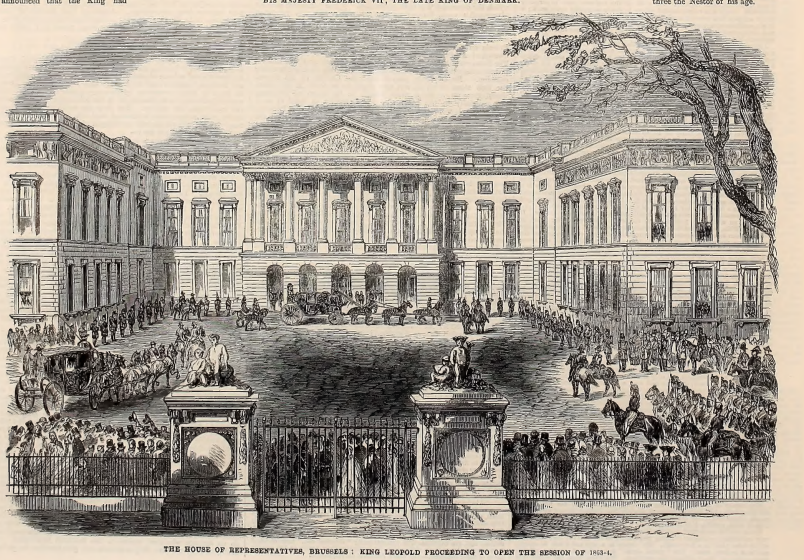
CRAMER, WOOD, and CO.'S GENERAL STOCK of HARMONIUMS is one of the most extensive and varied to be found in London. Prices from 6 to 100 guineas.
Second-hand Instruments of all kinds.
201, Regent-street.

CRAMER'S ARTIST'S CONCERTINA, manufactured under the immediate superintendence of Mr. Richard Blagrove. In purity of tone, delicacy of touch, noiseless rapidity of articulation, and general perfection of mechanism, these instruments are unrivalled. The vibrators are of tempered steel, and retain their perfect tuning in any climate. Price 12 guineas, including case.—Cramer, Wood, and Co., 201, Regent-street.

OPENING OF THE BELGIAN CHAMBER OF REPRESENTATIVES.

SINCE the complete restoration to health of the King of the Belgians it would seem as though the people could not see enough of their Sovereign, or be too much of his people. On two occasions lately ceremonials hitherto dependent upon their own inherent importance for any interest they possessed, have been ennobled and graced by the presence of royalty. A sketch of the celebration at St. Gudule, last July, of the anniversary of the King's accession has appeared in these columns. An event of more political if less picturesque significance took place on the 10th inst., when the King and Royal family presided at the opening of the Belgian Chamber of Representatives for the Session of 1863-4.

All who know Brussels will remember that the central avenue of the park abuts at one extremity upon the Palais du Roi, and at the other upon the Palais de la Nation (Chamber of Representatives), the Rues Royale and Ducale forming a slightly oval and decidedly brilliant setting to the little gem, with its Vauxhall and fountains, its kiosks, statues, and boschetti, which they inclose. On this occasion the entire *entourage* of stately buildings made a point of displaying the national colours, and the gorgeous orange, crimson, and black floating on the breeze of a brilliant day harmonised and contrasted alternately with the autumn tints that still flushed the park with beauty.



A salvo of artillery announced, at half-past twelve, the commencement of the ceremony. A detachment of the Garde Civique formed the line of way from the palace to the chamber. A band was stationed at an angle of the latter, and an occasional lively martial air, and the arrival of the representatives and of the different foreign Ambassadors in their gala Court equipages, served to beguile the tedium of expectation to a group of rather select than numerous spectators. At a quarter to one the Brabant greys, with outriders and postilions in scarlet, swept majestically round the Rue Royale corner, and, drawing up, deposited the Duchess of Brabant and suite. At one the sound of cannon and a murmur and flutter among the crowd at the Royal palace said, and that, nerveless, ran from person to person and group to group to the other extremity, announced that the King had started. A very few minute brought the martial "Brabançonne" into hearing, and the Royal cortège into sight. To see Leopold welcomed amongst and saluted by his people is a pleasing sight. To an English ear the vociferous heartiness of an English greeting may be wanting, but there is a profound self-contained affection in the attitude and expression of the Belgian people when their King comes among them which is more impressive than noise and more touching than gesticulation.

The King, with the Duke of Brabant and the Count of Flanders, were received by a deputation of the Chambers and, after a short delay, conducted into the *salle*. A very short time sufficed for the delivery of the Royal speech, and half an hour had not elapsed when the cortège was again in motion, bearing, amidst the cheers of the crowd and all the usual Royal appanage of sound, the King, by the Rue Ducale, home, the circle of the park being thus made. The crowd that had thronged the line of route, like a mammoth many-hued ring, now bent their steps and energies to the spot where the King would alight; the good-humoured hilarity of the people in the midst an of empressement not always consistent with dignity giving an air of fête to the proceedings, to which the rich toilets of the ladies, the beauty of the day, and the accidents of picturesque scenery already lent consistency. Stragglers were still streaming towards the focus of attraction when the King, accompanied by the Duke of Brabant and the Count of Flanders, after alighting, appeared on the palace balcony. Father and sons can never have appeared to greater advantage than thus standing together in the bloom of youth and majesty of age. A hearty cheer rose from the people, at last roused into enthusiasm as the King stood bareheaded before them—again and again renewed, as he and the Princes repeatedly acknowledged the warmth of their reception. The Duchess was then led forward by her husband to receive and acknowledge her share in the national greeting. After their departure, the crowd still lingered, as if unwilling to depart, eventually filtering in groups and streams through the principal streets in the town.

The apparently perfect health of the King was the subject of universal comment and satisfaction; and as he and his sons stood on the balcony, it took some scrutiny to distinguish amidst the three the Nestor of his age.

HIS MAJESTY FREDERICK VII., THE LATE KING OF DENMARK.

THE HOUSE OF REPRESENTATIVES, BRUSSELS: KING LEOPOLD PROCEEDING TO OPEN THE SESSION OF 1863-4.

MHOW.

THERE are five towns in India bearing the name of Mhow. The place so called to which public attention is now specially directed—on account of the Crawley-Lilley case, under Lord Acheson—is a British cantonment, situated about thirteen miles south-west of the town of Indore, and not far from the Vindhyan mountains. It has pretty much the appearance of a European town, having a church with a steeple, a spacious lecture-room and library well furnished with books, and a theatre. The town of Mhow stands on the Gumbire river, on an eminence, a mile and a half north-west of the cantonment.

The accompanying particulars of Mhow are supplied by the gentleman whose communications of the Peiwar, the Sherpur, and the Tomb of Sergeant-Major Lilley, at Mhow, are engraved on page 544 :—

MHOW, Oct. 10.

It is said, and believed, that when a house is divided against itself its condition is critical. The house of Mhow is undoubtedly in that position just now, or rather was yesterday morning when the storm which has raged with vigour for some months to come. I, as an English Rhinoceros, wandering through the jungle, and finding myself among a community of Mhow and being moreover an utter stranger to General Crawley, as well as to every officer in his regiment, may perhaps be allowed to offer my opinion as an impartial statement of many matters concerning this unfortunate trial that one who, from his position, knows better tattoo-time than Reveille, and the judgment warped by being a participator, however passive, to the events of the last night.

Mhow, in its magnificent and delightfully picturesque situation, was the scene of a great sensation. It is a little, lovely, cool station, where officers and men substituted, under the stern dictates of a tropical sun, the pith helmet which modern fashion would call upon us to wear. But there are such stations in this country I know from experience, for I was born in one, and the rule to prefer fashion to comfort, the first view I obtained of this now too famous cantonment was about three miles off. A lay included softly famous cantonment was about three miles off. A lay included softly and luxuriously lolling upon the top of a range of low, irregular hills, and myself also observed of a sultry Indian mid-day temperature. But I must not be supposed that this desiccating climate is utterly alienated from an occasional visit, with a tossing breeze. Even in the month of September, Lucknow, and Agra (and in the latter place I found the thermometer, three weeks ago, marking at 98 deg. within doors) I have felt cold, and more severely than I ever did in the wilds of Scotland, or on a March night in the Bay of Biscay.

As one approaches Mhow, letting his horse pick its way between the grassy mounds of the unmacadamised builders with which the cantonment is strewn out of their missile hall, the "station of Mhow"—for it is neither city, town, nor village—boasts a church, and the church, surrounded by all the pretentious and very pretty bungalows, help to make the scene, to which Nature has very largely contributed, one of the most striking in India. The Kings Royal and Indigenous hold an court here. Better developed limbs among the natives I have not seen. Youth, women, and children appear to be of most jolliest and healthy. Even as I passed the "married men's barracks" I saw a little, white-skinned boy, not of one of the soldiers, skipping about, his head uncovered, and his body carefeel in no further habiliments than the "early suit" worn by the celebrated Miss Nicolas of Shooter's. The boy seemed to be happy enough. He was evidently neither an anti-Crawleyite, nor a partisan. He enjoyed a state of existence unknown. And it is not with the "nobby" of Mhow. The departure of Colonel Crawley has in no way lab for the evening ever, and is almost a matter of indifference. Such friends to express an opinion upon the case, either pro or con. But, with the standing order to soldiers, "Keep your temper," and "Be courteous," while Colonel with a bitter hatred, and hope that Colonel Crawley will be "broken" while Major Smith, Captain Nolan, consider Colonel Crawley one of the gentlest, most considerate of commanding officers in her Majesty's service. And as to the common mess, the Captain and Major treat each other with shyness, and, curiously, look upon Colonel Crawley as never mentioned. But there is one fact patent to all, and which no one attempts to gainsay : it is the fact of the 23rd Regiment inclining very warmly towards their late commanding officer. They speak of him with sympathy, and they desire, almost to a man, that he may escape unhurt from the stormy which is now stitched to him. But with the merits of this case I have nothing to do. No doubt, Colonel Crawley, Colonel Crawley, the Assistant and fiery witness of all ranks have gone to England as an enormous cost, the passage money alone amounting to about £105 sterling. Possibly, by this time he added the full Indian pay and allowances which each witness will draw during his absence from Mhow.

There is not very much information to be added to the facts already known concerning Sergeant-Major Lilley's death. He seems to have been efficient as enemy. A soldier in his regiment said to me yesterday, "He was as good a fellow, Sir, as ever God put beneath a tree ;" and he was a man of many men who works his way up in a regiment like the Inniskillings to such a post as to be on the verge of obtaining a commission. The Sergeant-Major, as it now stands, seems to have arisen from a want of dignity on the part of Colonel Crawley. Had the latter judiciously when he received the communication from Captain Smiley, a hundred and forty men would not be sailing snugly home in Queen's steamers. The time to stop a mutiny is when it is in embryo. Sergeant-Major Lilley did exist.

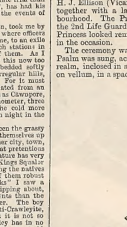
I have received from a visit to the building in which Lilley died. He was not placed in the building actually devoted to punishment, but in a room in the guard-house, which is set apart expressly for him. It was almost thirty feet long by twelve wide. It contained fifteen beds, and was used for the sleeping of the non-commissioned officers in 1861 to each man. The building in which Lilley died has long been pulled down, but with the exception of that nothing to do. The site was required by the executive engineer, and a portion of the new barracks over it. But nothing remains of the old guard-house, so there are a dozen other buildings exactly similar to it still standing. Maddy at these different spaces have been seen from time to time. The room in which the Sergeant-Major was first confined was a very superior building. The uglier sentiment I have heard is that the Sergeant-Major was first placed outside the building, was ordered to stand on the threshold of the door in the room of Mrs. Lilley's day lay in, an order and punishment. Was this seized the sentiment in this instance will transpire at the trial.

The non-commissioned officers and men of the regiment have erected an expensive but badly-designed tomb to the memory of their comrade. It bears the following inscription :—"Erected to the memory of Sergeant-Major Lilley, of the Inniskilling Dragoons, who departed this life on the 27th of May, 1863, aged 37 years, of Clogheen, Clonmel, Tipperary, Ireland, and enlisted in 1851, aged 27 years. This tomb was erected by the non-commissioned officers and men of the regiment, as a token of respect." From what I have said in a story. And Crawleyites allege that the Colonel, when he saw the monument being erected, gave immediate orders for it to be pulled down. But whether for a time in a fact—possibly for want of funds, or a scarcity of labour.

It is impossible to conceive a more healthy-looking station than Mhow. It stands at an altitude of 2000ft. above the level of the sea. The Vind, or Vindhyan Mountains, are piled in the south-west, and the numerous streams which stretch from Chimpanzee to Rajmahal. For sixteen hours out of the twenty-four the temperature is delightful ; but, of course, the heat at noon exists his numerical glare during eight hours of the day. As no one, however, is allowed to go out in the hour duty among the sun, the inconvenience is merely used as an enhanced room at the top of the house during the day, there being no punkahs in the bungalows. Cholera is unknown, and the only contagious disease which is prevalent is hospital. A very few cases during the year, and not the 90th I found one sixth on the sick list. Mhow, Belgaum, Poonah, and Kirkee are said to be the four most healthy stations in the whole Western India. It is supposed that the district of Malwa was the Mesopotamia of old ; and that the Nerbudda, the great river which runs through the centre of India, was the ancient dwelling-place of the children of Shem, and the birthplace of Abraham ; and that that river was the Euxus. Ophir, Havilah, and Tarshish are said to be in this region. There are stationed here at present the 72nd Highlanders, Inniskillings, Scots Greys, 3rd Dragoon Guards, Inniskillings, three battalions of artillery, two regiments of native infantry (the 4th and 23rd), and one company of Sappers and Miners, which, as I have been here in 1857. Large and well-arranged barracks are being constructed. One range, each of three blocks, the foundations of which I have seen to a quarter of a mile in extent, is completed and inhabited by the Highlanders. A commodious hospital, workshops, gymnasium, and recreation-rooms for men are executed by the soldiers, not only for Mhow, but even for Ajmere, reading-room and theatre. And since our visit, a handsome church, after the Beverley, but most probably it answers the purpose. These barracks are built according to the "Office" design. The regiment is now living in the old barracks which contrast to the upper floor are arm-in-arm together in the centre of the buildings. The regiment, therefore, at the end of the month, on the day's journey before them if they wish to visit the cantonment immediately below the hill. The Colonel's cricketers will probably be the first to avail themselves of the new field which has been refitted. The view from the Highland Barracks is very fine. To the east and the south the Vindhyan Hills rise from Rajmahal.

The Soldiers' Institute, one of hundreds, on the façade of which the name of Sir Hugh Rose will be written, continues to be a large source of income. From a notice on the wall I learnt that a series of lectures had just terminated : "Sir Roger de Coverley and Modern Progress," "Sir Walter Raleigh," "Sketch of the History of the 72nd Highlanders," "Sailors and their Songs," were some of the subjects treated. These lectures were attended by Major Mr. Fatoo, officiating clergyman to the 72nd, and the writer of the history of that regiment.

The bazaar of Mhow is like the majority of bazaars in the north-west, differing from them only by reason of there or four Parsees having established marts, where everything manufactured in the known world may be obtained, if their trade circular is to be credited.



Mhow has its racecourse, and the Mhow men have their races, which are now undergoing a diligent training preparatory to the trial of their strength, which takes place in a few weeks. The course is a mile and a half in extent, and kept in good order. The "grand stand" is capable of holding all the fashionables of Mhow without any crushing. The scene from the stand this evening was very lovely, as the sun set behind the Vindhyan Hills in a blaze of saffron glory. The narrow strip of land over which horses and men have to suffer glory. The narrow strip of land over which horses and men have to suffer during the race-week was golden, and the sky opened out into a series of apparent lakes studded with islands of golden cloud. The scene was golden, and the sky was golden, and the mountain ranges skirted the scene, contrasting with a weird and eerie solemnity the delicate beauty of those lakes within the sky, which lived only for half an hour, and then merged into the neutral tint of a moonless, starless night. HARTLEY HALL.

THE CROWN PRINCESS OF PRUSSIA LAYING THE FIRST STONE OF WINDSOR NEW CHURCH.

ON Saturday last the Crown Princess of Prussia (Princess Royal of England) laid the first stone of a new church at Windsor. The church-stone of a new church which is to be built in the Francis-road, about a mile from Windsor Castle. A numerous and brilliant party witnessed the ceremony.

The Royal party—comprising the Crown Prince and Princess of Prussia, Princess Helena, and Prince Arthur, attended by their suite—reached the spot at half-past twelve, having been conveyed in three carriages from Windsor Castle. Her Royal Highness was received at the entrance by the Bishop of Oxford (Dean of Windsor), the Archdeacon of Bucks, the Rev. Austin Leigh (Rural Dean), the Rev. H. J. Ellison (Vicar), and the Mayor and Corporation of Windsor, together with a large body of the clergy and gentry of the neighbourhood. The Prussian National Hymn was played by the band of the 2nd Life Guards as the Royal party entered the enclosure. The proceedings were conducted with the utmost propriety, and evidently took a deep interest in the occasion.

The ceremony was begun with prayer by the Bishop, and the 84th Psalm was sung, accompanied by the military band. Coins of the realm, inclosed in a small box, were deposited with an inscription on vellum, in a space hollowed out of the stone. The Dean of Windsor,

THE TROWEL USED BY HER ROYAL HIGHNESS.

addressing her Royal Highness, handed her the silver trowel with which the ceremony was to be performed. It is a handsome piece of workmanship, and bears the following inscription :—"Presented by the Ladies of the Parish of New Windsor, Nov. 21, 1863." The Dean remarked that it was with the deepest gratitude that all present witnessed the Royal Highness's presence on this interesting occasion. He fervently prayed that the Church of All Saints, the first stone of which her Royal Highness about to lay, might would grow up to be a great benefit to the town of Windsor, and especially to the poor, whose spiritual needs in need of such a blessing. It would be associated with the name of the Princess, and her birthday would ever be remembered in connection with the commencement of the work. He hoped that there would be pleasant reminiscences of her name in that place that, whatever title or dignity she might bear still she and her Royal children would be regarded with homely affection here. He concluded by expressing his sincere wishes for the happiness of the Princess.

Her Royal Highness, taking the trowel, performed the several acts of the ceremony, and ascertained, by plumbing, that the stone was properly laid. She then pronounced, in a low tone, but with a distinct enunciation and emphasis, the following words :—"In the Faith of Jesus Christ we lay the foundation of this church, and we do consecrated for ever to the service of Almighty God, in the name of the Father, and of the Son, and of the Holy Ghost. Amen." The Vicar then offered up a prayer, and a hymn was sung; after which the Bishop briefly addressed the assembly, and the proceedings were brought to a close.

The cost of the church will be about £4000, and the free seats will accommodate 600 persons.

It has been calculated that over two millions will be the amount of wages paid to the operatives of Lancashire in the coming of ago. The Mayor, who is in his sixteenth year, is at Eton School.

Mr. Layard, M.P., arrived in town yesterday week, after a series of speech-making in the north of England, and has taken a house in Under Secretary at the Foreign Office.

THE SECRETARY OF LEGATION IN NICARAGUA.—Many must be familiar with the beautiful view at Riverside, in the immediate neighbourhood of Richmond Bridge, on the valley of the Thames, and over the scene in which it is some supposed that the legions of Varus perished. Not by any means dissimilar, though far larger in its panorama, is the view discovered from Lookout Mountain, which looms up on our left, and from which you look down upon the valley of the Tennessee and Chattanooga. There is a tradition like a silver thread, which the sinuous Tennessee River, while from the rock upon which we stand, and which is called Lookout Mountain, a long ago the Indian savage used to watch his opportunity of attacking the hot boats, or the unwary settler. The red-skinned hunter, lurking in the dense undergrowth that robs the robbers of the Rhine, who three hundred years ago watched from their eagle's nest the passing of the merchant, or stealthily watched from the boat's that floated down the stream. I have seldom looked upon a fairer prospect. The intense blue of the sky, the glowing tints of an autumn sunset, the brilliant atmosphere and vivid light, and in the far distance the shadow of the mountains, all combine to make up such a picture, or, as the French would say, "tormenter," and twisted into gaunt shapes and fantastic outlines. Then the valley itself, the fair and fertile valley that had the contrasts of colour are startling beyond anything I have ever seen, and as we looked down upon it we could not help thinking that such a city had sun as Chattanooga must become in North America. Here, the scene, solid from of a mountain range, a belt of golden sun against the dark of the forest, embosomed in woods and dyed in dark green and purple, there, beneath shadows, the reflection of cascades of golden light, and everywhere that they have covered away for out of view. Right into, and a sight more full of a painful interest than any of Nature's wonders arises upon the eye. Two sections of a mighty nation, lately brothers, but now for ever divided by an ocean of blood, are lying in their long lines of battle, clutching the weapons with which they seek to renew their environed and fratricidal strife, and basking by their camp fires the narrow strip of darkness which divides them from each other. And here, among these lovely mountains, in scenes from which, a quarter of a century ago, the barbarian was tyrannously "crowded out," have civilised men come to beat their civilisation by inducing their hands in the heart's blood of their brethren.—*The Times' Southern Correspondent.*

ECHOES OF THE WEEK.

A CONSIDERABLE number of people, when they die, appear to go out of the world in an indecent hurry, because they die intestate, under the impression that making a will is a reminder to Death himself to make an immediate call. So, also, there are many who cannot bear to think of a hospital, or to give money to one, because, to them, it appears like attracting the terrible attention of Disease to themselves. Such victims of "nerves," as want of such common sense and such humanity are too often called, should carefully abstain from reading two pieces of important intelligence concerning hospitals. They are connected with the settlement of the great Chelsea question and the opening of a new wing to the Radcliffe Infirmary, Oxford. The Chelsea Hospital, on the new Sir Thomas Deane's Hospital may not be very near settlement, much having been settled, but that much has been finally approved. At present all parties, Board of Works and trustees of all kinds, have agreed that a plot of seven acres, to be reclaimed from the south bank of the Thames at Stangate, shall be given for the new hospital, and that Sir Thomas Deane would appear to be a settlement of that great question ; but it appears that the ruling powers are "thinking about it." As the opening of the learned Court is at best only somewhat between the locomotive habits of the sloth, the tortoise, and the Middle Kent Railway, it will be as well not to build too largely upon the projected Hospital, since it is quite certain that one half of the Vice-Chancellors are not hopelessly elderly, or the other half overburdened with sporting and fox-hunting. At the ceremony of opening the new wing of the Radcliffe Infirmary the Bishop of Oxford made a most excellent remark concerning that moral of sympathy between high and low, and declaring hospitals to be amongst the highest expressions of Christianity, as charity to the poor and afflicted, who were utterly disregarded before the eye of our Lord. Ancient Romans had every provision for the pleasure of the rich and powerful, but no provision whatever for the suffering. Gladiatorial combats and tragic spectacles for the multitude, but they had no provision for misery or want. Even Greek art, though it did not be said to have unpleasantly hoped that we had got out of old times, "when it was thought sufficient to provide for the sick only what was anything was considered good enough for the poor so long as they served their medicines and had their arms and legs cut off." A slight acquaintance with the Middle Ages, even among the wildest students, would be sufficient to save any philanthropical physician or surgeon from any such unpleasant mistake, and there is now in a time for all things, and Bishops may be allowed to be funny now and then.

Dr. Charles Mackay, who has been in England for some few weeks, is about to return to New York to resume his correspondence for the *Times*. Mr. Mackay's letters from America, and from the South, afloat concerning *Times* dissatisfaction with their correspondent's Southern tendencies, seem to have been by no means unsatisfactory. He proved. Still more pleased will they be to hear that a new volume of poems by Dr. Mackay is in the press, containing, among other the artistic title of "Studies from the Antique and Sketches from Nature."

Longfellow's new book, "Tales of a Wayside Inn," has not yet set the town talking, but it will not set long in that way. Longfellow, it is pretty to observe the intimacy and friendship of poets on the other side of the Atlantic, and the tender tattoo of sympathy, is more than inclined to take Old Mother England by the hair and give her a good shaking. We love poor Tennyson, and Longfellow, and Longfellow proves it by not hesitating to divide poetic spoil with Tennyson. Certainly, the spoil which Mr. Longfellow generously divides with Tennyson is not large, but good enough for such considerations. Here is Mr. Longfellow describing a ride on horseback.

> Now, *up! on the mood, and haul on the bridge,*
> *And let the horse go slowly with his head*
> *Low down and rocking from side to side.*

Already the lines have been admired, and deservedly admired. So, also, have these lines in Tennyson's "Maud," published 1855, been admired—when the lover is riding to meet Maud :—

> Now half to the setting moon are gone
> And half to the rising day ;
> *Low on the sand and loud on the stone*
> *The last wheel echoes away.*

It would be idle to suggest plagiarism here. It may be a coincidence. Sometimes there is a touch, so luminous in its truth to a poetic inspiration to be the case, another modern instance of what is not a wise saw may be given. Mr. Tennyson, years and years ago, described a girl's emotion :—

> And a tear
> Stole down the sweet perfection of her face.

This charming "conoit" Mr. Coventry Patmore adopted, simply because the word "tear" is, in poetry, a particularly enough. Last week's new volume of poems by Mr. Charles Swain, called "Airs and Graces," contains the line "A tear stole down her cheek." Liars is no good in being overcome by summer clouds like these. Such coincidences are interesting to the philosophy of the generally, the multitude, the million. But they are serious to the critical reader, who reckons them by tens of tens over the ten fingers. One, most notably, of the most delightful papers of Dr. Holmes, who will proudly recall the line about the sea :—

> Where the tall ships go sailing, sailing,

which may or may not be a reflection of the nine-tenths forgotten Abraham Cowley.

The conscious wrinkle furrowed on thy brow

The overgrowth of London must be compared with that of the occasional human body. Walk round, and you see how in just spots the active piece of humanity of some fine form since has become puffy, dotted with a light, swollen matter which is the accumulation of his wealth and waste. So London has got puffy with "new neighbourhoods" all around her. From Greenwich to Richmond, from Hampstead to Norwood, though she is every day being told that she is becoming corpulent. Nobody likes to be told of a superabundance of cleanliness matter. It is unpleasant, because nobody likes to be told that he has more or less what it may not lead. For instance, the stout man, who looks the picture of health, is subject to a moment's indisposition, and the post mortem proves that he suffered from fatty degeneration of the heart. The stout man is to be congratulated on his stoutness, without becoming fat within ; and London is a case in point. Whilst the whole of the suburbs are being added to, and are thus making the Thames—choking up the main artery itself with landed degeneration. And now, this very week, the new St. Thomas's Hospital is to attack the vital organ, and to be removed from the grip of the Dean at Stangate.

The speeches of Mr. Reed, one of the Admiralty architects, and of Lord Clarence Paget, Secretary to the Admiralty, are good reminders that the navy is not to be neglected, and that, as Mr. Reed says, "still in its infancy." Both gentlemen assure us that the next disaster to the oak-and-iron Prince Consort was admirable testimony to her structural worth. The Duke of Wellington, with Albert would have come out of the storm half as well. On such good authority, this seems satisfactory, to a certain extent ; but, with regard of such enormous cost, it will scarcely do to have rattling after one hurricane, and then wait and see if the worst kind may be achieved before the national mind can become easy as to great British defences ; and more than once it appears plain that the whole question with the Prince Consort and her sister ships is, how to get a terrific storm ; but it may reasonably be doubted whether she would be able to brave out in enemy's ship of equal power on the following day when the calm has succeeded. An iron monster, already battered by the combination and waves, would be scarcely more reliably from the very exercise of her means of defence. If 600-pounder Armstrongs were to form part of her armament, the vibration occasioned by firing might increase the rickety results of rolling and pitching ; and, moreover, such guns might be unmanageable in a storm, and certainly would be difficult as well as wasteful firing in bad weather. Kagosima, Lord Paget asserts, was destroyed because the firing from the Euryalus, &c., was unsteady from bad weather in a bay. Consequently, with guns of enormous calibre, at least half the shot and shell, owing a small fortune apiece, would go wide of the mark and do no damage whatever, except to the National Exchequer. No doubt, in these matters, ship-architects and gun-founders do go hand

in hand to a considerable extent; but their hand-in-hand working closely resembles drawing and indorsing heavy bills for Great Britain to accept.

"One foot on sea and one on shore." Reverting to the above, it appears that the Lavantine country, celebrated for roses, tulbein, harghilas, calepee, minarets, mosques, and kiosks, has fallen so far from its high and poetic estate that the newest diversion in high life is horse-racing in the English fashion. The Sultan takes the greatest interest in the proceedings of the racground near Constantinople; and many of the leading political chiefs take to the turf, as they do to their own Derby, Bentinck, or Palmerston. Like the English, also, the Turks profess that they are to be the best way of learning the relative values of breeds of horses, and already they have elicited one fact of no means significance. The English horse appears to be capable of doing more than the Arabian and Barbary. A very recent trial of the two will come off between Sefer Pacha's English Phœnix, weighted 13st., and Emir Kopkin, Arabian, weighted only 9st., the age of the ages not given, but in the mile the English horse won by 150 yards. Hence the Sultan is disposed to think the Arab a mere beauty; but no doubt he is right, always providing that extreme swiftness for a short distance is the one desideratum. Fuad Pacha is president of the Constantinopolitan Jockey Club, and subscribes the full powers of turning newspaper correspondents out of the field, as well as of deciding difficult points of racing and in making a good deal of money by it.

A newspaper account of the death of Captain Lyons, written at the time and merry probably from hearty hearsay, to the effect that he was weak. The Miranda is and was a screw-oversette; and, therefore, the sculptor of the monument to the lamented Captain stands fully exonerated from any possible imputation of defective drawing.

FINE ARTS.

WHO DISCOVERED PHOTOGRAPHY?

WE are enabled to offer our readers additional and important evidence concerning the very curious discoveries at the house of Mistress Boulton, 86, Sun-street, Bishopsgate, which, since our last week's reading, we narrated and discussed in our last week's Number. We intimated in the article referred to that several persons had testified that the rooms where the sun-pictures on silvered plates were found had not, before seventeen years ago, been opened for fifty years. Now, however, Mr. M. P. W. Boulton writes to us that "the room itself was in constant use. The cupboards, though rarely opened, were so occasionally." And our correspondent adds that he has reason to believe that Miss Wilkinson (the lady mentioned in our notice), the sister-in-law of Matthew Boulton, was aware of the boards on which the plates were found, and used the camera also found there for photographic purposes. We, of course, only desire to arrive at the truth, and this communication seems to weaken the testimony of the agent at Soho. Yet it must be observed that Mr. Boulton does not contradict the statement attributed to Miss Wilkinson that one of the plates represents the house at Soho before alterations—a fact that is direct evidence of the old man.

We have next week seems a remarkable confirmation of almost every point (except the long closure of the library) favouring the supposed practice of photography at Soho long before the discoveries of M. Niepce, Mr. Fox Talbot, and M. Daguerre. The correspondent in this instance is Dr. Henry Lee, of Weatherseal, Aylesbeach, Worcestershire, a gentleman born near Birmingham in 1795, and resident in Birmingham in 1816-23. The dates, the reader will please observe, are of the greatest importance, and the whole evidence of this correspondent is so weighty that we give it almost in extenso. "In confirmation," writes, then, Dr. Lee, "of the statement made by the old man" (meaning, we fear, by the employer of Matthew Boulton), "I well remember having heard, many years ago, from my mother, many of the particulars which leave no room to doubt the truth of the statement. I have heard her say that a society used to make trial at Soho to produce representations of objects by means of sun-light, which they called *sun-pictures*; that Mr. Francis Eginton, who lived on Soho-hill, in the near neighbourhood of Mr. Boulton, was said to be inventor of the process in question, which was still in use, and that, from a fear of injury to their artists, the process was discontinued, being said to have not arrived at the perfection it aimed at. My father and mother were also acquainted with several members of the Lunar Society. My father hung in his parlour an original portrait of Mr. Boulton, which was presented to a friend than of a public benefactor. My mother continued to visit his daughter, who long survived him. I recollect, also, the old man's story my mother's statements, which, having been more than once repeated to myself, I clearly remember. My mother came to Birmingham in 1784, and resided in that neighbourhood till his death, in 1832. I have been with her at Mr. Eginton's, and have heard from her anecdotes which he had told her, of which, however, her information was derived from authentic sources."

The personal evidence in favour of the sun-pictures is therefore still strong; but the proofs—circumstantial, documentary, and intrinsic—of the manufacture of the paper pictures lately brought to light by Mr. F. S. Barth it is impossible to gainsay. The first portion of how they were produced remains, however, as great as ever. A correspondent has made use of two of these pictures as the very subject demonstrates to us that they were not done by the hand of an artist. And, indeed, on last, it is not possible that it is moreover extremely difficult to imagine that, with the optical appliances then in use, they are photographs. And yet they have been produced by some voluntary process, the effects of which are more remarkable than those of photography than anything else. The "anastatic process" has been mentioned as the means of the deception. But it is clear on this account for the facts that some of them are copies of water-colour drawings, and they are all reversed, and, last, that there are two different sizes of the same subject, proving the power of enlarging or reducing the copies at will? We did not mention, also, that there are numerous little white specks on all of them, which exactly resemble the effects of air bubbles in photography.

The reopening of the National Gallery, after the autumn recess, is marked by the addition of the unusually large number of twenty-nine pictures. Of these twenty-two may justly be named the Peel bequest. Albert Dürer, by-the-by, that—as the inscriptions affixed to them attest—they are given by her Majesty. The illustrious name is not that of Prince Consort. These pictures are a selection from the Wallerstein collection of Sir Richard Wigham. They are the works of early Flemish and German masters, and will serve, therefore, to illustrate phases of art and development very different from the contemporary Italian and Netherlandish schools. Prince Albert's gift comprises pictures attributed to Justus, of Padua; Andrea di Leigi, of Alois, called L'Ingegno; Pinturicchio, A. Bronzino; Stephen Lochner, of Cologne; and Johann Schoreel, of Laverzberg Passion" (known also as the "Master of Werden"); the "Master of the Lyversberg Passion" (Margaret Van Eyck, sister of Hubert and John); Hans Memling, H. Vander Goes, R. Vander Weyden the Elder, and Quentin Mostert. Cornelius Engelbrechtsen, Aelbert Joachim de Patinir, Henrik de Iles, Jan Schoorel, Sigismund Welbein(?), brother of Hans, the Father, &c. Besides these, examples (one, at least, of them of great importance) have been purchased for the gallery of G. Bellini, Peselino, Beltraffio, and Bramantino.

The marriage of the Prince of Wales is to be commemorated in a new west stained-glass window, about to be placed in Watford Church. The design, by Messrs. Heaton, Butler, and Bayne, consists of three main divisions. The base is occupied by four scriptural subjects bearing on marriage, in the following order:—1, Adam and Eve in the Garden; 2, Isaac and Rebecca meeting at eventide in the field; 3, Ruth and Boaz at the gate of the city; 4, the marriage of the Virgin Mary and Joseph. In the second or grand division is represented the marriage feast of Cana in Galilee. The third and upper division consists of the coats of arms of the Prince and Princess of Wales, with the Royal pair, and the date of their marriage.

The Marchioness of Waterford, one of our best amateur artists, is painting in distemper, on twelve arched compartments of the walls of the schoolroom at Ford, Northumberland, a series of pictures representing boys and girls mentioned in the Bible. One subject is already completed—Cain and Abel, as boys of the age, sacrificing. The second is Isaac going to the sacrifice; the third Esau selling his birthright; the fourth Joseph and his Brethren. This is a step in the right direction, and indicates the highest and best function of art. We have heard one of our first mural painters say, that the greatest error in the walls that would like to see the walls not only of our churches, palaces, and public buildings, but of our schools, covered with pictures. Why not, indeed, when all of our prisons, hospitals, and workhouses covered with appropriate paintings.

A handsome local subscription has been promised towards the restoration of St. David's Cathedral, but much remains to be done before the sum required by Mr. G. Scott's estimate of £30,000 can be raised. We think, therefore, that people ought to be reminded that this cathedral of Southern Wales, although comparatively little known, has claims upon all in or out of the principality interested in preserving the ecclesiastical remains of Catholic times in Great Britain. For, although comparatively small, some portions of St. David's are unsurpassed in beauty, while others are of great importance in the history of architecture. Of the latter is a portion of association which it certainly forms one of the most remarkable monuments of ecclesiastical architecture in the kingdom.

The collection of illustrations of the history and progress of wood-engraving (exhibited at the South Kensington Museum by Mr. John Thompson some two years ago has been rearranged, and, by some additions, is now exhibited in a large upper apartment of the Museum adjoining the Print Gallery.

Messrs. Colnaghi and Co., of Pall-mall, have just published an engraving by Mr. R. S. Cousins, R.A., of a portrait of the Princess of Wales, by M. Lambert. The engraving is more like than the original—which, however, was the utmost that could be made out of the work of art the plate is quite worthy of our greatest master of execution.

The foundation-stone of a National Academy of Design has been laid at New York; and the New York *Independent* felicitates its readers that "the artists of that city have at last a room and a domicile of its own, which is more than the Royal Academy of London—or Paris—can say, after nearly a century of trials to do, with all the patronage and prestige of Royalty attached to it."

A valuable official report by M. le Comte de Nieuwerkerke, the Superintendent of the Fine Arts in France, has been recently made to the Imperial Museums (the Louvre especially) from 1849 to 1853, has just been published by Messrs. Firmin Didot Frères.

A very extensive and remarkable series of outline-drawings, by Mr. Maclise, illustrative of the Norman Conquest, is still be remarked, exhibited at the Royal Academy some years since. These are now in course of being engraved by the distinguished German engraver, Louis Gruner. By some accident the work of engraving has been lost; it is supposed it may inadvertently have been sold as waste paper. Any person who can give information that may serve to give any information that might lead to the recovery of the missing drawings, has only to do so, and he will be rewarded for doing a great service to the eminent painter now so worthily occupied at Westminster.

CURRENT LITERATURE.

Wait for the End. By Mark Lemon. (3 vols. Bradbury and Evans.) Gerard and Gilbert Norwold, half-brothers, are the elder and younger sons of Sir Thomas Norwold, a baronet of ancient family, but an almost noble, the latter of an entirely ignoble, nature, which early in the story is developed by a weakness for cheating at cards. This evil tendency is defected by Gerard, who, in consequence, sacrifices his half-brother in the act, and insisting at all hazards upon restitution being made to the wronged man. From this point we see all the unfortunate ramifications of the plot of which the reader has to "wait for the end." For Gilbert, to avoid the punishment of detection and consequence, to which Gilbert has recourse for providing the necessary funds which are to be brought home to Gerard, who is consequently expelled by the furious father, and disowned from the paternal mansion. Gerard, determined never again to use the name which has been dishonoured, and anxious to avoid disgrace, at once establishes himself amignites to New South Wales, prospers abundantly, is joined after a while by Gilbert, who, however, is a source of annoyance to Gerard. Spraggatt, marries charming Lucy Spraggatt, and is blessed with a lovely child, Ada. Meanwhile the old Baronet receives indisputable proof of the injustice he did his younger son, Gerard, in the conspiracy threat, and dies before he can remedy his mistake. Gilbert, in the mean time, has become the favourite barrister of Sir Stephen Jaffier, with a view to money at her father's death, is disappointed in his expectations, and therefore revenges himself on the family of Jaffier by her with a harshness which hastens her death and estranges her child from his father. It is necessary to hint that when the cousin from Australia is left for the completion of the story, Sir Stephen Jaffier has come confronts her with the cousin in Europe, that Love attends in Fortune's train, and that Gerard is left behind to finish the work things are not smooth; for Gilbert, on pretence of his brother's death, has succeeded to the title and estates of the family. Nor are we to forget Mr. Weaver, the manager of Captain Elmsley, the debonair and gentlemanly, the lovestruck barrister; or Master Mayley, the pretty heiress; or the motley company at the Theatre Royal, Bath. Of these, and many, the intricacies ingenious, and the underplot is multiform. The best scene, in our humble judgment, are those in which the manager figures; the scene between the general lover, when the first discovery of Edward's drama are "cast," is exceedingly humorous. And when we consider the dramatic experience of Mr. Mark Lemon, his great reputation has heretofore rested, it seems only natural that he should excel in dramatic writing. It is a pity that at the outset of his story he should have begun with the error of placing term-time in September, for he evidently has the University of Cambridge in view, and it requires no calculation to prove this.

Tales of a Wayside Inn. By Henry Wadsworth Longfellow. (1 vol. Routledge, Warne, and Routledge.) A new volume of poems, by the author of "Evangeline," is fair matter for congratulation. Still, *essayer mon talent* is a dangerous task. Homer himself nods sometimes, and even the Swan of Avon sometimes sings amiss. So it is Mr. Longfellow is an exception to this rule; he has proved forth simpler, grander, and more picturesque than are to be found in the volume before us. There are the same antique quaintness, the same musical cadence, the same accuracy of rhythm, and the same graceful flow of expression; but the prosaic spirit has been mixed in larger quantities with the poetic element. The following gives rise to the title of the book is to be gathered from the following graphic, tuneful lines:—

But from the parlour of the inn
A pleasant murmur smote the ear,
Like water rippling over pebbles,
Or like the humming of bees.
Here the feet of many horses
Shook the road, and through the open doors
A murmuring sound of conversation came,
And, in each intervening pause,
The music of a violin.

Around the fireside, at their ease,
There sat a group of friends, entranced
With the delicious melodies;
Who from the fair or noisy town
Had to the wayside inn come down
To rest beneath its old archway,
Or stop a while from their journey.
The firelight on their faces played,
Their shadows on the walls danced.
And, though of different lands and speech,
Each had his tale to tell, and each
Was anxious to be pleased and please.

And hence it comes that legends of many lands—American, Italian, Sicilian, Jewish, and Norse are set to the poet's facile measures. *The Poetry of the British Navy.* By C. D. Yonge. (2 vols. Richard Bentley.) Although the assertion of the poet that

Britannia needs no bulwarks,
No towers along the steep

has met with much contradiction in our day, and has almost given place to the cry of Fortify, fortify, fortify! it may still be declared, with considerable truth, that

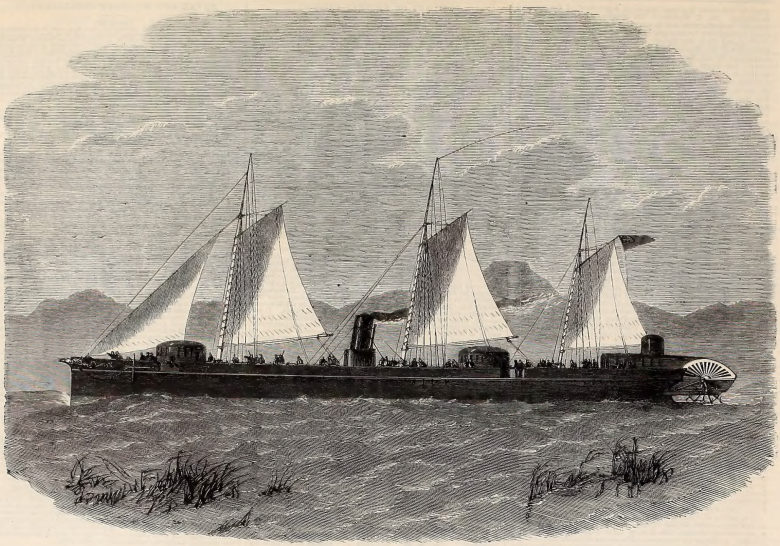
Her march is on the mountain-wave,
Her home is on the deep.

And until Britannia betakes herself to a different march and to a different home, naval achievements, naval anecdotes, and naval biographies will be eagerly sought from every generation to generation. For, though it has often been said—with about as much truth (and there is very little) as there is in the oracular utterances—that we are not a military nation, the boldest spave of sharp sayings has never denied that we are a naval nation. As a naval nation, then, we expect our Navy to do not only their duty, but everything; and how nearly our Jack Tars have succeeded in satisfying our moderate expectations, from the days of Alfred to the days of Victoria, may be read with entertainment in Mr. Yonge's two sturdy volumes, bound—but of compliment, no doubt, to the sailors' jackets—in blue. His history, fortunately, does not include the late bombardment of Sebastopol; for it has not been completed, and we fear it is an achievement of which—so far as justice and humanity are concerned—we are at liberty to boast. But he brings us down as far as the bombardment of Odessa and Sebastopol; the capture of Bomarsund; the disaster of Dynamund; the heroic deeds of the Naval Brigade, actions and all the inglorious inaction which characterised the Crimean War; the miserable failure of the Baltic Armament, and the consequent engagements with Chinese junks and Chinese forts, down to the repulse of Sir James Hope, and his subsequent successful visit which opened for our Army and the army of our allies a road to the "loot" of the Summer Palace. But part of his volumes will no doubt be found the most interesting, as the events recorded come within the reader's own ken. An appendix is very properly added, and there are useful plans of the principal engagements. We observe that the author has had the very best assistance, official and private, towards verifying the accuracy of his statements.

Industrial Biography. By Samuel Smiles. (1 vol. John Murray.) This volume forms a very interesting and useful book forms a sort of supplement or continuation to the "Lives of the Engineers." Mr. Smiles's volumes has been abroad some time in England, old ideas have been revised, new discoveries made, and new ideas born unplanted, so that no apology is needed by him who essays to place before the public the lives of persons of great ingenuities, with the notion that they are as worthy of attention as those of conquerors and statesmen. The chief names which figure in Mr. Smiles's pages are those of Dud Dudley, Huntsman, the first success in smelting iron with pit-coal; of Andrew Yarranton, an ingenious schemer in many things; of Thomas Newcomen, the inventor of the steam-engine; of the Derbys and Reynoldses, of whom one invented cast-iron pots, another cast-iron cylinders, another constructed the first iron bridge, and another was the first to employ inclined planes for connecting the various coals of different levels; of Benjamin Huntsman, inventor of cast steel; of Henry Cort, "the founder of the fortunes of our "iron aristocracy," though he himself died unrewarded; of Sir Humphrey Davy, the wonder of his generation; of David Mushet, the discoverer of the Black Band ironstone; of James Beaumont Neilson, the inventor of the hot blast; of Joseph Hamilton, whose lock remained for years unpicked, and took Hobbs, the American, almost a month to pick; of Jesse cunning hand wrought many an engine, and whose hydraulic press is in instrumental in the erection of the Mandalays and Brunel; of Joseph Clement, the various inventor and various improver of tools; of Sir Joseph Whitworth, and Messrs. Fox and Roberts and Whitworth of Manchester; of James Nasmyth, whose steam-hammer is known wherever the name sound like a hammer, and last, but not least, of William Fairbairn. One great advantage of the book is that it is open to any time with profit: for, whilst it excites admiration and wonder in the reader to which have been given to "inventive men," it either teaches the reader how is conscious of his own humility, and how to study to examine himself and see whether there be not in himself, too, latent faculties—faculties which, perhaps, are of some other order—whereby he may benefit his fellow-men.

On Life and Health. By William S. Savory, F.R.S. (1 vol. Smith, Elder, and Co.) We have here collected together four lectures upon physiology. The author does not, of course, attempt to exhaust, or on all points to discuss a subject so large as his title. He merely puts before his readers some of the principal conclusions arrived at by the physiologists. He frankly acknowledges that he has drawn largely upon the labours of others, particularly Von Baer and Carpenter; and upon such a subject it would be almost impossible, and certainly not desirable, to avoid doing so. Indeed, in connection with the *rogue morts* there are some comments upon the case mentioned by Carpenter—Conybeare's case of the man in the battle-field of the Alma "resting on one knee, with the arms extended in the attitude of prayer," who was overpowered, the arms clenched, the very expression of firing at an enemy stamped on the face and frozen by death. The author doubts the validity of the usual explanation, and offers one of his own, which, as well as the fact, we must leave to be gathered from the book, and the reader can then weigh for himself the probability of the one or the other of each.

Personal Narratives of Service amongst the Wild Tribes of Abyssinia. By Mansfield Parkyns. (2 vols. Campbell, Fyfe, and Blackett.) "It is probable," says the author, "that in England few persons have any great knowledge of that portion of our Indian empire which is known as the kingdom of Abyssinia." It is more than probable, it is almost certain; and it is a question whether there are more than a few persons who could point out the country upon the fingers of the two hands who know so much as that "Orion lies between, and a little to the north of the twenty-third degree of north latitude, and the eighty-third and eighty-seventh of east longitude."



This "kingdom" embraces the Bay of Bengal on the east, Gondwana on the west, the mouth of the Indus on the north, and Ceylon, Bengal on the north. It is to the tribes which inhabit the hill country of that district that Mr. Mansfield Parkyns's narrative is principally confined. For against them—or rather against their practices—he has exercised the severest European crusade. They had, it appears, from time immemorial indulged in the pious habit of burning widows and the barbarous policy of female infanticide. Against these habits the British Government has sometimes most powerfully to fight, and their endeavours were zealously seconded by the exertions of Mansfield Parkyns. Of these and of his own exploits, his own repeated assurances' and the testimonials which he has appended to that narrative, the reader will form the ultimate judgment for himself, and the success he commanded, the nature of the Meriah sacrifice, and the moral character of the Khonds must have recourse to his account. His labours appear to us to have been of the first rate and a reason why his story should be given to the public just now may be found, perhaps, in the circumstance that he lately brought forward upon the subject of human sacrifices in the kingdom of Dahomey.

The Navy Act on savings banks, passed in the late Session, came into operation last Saturday. In sixty-eight sections the law is now amended and consolidated. There are 1,407 savings banks, of which 1,328,998 are individual depositors, 18,306 charitable institutions, and 1,939 friendly societies, with deposits to the amount of £32,768,000 and upwards. £2,041,237, are deposited direct with the Commissioners for the Reduction of the National Debt, and the capital of the savings banks amounts to £40,550,257. The new Act is not to affect Post-office savings banks, the interest to be paid to them by the Government is to be as be £3 5s. per cent per annum, and the interest to depositors is not to exceed £3 5s. 10d. in the year per cent. Infants and married women can make deposits, and, should the husbands of the latter give notice, the money is to be paid to them. All depositors are confined to one savings bank on gain of forfeiture. The interest is to be calculated half-yearly, on the 20th of November and the 20th of May, and to be added to the principal. No new bank is to be formed without the approval of the National Debt Commissioners. The rules are to be certified by the barrister appointed (Mr. Tidd Pratt), and his fee is fixed at one guinea. In the event of death or bankruptcy of any officer holding money, the trustees are to be the first paid out of the estate. Considering the number of persons connected with savings banks, the law, as now consolidated, is a great improvement on the old system.

HER MAJESTY'S SHIP MAJESTIC KEEPING WATCH OVER THE STEAM-RAMS IN THE MERSEY.

THE famous steam-rams El Tousson and El Monassir, which were built by Messrs. Laird, at Birkenhead, for, as is generally believed, the Confederate States of America, still lie in the Mersey, her Majesty's ship the Majestic keeping watch and ward over them. It is well known that Earl Russell, acting on representations made on behalf of the Federal Government, ordered these vessels to be seized, and the purposes for which they were constructed will consequently become the subject of a legal investigation. Neither vessel is finished, all work upon them having been suspended. El Tousson, however, wants but little to fit her for receiving her equipment, while El Monassir is in a comparatively backward state. The two rams are not unshapely in their hulls, but seem as well designed for swiftness as for strength. The length of each is 230 ft., the beam 42 ft., and the extreme depth less than 20 ft. The burden is but 1500 tons register, and the draught of each vessel when loaded will be some 15 ft., the deck being about 6 ft. above the water-line, all the intermediate surface being protected—first, by a coating of teak over the iron skin of the ship, and then by armour-plates over that, each massive scale being 5½ in. thick. All this armour is dovetailed together so accurately that the joints are scarcely perceptible. The deck is of 5-in. teak, covered with iron, and the bulwarks are also of iron, being made so as to let down outwards, and thus to clear the decks during action. Two revolving cylindrical turrets, on the principles invented by Captain Coles, are apportioned to each ship, one turret being before and the other abaft her engine-room. There is also a pilot-house, strongly built of teak, and iron-plated. Each turret carries two guns, placed in close proximity, so that they can be brought to bear nearly in the same position at one time. The wall of the turret is a series of cellular spaces, like the chine of a shell-fish; and all these iron cells are to be filled up with teak, making one solid and uniform mass, which is to be again strengthened and rendered well-nigh impregnable by armour-plates. Each vessel is furnished with a powerful, sharp iron prow, or beak, protruding from the bow under the water-line to enable the vessel to butt upon, to penetrate, and to damage an antagonist, somewhat in the way, though more effectually, that the Confederate ram Merrimac destroyed the Cumberland in the James River. It is from this feature in their construction that the name of "rams" has been given to these vessels. At each end of the vessel is a raised deck, forming tolerably commodious quarters for officers and men; and the forecastle is made to carry one or two heavy guns. In the captain's cabin are portholes for two 32-pounders. Their sterns will be so formed as to protect the screws and rudder from shot or collision. Each ram has capacity for 300 tons of coal. Our Engraving is from a drawing made by Mr. William Woods, of Queen's-road, Liverpool.

IRON GUN-BOAT BUILT AT SYDNEY, AUSTRALIA, FOR THE NEW ZEALAND GOVERNMENT.

GUN-BOAT FOR NEW ZEALAND, BUILT AT SYDNEY.

About seven or eight months ago, when the military commanders engaged in the Maori war had become aware of the great advantage of effecting a passage up the rivers, it became a question as to how a boat capable of withstanding the assaults of the enemy, and at the same time of light draught and easy movement, could be obtained for navigating the tortuous and shallow streams. The New Zealand Government at once looked to New South Wales for such a vessel, and overtures were made, through Mr. E. O. Moriarty, the Engineer for Rivers and Harbours, who communicated with the Australasian Steam Navigation Company on the subject, and found them pre-

PARIS FASHIONS FOR DECEMBER—SEE NEXT PAGE.

pared to undertake the construction of a gun-boat of the required description. Mr. T. Macarthur, the company's chief engineer, was intrusted with the work, and in seventeen weeks the vessel was afloat, ready to hand over to the agent of the New Zealand Government.

We gather from the *Sydney Morning Herald* the accompanying particulars of the Gun-boat No. 3 as she is called, pending her formal nomination by the New Zealand authorities. She is an iron-built vessel; her length is 140 ft., her breadth of beam 20 ft., and her depth 8 ft. She is flat-bottomed, and her depth of water, with 300 men and stores on board, is only about 3 ft. But she has centre boards, by means of which her keel can be deepened to 8 ft. when necessary. She has non-condensing engines of 40-horse power, with tubular boilers of improved construction, to carry a pressure of 60 lb. to the inch; and she is propelled by means of a stern paddle-wheel, which has feathering floats. On the maindeck she is fitted with two iron towers, 12 ft. in diameter and 8 ft. elevation, pierced with slots for rifles, and also with ports for 12-lb. Armstrong guns. From the one tower the vessel, if she should be boarded by the enemy, can be raked from the beam forward; and from the other from the beam aft. The engine-room aft is also constructed of iron, affording shelter to the steersman and accommodation for riflemen. The commander will have a turret above this stern-tower. The engines are entirely under deck, and every portion of the vessel can be shut against an enemy boarding her. Between decks there are five water-tight compartments, but admitting of communication fore and aft, and accommodation for 300 or 400 men. One noticeable peculiarity in her means of defence is that on an enemy attempting to board she can, by means of perforated pipes lying like a moulding along her side, pour upon them jets of boiling water or volumes of hot steam. She is schooner-rigged, and does not present an ungraceful exterior—the iron, which is ⅜-inch plate, not being so heavy as to make her look cumbrous. Between decks she has a patent noiseless fan, attached to a donkey-engine, for the purpose of driving the smoke from the towers. She carries twenty tons of coals in her bunkers, and consumes about three tons a day. She was built under the superintendence of Mr. Moriarty, acting for the New Zealand Government, and practical men are of opinion that the engineering work is as finely finished as any imported from the mother country.

On the 14th of September she made a trial-trip. She proceeded down the harbour as far as Shark Point, thence round Cockatoo Island; and during her course she attained a speed of nine knots an hour, whilst she turns comfortably within her own length.

PARIS FASHIONS FOR DECEMBER.

SCOTCH patterns for nearly every article of ladies' attire still maintain their ascendancy, and will probably do so throughout the winter, as they are "published" by the best modistes of the French capital, and patronised by the most elegant leaders of the fashion. The adoption of the écossais has, in fact, become so general in Paris that all the clans are there met with, and form a veritable congress of the patterns derived from the "land o' cakes."

A new and very superior description of plush has been introduced for bonnets, mantles, and dresses. The pile is shorter than that of the ancient material, so that the new plushes resemble velvet very closely, only they are somewhat brighter and softer in appearance. The most fashionable colours are écossais, pineapple, amethyst, peach-blossom, sapphire, and opal, the delicate shades being employed for bonnets, concerning which it may here be mentioned that the shapes are becoming less high, and very narrow near the cheeks, leaving scarcely any room for blonde or other trimmings, the ornamentation of the richest chapeaux being confined principally to the front, above and beneath.

The fashion of wearing dresses drawn up over coloured jupons is definitively adopted for the winter, and the painful sight of beautiful robes training through the dust or mud from the macadam will therefore no longer be witnessed. The coloured jupon has become, in consequence, an article of importance, requiring a certain amount of taste in its selection, so as to blend suitably with the rest of the toilet. Many of the best jupons are in light woollen material, of striped patterns, and ornamented near the edge with a band of plaid, or with a narrow plaited flounce.

Passementerie ornaments for robes de foulard are very generally adopted; but they are either profusely applied, or not at all, as will be seen on referring to our Engraving of the Paris fashions for December in to-day's Impression.

THE ILLUSTRATIONS.

Fig. 1. *Walking Dress.*—Large-patterned green and blue woollen plaid dress, without ornament. The camail is in plush velvet of the same design, and trimmed with a chenille fringe. Grey velvet bonnet, richly decorated with flowers, grey velvet bows, and a feather.

Fig. 2. *Evening Dress.*—The ensemble of this costume produces a very pleasing effect. The robe and what may be called the paletot are in light grey poplin, trimmed with a profusion of passementerie designs. Lace cap, ornamented in front with a puff of pink ribbon surmounted by a black velvet bow. Linen Parisian collar; muslin sleeves, with narrow linen cuffs, the latter fastened with handsome stone buttons.

Fig. 3. *An "At Home" Négligé.*—White foulard dress, ornamented round the skirt with a deep band of red and black plaid silk. The vest is in red cloth, adjusted behind, but very short and open in front, with cuffs like those on a gentleman's coat. The cap, in the latest style, is of Brussels point-lace, slightly trimmed with pink ribbon, and completed by long and rather wide grey strings.

Fig. 4. *Dress for a Little Boy.*—This is a pretty costume à la chasseur for a child of ten or twelve years of age. Of course, the yellow leather accoutrements are not *de rigueur*. It is only necessary to remark that the dress is of blue velvet or cloth, cloth being usually preferred. Russia leather boots, with tassels in front.

WILLS AND BEQUESTS.

The will of the Most Hon. John, Marquis Townshend, of Raynham Hall, Norfolk; Ball's Park, Hertford; and Stratford-place, London, was proved in her Majesty's Court of Probate by his son, now Marquis Townshend, the sole executor. His Lordship was an Admiral in the British Navy, a Naval Aide-de-Camp to the Queen, and a magistrate for Herts, Norfolk, and Staffordshire. He succeeded to the title in 1855, and died at the age of sixty-five. His will, with a codicil, are respectively dated Dec. 26, 1859. His Lordship has bequeathed the whole of his property, real and personal, to his son the Marquis, leaving by the codicil legacies to his servants.

The will of Miss Isabella Schröder, of Northbrook House, Southampton, was proved in London by the executors and trustees—namely, the Rev. H. J. Julius, M.A., and John Druce, Esq., solicitor, the acting executors, power being reserved to W. H. G. Bagshawe, Esq., the other executor. The personalty was sworn under £60,000. The testatrix has bequeathed a large portion of her property to charitable institutions, part thereof being subject to the life interest of parties who are legatees under the will. Of this, which she describes as her own property, after making some bequests to friends and to servants, she leaves the residue to the British and Foreign Bible Society; and, having a power of disposal over property under her father's will, upon the decease of her mother, leaves the interest of £10,000, part thereof, to her aunt for her life, and at her decease the principal to be divided as follows:—£5000 to the British and Foreign Bible Society, £3000 to the Society for Promoting Christianity amongst the Jews, £1000 to the City Missions, and £1000 to the Church Missionary Society. These four societies also take the residue of her property equally amongst them. There is an immediate legacy of £200 left to the poor of Bentley and £100 to the poor of Wrecclesham; and, upon the decease of her mother, very liberal bequests are made to the poor of the undermentioned parishes, viz.:—Bentley, Wrecclesham, Farnham, Aldershott, Brinsted, and Frensham.

The will of Captain Thomas Gardner (late Life Guards), of Sea Grove, near Hyde, Isle of Wight, and Cambridge-square, Hyde Park, was proved in the London Court by the trustees and executors, Lord Alfred Paget, Henry George Hopkins, Esq., and Daniel Cullingham, Esq.—the personalty being sworn under £120,000. The will is dated March last, and a codicil in August. The testator was possessed of considerable landed property in the counties of Lancaster, Northampton, Hants, and Middlesex. To his wife he has left a legacy of £10,000 and an annuity of £1000 from his real estates, together with the interest arising from other estates, producing an income of nearly the same amount; also his residence, Cambridge-square, and the furniture from both his residences. To his executor, H. G. Hopkins, he divises the Sea Grove estate; to the Rev. Frederick Hopkins he devises his estates in Lancaster and Hants; and to his godson, George Thomas Cavendish Paget (third son of Lord Alfred Paget), he leaves his estate at Hampstead. After making liberal legacies to personal friends and to his executors, and also annuities and legacies to his servants, he leaves the residue, both real and personal, equally between the said Henry George Hopkins, Esq., and the said Rev. F. Hopkins.

OBITUARY OF EMINENT PERSONS.

THE DOWAGER LADY BOLTON.

The Right Hon. Maria, Dowager Baroness Bolton, was the younger daughter (by his wife, Maria, daughter of Thomas, second Earl of Effingham) of the celebrated British General of the first American War, Sir Guy Carleton, created for his services Baron Dorchester, and was the sister of Lieutenant-Colonel the Hon. George Carleton, who fell at Bergen-op-Zoom on March 10, 1814, and whose son Guy is the third and present Lord Dorchester. Her Ladyship was born on Aug. 20, 1777, and was married, on the 8th of May, 1810, to William, second Baron Bolton, who died, without issue, on July 13, 1850, when the title devolved on his nephew, William Henry, the third and present Lord Bolton. The Dowager Lady Bolton died at Odiham Rectory, Hants, on the 16th inst.

ADMIRAL SIR JOHN GORDON SINCLAIR, BART.

Sir John Gordon Sinclair, eighth Baronet, of Stevenson, in the county of Haddington, and Murkle, in the county of Caithness, a Deputy Lieutenant for those counties and an Admiral in the Royal Navy, who died on the 13th inst., at Stevenson, his seat in Haddingtonshire, after holding the baronetcy for sixty-eight years and having been sixty-four years in the Navy, was the only son of Sir Robert Sinclair, the seventh Baronet, Lieutenant-Governor of Fort St. George, Scotland, by his wife, Lady Madeline Gordon, second daughter of Alexander, fourth Duke of Gordon. He was born July 31, 1790, and succeeded his father in the baronetcy when five years of age. He entered the Royal Navy in 1799, as a midshipman, and served in the Victory, under Lord Nelson's flag. He, as Lieutenant, in the Blake, took part in the Walcheren expedition; and was afterwards at the capture of the Isle of France. It was, however, while commanding the Redwing, in the Mediterranean, that he particularly distinguished himself, destroying the batteries and capturing a convoy at Morjean, March 31, 1813. He was at the capture of Cassis in the same year, and there commanded the boats of the squadron, and brought out from the port two gun-boats and twenty-four merchant-ships, for which he was officially commended in the *Gazette*. He became a Post-Captain June 6, 1814, and was for some years Captain-Superintendent at Gibraltar. He was made a Rear-Admiral June 8, 1849; a Vice-Admiral Oct. 17, 1856; and an Admiral Aug. 15, 1861. Sir John Gordon Sinclair married, June 15, 1812, Anne, only daughter of Admiral the Hon. Michael de Courcy, and niece of John, twenty-sixth Lord Kinsale, by whom (who died in 1857) he leaves two sons and three daughters. The eldest of the latter, the Hon. Mrs. Pelham, is widow of the Hon. Captain Dudley Worsley Pelham, R.N., second son of Charles, first Earl of Yarborough. Admiral Sir John Gordon Sinclair is succeeded by his eldest son, now Sir Robert Charles Sinclair, the ninth Baronet, late a Captain in the 38th Foot, who was born May 25, 1820, and married Charlotte Anne, daughter of Lieutenant Coote, late of the 71st Regiment. This family of Sinclair springs from the ancient house of Sinclair of Longformacus; the first Baronet, Sir John Sinclair, an eminent Edinburgh merchant, obtained his baronetcy as far back as 1636. His grandson, Sir Robert Sinclair, the second Baronet, was a Baron of the Exchequer in Scotland; and Sir John Sinclair the fourth Baronet's third son, George, was a Senator of the College of Justice as Lord Woodhall. From Sir John the baronetcy has passed through an equally honourable descent, from father to son, down to the gallant Baronet just deceased and his successor the present Baronet.

SIR FRANCIS H. GILBERT, BART.

Sir Francis Hastings Gilbert was (by his wife, Isabella-Rose, daughter of Major Thomas Ross, R.A., and granddaughter, maternally, of the tenth Macleod of Rasay) the only son of the gallant Lieutenant-General Sir Walter Raleigh Gilbert, G.C.B., the first Baronet, who was so created in 1850, and had the Order of the Bath, and the thanks of Parliament and the East India Company, for his brilliant military conduct and signal services in the wars against the Sikhs. His son, Sir Francis Hastings Gilbert, the subject of this notice, was born in India, July 10, 1816, and succeeded his father as second Baronet May 10, 1853. A great part of Sir Francis's life has been spent in the British consular service. He has, since 1843, been Vice-Consul at Hayti, Acting Consul at Port-au-Prince, and Vice-Consul at Bengazi. He was Consul at Alexandria from 1848 to 1853, during which time he was twice Acting Agent and Consul-General. He was appointed Consul for the province of Scutari May 27, 1860. He died at Southwood Lodge, Cheltenham (his mother the Dowager Lady Gilbert's residence), on the 17th inst., shortly after his return to England. As Sir Francis was never married, the baronetcy, so recently and gallantly achieved and so creditably maintained, becomes extinct. Sir Francis leaves two sisters—viz., Flora-Anne, who was married, first to the late Captain Roderick Norman Maclean, B.N.I., and, secondly, to Captain Richard Shubrick, 3rd Madras Engineers; and Geraldine-Adelaide-Elizabeth, who is married to Captain Charles Russell Colt, 56th Foot.

CAPTAIN EDWARD JOHN ELIOT.

Captain Eliot, who was the third son of Francis Percival Eliot, Esq., of Elmhurst Hall, Staffordshire, was born in 1783, and commenced his military career at a very early age, his commissions as Ensign and Lieutenant of the Staffordshire Militia, of which his father was Lieutenant-Colonel, bearing date 1797 and 1798. He afterwards exchanged into the regular service, and was in Spain with the army under Wellington, and shared in the glories of Busaco, Talavera, Vimiera, the siege of Badajoz, and Torres Vedras. He obtained his captaincy of the 27th, or Inniskilling, Regiment of Foot in 1808, and continued with this regiment in the Peninsula until the Peace, in 1814. A severe illness, which he caught during his arduous duties abroad, obliged him soon after to retire from the Army. After a delay of more than thirty-five years, Captain Eliot received the war medal and clasps for his services. He was afterwards appointed a landing-waiter in her Majesty's Customs, and continued in that service upwards of thirty years, and retired some years since upon a pension, which he enjoyed up to his death. Captain Eliot married, in 1826, Margaret, daughter of George James, Esq., of Alnwick, in the county of Northumberland, Captain in the Northumberland Regiment of Militia. A notice of the late Lieutenant-Colonel William Granville Eliot (brother of Captain Eliot) appeared in the ILLUSTRATED LONDON NEWS Sept. 29, 1855.

THE REV. DR. VERNON.

The Rev. Charles Vernon, D.D., of Wherstead Park and Great Thurlow Hall, Suffolk, who died at his seat at Wherstead, on the 22nd ult., succeeded, a few years ago—according to the limitation in the will of his cousin, John Vernon, Esq.—to the extensive estates of Wherstead, Belstead, Thurlow, and Herndon, all in the county of Suffolk. He was born at Bury St. Edmunds, and was educated at Reading, and Peterhouse, Cambridge, of which college he was a fellow-commoner, and afterwards fellow. He held for many years the family livings of Stradgill and Herringswill. Dr. Vernon died deeply lamented by all who knew him, especially by his numerous dependents, to whom he had endeared himself by his considerate and generous disposition. As Dr. Vernon, though married, died without male issue, the entailed estates alone pass to the infant son of the late Captain Dashwood (who was nephew of the late Sir R. Harland), according to powers of devise given by John Vernon to his sister, the late Lady Harland. Dr. Vernon was a representative of the ancient and historical family of Vernon, and grand-nephew of the famous Admiral Vernon, who took Portobello early in the last century. The history of this family (which traces its origin directly from William De Vernon, of Vernon Castle, in Normandy, temp. William the Conqueror) presents the remarkable features of a peerage, two baronetcies, and three families becoming extinct within a century, and no fewer than seven failures of male issue to inherit the estates.

The *Aberdeen Herald*, in noticing the late Royal ukase against tobacco at Windsor Castle, says that smoking has long been prohibited within "the precincts of Balmoral Castle" while her Majesty resided there.

Monday next is the last day for the deposit of plans, &c., for private bills in the next Session, and the 23rd of December is the last day for the Parliamentary deposits.

NAVAL AND MILITARY INTELLIGENCE.

ADMIRALTY.

The following promotions, dated the 14th inst., have been made in consequence of the death on the 13th inst. of Admiral of the White Sir J. G. Sinclair, Bart.:—Admiral of the Blue Sir H. Stewart, K.C.B., to be Admiral of the White; Vice-Admiral J. R. Burton, K.H., on the Reserved List, to be Admiral on the same list; Vice-Admiral of the Red Sir W. F. Martin, K.C.B., to be Admiral of the Blue; Vice-Admiral of the White Sir J. Scott, K.C.B., to be Vice-Admiral of the Red; Vice-Admiral of the Blue T. W. Carter, C.B., to be Vice-Admiral of the White. Rear-Admirals J. Brasier, R. C. M'Crea, on the Reserved List, to be Vice-Admirals on the same list; Rear-Admiral of the Red M. Quin to be Vice-Admiral of the Blue; Rear-Admiral of the White S. C. Dacres, C.B., to be Rear-Admiral of the Red; Rear-Admiral of the Blue C. Frederick to be Rear-Admiral of the White; Captain C. H. M. Buckle, C.B., to be Rear-Admiral of the Blue. Retired Vice-Admirals W. H. Smyth and R. Saumarez to have the rank and title of retired Admirals, and retired Rear-Admirals W. Slaughter, K.H., T. Gill, W. A. Herringham, and R. Gordon to have the rank and title of retired Vice-Admirals, in pursuance of the Order in Council of May 7, 1858.

Sir Leopold M'Clintock, of Arctic celebrity, has been appointed to the command of the Aurora, a 35-gun screw-frigate.

The death of Admiral Sir John Gordon Sinclair, Bart., took place on the 13th inst., at Stevenston, his seat in Haddingtonshire.

Captain James Scott, Military Knight of Windsor, died, in his eighty-fourth year, on the 17th inst., in the Lower Ward, Windsor Castle.

It is stated that the Admiralty have it in contemplation to add the rank of Commander to the designations of Lieutenant and Sub-Lieutenant, attached to commissions in the Royal Naval Reserve.

Mr. Phinn, Q.C., has been appointed Counsel to the Admiralty and Judge-Advocate of the Fleet, vice Mr. Collier, appointed Solicitor-General. Mr. Phinn was appointed to this office by Sir James Graham in 1852, and resigned it on becoming Second Secretary of the Admiralty in 1855.

It is reported that a committee of naval officers had been nominated by the Admiralty with the view of a strict inquiry being instituted into dockyard management. Admiral Sir Houston Stewart, K.C.B., and Vice-Admiral the Hon. George Grey are, it is said, to be two of the members.

Her Majesty's steam-transport Megæra arrived at Demerara on the 16th of October, from Sierra Leone, with a detachment of the 2nd West India Regiment, to relieve the company of the 1st West stationed there. The Megæra would sail on the afternoon of the 4th for Trinidad, with the detachment of the 1st West.

The Adjutant-General, Sir James Yorke Scarlett, has recently issued a circular memorandum, addressed to the Army at home and abroad, in reference to musketry regulations, wherein his Royal Highness the Field Marshal Commanding-in-Chief is pleased to desire that on home stations the annual course of musketry instruction shall henceforth commence on the 12th of March in each year, the non-commissioned officers being trained during the previous month in the prescribed manner, for the purpose of assisting in the instruction of their respective companies.

The annual report of the instruction carried on at the schools of musketry at Hythe and Fleetwood, for the information of the Field Marshal Commanding-in-Chief, has been published. During the year ending the 31st of March, 1863, 316 officers, 1247 sergeants and rank and file, and 117 volunteers of all ranks have been instructed in these schools. Of the officers (four of whom belonged to the cavalry), 194, or 61 per cent, became first-class shots; 110, or 35 per cent, second-class shots; leaving only 12, or 4 per cent, in the third class. Of the 1247 sergeants, rank and file, 769, or 62 per cent, became first-class shots; 429, or 34 per cent, second-class shots; leaving only 49, or 4 per cent, in the third class. Of the 117 volunteers, 82, or 70 per cent, became first-class shots; 31, or 27 per cent, second-class shots; leaving only 4, or 3 per cent, for the third-class.

Her Majesty's iron-clad screw-frigate Caledonia, of 35 guns, has been towed from the Victoria Docks to Sheerness, to be completed for commission. She was removed from dry dock at Woolwich on the 28th of September, since which period she has been fitted with the whole of her machinery of 1000 horse-power, and her eight boilers, weighing 850 tons, which it appears could not be placed in the ship either at the dockyards of Woolwich, Deptford, or Sheerness, in consequence of her draught of water being 32 feet, and the basins at those yards being of insufficient depth. The Caledonia is of the same class as the Royal Oak, which has been added to the Channel Fleet, but her engines are 200 horse-power more than the latter vessel; also of greater strength. The Caledonia is fitted with two towers on the upper deck, for the use of the officer of the watch and the captain and master when the ship is in action. These are considered preferable to a single tower, with which the Warrior is supplied, as they are clear of the masts and funnels, which obstruct the view. These towers are plated with 4½ inch iron, and they are accessible through the scuttle from the main deck.

The members of the Ordnance Select Committee assembled at Woolwich Arsenal on Monday week to witness a repetition of experiments with the six-pounder breech-loading rifled gun invented by Mr. Parsons. 100 rounds were fired within fifty-two minutes, which included some delay which took place in consequence of not being provided with a sufficient quantity of the proper description of ammunition. At the termination of the firing the weapon was found to be so hot that a hand could not be placed upon it. The breech was found to act with perfect freedom, and the gun to be perfectly gas-tight. Mr. Parsons maintains that his system is peculiarly adapted for guns of large calibre, as the sphere, which serves instead of a ventpiece, can be made of any size and strength, and it has not to be lifted out of its place in the operation of loading. The slot which is necessary in the Armstrong gun is also dispensed with. The 11-inch experimental rifled gun, mounted at the Royal Arsenal for the purpose of being forwarded to the Excellent, gunnery-ship, was this day inspected by the Ordnance Select Committee. The breech of the gun can be raised or lowered on a small pinion working into a rack formed on a hoop which encircles the gun, and a quoin is thrust under the breech to maintain its position when properly adjusted.

A preliminary trial of Sir William Armstrong's monster gun, lately manufactured at Elswick for the War Department, was made on Thursday week, at Shoeburyness, with satisfactory results. The gun weighs over 22 tons, and is mounted on an ordinary gun-carriage of great size and strength. Its length over all is 15 ft., that of the bore being 12 ft. Its internal diameter is 13·3 in., and it is rifled on the "shunting" principle. The grooves are ten in number, and turn once in sixty-five calibres. In its construction it differs but little from the other large muzzle-loading guns manufactured under Sir William Armstrong's direction, consisting of a number of coiled tubes of enormous strength shrunk one upon the other. The thickness of the walls of the gun at the breech is 20·85 in, the total diameter at the trunnions being 55 in. It carries a conical cast-iron hollow-headed shot, weighing 510 lb., or a shell of ordinary construction weighing 600 lb., and capable of containing a bursting charge of no less than 40 lb. of powder. The charge used on Thursday week with shot was 70 lb., with shell 60 lb. The gun was easily served by a party of twenty men. At first, not being accustomed to such a monster, the men worked rather slowly, but as they became used their work they at last succeeded in abridging the space of time between the rounds to ten minutes. The destructive powers of "Big Will" (as the monster might well be christened) will be enormous. A shell with a bursting charge of 40 lb. may be readily fired from it, the largest charge yet used in a shell being, we believe, no more than 8 lb.

A day's firing at armour-plates recently took place at Portsmouth, under the superintendence of Captain Astley Key, and resulted in a decided triumph for the plates over the gun. The plates were bolted on the sides of the Monarch target-ship in the ordinary manner, with 2 in. bolts, and were fired at with the 95 cwt. 68-pounder gun, at a distance of 200 yards. There were four plates, comprising one 4½ in. plate from the Thames Ironworks and Shipbuilding Company for the Minotaur; one 4½ in. plate from Messrs. John Brown and Co., of the Atlas Works, Sheffield, for the Ocean; and one 5½ in. plate from the same firm, as an experimental plate, being made from Acadian charcoal iron; one 5½ in. plate and one 4½ in. plate from Messrs. Cammell and Co., of the Cyclops Works, Sheffield. Messrs. Brown's Acadian iron plate received nine shots, one of which struck the right lower corner and broke a piece off 16 in. in length by 15 in. in width. There were three other slight cracks, but the plate was not materially injured, except in its broken corner, and this damage was solely due to the shot striking at the extreme corner, and where the backing also was afterwards found to be deficient. The metal, however, with which Messrs. Brown manufacture their own plates is undoubtedly superior to the Acadian tried on Friday, the latter being apparently too hard for the manufacture of armour-plates of the first class. The Ocean's plate, from Messrs. Brown's, for a 4½ in. plate, could not well, with our present knowledge of armour-plate manufacture, be surpassed. It is almost unnecessary to state that both these were "rolled" plates, as none others are manufactured at the Atlas Works. The Thames Company's plate for the Minotaur, hammered, was the smallest of the four, but was undoubtedly one of superior manufacture and metal. Like Messrs. Brown's Acadian plate, it was severely damaged on one of its corners by shot, and the iron, being there unsupported, necessarily gave way. The two plates sent in as test plates by Messrs. Cammell, of Sheffield, were "rolled," and gained for their manufacturers a position never before surpassed by any other plates on their first trial as test-plates. The 5½ in. plate, indeed, in its left centre received six shots in a space measuring 18 in. horizontally and 2 ft. 10 in. vertically. Over this space and through the indents of the shot marks there was nothing beyond three slight surface cracks. The plate received eleven shots in all. The 4½ in. received eight shots, and was possibly one shade inferior in quality to the 5½ in. The metal of these two plates, as well as that of Messrs. Brown's 4½ in., was beautifully fibrous. At the conclusion of the trials of the four plates several shots were fired at a French manufactured 4½ in. plate that was bolted on to the target-ship's side with Acadian iron bolts. One of these shots struck the French plate in a comparatively uninjured part and penetrated clear through into the ship's side, presenting a strong contrast to the resistance offered to the shot by the two English 4½ in. plates that had but just been through their trial.

The *Scotsman* states that Professor Pirie, of Aberdeen, will be proposed as Moderator of the next General Assembly of the Church of Scotland; and Principal Fairbairn Moderator of the Free Church Assembly.

Nov. 28, 1863

COLUMN FOR THE CURIOUS.

THE Corporation of the city of London, whose share in the City improvements is often grudgingly allowed, are about to remedy the dullness of Holborn and Snow hills by what is, in new phrase, termed "the raising of Holborn valley." Holborn was paved four centuries and a half ago, yet up to this date no satisfactory remedy for this dangerous portion of one of the oldest thoroughfares of the metropolis has yet been provided. Holborn valley, when thus improved, by viaducts crossing the valley of the Fleet and otherwise. The Holborn encountering the "dark lane" of Farringdon Ward, and so it has proved to horsefish as well as to criminals in the cart on route to Tyburn.

As clever Tom Clinch, while the rabble was bawling,
Rode stately through Holborn to die of his calling.
He slept at the George for a night in his way,
And promised to pay for it when he came back.—Bo-ck, 1727.

The improvement has in our times been modified by lowering Holborn-hill, the activity of which, in 1842, varied from 1 in 164 to 1 in 23. In 1845 Mr. Wallace, the engineer, proposed a much greater amount of traffic between Fetter-lane and the Old Bailey at "20,000,000 pedestrians, 67,140 equestrians, 18,000 carriages, 13,807 27,370 carts, 3,000 waggons, 78,850 stages, 82,238 carriages, 13,807 omnibuses, 466,110 chaises and taxed carts, and 334,744 cabs." It was now stated that upon an average upwards of 4,000 vehicles a day go up and down the hills from the low levels. Among the plans was that of Mr. Gotto Bellamy, who built Holborn-bridge, and proposed to construct a bridge from Snow-hill across the valley to Holborn-hill; and to lift the valley 17 ft. formed part of the Corporation's plan. And the Improvement Committee have recently received 100 designs, illustrated by 200 drawings and 30 models, from which they have selected what appears to them to present the leading requirements of the case. They recommend that Holborn-hill and Skinner-street shall be pulled down, and that the viaduct shall cross the valley nearly as possible over the whole line of road, so as to make a high-level street, commencing on Holborn-hill, opposite the present Hatton-garden, Ely-entry, Ely-place; and terminating in Skinner-street, near the Old Bailey. The changes in the neighbourhood will be wisely made, as the new streets will be more worthy residences. The great line of Farringdon-street and Victoria-street, to be continued southwards to Blackfriars, was the plan of Sir Christopher Wren, since. We have lived to see, in the valley, Holborn-bridge covered up, and an arch erected in 1841; Field-lane and Saffron-hill swept away with the age of bandanas; and Fleet Market and the Fleet Prison disappear; and Skinner-street, the site of Newgate-street, according to the present Act. They will disappear the block of houses on the north side of the street, which, from having been shut up many years, have become a nest of vice, and a refuge for the worst means land of promise. At No. 41, by-the-way, Godwin, the novelist, married Mary Wollstonecraft, and published his tragedy of the name of Edward Baldwin; over the door was formerly a large artificial stone relief of Keep narrating his adventures.

A Roman pavement has just been discovered at Norton, in the East Riding of Yorkshire, by a labourer digging in a field east of the town. The pavement, a diagonal one, is about 12 ft. square, and bounded the sides of a vault; also, decayed wood and several human bones, a portion of the skull distinct, and two jaw bones, with teeth perfect, in the sand thrown out were gathered the bottom of a lachrymatory of sun-baked Roman pottery, besides fragments of pottery; but of no interest as the human. The field has yielded more than one find of small copper coins of the Emperor Constantine. Mr. G. Pycock, late antiquary, who has examined the site, is of opinion that the burial, though Roman, was not originally made in the position found, but that the remains have been, at some period, found and re-interred, with the pottery, in a cyst (of which decayed wood and hinges give evidence); and that the skeleton had been gifted around the ancient interment. Another Roman find is described in the vicinity of Old Sarum, consisting of three jars of Roman copper coins, in good preservation, to the number of 1,500.

To this gain of evidences of Roman dominion in England we have to add a triangulated destruction by a spreading road at Barrow Hills, in the county of Essex, on the south border of Cambridgeshire—being four tumuli, arranged in a cross and varying in size. The largest was 30 ft. high, 44 ft. in height, was explored in 1833 by Mr. J. G. Rokewode and other gentlemen, who excavated a passage or gallery on the north side of the central earth. From the interior of the mound, and on what is termed the natural surface, from the centre of the barrow. In this line was found a chest containing various remains of gunmen. Roman or Saxon manufacture—glass urns or bottles, a bronze lamp and cup, a patera, a prefericulum (a long or tall handled vase), glass vessels, a fictile urn of opinion that the burial, though Roman, was not originally made in the position found, but that the remains have, at some period, been found and re-interred, with the pottery, in a cyst (of which decayed wood and hinges give evidence). Another Roman find is described in the vicinity of Old Sarum, consisting of three jars of Roman copper coins, in good preservation, to the number of 1,500.

To this gain of evidences of Roman dominion in England we have to add a triangulated destruction by a spreading road at Barrow Hills, in the county of Essex, on the south border of Cambridgeshire—being four tumuli, arranged in a cross and varying in size. The largest was 30 ft. high, 44 ft. in height, was explored in 1833 by Mr. J. G. Rokewode and other gentlemen, who excavated a passage or gallery on the north side of the central earth. From the interior of the mound, and on what is termed the natural surface, from the centre of the barrow. In this line was found a chest containing various remains of gunmen. Roman or Saxon manufacture—glass urns or bottles, a bronze lamp and cup, a patera, a prefericulum (a long or tall handled vase), glass vessels, a fictile urn

CHESS.

TO CORRESPONDENTS.

NUMBER—The address of English player, Alexander M'Donnell, was buried in Kensal-green Cemetery. His grave is in a secondered spot on the north-west corner of the burial-ground, and is indicated by a plain stone slab, on which are carved his name, his age and the date of his death. The inscription is as follows:—"Sacred to the memory of the memorable player Alexander M'Donnell, who died 31st January, 1835, aged 29 years."

Solvers—Leslie Charles de la Bourdonnais, the Celebrated Chess-player, 12, Alexander-square, Brompton.

We thank—To present further solution, it will be well to give a more explicit account of the moves. Thus, No. 1, 1. Kt to Q 7th, and if Black play 1. P to Q 4th, 2. Q to K 5th, and if Black move 1. P to K 4th, 2. Q to K 8th, mate.

1. B to K 2nd (ch)	K takes P	2. B takes Kt
2. Q to queen the King's Kt sq. (ch)	White plays	K to Q 6th
3. B to K 6th (ch), 3. B to Q 6th (ch), and 4. Q to K 5th, mate.		

(If he take the Rook, White plays, 3. Q to Q 6th (ch), and 4. Q to K 5th, mate.)

If Black move 1. K to Q 6th, 2. B takes P

as Black move; 1. K to K 6th, 2. Kt to Q 4th, mate.

R. E. Turner.—If you will accept to lock over your solution, we shall be glad to see if mate cannot be effected by 1. Q to Q 8th, as well as by 1. B takes Kt (ch).

J. S.—In the Chess Player's Chronicle, the problem known as "Chess Puzzle," published by Mr. Bohn, is said to be by Mr. Staunton. If they object to the solution, it is probably because the mate is effected by the medium agreed on cannot be resulted. He a fixed move. Black may play 1. Kt to Q 4th, and White may reply 2. Kt to Kt 6th, and forfeit to the same penalty as for a false move played with an opponent's piece.

J. S. Wood.—Your solution is correct, and your problem is sound. We have published that from no lack of appreciation, but simply in consequence of the position of the pieces—the better portion of the game seems admirably played—by Lasker himself. Black (Mr. Lasker) has the move in the position, and White (Mr. Steinitz) has a drawn game—necessarily at moves 31, 33, and 35; and White's winning, after all, only proved thus, at No. 37 (as given below):

37. P to Q 6th	P takes P
38. P to Q 7th	Q to Q 3rd
39. P to Q 8th (becomes a Queen)	Q takes Q
40. P takes P	Q to Q 3rd
41. P to Q 7th	Q to Q 2nd
42. P to Q 8th (becomes a Queen)	Q takes Q
43. P takes P	K to Q 4th

Of the accompanying problem we may happy to be able to speak in terms of unqualified commendation.

A Novice, Brighton.—The circumstances you mention to be unusual are impossible, indeed, in a game of chess. Your solution of the problem is correct, but not quite complete. Our solution is as follows:—1. Kt to Kt 3rd, and if Black play 1. P to Q 4th, 2. Q to Q 5th, and in short, must be considered to have lost the game.

Mathematician.—In the Illustrated London News of last English players of the last twenty-five years is in course of preparation for the Illustrated London Chess-player, and will be published in a few days.

C. F.—There can be no appeal under any circumstances against the umpire's and impartial decision of Problem No. 10. As you avoid to limit that, only a few days after contributing that and two or three others, you have sent us a solution of No. 10, which, as the following positions will show, is not correct:

White.	Black.
1. Q takes B	K takes Kt (or)
2. Q to Q 4th (ch)	K to K 5th (dis. ch)
3. B to Q 6th	Any move
4. Q to Q 3rd mate	

(or),

	Kt takes Q
2. B takes Kt	K to Q 4th
3. Q to Q 3rd mate	

SOLUTION OF PROBLEM No. 1030.

WHITE.	BLACK.
1. B takes Kt (ch)	K to K 5th
2. Q to K 7th (dis. ch)	K to K 4th
3. Q to K 4th (ch)	K to K 5th (dis. ch)
4. Q to K 5th (ch)	K to B 5th (ch, checkmate)

PROBLEM No. 1031.

By Mr. R. Landesmann, of Vienna.

BLACK.

WHITE.

White to play, and mate in three moves.

CHESS IN LONDON.

A smart Skirmish, in which Mr. Staunton gave the odds of "Pawn and two Moves" to a skilful foreign amateur.

(Remove Black's K to P 3 Pawn from the Board.)

(Irregular Opening.)

WHITE (Mr. ——.)	BLACK (Mr. S.)	WHITE (Mr. ——.)	BLACK (Mr. S.)
1. P to K 4th	P to K 3rd	7. Kt to K to Kt 2nd	B to Q 3rd
2. P to Q 4th	P to Q 4th	8. Castles	Castles
3. P to Q 5th	P to Q B 4th (ch)	9. P to Q B 3rd	Kt to K 2nd
4. P takes P	P takes P (ch)	10. P to Q Kt 4th	P to Q Kt 3rd
5. Kt to Q B 3rd	Q takes Q B P	11. K takes B	Q to K R 4th (ch)
6. B to K 2nd	Q to Q R 4th	12. K to Q sq	Kt to K Kt 5th

and White cannot save the Game.

An instructive Game, played in the Chess Tournament last year, between Mr. Paulsen and a well-known English Amateur, Mr. Green.

(Irregular Opening.)

WHITE (Mr. G.)	BLACK (Mr. P.)	WHITE (Mr. G.)	BLACK (Mr. P.)
1. P to K 4th	P to K 4th	10. P to K 5th	P to K R 3rd
2. P to Q 4th	P to Q 4th	11. P to K 4th	P to K R 3rd
3. P to K 5th	P to Q B 4th	12. Castles (Q side)	B to Q Kt 2nd
4. Kt to K B 3rd	P to Q 3rd	13. P to K B 5th	K Kt to K 2nd
5. B to K 2nd	P to K B 3rd	14. P takes P	P takes P
6. B to K 3rd	Castles	15. K to K 2nd	B takes Kt
7. Q to Q B 3rd	Kt to Q B 3rd	16. P takes B	Kt to Q 4th
8. Q to Q 2nd	P to K B 3rd	17. Kt to K 4th	B takes Kt
9. B to K R 4th	Kt to K 2nd	18. P takes B	Q to Q B 4th

(Black has already the better position; but by this move he loses the game, as will be seen by his opponent.)

19. P to K 6th	Q to Q Kt 4th
20. Kt to K sq	Q to Q B 4th
21. Kt to K B 2nd	Q to Q Kt 4th
22. Kt to K sq	Q to Q B 4th

(Black has an available resource against the continued assault we threatened.)

23. Q R to Q sq	Q takes K P
24. Kt to K sq	Q to Q B 4th
25. Kt to K B 2nd	Q to Q B 5th

and wins.

CHESS ENIGMAS.

No. 1043.—By Herr Klein.

White: K at K 5th, Kt at K 3rd, and P at K 4th. *Black:* K at Q 4th, and P at K 2nd.

White to play, and mate in two moves.

No. 1044.—By Mr. B. Rumbu (*Shaftesbury*).

White: K at Q B 2nd, R at K 4th, Bs at K B 8th and Q 5th, Kt at K 5th, P at K B 4th and Q B 7th. *Black:* K at Q Kt 4th, Bat Q R 8th, and P at K 3rd; P at K Kt 4th, Q B 4th, and Q Kt 6th.

Black: K at K 4th; P at K 2nd, K 2nd, Q B 4th, and Q Kt 3rd.

White, playing first, to mate in four moves.

SCIENTIFIC NEWS.

THE BANANA OF BRAZIL, which forms the basis of the nutritive matter of the population throughout the interior of the country, has been recently analysed by M. Commaille, who had received four fine sound specimens. He has reported the following results to the Academy at Paris:—Water, 73·000; albumen, 0·820; cellulose, 0·200; fatty matters, 0·623; cane sugar, grape sugar, an organic acid, gum, pectine, and traces of starch, 19·057; phosphoric acid, 0·62; lime, silicia, chlorine, iron, &c., 0·779=100. There is, therefore, the chemical composition of the ripe banana deprived of the husk. When the husk was reduced to ashes it was found to contain—carbonate of potash, 17·78; carbonate of soda, 6·08; carbonate of potassium, 29·16; phosphates of potash and soda and a little sulphate, 6·66; carbon, 7·00; lime, iron, &c., 2·37; silicia and loss, 36·96=100. Each of two valuable products of potash and chloride of potassium, found in three ashes, ought to render them of considerable value for agricultural purposes.

A LUMINOUS METEOR of the first order was observed (it is said for the first time) between 5 and 6 P.M. by Mr. Julius Schmidt, of Athens, in the north-east quarter of the heavens from *Ley Mesons*. On Oct. 19 last, at five minutes to seven o'clock, the meteor appeared in the form of a star of the first magnitude, of a brilliant white colour, and of a circular form. It then suddenly assumed a pear-like form, and, after remaining stationary for a few seconds, it began to move slowly towards the south-west, and, after passing through eight of the stars disappeared; and it gave a greenish hue to the surrounding stars. It then suddenly assumed a blood-red colour, and, after remaining feeble, with a diameter equal to about ten or fifteen minutes. It, then, with a rapid motion, burst into fragments, and followed the course for fourteen seconds. He saw no more a single luminous body, but two green-white nebulous masses, which, after remaining stationary for a few seconds, also accompanied by a reddish trail distributed like sparks in the tail of the meteor. This extraordinary observation was reported to the Academy at Vienna, and has been transmitted to M. Quetelet and Mr. Grig, of Manchester.

PRESERVATION AND ORNAMENTATION OF BUILDING MATERIALS.—In the first number of Mr. Ruskinson on the important subject, laid before the Paris Academy of Sciences, and inserted in the *Comptes Rendus*, vol. lvii., No. 20, page 1, the results of experiments are given, showing that the hardness, and crystallisation of the surface of Portolan No. 1, Portland stone, sandstone, gypsum, and their specific gravity, before and after saturation, are given in grains and grammes. By the action of certain chemical substances placed in tubes of porcelain heated to vivid redness, the surface of the stone becomes changed in its nature. By the action of certain metallic vapours, the surface of the stone becomes changed in its nature. By the action of certain metallic vapours by brunishing substances were decoloured; agates and calcedony are given a fine polish; and the colours of red, and orange-yellow became paler in tint. Red and yellow carnelians were decoloured, but the white agate remained unchanged in colour. Also, that the metallic oxides give precious stones; but the diamond, ruby, and sapphire resist its action. Besides such metallic oxides as are fixed at a red heat, there becomes a solution of hydrogen, which reduces the oxide. Hydrogen also reduces malachite to the metallic state, and the green colour of the malachite disappears. Iron reduces malachite to the metallic state, &c. Many of M. Kuhlmann's experiments respecting the action of the vapour of ammonia on the colouring matter is due to the presence of organic matters. For further details we have no room.

When we consider the action of atmospheric air, the divers substances which the metallic oxides undergo in silicious pastes and in marbles by the agency of oxydation, and the various colours which they acquire by such action, these modifications are sometimes powerful causes in the disaggregation of stone, independently of the action of water and of frost. In the first place, the saturation of water which has penetrated porous stones breaks them up by freezing, as also water, the expansion of which is equal to one-tenth of its volume, may at time disintegrate the very hardest stones. May the collecting these facts tend to the clearing up of the question which is the study of the geological modifications which mineral substances undergo on the surface of the globe?

THE ACTION OF CERTAIN METALLIC SUBSTANCES upon Bees has been examined by M. Gorup-Besanez. From an analysis of his paper (in *Nature's Annales der Chemie und Pharmacie*, Band cxv. Heft 2) we collect that he finds and support the conclusion of the author on the analogy which seems to exist between the action of the poison of bees and that of the poison of hemlock. He found that a watery solution of pure zinc acid, with the addition of a few drops of potash, produced in bees violent convulsions, quite independent of urea. Urea acts quickly scorbutic ozone, disengaging ammonia in the presence of potash. Large sugar was not attacked by ozone; but, in the presence of acids, potash, or carbonate of soda, it was entirely transformed into carbonic and formic acids. Cane sugar was not attacked by ozone, only forming the same products. The fatty volatile acids which related the action of ozone were tuned into carbonic and formic acids. Solutions of albumen and solid fatty acids, such as stearic and palmitic acids, were attacked very slowly, even when encompassed by an excess of ozone. Ozone was not transformed, however, into fatty acid, containing a less number of carbon equivalents. On the purified chemically absorbed the assimilation of nourishment; and, at whatever stage of the reaction the liquid was examined, there was only found in it carbonic and sulphuric acids and the corresponding bases of salts. Gelatine, the basis of bone, was wholly transformed into a body with altogether different properties, but being of the nature of jelly.

HABITS OF THE CADDIS OR CASE WORM, THE LARVA OF PHRYGANEA GRANDIS.—Mr. Frederick Smith has been to Gray on the Thames this singular creature appears in the *Annals of Natural History*. We extract a few particulars. The latter was seen to fix a low containing cases made of worms collected by herself from the Weedle, which rows through her fathers garden at Willesden. She placed in one line the cases of the worms, at the bottom of the river are constructed of various materials, such as small stones glued together, of stones and shells, and stones cemented. To discover the capabilities of the worms, Miss Smee turned them out of their natural cases and gave them different materials to construct. They found leaves of trees in an equal facility with every material. They smoothed well with pieces of glass, sandpaper, and also procured stones small, insects, bone shavings, *gold leaf*, &c. but entirely failed with round objects, such as beads. They were much affected, and even destroyed, by being turned over. Some substances, such as pine-wood, were given them; and they could not use pieces of coal, brick, or metal. Some of the worms were furnished with old fishing rods, copper, tin, or lead. Five was the highest number of artificial cases that Miss Smee's cadis-worms could be induced to form. They bend, twist, and securely glued together. They begin by cementing a number of pieces loosely together, merely as a foundation for the permanent structure. They fasten next by lifting up each piece of stone or other material with their feet, turning it on its side to ascertain whether it is the best one that can be had, and when it is retained, rejected, and another tried in the same manner, until they succeed in finding a suitable one, which they fix and cement firmly and consolidate them their mouth. When the stone is made the body of the creature is completely screened, the head and the anterior portion of the body are nevertheless covered with raw meat and flies; they would never eat cooked meat. The case they are now forming is about two inches long, and is in shape like a spear or vessel, otherwise a fierce and dangerous looking one. The case is nearly constructed of stones, and has projecting with a double curved and pointed hook on each side, the use of which I am not aware. The head is large and powerful, the mouse, by which they possess extra strength to resist being torn from their case. The antennæ seem to be very sensitive, and are constantly in motion. Miss Smee found that a slight irritation, caused by the insertion of a pin, induced the worm to withdraw into its case.

THE MIXTURE AND CONTRAST OF COLOURS.—M. Chevreul, so renowned for his researches on this subject, has made a new communication in especial reference to the use of colours in dyeing. The first point has an exception to the law of M. Chevreul on the simultaneous contrast of colours pertains when a colour is placed upon another, and when a colour is placed upon another; since, in place of the upper one being modified by the complementary tint overlaid by it, it becomes purer. This law, he asserts, it seems, on the contrary, to be combined with the colour of the under piece. M. Chevreul states that his experiments with regard to the application of the preserved distance, and has so remark to make on their examination; but with regard to the latter, he observes that it is not to be relied on entirely, and says that the phenomenon is due to another law, which he terms that of the harmony of colours. The former is expressed by the law of the contrast of colours. The former is expressed by the law of contrast. The mixture of two simple colours gives a binary compound—e.g., red and yellow give orange; blue and yellow, green; and red and blue, violet. Of these simple colours, or rather two complementary colours, give white or grey—e.g., red and green, yellow and violet, and blue and orange. He relates to material colours, for the complementary colours of the spectrum give white; 2. If the colours mixed are not complementary, the resulting colour mixed, does not produce black or a normal grey because one colour predominates over the other. The predominating colour may be thus lighted with the predominant colour. With regard to the law of simultaneous contrast, M. Chevreul says that it consists in the production by the eye simultaneously of zones of diverse colours of equal dimensions, and place at two or three decitrees distance from each other, in such a manner that they are able to produce the modification which each of the zones causes to undergo. The law comprises two articles:—1. Contrast of tone, which is that by which two colours of the same tone, but relatively to the black or white; in other terms, according as they are light or shaded. 2. Contrast of colour, which a simple colour can be shaded only by the addition of one of the other simple colours—e.g., red can be shaded only by yellow or blue; yellow by red or blue; blue by red or yellow; a binary colour (orange, green, or violet) can only be shaded by one of the simple colours which do not enter into its composition. The general law of contrast of colours) rules in the arts which employ material colours—painting, &c. The second (the law of harmony) is that which has to preside over the coloured mosaics of a sensible extent—such as tapestry, carpet-making, mosaics, stained glass, &c. M. Chevreul says "that the object is attained when the eye of the spectator also distinctly the forms and colours of the models reproduced at a distance in which the completed extent of each element seems to be perceptible. Then the effects of vision relate no more to the principle of contrast, but rather to that of the mixtures of colours." Further details will be found in No. 16 of vol. lvii. of the *Comptes Rendus*.

An influential committee has been formed in London to resolve subscriptions in aid of the agricultural population of Hungary, under the suffering consequent upon the failure of the harvest. The committee are acting in concurrence with the Austrian Government.

NEW MUSIC.

NOTICE.—HALF-PRICE.—All Music, and the best Editions, at half the published price, sent post-free for postage-stamps or Post Office order.
HOPWOOD and CREW, 42, New Bond-street, W.

The prettiest drawing-room piece is
GANZ'S SOUVIENS TOI.
Mélodie chantante. Price 3s. 6d.
"A most pleasing morçeau, equally simple and elegant."—Illustrated News.—HOPWOOD and CREW, 42, New Bond-street.

A CHRISTMAS PRESENT.
COOTE'S NEW ALBUM
of Dance Music. Price 10s 6d.
HOPWOOD and CREW, 42, New Bond-street.

NOW READY,
COOTE'S NEW ALBUM,
elegantly bound and Illustrated. Price 10s. 6d.
HOPWOOD and CREW, 42, New Bond-street.

THE NEW VALSE.
COOTE'S VILLAGE ROSE.
Price 4s. Solo or Duet.
HOPWOOD and CREW, 42, New Bond-street.

THE BEST SET.
COOTE'S COLOGNE QUADRILLES.
Solo or Duet, 4s.
HOPWOOD and CREW, 42, New Bond-street.

COOTE'S KATE KEARNEY WALTZES, introducing "Kathleen O'More," "Terence's Farewell to Kathleen," "Kate Kearney," "Savourneen Deelish." Solo or Duet, 4s.—HOPWOOD and CREW, 42, New Bond-street.

SPARKLING AND DANSANTE.
COOTE'S ROULETTE GALOP. Price 3s.
The best Galop of the Day.
HOPWOOD and CREW, 42, New Bond-street.

COOTE'S VILLAGE-BELLS POLKA. Price 3s. One of the very best published, and will excel in popularity the celebrated "Great Eastern," by the same Composer.
HOPWOOD and CREW, 42, New Bond-street.

CONTINUED SUCCESS.
COOTE'S MARIANA VALSE. Price 4s., Solo. Performed by all the Bands in the United Kingdom.—HOPWOOD and CREW, 42, New Bond-street.

THE BEST SET OF LANCERS ARE
COOTE'S CURE LANCERS. Price 4s. Introducing "The Pilgrim of Love," "My Pretty Page," "So Early in de Morning," "The Cure," and other popular Airs. A real merry set. No dance programme complete without them. Always redemanded.—HOPWOOD and CREW, 42, New Bond-street.

MERRY SONGS.

Have you seen the Ghost	2s. 6d.
Polly Perkins of Paddington-green ..	2s. 6d.
Jemima Brown	2s. 6d.
Isabella with her Gingham Umbrella ..	2s. 6d.
Charity Crow	2s. 6d.
The Dog-show (Howard Paul's song) ..	2s. 6d.

HOPWOOD and CREW, 42, New Bond-street.

BUCKLEY'S BEAUTIFUL SONG,
COME WHERE THE MOONBEAMS LINGER. Price 2s. 6d. The melody is simple and beautiful.
HOPWOOD and CREW, 42, New Bond-street.

THE FAVOURITE SONG, BY F. BUCKLEY,
OH! IF I HAD SOME ONE TO LOVE ME,
My trials and troubles to share.
Price 2s. 6d. HOPWOOD and CREW, 42, New Bond-street.

NEW CHRISTY SONG.
OUR ANGEL NELL. Price 2s. 6d. A soft,
plaintive melody, nightly encored.
HOPWOOD and CREW, 42, New Bond-street.

C. M. E. OLIVER'S New Morçeau IMPRESSIONI DI VENEZIA. Romance for the Piano. Price 3s. Very effective.
HOPWOOD and CREW, 42, New Bond-street.

NEW SONG, THE OAK AND THE SAPLING, composed by HENRY SMART. Price 2s. 6d. (sent at half price). This is one of the most successful songs of the season; it is universally admired. Compass from D to E.
DUFF and HODGSON, No. 20, Oxford-street.

SONGS for CHRISTMAS.—"The Merry Winter Night," by E. J. Loder, price 2s. "Winter Evergreens," by S. Glover, price 2s. 6d. "The Christmas Tree," by H. Farmer, price 2s. 6d. "The Chimes," by F. N. Crouch, price 2s. 6d. "Mirthful Winter," Duet for Soprano and Contralto, by S. Glover, price 3s. These spirited compositions are highly calculated to enliven the winter evening.
DUFF and HODGSON, 20, Oxford-street.

THE BEATITUDES.—Four New Sacred Songs. By CHARLES JEFFERYS and STEPHEN GLOVER. The popularity of "The Christian Graces" — Faith, Hope, and Charity, is likely to be exceeded by the demand for the new set—"Sorrow," "Meekness," "Mercy," and "Peace." Each song, post-free, 16 stamps; or the set, 5s.—London: C. JEFFERYS, 21, Soho-square.

FELIX GANTIER'S Four New Pieces for Piano — "Summer Sunbeams," "A Moonlight Melody," "The Rippling River," "The Convent Chimes." Each piece beautifully Illustrated in imitation of water-colour drawings. Post-free for 19 stamps.—London: CHARLES JEFFERYS, 21, Soho-square.

DOLORES' SONGS. "Wings," 2s. 6d. "Hush," 2s. 6d. "The Mill," 2s. 6d. "The Dream," 2s. 6d. "Echoes," 2s. 6d. "The Bridge," 2s. 6d. Each song post-free for 16 Stamps; also another edition of "The Brook," for 19 Stamps.
London: CHARLES JEFFERYS, 21, Soho-square.

TO THEE ALL ANGELS CRY ALOUD, a sacred reverie for the Piano, 2s. 6d. "Eva's Dream," 2s.; and, just published, "La Marche des Frondeurs," 2s. 6d. By C. O'Grady.—JEFFERYS, 21, Soho-square, London.

MUSIC HALF-PRICE and POST-FREE. All full-price Music of every publisher forwarded on these terms on receipt of stamps. The trade supplied to sell at Half-price. OETZMANN and CO., 27, Baker-street, Portman-square, London, W.

HENRY FARMER'S NEW PIANOFORTE TUTOR, price 4s. "This is decidedly the most useful and best Instruction Book for the Pianoforte we have seen."
London: J. WILLIAMS, Holborn-bars and Cheapside.

HENRY FARMER'S GEORGIANA VALSE, Illustrated by J. BRANDARD. Price 4s. Solo and Duet. Orchestra, 5s.—London: JOSEPH WILLIAMS, 11, Holborn-bars; and 123, Cheapside.

HENRY FARMER'S CHRISTMAS QUADRILLE. Price, Solo, 2s.; Duet, 3s.; Septet, 3s. 6d.; Orchestra, 5s. (Postage-free.) This beautiful Quadrille boasts an unrivalled popularity.—London: WILLIAMS, 11, Holborn-bars.

THE SPIRIT OF THE OCEAN, "In the blue depth of the waters," sung nightly by Miss Poole in Byron's "Manfred," at T. R. Drury Lane; Music by JOHN BARNARD. Price 2s.—J. WILLIAMS, Holborn-bars, and Cheapside.

HANDICAP GALOP by ERNEST HARTMAN, price 3s. This highly-popular Galop is now performed by all the military bands in the United Kingdom.
JOSEPH WILLIAMS, Holborn-bars, and Cheapside.

THE PICKET OF THE POTOMAC.
Music by H. F. HEMY. 2s. 6d.
The beautiful and touching words of this song were found in the pocket of one of the Confederate volunteers who died in the camp on the Potomac from a rifle-wound whilst on "picket duty."
London: JOSEPH WILLIAMS, 11, Holborn-bars, and 123, Cheapside.

S. GLOVER'S VOCAL DUETS. Sweet Visions of Childhood. 'Neath the Greenwood Tree. Poetry of both by Carpenter. Each post-free for 16 stamps.
London: B. WILLIAMS, 11, Paternoster-row.

ENGLISH CONCERTINAS, by LACHENAL, Full Compass, with all the latest Improvements, warranted for Hot Climates, and to keep well in Tune, from Two guineas, with Case, Lock and Key, &c.
HOPWOOD and CREW, 42, New Bond-street.

THE GLORIES of the HEAVENS seen distinctly by a New Telescope for £5, which will also distinguish the features of a man four miles, and time by a church clock ten miles. This instrument is guaranteed to be equal in the most important respects to telescopes costing £70.—SOLOMONS, 39, Albemarle-street, Piccadilly. Persons are invited to apply for a diagram, with full particulars and seven sheets of closely-packed printed testimonials of the highest respectability, sent free by book-post, 1d.

OPERA, Race, Field, and General Outdoor Day and Night GLASSES, with an improvement which renders them much more portable and powerful, they being suited to the waistcoat pocket. It has always been a great drawback to the general use of field-glasses on account of their weight and large size; but as Messrs. S. have overcome this difficulty a more rapid sale is expected, which induces them to reduce the prices, which range from 20s.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

SPECTACLES.—The Patent Newly-invented TINTED SPECTACLES are patronised by the majority of the nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision.
S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

SLUGG'S ASTRONOMICAL TELESCOPES
and Parallactic Stands, best object glasses.
Warranted to show Saturn's Ring, Jupiter's Belts and Moons, Nebulæ, Double Stars, &c., £2 10s.;
3¼ in., £12 10s.; 6¼ in., £85.
Full Particulars for One Stamp.
J. T. Slugg, 214 Stretford-road, Manchester.

SLUGG'S MICROSCOPES, the cheapest made.
New Giant size, £10 10s.; New Binocular, £5 5s.
Model Microscopes, 2 and 4 guineas.
Full Particulars for One Stamp.
214, Stretford-road, Manchester.

CAUTION.—THE CELEBRATED LORD BURY TELESCOPE can only be had of J. H. STEWARD, Sole Maker, and his Agents. Will read the name of a light-ship at eight miles. Price £3 10s. complete. Address, 406, Strand, London. Catalogues, with testimonials, post-free.

THE BEST.—BURROWS' FIELD GLASSES.
W. and J. Burrow, Malvern.

THE BEST.—BURROWS' RIFLE TELESCOPES.
W. and J. Burrow, Malvern.

BURROWS' BINOCULARS. These Field Glasses are noted throughout the world for their matchless quality. The highest authorities pronounce them
THE BEST.
Mounted specially for India, China, and all stations in the Tropics.
1st Size and Power £6 6s. 0d. in Sling Case.
2nd Ditto ditto £3 13s. 6d. ditto.
In Aluminium, "incredibly light," 1st size, £14 14s.; 2nd, £10 10s.
BURROWS' RIFLE TELESCOPES,
as used at the "International" and "Lords and Commons" matches at Wimbledon,
£3 3s.; £5 5s.; £6 6s.; and £9 9s. each.
Lists post-free on application.
Address W. and J. Burrow, Malvern.
London Agents: Arnold, 72, Baker-street; Wales and M'Culloch, 56, Cheapside, and 32, Ludgate-street.

MAGIC LANTERNS for HIRE.—A newly- arranged selection of slides has been made in connection with the magic lanterns and dissolving-view apparatus which are kept on hire at the National Society's Depository, Westminster. For terms of hire address the Superintendent.

W. F. THOMAS and CO.'S PATENT SEWING-MACHINES.—These machines, made by the original patentees and introducers of the invention, with all the improvements which 15 years' experience has suggested, stand foremost and unrivalled for all practical purposes. They are guaranteed to perform their work efficiently, with exceeding rapidity, regularity, and durability, and give no trouble. The stitching (alike on both sides of the material) is without cord or ridge, and the thread cannot be pulled out. They hem, bind, gather, and braid with equal facility. Catalogues on application to 66, Newgate-street; and Regent-circus, Oxford-street, London.

CHUBBS' FIREPROOF SAFES, with their Drillproof and Powder-proof Locks; Cash and Deed Boxes, Detector Locks, Street-door Latches. Illustrated Price-lists, gratis and post free.—Chubb and Son 57, St Paul's-churchyard London.

MAPPIN BROTHERS,
THE LONDON-BRIDGE FIRM.
MILITARY CANTEENS for OFFICERS,
£8 8s. each (Oak Case), containing

Nov. 1, 1863.

ALLSOPP'S ALE AND GUINNESS'S STOUT.—JOHN F. BIGGS and CO., sole contractors for bottled beer to the International Exhibition. Agents for Samuel Allsopp and Son's India Pale Ale and Burton Ale, and Guinness, Son, and Co.'s Extra Stout. Importers of Wines and Spirits. Offices and Stores, the Royal Exchange, E.C. The trade supplied on liberal terms, for cash.

THE
ONLY PRIZE MEDAL, 1862,
awarded to any English Manufacturers of
CHOCOLATE and COCOA, was obtained by
J. S. FRY and SONS, Bristol and London.

FRY'S ICELAND MOSS COCOA.
A combination of Cocoa with Iceland Moss.
Very Strengthening and Nutritious for Invalids, and agreeable
FOR THE GENERAL CONSUMER.

OSWEGO
PREPARED CORN,
for
Puddings, Custards, Blancmanges, &c.
Manufactured and Perfected by
T. KINGSFORD and SON,
of Oswego, State of New York.
It is the original preparation from the farina of maize, established 1848, commands the highest price from the trade, and offers the best value to the consumer.
It is a quarter stronger than any of the imitations, has a finer grain, and is more delicate.
The Oswego has the natural golden tinge, and not the chalk white produced by artificial process.
KEEN, ROBINSON, BELLVILLE, and CO.,
Garlick-hill, London.

KEEN'S GENUINE MUSTARD.
There are many qualities of Mustard sold.
Obtain Keen's Genuine Mustard and full approval is guaranteed.
FIRST MANUFACTURED 1742.
Sold by most Grocers from the Cask, and in 1 lb. and ½ lb. Canisters.
KEEN, ROBINSON, BELLVILLE, and CO.,
London.

LETTERS PATENT 1823. PRIZE MEDAL 1862.
ROBINSON'S PATENT GROATS is the most valuable preparation for making pure and delicate gruel. Modern chemistry has shown that this food is easy of digestion and rich in nutriment.
ROBINSON'S PATENT BARLEY makes a delicious custard pudding, directions for which have been given by Mons. C. E. Francatelli. It is appreciated as a non-inflammatory drink, is excellent for mothers nursing, and has long been used with great success for rearing children by hand.
KEEN, ROBINSON, BELLVILLE, and CO., London.

ALL Good Cooks and Careful Housewives
use Symington's
PATENT PREPARED PEA FLOUR,
perfectly wholesome, and requires no boiling. Packets, 1d., 2d., and 4d.; Tins, 1s., 1s. 6d., and 3s. All Grocers, &c.—Works, W. SYMINGTON and CO., Bowden Steam Mills, Market Harborough.

CHEESE—STILTON in perfection.
HAMS—Small, first class.
BUTTER—Aylesbury, Fresh Daily.
CRAFT, Cheesemonger, Knightsbridge.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.
GLENFIELD PATENT STARCH,
awarded the Prize Medal, 1862.
This unrivalled Starch is
used in the Royal Laundry,
and pronounced by her Majesty's Laundress to be
the Finest Starch she ever used.
Her Majesty's Lace-dresser
declares it to be
the best she has tried,
and the above award by some of the most eminent
scientific men of the age
confirms its superiority.
WOTHERSPOON and CO., Glasgow and London.

PRICE'S CHILD'S NIGHT LIGHTS are perfectly safe, and burn their time. The quality of these Night Lights can now be relied on.

SHERWOOD BED LIGHTS, Sixpence and Eighteenpence a Box. These candles are made to supply a want very generally expressed—a cheap, really good chamber candle. They will be found inferior only to "Price's Candles, which will not drop grease when carried," which are sold in Boxes, One Shilling and Three Shillings each.

GLYCERINE, which very simple tests show to be impure, is being sold on the statement that it is "in every respect equal to Price's." Most medical men prescribe PRICE'S GLYCERINE. Where purity is of importance, patients can ensure it by desiring to have their Glycerine in 1 lb., 8 oz., 4 oz., or 2 oz. bottles, with capsules over the stopper, marked "Price's Patent." Belmont, Vauxhall.

HAIR DYE, at the International Exhibition. To UNWIN and ALBERT, 24, Piccadilly, the only award was given for the excellence of their COLUMBIAN HAIR DYE. The effect upon grey hair is so instantaneous that a natural brown or black is immediately produced.—5s. 6d., 10s. 6d., and 21s.

HAIR-DYEING ROOMS.—UNWIN and ALBERT'S, 24, Piccadilly, are as private and replete with every convenience and comfort as a lady's dressing-room; where hair can be coloured the lightest flaxen or darkest brown or black.

EAU and POMMADE RÉPARATRICE DE FRUCHET, à PARIS.—Infallible to restore the Hair to its natural colour; keeps it clean, smooth, and brilliant. Sold by all Chemists and Perfumers. Wholesale Dépôt, TH. LUSCHER and CO., 27, Cannon-street West, London.

NAPOLEON PRICE'S GOLDEN OIL for RESTORING the HAIR. The fact of its being in constant use in the Royal Nursery and in the families of the Nobility stamps its superior excellence. 3s. 6d., 5s., 7s., and 10s. per bottle.—Manufactory, 158, New Bond-street.

PESTACHIO-NUT TOILET-POWDER imparts to the skin a natural whiteness, youthful delicacy, and softness attainable by no other means. 2s. 6d. per Box. Sold everywhere.—PIESSE and LUBIN, 2, New Bond-street, London.

PIESSE and LUBIN'S SWEET SCENTS, Magnolia, White Rose, Frangipanni, Geranium, Patchouly, Ever Sweet, New Mown Hay, and 1000 others. 2s. 6d. each. Sold everywhere.—Laboratory of Flowers, 2, New Bond-street.

TEETH.—OSTEO-EIDON, Messrs. GABRIEL'S SPECIALITE.—The numerous advantages, such as comfort, purity of materials, economy, and freedom from pain, obtainable hereby, are explained in Messrs. Gabriel's "Pamphlet on the Teeth," just published, free by post, or gratis on application.—Messrs. Gabriel, the old-established Dentists, 27, Harley-street, W., and Ludgate-hill (over Benson's, silversmith); Liverpool, 134, Duke-street; and Birmingham, 65, New-street. Diploma, 1815.

ARTIFICIAL TEETH, exquisitely enamelled to nature, detection impossible, purest materials and best work, on Mr. ESKELL'S patented and painless plan of self-adhesion. His Treatise free for seven stamps.—8, Grosvenor-st., Bond-st., W.; and at 39, Bennetts-hill, Birmingham. Consultations free.

SUMMERS'S CASTOR-OIL PILLS (a safe Substitute for Castor Oil). For Bilious and Liver Complaints, Wind, Headache, and Drowsiness. Sold by all Chemists; or a box sent by post from the Proprietor, Mr. Summers, Chemist, 43, Curtain-road, London, for 15 stamps.

100 PATTERNS SILKS, post-free. All the new Coloured Silks plain and figured, from 1 guinea the Dress. Moire Antiques from 2 guineas. Warranted all pure Silk.—NICHOLSON'S, 50 to 52, St. Paul's-churchyard.

70 PATTERNS BLACK SILKS, post-free, comprising every description of Glacés, Gros de Suez, Moire Antiques, Gros Grains &c., the durability of which is guaranteed.—NICHOLSON'S, 50 to 52, St. Paul's-churchyard.

NICHOLSON'S NEW CLOAKS. Illustrations of Nineteen of the Leading Styles for the Present Season sent post-free.—NICHOLSON and CO., 50 to 52, St. Paul's-churchyard. Established 20 years.

SILKS—PATTERNS FREE.
New Winter Checks,
£1 7s. 6d. for 12 yards.
Glacés—Light and New Colours,
£1 19s. 6d. for 12 yards. Any lengths cut.
The Gros de Suez—£2 7s. 6d. for 12 yards.
Broché, Checks and Stripes, £1 19s. 6d.
Moiré Antiques, in New Colours,
£4 10s the Full Dress.
JOHN HARVEY and SON, 9, Ludgate-hill.

WATERPROOF TWEED CLOAKS.
One Guinea—to bottom of Dress.
The New Double-milled Oxonian Cloth
Walking Jacket, £1 9s. 6d.
JOHN HARVEY and SON, 9, Ludgate-hill.

KNICKERBOCKERS, Linseys, patterns free.
New Mixtures, 1s. 7½d. per yard.
French Poplins, in New Colours,
18s. 6d. per 12 yards.
French Merinos, all colours, 2s. 9d. yard.
JOHN HARVEY and SON, 9, Ludgate-hill.

WEDDING or INDIA OUTFITS supplied in first style, at much less than the usual charges. Detailed price-lists by post.—WHITELOCK and SON, 166, Strand, opposite the Church, near Somerset House.

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by GEORGE C. LEIGHTON, 198, Strand, aforesaid.—SATURDAY, NOVEMBER 28, 1863.

THE ILLUSTRATED LONDON NEWS.

No. 1234.—VOL. XLIII. SATURDAY, DECEMBER 5, 1863. WITH A SUPPLEMENT, FIVEPENCE

LORD ELGIN.

WHETHER the illustrious Governor-General of India has succumbed to the disease which, when the latest telegrams from Bombay were dispatched, had already hurried him to the brink of the grave, or whether he will escape from its fierce assaults with his life, too little room has been left us for doubt as to the close of his political career. Of that, alas! we can now speak with certainty as completed. For all practical purposes the public life of the Earl of Elgin has reached its goal, and we are compelled to add his name to the rapidly lengthening list of British statesmen whom the exhausting climate of the Eastern Peninsula has struck down, either in the mid career of their usefulness or before they could taste its rewards. A line or two commemorative of the man and of his services will not be premature, however time may clear away the slight uncertainty

THE WAR IN AMERICA: CONFEDERATE SHARPSHOOTERS FIRING ON A FEDERAL SUPPLY-TRAIN ON THE TENNESSEE RIVER.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PAGE 574.

which still shrouds from the English public his earthly fate—a line or two which neither we nor our readers shall have reason to regret, even if subsequent information prove that our apprehensions have been happily contradicted by the event.

In July last Lord Elgin completed the fifty-first year of his age. Although of Scotch descent, he was of southern birth, and London claims the honour of ranking him with her distinguished sons. His ancestry may be traced back to the famous Bruce of Scottish history. His father associated the name of the earldom with the Parthenon marbles. He took first-class honours in classics at Christ Church, Oxford, in 1832, and entered Parliament as a commoner in 1841, when he was elected member for Southampton. Succeeding almost immediately afterwards to his Scottish earldom, he remained in the House of Commons only long enough to attract by his abilities the notice of the late Sir Robert Peel, who appointed him Governor-General of Jamaica. Here his administrative talent, his conciliatory disposition, and that happy combination of sagacity, firmness, and tact, of which his after life presented I such brilliant illustrations, won for him the confidence and gratitude of the colonists, while they secured the fullest satisfaction of the Government at home. The public, therefore, hailed his promotion in 1846 to the governor-generalship of Canada. The seven years of his administration of the public affairs of that important province more than realised the pleasing augories which had preceded him thither. He quickly extinguished the smouldering embers of discontent which an unsuccessful rebellion had left behind it, and laid a solid foundation for the future prosperity of the colony in the treaty of commercial reciprocity between Canada and the United States which he successfully negotiated in 1854. Some time before his return to this country he received from the Queen the appropriation of his services by raising him to the British Peerage; and shortly after his arrival he was entertained at a great public banquet, at which the most eminent men of all political parties vied with each other in doing respectful homage to his statesmanlike career.

These peaceful triumphs, however, merely preluded the grander achievements of his life. In 1857 Lord Elgin was selected by Lord Palmerston as special plenipotentiary to China. Out of a miserable squabble about the lorcha Arrow had arisen an entanglement of our relations with the Celestial Empire which required something better than a mere superiority of arms to put straight. Lord Elgin was deemed to be the man best qualified for the difficult enterprise, and his way to the scene of his mission, tidings reached him of the military mutiny in India. With equal promptitude and moral courage he decided that, in the face of such an urgent danger, the Chinese question, important as he regarded it, could afford to wait; and he resumed the responsibility of diverting the expeditionary force then on its way to support his authority, to Calcutta, where it was more needed to strengthen British rule, at that moment tottering to its foundations. The extreme peril having been thus opportunely warded off, and the mutiny subsequently quenched, the noble Lord resumed his purpose. The capture of Canton, followed by the expedition up the Peiho, resulted in the Treaty of Tien-Tsin, which may be regarded as having initiated direct intercourse between the Court of Pekin and that of her Most Gracious Majesty. Peace having thus been secured, on what was judged to be a solid basis, the noble Earl—probably in pursuance of instructions from home—suddenly appeared with a naval force in the waters of Japan, and extorted from the Japanese Government a treaty by which the long-secluded people of Japan was brought into direct accessibility to European commerce.

Events, however, did not at first harmonise with the expectations which the treaty of Tien-Tsin had raised. Mr. Bruce, his Lordship's brother, now her Majesty's representative at Pekin, while on his way to his destined post, made demands upon the Chinese authorities which they attempted to evade, and in the attempt to enforce these demands encountered the naval disaster at the mouth of the Peiho. Lord Elgin was again sent out, and was again successful. The capture of Pekin and the treaty of Oct. 14, 1860, settled, for the time being, our political relations with China; and that vast empire, though distracted by internal dissensions, is now open to the commerce of the world. These distinguished services naturally pointed out the Earl of Elgin as the most fitting successor to Lord Canning in the viceroyalty of India. The splendid post was offered him and accepted, and already the cares of office and the ravages of an insalubrious climate seem to have left him an easy victim to disease of the heart, temporarily aggravated by travelling over an elevated tract in the Himalyan range.

The brief Indian administration of the noble Earl has been peaceful and prosperous. To some extent, no doubt, he reaped a harvest of which the seeds had been sown by his predecessor; to an equal extent, perhaps, he will leave behind him the contributions which will enrich the fame as well as facilitate the labours of the Viceroy who shall succeed him. Be this as it may, our Indian empire exhibits at this moment striking external signs of material improvement. The immense increase of her trade, the gradual amelioration of her institutions for the protection of life and property, the rapid creation of new and remunerative branches of industry, the consequent healthiness of her financial condition, the intersection of the country by railways, the fertilisation of vast tracts by works of irrigation, and the acquiescence, temporary, if not final, of both Princes and people in British rule, show that the mutinies of 1857 taught us a severe but profitable lesson, and that the dangers anticipated by so many Anglo-Indians from the abolition of the double government by the company and the Crown were purely visionary. Eastern peoples, it has been shown, are as readily ruled by just governments as the more civilised populations of the West. Human nature is everywhere substantially the same; and goodwill, truthfulness, and firmness in the Governor ensures there, as elsewhere, the respect and tranquil submission of the governed.

Lord Elgin's success in every position to which the confidence of his Sovereign raised him rose one even more to his moral than to his intellectual qualities. The latter, it is true, were of a high order, and had been assiduously cultivated; and pre-eminent among them was the instinctive facility and marvellous accuracy with which he caught the salient characteristics, the wants, the aspirations, and even the prejudices of every variety of human nature when presented to him en masse. In the West as well as in the East, differing so widely in kind and degree of civilisation, he seemed to comprehend at a glance the secret of natural sympathies and to divine the best mode by which each nation might be approached. He was seldom at a loss as to what should be conceded, or what insisted upon with stern and unyielding determination. He appeared to calculate with unerring exactness what would be the effect of his measures upon the will of those with whom he had to deal. There is some reason for believing that he would have done his best work even more solidly than he has done it if he had been left to the unfettered decision of his own sagacity. His aim was always lofty. His ambition was allied with benevolence. To restore peace where it had been disturbed, to reunite those whom differences had severed, to multiply the ties by which men are held together, and, with the assent of conflicting parties, to lay the foundations of a durable order, was the work which he best loved, and for which he was most eminently fitted. Wherever he went he won respect and reverence for his name. His successes left behind them no bitterness, even in the minds of those whose opposition he had subdued. His triumphs were firmly held in check by his moderation, and perhaps, in some instances on quitting the stage, left behind him fewer personal enemies, or a reputation more unstained by exceptional outbreaks of infirmity.

The premature decease, so after another, of our most eminent men sent to India is a heavy penalty to pay for the rule of that empire. If the recent death-rate of statesmen in the East is to be regarded as normal, the highest posts will be shunned by those best qualified to adorn them. But must it be so regarded? Is it not time that the attention of the home authorities at home has been sufficiently attracted to the subject, perhaps it will be discovered that the seat of Government in India is located upon the most pestilential spot which can be found on the peninsula, and that its removal to a more salubrious locality, as the interests concerned will allow, is imperatively necessary. Possibly, also, it may be deemed expedient to look for future Viceroys among the unquestionably able men in India whose constitutions have already been seasoned to the climate. But, above all, the burdens of office need to be somewhat lightened, and the appointment of a Viceroy recommended of some of its cares, by a more skilful organisation of the machinery which connects the Indian Administration with the Secretary of State at home. The price which we are paying for the possession of the Hindostan is too heavy to be paid, or it must be lowered; for we cannot afford to sacrifice the lives of our choicest men year after year even to maintain the prestige of British rule in the East.

Happily, we perceive, by her Majesty's Ministers have received the benefit of one of the foregoing suggestions. Sir John Lawrence has been appointed to proceed immediately to India, temporarily to act as Governor-General during Lord Elgin's illness, should he be found yet surviving, permanently to fill the post should the noble Earl have succumbed to it. The choice of the Crown never fell upon a fitter person for the office. Emphatically, he will be "the right man in the right place." His life has been spent in India, where his transcendent administrative abilities, his high personal character, and his intuitive appreciation of the Asiatic mind, as well as his feeling, raised him from a clerkship in the Company's service, through successive gradations, to the governorship of the Punjaub. To him, more than to any other man, is due the formation of that loyal and brave native population during the mutinies, on what the Sikhs would do. Hereditary foes to the English, their country but recently annexed, their habits turbulent and warlike, it was with fear and trembling that all men looked towards the north-west to see whether they would rise in the time of trouble. He crushed the first seeds of insurrection. He organised troops, armaments, and supplies, and, by his promptitude, energy, and genius, ensured the capture of Delhi, the turning-point of the Indian Mutiny. His singular capacity for ruling none can doubt who knows anything of the rapidity and success with which he developed the resources of the Punjaub. Let us hope that, as his constitution has been acclimatised, he will be long spared to exercise supreme rule in India, and that he will bring to bear his rigid integrity and his high sense of honour upon the work now before him as triumphantly and to as great advantage as he has always done in posts of inferior importance.

Colonel Neale, the British Charge d'Affaires in Japan, has been made a Companion of the Bath.

Mr. Egerton has been appointed to the Embassy at Berlin, and will be succeeded in the Embassy at Turin by Viscount Sidney.

The Queen has approved of Mr. Alfred Bauer as Vice-Consul at Singapore for the King of Hanover.

The Duke of Genoa Her Majesty's steamers state that the Diamond Steamship Company are building four steamers to run direct between England and Port Elizabeth, Natal, and Mozambique.

A young son of Queen Pomaré and several Tahitians, her subjects, have been sent to France for their education, are now at Rennes. They are to gain the winner at the Rennes choral establishment of Lavaron, near Auch, under the direction of the Prince de Polignac.

The *Levant Herald* states that Sheikh Faris Effendi Shediak, the editor of *El Jenaih*, is engaged in translating into Arabic Gibbon's "Decline and Fall of the Roman Empire," which is subsequently to be rendered into Turkish, and published at the expense of Abdul Aziz.

The gossip of the clubs that Lord Brougham thought Shakspeare an overrated man has been effectually contradicted by the noble Lord himself, who has expressed his readiness to co-operate with the promoters of the Shakspeare Tercentenary Celebration. His Lordship's name will forthwith be placed amongst those of the vice-presidents of the association.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Emperor arrived in Paris on Sunday, and next day presided over a Council of Ministers. His Majesty afterwards received the Papal Nuncio and the Russian and Spanish Ambassadors, who handed to him the replies of their respective Sovereigns to his invitation to attend the congress. The Emperor returned on Monday evening to Compiègne.

The Corps Législatif has nearly concluded its investigations into the validity of contested elections. On Saturday last the election of M. Bravay for Gard was annulled, after an animated discussion. At the sitting on Monday the election of M. Henry for the department of Isère was declared valid by 201 votes to 36, after a brilliant debate between M. Thuillier, the new Governmental celebrity, and M. Jules Favre. M. Thiers endeavoured to sum up the whole question of Government candidatures, but it was thought better to postpone that subject until the general debate on the address.

The Rappahannock, a screw-steamer bearing the Confederate flag, put into Calais harbour on Tuesday last week. The vessel proves to be Majesty's steam-sloop Victor, which was sold, along with three other war-steamers, at Sheerness a week or two since. Some particulars respecting her will be found in another column. The Consuls' authorities at Calais have been instructed to allow the Rappahannock (Victor) to be completed in that port.

THE PROPOSED EUROPEAN CONGRESS.

The Paris journals publish summarised accounts of the replies made by the different Governments to the congress invitation. Italy and Spain accept. The Pope accepts under such qualifications as would obviously render any such scheme impracticable were they allowed to prevail. Switzerland is willing, provided her neutrality be again guaranteed. Prussia may be said to accept the general basis while recommending a preliminary conference. Austria's reply is very cautious—much more equivocal than that of England—a reply which, "by dint of saying nothing," yet raises many inquiries and makes such suggestions as seem to indicate little real inclination to take any part in the affair. Russia requires a well-defined programme, but endeavours to evince a willingness to get over difficulties. The Sultan of Turkey has accepted the invitation.

The *Moniteur* has published the diplomatic correspondence between France and England respecting the European congress proposed by the Emperor Napoleon. It is not necessary to repeat a single word of it.

The official correspondence is opened by the letter of the Emperor addressed to Queen Victoria, which reproduces the invitation in the words that were addressed to the other chancellor at its opening. The Earl of Russell, in reply, declares that England is unlike to be present, that the Treaty of Vienna is not in such a desperate condition as the Emperor supposes, and requires that France shall state beforehand what subjects are to be discussed and how the decisions of the congress are to be carried out. To this M. Drouyn de Lhuys, writing for the Emperor, replies that it would be impossible to submit to the congress of European Sovereigns to present to his seniors what subjects they shall not discuss, or what they shall not discuss; but, with little coyness, condescends upon Poland, Italy (including Rome), Denmark, and the Danubian provinces. The reply of Earl Russell, which closes the correspondence, discusses these questions in detail, despairs of a satisfactory solution of any of them, while rejection of the deliberations of the congress is alternately between war and annihilation; and, as her Majesty's Government are not anxious to encounter either of these evils, they "feel themselves unable to accept his Imperial Majesty's invitation."

Private letters from Paris, as well as the "official journals, show that a very angry feeling has been roused by the refusal of Russia to join the congress. Some of the papers eagerly urge that the congress should go on without her. On the other hand, it is stated that at the recent State Council, it was determined to abandon the idea of bringing forward the proposals contained in the letter which has accepted the invitation. A manifesto, it is said, will be issued by the French Government describing the manner in which the proposal was received by Europe, and explaining the reasons for the abandonment.

M. FOULD'S FINANCIAL STATEMENT.

M. Fould's financial statement was published on Thursday. It states that the total amount of the deficits is 140,000,000 f. It is necessary to consolidate part of the floating debt. The produce of a loan will be required to meet the deficit in the Treasury. Bills are in circulation on account corresponding to that which it will demand. M. Fould proposes to the Emperor to fix the amount of the loan at 500,000,000f. The expenses of Mexico will amount to 210,000,000f. at the end of 1865.

THE FRENCH IN MEXICO.

Advices from Vera Cruz to the 1st ult. state that the army under the command of General Bazaine had left Mexico city for a campaign against Juarez.

AUSTRIA.

According to the *Wiener Zeitung* the Government has relinquished the idea of the issue of a public loan, as circumstances are at present unfavourable to such a speculation, and are making other preparations to cover the public expenditure and for the repayment of the sum due to the National Bank.

The claims of the public administration of Croatia have resolved that Croatia shall send deputies to the Austrian Reichsrath, on condition that certain modifications be made in the Constitution.

ITALY.

The treaty of commerce and navigation between France and Italy passed the Senate on Saturday by a majority of 56 to 6. Several amendments were proposed by the Opposition, but were all rejected by large majorities, and the treaty was adopted without alteration.

THE SCHLESWIG-HOLSTEIN QUESTION.

Copenhagen telegrams assert that the majority of the municipal councils of Schleswig have sent deputations to congratulate King Christian upon his accession to the throne, and that the clergy of the Schleswig officials have taken the oath of allegiance.

From Germany we learn that the Duke of Brunswick has recognised the Prince of Augustenburg as Duke of Schleswig and Holstein.

Prince Frederick of Augustenburg has issued a formal summons to the Danish Ministry, in which he demands that the Danish troops should instantly evacuate the territory of Schleswig and Holstein, and that the Duchies of Schleswig-Holstein in the interim should be sent back to the Duchies. If the Danish Government do not express a readiness to comply with these demands within three days, then the Prince announces that he will take the necessary steps to uphold the rights of legitimate government. This announcement, however, has not the importance which is ordered by the fact that Austria and Prussia show so little inclination to back up the Legitimacy claims. Hanover has declined to assist in the Augustenburg question, and nothing else is the basis of action in the Duchies. The note of Prince Frederick was forwarded by the Diet to Count the Federal Diet acting on behalf of the Prince) to the Danish Envoy, but was returned unopened.

In the sitting of the German Diet, on Saturday, a resolution was passed excluding the Danish representative from the deliberations. It was agreed that the proposition that the vote for Holstein shall be suspended until some settlement shall have been arranged. In the sitting the Austrian and Prussian representatives delivered an important declaration, stating that the position of Austria and Prussia is that of the treaty rights of them in 1852. That treaty was accompanied by stipulations for the inseparable union of Holstein and Schleswig; and the Austrian and Prussian Governments are prepared to advise the treaty if the Cabinet of Copenhagen executes the preliminary conditions.

The Municipal Council of Vienna has voted an address to the Emperor in favour of the Schleswig-Holstein movement. A request, however, addressed to the police authorities for permission to hold a public meeting on the subject has been refused.

On Wednesday the Prussian Chamber of Deputies passed, by a majority of 231 to 63 votes, a resolution affirming that "the honour and the interest of Germany demand that all the German States should support the rights of the hereditary Prince Frederick of Augustenburg to the Duchies of Schleswig and Holstein."

Our Cabinet has addressed to the German Diet and the Prussian

Government, and probably likewise to Austria, despatches intimating that England will faithfully observe the Treaty of 1852, which secures the hereditary rights of Christian IX. to all the territories then united under the Danish Crown, and adding that it expects all the Powers which acceded to that treaty will "share this opinion." According to the *Times*, the British Government has also advised, or will advise, Christian IX. to revoke the "patent of the 30th of March," and thus deprive the German Diet of any pretext for ordering a "federal execution" in Holstein.

SWEDEN

All the four Estates have unanimously granted the credits asked for by the Ministry, expressing at the same time entire approval of the policy of the Government. No dissenting opinion was made.

THE INSURRECTION IN POLAND.

The telegrams report the same tale that they have done for weeks past—constant defeat, transportation by wholesale, and the utter ruin of military executions. A despatch, dated on Monday, affirms that the number of insurgent prisoners last week amounted to 1000. The Russians, it is added, openly acknowledge their intention of deposulating the country by transportation.

Meanwhile, the spirit of the people is unsubdued, and seemingly unshakeable. Intelligence received in Vienna confirms the news of the revolt of the Polish inscurrents in Samogitia, and says that the Polish and Sundonic districts. The peasants are now reported to be joining the movement much more generally and readily than before. The insurgents are stated to have made themselves masters of some small towns. Insurgent bands well armed and uniformed are making their appearance in the government of Kowno. Mieroslawski, it is said, has left Galicia, and is on his way to Poland.

THE INSURRECTION IN POLAND.

We have received news from New York to the evening of Nov. 21. Despatches from Rear Commodore Worden, dated Nov. 19, say that a heavy skirmishing General Longstreet had driven General Burnside's army from Knoxville and had "completely invested the city." General Longstreet crossed the Tennessee River on the 14th ult., and General Burnside retreated upon his position at Loudon "during" between the Confederate vanguard and the Federal rear; and on the 16th ult. General Burnside "formed a line of battle" at Campbell's Station. An engagement ensued, and lasted from noon till sunset, when General Burnside "checked the Confederate advance," but, abandoning the night, retired to Knoxville, which on the 17th ult. General Longstreet attacked a work in front of Knoxville on the 18th ult. and the attack and repulse which lasted some hours the Federals abandoned their position and retreated to "stronger defences." General Burnside, we are told, in "private despatches" of the 19th ult., "expressed confidence of his ability to hold that communication with Cumberland Gap is interrupted." At Chattanooga all had comparatively continued to be quiet. Troops from their batteries on Lookout Mountain. They were said to have received reinforcements; but it was not known if the Federals had been reinforced by the arrival of General Sherman's corps.

There is nothing new from the Rapidan, except that there has been some sharp skirmishing on its banks, in which the Federals have driven back. General Lee's army was in position between the Rapidan and the Rappahannock. General Meade's army had advanced to the Rapidan, and it was thought he would attempt the passage of the river. He set forth on a visit to Washington, and General Meade visited Washington on Sunday, the 15th ult., and after a conference with Mr. Lincoln, returned to the army.

The Federals still keep up the bombardment of Fort Sumter, Charleston accounts of the 17th ult. state that four monitors had passed up the river, apparently to succeed in the work of the fleet, and that twenty-five shots had been fired into the city, but had done no damage.

General Banks's expedition landed on the 2nd ult. at Brazos de Santiago, on the coast, some miles from the mouth of the Rio Grande. On the 6th he occupied Brownsville without any resistance.

GENERAL NEWS.

The bounties offered to soldiers in New York now amount to 700 dollars.

Gold has risen at New York to 34 per cent premium.

The United States Marshal had seized 1200 cotton in New Orleans.

The cemetery at Gettysburg was dedicated on the 19th ult. President Lincoln, Mr. Seward, and the Corps Diplomatique were present. Mr. Everett made an oration.

The Federal General M'Neil, whose name has been rendered infamous by his previous execution of ten men in Missouri because a "Union man had disappeared, had issued an order on the same fate, that he will hang a guerrilla each time whenever the telegraph may be cut between St. Louis and Fort Smith.

The Rev. H. W. Beecher had delivered a speech at the Brooklyn Academy of Music, in which he recounted some of his English experiences. He declared that the people were Republican and the labouring classes of England favoured the North, and he counselled the country towards England.

Mr. Wendell Phillips, the well-known Abolitionist orator, had made a speech in which he said that "President Lincoln's Emancipation Proclamation was the greatest folly of his life was the issuing of the emancipation proclamation." He continues this: but the *Herald* asserts that Mr. Lincoln has on many occasions expressed this opinion.

INDIA.

At the India Office, on Saturday, was received the grave intelligence that the Governor-General, the Earl of Elgin, had left the metropolis of the heart, and that his condition is such as to occasion great uneasiness. Lord Elgin is said to have reached Simla on the 20th, requested the Queen to nominate his successor, appointing Sir William Denison, Governor of Madras, to act in the interim. The last accounts of the Governor-General's health were dated the 14th ult.; he was seriously ill of cholera. The Earl had been suffering from an affection of the heart, which, in combination with a high mountain pass, became suddenly worse.

Sir John Lawrence still proceed to India by the next mail, which leaves on the 10th inst., to assume the functions of Governor-General temporarily, and Lord Elgin should still be able to return to Calcutta, if, as is apprehended, his death shall have occurred.

In a letter from Bombay, dated 30th ult., the Punjaub frontier on the 9th ult., the British troops had about sixty men killed and wounded, including three officers killed and two wounded.

METROPOLITAN NEWS.

A SMART transaction is reported of the Confederate agents in England. The Admiralty, a short time ago, told her Majesty's screw gunvessel Victor, not a high speed sale, she was permitted to purchase her engines under the superintendence of the dockyard officials. It was stated that she was unfitted for the service, and she was accordingly sold to the agents of the Confederates, who have now cleared to the Sevilla, of London. Several suspicious circumstances have occurred, and the dockyard officials have been dismissed the Admiralty. The case was the receipt of an order at Sheerness directing her to be stopped. The officers, however, were not aware that the vessel had been sold, and had taken out the necessary papers. The Victor, however, and had her taken out of the hands of the Confederates. The Custom-house authorities at Calais, in answer to a question, have received instructions from Paris to allow the Rappahannock to have whatever her captain pleases. It is said that the Admiralty have also sold the Amphion, Cyclops, and Phoenix to "private gentlemen." About the middle of October instructions were received at Chatham, directing that in all cases in which vessels of war were sold out of the service "the greatest care should be taken in removing all the gun fittings and returning them to the War Department." The Victor, Cyclops, and Phoenix, it would seem, no doubt, stripped of their gun fittings, but these could be replaced without much difficulty.—We have the somewhat singular statement from Hull that "an undecided ram" was launched there, with steam up, a few days ago, and that, after taking on board a number of "Southern-looking gentlemen, she was off like a shot.

Parliament was formally prorogued, by commission, to the 13th of January.

On Wednesday London was visited by a gale, accompanied by heavy falls of rain. Much damage was done to houses and chimney-pots, and none of the surrounding districts were flooded.

The Court of Common Council have unanimously agreed to appropriate ground in Victoria Street, and to erect a building thereon, for the laboring poor, at an estimated cost of £20,000.

Tuesday was the birthday of the Princess of Wales, and was observed as such in the metropolis. The bells were rung in several of the churches; and the inmates of the Bonnington Asylum were regaled with cakes, paraded in the courthouse opposite Marlborough House; and the Royal Standards were hoisted on the Horse Guards.

The Hospital for Sick Children, Great Ormond-street, has always been favoured amongst its many excellent friends of Royalty. Now in the kind consideration of her Majesty for that most helpless portion of the community, a large box, addressed to the Queen, was received at the hospital, and all descriptions has been received by the nurses, and by the children of the Princess Alice and Princess Helena from her Royal Highness Princess Helena and his Royal Highness Prince Alfred.

On Tuesday afternoon the first train passed over the Charing-cross Railway from Hungerford Bridge to the new and nearly completed, on the old site of Hungerford Market. The train consisted of two of the Metropolitan engines, and a number of the Brighton Railway and a large number of carriages of different classes. The trip proved entirely satisfactory. It is expected that the line will be opened for public traffic in January.

The anniversary festival of the Scottish Hospital took place on Thursday evening at the Freemasons' Tavern, under the presidency of Lord Palmerston. The attendance was very large, numbering about 400, a portion of whom had to dine in an apartment adjacent to the great hall; and there were about 100 ladies in the gallery. The Duke of Argyll and other members of the Scottish aristocracy, and a great many influential gentlemen resident in London, were present. In the course of the evening subscriptions were announced amounting to between eleven and twelve hundred pounds.

A prisoner named Lawrence escaped from the Coldbath-fields House of Correction on Monday night. By some means he obtained possession of a jacket and a piece of rope. To this he attached a hook, and threw it over the wall of the prison. He then climbed up the rope, and from his cell window to the top of the wall. The rope was then drawn up, and he then descended by it on the other side. He was not seen to escape.

Last week the births of 1038 children—1011 boys and 927 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number was 1,016. The deaths of 1,016 persons were registered in London last week, a number which is not very different from those of the previous week. In the ten years 1853-62 the average number registered in the week; but these of the old shoe an increase. Fifty-four persons died at the workhouse of Clerkenwell, of whom 19 were from consumption, 10 from bronchitis, six from lung and nine from accidental causes. Bronchitis was returned in 1,016 persons in St. Pancras, 1,012 in Lambeth, 1,009 in Marylebone, and 1,008 in Hackney. Of 1,016 deaths from measles, 112 from scarlatina, 70 from typhus.

The annual meeting of the Royal Society was held at the Royal Hospital for Incurables was held at the London Tavern yesterday week. It appears that the receipts of the year have been £2,000 in excess of the estate, Putney-heath, for £18,000. Amongst the legacies reported was one of £1,000 from the late Mr. Thomas Hall, of Bath. The annual dinner, for the treasurer 500 guineas, as the proceeds of a concert which had been given by Mr. Charles Hallé and Madame Clara Novello. The dinner which had been held in the building of the Great International Exhibition was also very productive. Among the toasts given by the chairman, Lord Stanley of Alderley, was "Home and our patients. There are now on the foundation 200 worn-out servants of the institution, and 1,000 have been relieved. The society has reached the amount of £10,000.

The annual meeting of the Royal Society was held on Monday, at Burlington House. The chair was taken by the President, General Sabine, R.A., who, in his address, gave a brief review of the year's principal scientific progress and results of the year were passed in review, principal the medals for the encouragement of science to whom they had been awarded. The medal was given to the Rev. Professor Sedgwick, for his observations and discoveries in the geology of the Silurian system. The Royal medal was awarded for his determination of the characters of the Devonian system, by observations of the order in which the various members succeed each other in Devonshire. One of the Royal medals was given to the Rev. Miles J. Berkeley, for his researches in cryptogamic botany, especially in connection with the fungus mould to Mr. J. P. Gassiot, for his researches on the voltaic battery and constancy. The Council of the Royal Society for the ensuing year, with the following exceptions, were elected as officers and council for the year ensuing:—President, General Sabine; Treasurer, Mr. Hamilton Rowan; Secretaries, Mr. Miller; secretaries, Dr. Sharpey and Dr. Stokes; foreign secretary, Professor William Hallowes Miller; Council—Professor Bentham, Mr. Busk, Professor George Buck, Colonel Sir George Everest, Dr. Falconer, Dr. Gladstone, Dr. Hooker, Dr. Huggins, Professor Huxley, Professor Miller, Professor Odling, Professor Henry J. Stephen Smith, Earl of Stanhope, Professor Sylvester, Dr. Tyndall, and Professor Wheatstone. The number of fellows present at the dinner was held at Willis's Rooms.

The Lord Chief Justice, on Wednesday, a young man, named Frankel, for the recovery of damages from the London and North-Western Railway Company for injuries sustained by the plaintiff's horse while in the service employed by the defendants. The plaintiff's omnibus began racing with a rival vehicle, by which the complainant was thrown out, and he appeared in court a mass of bandages and plaster. The case therefore was opened by one of the jury taking upon himself the office of foreman and returning a verdict for the damages claimed.

The man, calling himself Captain Hartley, who was apprehended the other day at the Great Western Railway Station, Paddington, on a charge of stealing by the Earl of Uxbridge on his father, the Marquis of Anglesey, was brought up on remand before the Lord Mayor on Tuesday. The object of the present application was taken to clear the reputation of Major Massey—favourably known in the Crimea as Captain Massey—of the charge of having robbed the Earl on the prisoner of his being implicated in another forgery the prisoner attempted to utter. The prisoner, who appeared in this as in every other case employed a clerk to act for him, was then discharged.

The man, calling himself Captain Hartley, who was apprehended the other day at the Great Western Railway Station, Paddington, on a charge of stealing by the Earl of Uxbridge on his father, the Marquis of Anglesey, was brought up on remand before the Lord Mayor on Tuesday. The object of the present application was taken to clear the reputation of Major Massey—favourably known in the Crimea as Captain Massey—of the charge of having robbed the Earl on the prisoner of his being implicated in another forgery the prisoner attempted to utter. The prisoner, who appeared in this as in every other case employed a clerk to act for him, was then discharged.

LORD STAMFORD'S STUD SALE.—This sale took place at Newmarket on Wednesday last, and consisted of the whole of the stud on the twenty-eight three-year-olds, &c., among whom Hungry was sold to Mr. Merry for 1,000 guineas, Jacko (400 gs.), Mr. Payne; Jocose (300 gs.), Cavendish (1000 gs.) and Gemma (700 gs.) were the two highest lots. Lemonade (300 gs.), Mr. Payne; Lemonade (300 gs.), Mr. Payne; Lemonade (300 gs.), Mr. Joseph Dawson. The eighteen two-year-olds realized 11,615 gs., and Acolyte (800 gs.) were the first four. The siddings for Cashmere (1,000 gs.), Mr. Tom Parr; Lord Lyon (1,000 gs.), Mr. Merry; and Lord Ecclesfield, and the chestnut was knocked down to his Lordship, but he declined to take him, Mr. Merry, who had been standing close to the rostrum, put his peculiar foreign made sense doubt whether he would be able to get the horse, and he was put up again at 1,000 gs., and Mr. Merry's paddling made 10,225 gs., and sold at all prices from 28 gs. to 3000 gs., at which Cashmere, purchased for 2500 gs. this season, were sold again for 4000 gs. What is to consider this extraordinary anomaly, and the fact that Archduke, one of the best horses of his day, £1500 half-forfeits on his head, was knocked down for more than four times the sum given for him by his Lordship at her Majesty's sale, we can only refer to the old adage, with the oldest auto-proprietors that for a "without reserve" sale the prices were incomprehensible. Except a little (before character, and big larger biddings, the whole proceedings were of a The day was wretchedly cold and windy, and chimney-pots and sheds were flying about pretty copiously in the town.

CHURCH AND UNIVERSITIES.

Dr. Stanley, who has been appointed Dean of Westminster, preached his farewell sermon in the cathedral at Oxford on Sunday morning.

On the 19th ult. the ancient parish church of Kingsthorpe, near Northampton, was reopened for Divine service, after a very complete and conservative restoration by Mr. Slater.

More than 1400 candidates, the great majority of whom were females, have been confirmed in various churches of Bristol during the last fortnight by the Bishop of Gloucester and Bristol.

The Archbishop Designate of Dublin is announced to preach one of a course of Advent lectures at St. Paul's, Walworth, on Sunday evening next (to-morrow).

The Church of St. Mark, Notting-hill, of which an Engraving was given in our Number for the 7th ult., was consecrated by the Bishop of London yesterday week.

On Monday the proposal for augmenting the stipend of the Good Prebendal Rectory of Hitchin, which has been brought some years, by Dr. Stanley, before the Ecclesiastical Council of Oxford University, was the vote being given by the members of the council, dropped.

In the chapel of Lambeth Palace, on Monday, the Rev. A. P. Perceval, of Exeter College, Oxford, Curate of St. Paul's, Oxford, was consecrated to the bishopric of Melanesia. Dr. Selwyn, formerly Bishop of Lichfield, recently deceased. The officiating prelates were the Archbishop of Canterbury and the Bishops of London and Oxford.

St. Michael's Church, Catwick, was reopened on the 19th ult., after repairs under the superintendence of Mr. W. Slater, by the Archbishop of York preached. The restorations, so far as they have gone (for the tower has yet to be dealt with), have cost over £1000. The village-clerk was the gift of Mrs. Danvorth, and the stained glass for the east and west windows that of Archdeacon Thornton.

The Bishop of Oxford's visitation of the archdeaconry of Oxford at the Cathedral of Christ Church on Tuesday was attended by nearly all the clergy and churchwardens of the Oxfordshire portion of the diocese. His Lordship's visitation address, similar to the recent one at Aylesbury, occupied nearly three hours and a-half.

On Thursday week five boys and seven girls were admitted into the school of the Metropolitan Convalescent Institution, which provides and clothes the orphan children of the poorer clergy gratuitously. Fifteen orphans were elected in July last, the examination of the candidates for making twenty-eight children admitted during the year. There are now 145 children in the school.

St. Michael's Church, Alnwick, was reopened last week, after a very extensive restoration. The interior of the chancel was present, with the Duchess. The Bishop of Durham preached. The restoration, which has been carried out by Messrs. Dobson and Son, has been a voluntary rate, and one subscription have been sent in by those willing to do so. The cost, £2,000, has been the largest portion of the expense has been borne by the Duke of Northumberland.

The parish church of St. Peter and St. Paul, Charlton Horethorne, was reopened on Tuesday week. This is the first of a series of complete restoration under the superintendence of Mr. W. Slater. By the indefatigable exertions of the Rev. C. Bere, M.A., the rector, the church has been wholly repaired, with a gain of over fifty sittings; one aisle has been re-roofed, and the tower and porch entirely repaired. The cost, amounting to £700, were chiefly contributed by the landowners and occupiers.

On Thursday week the new church of Ireland, the Queen having raised an important Church movement, set on foot by the Rev. T. S. Evans, vicar of Merthyr, in 1857, and by the Right Honourable C. M. Bruce, M.P., to relieve the spiritual destitution of their respective parishes, in which there are now only two churches accommodating 1,000 persons. The Archbishop of His Lordship laid the first stone of the church of St. Michael, Shettleston, in his presence, and many friends and admirers. This is the first of the new and unappropriated churches to be erected in these parishes, three of which will be in Mr. Bruce's neighbourhood. Contributions were also given by Mr. Sheriffs, the Incumbent of St. Mary, Haggerston, Mr. Hubbard, Mr. W. Ewart, M.P., Mr. Gladstone, M.P., Mr. Baxter, and Mr. Bruce. They have to undertake to provide churches, schools, and parsonages for the four new districts. From £10,000 to £12,000 will be required. Highly respectable private scenes in restoring and resetting the church of St. Mary with open benches. The chancel has been restored at the expense of the tithe, and afterwards the endowment of St. Michael's. Two mission chapels have been erected; and it is proposed to fix on a site for a new church in the centre of the parish, and throwing out a temporary church, and open it for service. In addition to this, the Presbyterian congregation of Shettleston have contributed £15,000 towards the general scheme, and it is estimated that £12,000 is still required to complete the plan.

PREFERMENTS AND APPOINTMENTS.—The Hon. and Rev. T. E. Gye, *Rector of*; and the Rev. G. B. Hemming, Vicar of Berwick, to the Honorary Canons, Durham. Rev. T. T. Griffith to be Perpetual Curate of Rochester, Salop. The Rev. Thomas Hall to be Rector of Stephen, Salford, Rev. J. B. Gulick to be Vicar of Blandford Forum, Dorset. Rev. R. Bird, Jun., to be Chaplain to the Gaolbirds' Hospital, Coldbath. Rev. B. W. Beake to be Perpetual Curate of Holy Trinity, Lee, Kent; Rev. W. C. Chapman to be Vicar of Bishop's Cannings, Wilts. Rev. Richard Burdon, *Corrector*. The Rev. A. Child to All Saints', Langton; Rev. R. G. Lambert to Christ Church, Hoxton. Rev. H. Chichester to Hartpury Magna, near Dursley. Rev. H. Clement Smith to Battle, Sussex.—*Guardian*.

CELEBRATION OF DUTCH INDEPENDENCE IN AMSTERDAM.

The great popular festival of the Netherlands to celebrate the fiftieth anniversary of the deliverance of the French domination took place this week before last. On Sunday, the 15th ult., the festival was begun by a thanksgiving-service in the churches, and the clergy because for the nonce, to a certain extent, political expositors. Monday the 16th held in the quaint, old city of Amsterdam as a day of popular rejoicing. Every individual branch of industry, and the various trade unions formed themselves into a gigantic procession of about 12,000 men, each preceded by a banner, and each bearing with it appropriate devices, banners, and triumphal cars, accompanied by bands of music. The Typographical Society was the first represented. The car contained a printing-press, from which thousands of patriotic poems were printed and spread broadcast among the people as indicative of the liberty of the press, acquired by the arrival of the Prince of Orange, whom the inventor of printing, occupied a prominent position on the car. In the centre of the boats of William I. and III. The Dutch Admirals, as the chief magistrate and representative of the King, was everywhere received with great enthusiasm.

We give on the next page an Engraving showing the procession passing the Dam. First we have represented a boat, bearing the national and Orange flags, and with the royal arms emblazoned on the sails. Next follows a carriage containing four of the surviving leaders of the revolution of 1813; and the banner bearing the words, "In 1813," was the first to hoist the Orange flag. Members of the Typographical Society come next, succeeded by a triumphal car, representing the Netherlands: the Netherlands maiden, on the throne under her left hand a shield, in her right a lance, on which is the cap of liberty, the Netherlands lion lying at her feet; Commerce, Agriculture, Agriculture, and Industry accompany her; twelve maidens in white, with flowing hair, and wreaths of golden acorns on their heads, Christ Church, Hoxton. Rev. H. Clement Smith to Battle, Sussex.—*Guardian*.

On Saturday evening the Hon. Henry Nelson, youngest brother of Earl Nelson, was thrown from his horse and killed.

The young Marquis of Bute is, we learn, pursuing his studies at Harrow, in the house of Dr. Butler, with success; and also is distinguished in our 3rd Number.

The Hon. G. Denny, Rector of Chydon—the patron of "Brother Ignatius" and the "English Order of St. Benedict"—has been fined £5 for assaulting one of his parishioners with a cudgel. The Bench, which consisted of Sir C. Brise-Middleton and three clergymen, told the rev. delinquent that "it would and greatly to promote the peace of the neighbourhood if he would resign his incumbency."

On Monday night a meeting of the local board in connection with the Society of Arts was held in the Townhall, Hereford, for the purpose of distributing the prizes and certificates to the successful candidates at the recent examination. Sir Minto Farquhar, M.P., presided; and amongst the gentlemen present were the Right Hon. W. Gowper, M.P., Mr. Dimsdale, the Rev. Mr. Hemming, and several influential gentlemen connected with the district. The report was of a most encouraging nature.

THE CHAPEL OF THE ASYLUM FOR MERCHANT SEAMEN'S ORPHANS.

THIS chapel, erected at the sole cost of Lady Morrison, of Snaresbrook, stands apart from the Asylum itself, though arranged to group with it, and is executed in the same style of architecture as adopted in that building. It consists of a nave, chancel, and organ chamber. The nave, 50 ft. long, 28 ft. wide, and 50 ft. high, and apsidal chancel, 25 ft. long and 18 ft. wide, with the organ chamber on the north side.

The exterior is executed in red and black brick, and red Mansfield and white Ancaster stone dressings. The flat buttresses, rising square above the roof, are crowned by pyramidal-shaped pinnacles supported on four isolated shafts, with moulded capitals. The four large angle buttresses, of similar character, have their open and shafted pinnacles surmounted by small statuettes of the four major prophets. The windows of the nave are in three lights; the heads being filled with flat tracery, and the mullions are shafted, having carved capitals and moulded bases. Those to the chancel apse are in two lights, with marble shafts.

The western door has deeply recessed brick jambs, containing single shafts with carved capitals and moulded bases. The arch mouldings are partially enriched, and the billet hood-moulding is slightly ogeed at the apex, to receive an oval tablet finial containing a shield bearing the arms of the founder.

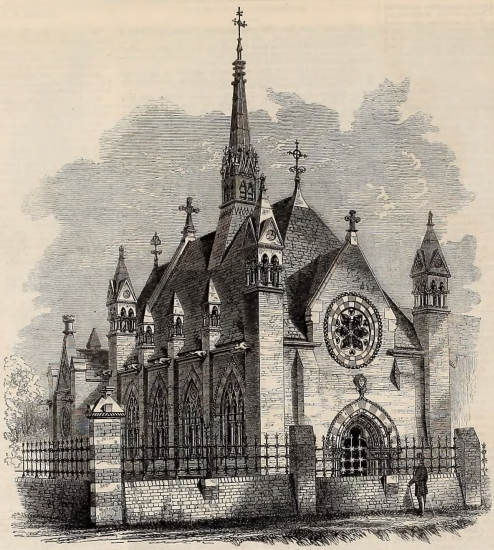
In the centre of the nave roof rises a crocketed flèche, 35 ft. high, covered with lead, and terminating in a wrought-iron gilt cross.

The nave is divided into four bays, with moulded corbels carrying broad hammerbeam pointed arched roof trusses. The purlins are enriched, whilst the edges of the beams have only a billet moulding. The chancel-arch springs from two marble dwarf pilasters, with carved capitals, corbelled over from face of the chancel wall: it is executed in alternate voussoirs of red Mansfield and Ancaster stone, worked on the edges in a scallop pattern, and inclosed by a billet-worked hood-moulding. The internal walls are lined with pale Suffolk bricks and red and black bands, in devices of a sacred character, particularly in the tympanum over chancel-arch, where they assume the forms of the emblems of the Passion.

The chancel is elevated three steps above the nave, and is further separated therefrom by a pierced dwarf parclose, executed in red Mansfield and Ancaster stone. The steps of the chancel leading to the presbytery, within the communion rails, are executed in red Mansfield stone. The chancel, presbytery, and organ-chamber are paved with Minton's encaustic tiles, inclosed in borders of red Mansfield stone.

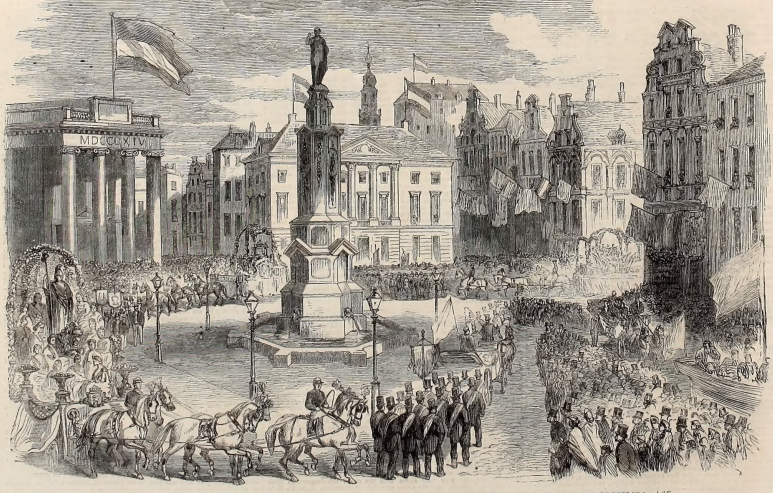
The reredos is executed in alabaster, and prepared for the reception of a small fresco. The walls of the presbytery have four trefoil alabaster panels, carved with emblems of the Evangelists, and lined below the enriched string of windows with bands of red Mansfield and blue Forest of Dean stone, in alternate courses, to be incised in diaper and other patterns and devices.

The four-light window on the south side has been filled with stained glass, representing the history of Noah, and has been put up to the memory of the late Mr. Richard Green, of Blackwall, formerly treasurer, and a great benefactor to the institution.



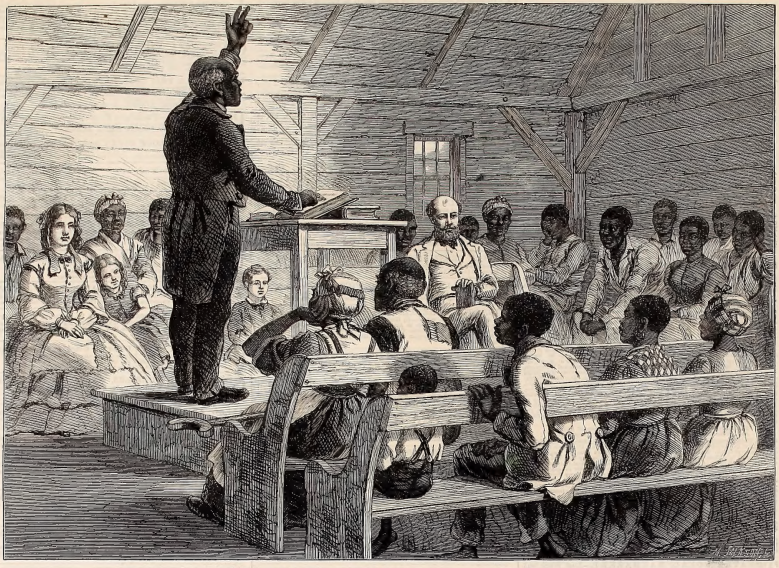
The stalls and seats are of oak and pitch pine, as also are the tables and chairs, and they are designed in accordance with the style of the chapel. A crimson embroidered altar-cloth, from the looms of Messrs. Morris, Marshall, and Co., has also been given by the founder.

An altar-railing of brass, with square standards incised ornamentally, and a telescope bar separates the presbytery from the chancel. The pulpit has square red marble sides, with an alabaster enriched capping, and stands on four green Limerick marble shafts, having carved capitals, moulded bases. The founder's window, at the west end, has been filled by the committee of the charity with stained glass, in recognition of this munificent gift to the charity, the subjects being taken from Matt. xxv. 35, 36.



The seating accommodation is for 300 children and thirty officers and servants.

The whole of the works have been executed from designs furnished by the architect to the asylum, Mr. G. Somers Clarke.



The chapel was opened for Divine service for the first time on Sunday, the 8th ult.

THE HAIRDRESSER OF TETHERHAM. Illustrated by L. HUARD and A. HUNT.

TELL US A STORY. Illustrated by C. ROBINSON.

THE CHRISTMAS ANTHEM. Illustrated by A. HUNT.

The Letterpress by Shirley Brooks, R. F. Blanchard, Hain Friswell, G. Macdonald, Weatherd Masston, the Author of "Abel Drake's Wife," and D'Arcy Thompson.

The Number will contain Illustrations of the London Cattle Show and several Fine-Art and News Engravings.

Price of the whole—Number, Two Supplements, and Coloured Picture—One Shilling Unstamped; Twopence Extra for Stamped Copies.

198, Strand, W.C.

NOTICE TO ADVERTISERS.—Advertisements for the Christmas Double Number, Dec. 19, should be sent in not later than the 15th, to ensure insertion. Terms, 3s. a line of ten words; lowest charge, 12s. for thirty-four words.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, DECEMBER 5, 1863.

OUR friends of the French press have instruction, or at least permission, to be very angry with us for declining to go to congress. They are exhausting the various stores of sarcasm, bitterness, and denunciation always at the service of the most adroit body of writers in the world. We shall certainly not refuse them the tribute of our admiration for their literary skill. They have served a severe apprenticeship to the art of saying disagreeable things in a way which does not expose them to the domiciliary visits and warning utterances of the "Black Man," of which the writers pretend to their gladiatorial craft. They are not allowed to go too far and to get up a revolution in England; but abuse of this country is always pleasant to a French reader, and, though the war-cry is prohibited, the festers are sufficiently slackened to allow the journalists to perform a war-dance. The peculiar style which England has committed against nationalities and universal brotherhoods, ever since the first French Revolution proclaimed the consanguinity of peoples are being set in order before her eyes. We are shown to have always been a treacherous friend, but never had a higher aim than commercial success or national ascendancy; we have neither a natural nor an acquired taste for glory, and to be still as sordid in feeling as we are faithless in friendship. But all this we have heard before, upon divers occasions.

Some of our critics take a more distant view of the crisis, as they are pleased to call it: for some people are always on the brink of a crisis, usually of their own making, and eminently so in this case. We are told that the "Lords of the Isles have killed congress," and must be made, if not exactly to suffer for the murder, at all events to feel the full atrocity of the deed. Here is a great Emperor, whom the French writers, by a pleasant fiction, continue to describe as the elected of forty millions of votes, more to the purpose, has 600,000 soldiers ready to do his bidding; and this mighty potentate, the representative of France, calls the nations of the earth to a congress, which, in the plenitude of his wisdom, he deems necessary. The first answer is from a set of stubborn and haughty Islanders, whose little country is really a part of France, only that it has slipped away by some physical accident which will be remedied one of these days; and the insular bigots presume to set up their opinion against the Emperor's, and tell him that a congress is not wanted, and will not work. The insolence is almost sublime, but still it is irritating. The grand scheme for pacifying mankind is stopped. The triumphal car of the goddesses Peace and Glory cannot roll down the Ages because England has drawn her little wheelbarrow in the way. What is to be said to such obstructives. We know what we should like to say; but our great and gracious Emperor knows no logic but that of argument—far from him be the *ultima ratio regum*. Yet England must be taught a lesson—a preliminary one. So it is advised that the congress be held without her, that France should be low of how little real weight in Europe are these self-sufficient Islanders, and that England should be, in colloquial phrase, "cut" until she comes to her senses. Perhaps some of the writers have a vengeful recollection of the days when England induced some of the other Powers to join with her in engagements and isolate France, and have a mind to repay us in our own coin. The cases are not parallel, but parallel enough for vicious journalists to base a *quid pro quo* upon.

Other writers take a sterner tone. England has forgotten that she is a mere island. Be it so. Napoleon is a better geographer, and will treat her as she deserves. Let her sulk. But the Emperor, who condescended to speak in the name of France, and to invite the nations to settle by debate what he could have settled with his sword, like the Emperor at the head of another day, has thereby placed himself above all ordinary rules, and is certainly not to be checked by the conventionalisms of an effete diplomacy. He announced his belief that unless a congress settled the European questions they must lead to war, Let him, therefore, at once take the initiative. He can pursue the policy which his genius pointed out. Let him make war, if in his wisdom he deems war the only method of pacifying the nationalities. He has no one to consult but himself, as the Sovereign of a country accustomed to come to his sovereign council and aid him in assuaging the troubled waters. The Emperor is affectionately but strongly urged to do exactly as he likes, and it is not improbable that he may be pleased to grant the loyal petition of his attached journalists.

As we are in the happy enjoyment of nothing worse than contempt and disdain, we need not, perhaps, be in any hurry to "threaten the threatener and outscold the boaster." We can bear French epigram, and, indeed, are pachydermatous enough to admire it, even when launched with the best aim against our shortcomings and blunders. The Parisian epigram is more exceedingly well, and there is a neatness in their crisp sentences, a happiness of irony, a felicity of illustration which make many of their articles models of diatribe. When they are covertly scoffing under the guise of encouragement, loans to the English reader a sensation of unpleasantness which destroys the charm of style. One does not like to see clever men keeping their eye so constantly on the hand of a superior, and trying so elaborately to evade his anger while deserving it. A general amnesty has rendered too late the "stern parient" of private life, and in the domestic circle one hates to see lively and intelligent children afraid to give vent to their spirits for fear of a warning in the form of a box on the ears or an exile to the haunted Cayenne—the dark bedchamber. But when our literary friends are in free fire, when their spleen is directed against ourselves instead of the elected of the millions, and when their articles are pleasantly flavoured with that essence of *Anglophobie* dear to them all, in spite of their philanthropy, we can afford to be attacked without the disagreeable sensation, and can enjoy the hard hitting. It pleases them and does us no harm.

We shall not protest against these attacks; but, in the meekest spirit, we would ask a question. Why is England singled out for abuse? Is it this little island the only power in the world that has importance enough to make its conduct irritating to France? We were told the other day by Mr. Beecher that we alone had power to annoy the Northern States because we are low as no much that our unkindness towards them is doubly cutting. And is France in love with us also? Has the elegant Lutetia taken a Platonic fancy to *ce cher vieux* John Bull, and cannot she bear a slight from him? We ask because, in our modesty, we imagined that there were a few other great Powers in the world, and that they had quite as much right to come to congress. Not, we allow, in the brusque and brutal manner of the islanders — not by the frank declaration that the congress must be a sham, and therefore they decline to be a party to it. No; but in what we consider a much less really offensive way. The Pope will come—his Holiness is only too happy to visit the eldest daughter of the Church; but what is the understanding on which Pope Pius declares he will come? That the Emperor is to respect his Holiness's rights over the people of Italy, that is, the work of the war of liberation, the war of Solferino, if not to be undone, is to remain unrecognised. Is not this an ironical insult, instead of a message such as one Sovereign should send to another? And what says Austria? Is her answer at all more frank, or does it come clothed with favourable conditions? And Russia, who has still, it seems, a few dignified taunts to spare for those whom Gortschakoff has so cleverly insulted as to draw forth the undisguised admiration of Mr. Seward. What says Russia? She will have a programme of the performances, and will take very good care that such playbill does not contain promise of the farce called "Polish Independence," though she does not object to entertain "Killing No Murder." We appeal to the French journalists, who are masters of politeness when they choose to be, whether the straightforward conduct of England is not evidence of higher breeding than the course of the other Powers would imply; and whether we do not show ourselves worthy to be the friend, even if we decline to be the adviser, of a Sovereign who is above conventionalities.

We must, perforce, and at the cost of doing violence to our nature, extract a great compliment from all this abuse of ourselves, while others are allowed to behave worse with impunity. We cannot resist the deduction that England is, virtually, the mistress of the situation, and that any grand European plan in which she declines to co-operate must fall to the ground. She sets the fashions for Europe. Be it so: we do not wish to be vaunt-ful, but, on the contrary, to work out a moral of the humblest kind. If England has attained this position, if all the Powers are compelled to watch her actions and to follow in her footstep, *how* did she gain that eminence and ensure that respect? By being honest and truthful, by abstaining from all efforts to aggrandise herself, and, in a word, by minding her own business. If other people will take that hint, Europe need be troubled neither by the noise of congress nor of cannon.

THE COURT.

The Queen continues at Windsor Castle, in good health.

On Thursday se'nnight her Majesty, accompanied by Princess Helena and Princess Hohenlohe, attended by the Hon. Mrs. Bruce, Major-General the Hon. A. N. Hood, and Colonel F. Ponsonby, left Windsor shortly after twelve o'clock for the Ranger's Lodge, Blackheath, to pay a visit to Prince Arthur. The Queen travelled by the London and South-Western Railway to the Clapham Junction, thence by the Brighton and London, Chatham, and Dover lines to Beckenham; and thence by the North Kent branch of the South-Eastern Railway to Lewisham, where her Majesty was received by Mr. Charles Gilpin, M.P., and Mr. Teulon, directors of the South-Eastern Railway. The Royal party proceeded in carriages to the Ranger's Lodge, where their arrive received by Prince Arthur and Major Elphinstone. After partaking of luncheon with the Prince, the Queen and the Princesses left the lodge for Eastwell Park, Ashford, and returned by the same route to Windsor, arriving at five o'clock. The Queen was loudly cheered on the route between Blackheath and Lewisham. The Queen and Prince and Princess of Prussia and Princess Charlotte of Prussia, attended by Countess Hohenthal and Count Furstenstein, went to Claremont to visit Queen Marie Amelie. The Duke and Duchess of Nemours arrived at the castle; the Earl of Carlisle also arrived at the castle and had an audience of the Queen.

Yesterday week the Queen, accompanied by the Crown Princess of Prussia and Princess Louise, walked and drove in the grounds in the morning. The Prince of Wales, the Crown Prince of Prussia, and the Duke of Chartres went out hunting with the harriers, attended by Major-General Hon. A. Grey, Major Teesdale, and Major Probyn.

On Saturday last her Majesty, accompanied by the Princess of Wales, drove out. The Prince and Princess of Wales left for the castle for Frogmore House. The Crown Prince and Princess of Prussia, attended by Countess Hohenthal and Count Furstenstein, proceeded to Oxford and inspected the chief objects of interest in the University. Their Royal Highnesses returned to Windsor in the evening. The Duke and Duchess of Argyll arrived at the castle.

On Sunday the Queen, the Crown Prince and Princess of Prussia, Princess Helena, Princess Louise, Princess Beatrice, Prince Arthur, Prince Hohenlohe, attended Divine service in the private chapel. The Bishop of Oxford officiated.

On Monday the Queen, accompanied by Princess Helena and Princess Louisa and attended by the Hon. Mrs. Bruce, Major-General the Hon. A. N. Hood, and Colonel F. Ponsonby, went to Virginia Water, and visited the Duchess Dowager of Sutherland and Lady Augusta Bruce, at their respective residences. The Prince and Princess of Wales left for Mr. Theed with a visit at their studios. At Mr. Foley's, the Queen inspected the monument to Baron General Bruce, and Mr. Theed's and her Majesty inspected the statues of the Prince Consort and the Duchess of Kent, which are in progress. The Queen returned to Windsor at ten minutes past six o'clock. The Crown Prince and Princess of Prussia, attended by Countess Hohenthal and Count Furstenstein, also went to London. Their Royal Highnesses paid a visit to the British Museum, where they remained more than two hours, a considerable portion of the time being spent in the MSS. room.

On Tuesday the Queen, accompanied by Princess Helena, walked and drove in the castle grounds. Earl Russell had an audience of the Queen. The Duke de Lesparre, Duc d'Auvergne, Ambassador of France, was presented to her Majesty, at an audience, by Earl Russell. Count Rosfoteff, Envoy Extraordinary from the King of Denmark, had an audience of the Queen, to present his credentials. Earl Russell, M. De Bille, Danish Minister in London, was also presented by Earl Russell to her Majesty at the same audience.

The Queen and the Royal Family take daily walking and driving exercise in the vicinity of the castle.

The Hon. Caroline Cavendish and the Hon. Flora Macdonald have succeeded the Hon. Horatia Stopford and the Hon. Harriett Phipps as Maids of Honour. Lord Alfred Paget and Colonel the Hon. D. De Ros. have succeeded Major-General Hon. A. N. Hood and Colonel F. Ponsonby as Equerries to the Queen.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales arrived at Frogmore House on Saturday last.

On Sunday their Royal Highnesses attended Divine service in the private chapel of Windsor Castle.

On Monday the Prince went out shooting.

Tuesday was the anniversary of the birthday of the Princess. Their Royal Highnesses and suite drove to Virginia Water and lunched in the Temple. Returning home, they arrived at seven o'clock and returning at four o'clock. In the evening the Prince and Princess had a dinner and an evening party. The dining-room was decorated with wreaths and choice exotics, and the various elegant presents which the Princess had received on this auspicious occasion were displayed in the room. Subsequently Herr Hermann, the celebrated prestidigitateur, had the honour of performing in the presence of the Prince and Princess and their friends. The party was celebrated at Windsor and in London with the customary honours paid to the members of the Royal family.

The Princess has during the week honoured Mr. Frith with a sitting for the marriage picture.

PRINCE ALFRED.

Prince Alfred continues at Holyrood Palace.

On Friday se'nnight his Royal Highness and Prince William of Hesse, attended by Major Cowell and Captain von Zangen, left Holyrood on a visit to the Marquis and Marchioness of Tweeddale, of Yester House. Their Royal Highnesses travelled by way from Edinburgh to Haddington, and posted thence to Yester. A distinguished circle met their Royal Highnesses at dinner.

On Saturday last the Prince and Prince William of Hesse, accompanied by several of the visitors at Yester House, shot over the preserves, and bagged 600 head of game.

On Sunday their Royal Highnesses attended Divine service in the parish church of Gifford; the Rev. Mr. Kerr officiated.

On Monday the Prince and Prince William of Hesse left Yester House at half-past seven o'clock, and travelled by the ordinary train from Haddington to Edinburgh.

Their Royal Highnesses the Duke and Duchess d'Aumale have left Hertford House, on a visit to Countess Frances Waldegrave and Mr. Chichester Fortescue, M.P., at Dalkeith House, Essex.

FINE ARTS.

WINTER EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER COLOURS.

The second winter exhibition of the Old Water Colour Society, just opened, is distinguished from the usual exhibition in May by professing to consist of "sketches and studies." Many, however, of the productions now on view have so large a measure of pictorial completeness that to consider them unworthy to be submitted in the severer competition of the summer exhibition must argue, we suppose, great but mistaken humility in their contributors. The bona-fide sketches and studies from nature and for pictures constitute, nevertheless, the main attraction of the exhibition. Now, we all know that a sketch has a charm peculiar to itself; and it will readily be inferred that such an exhibition as this may be instructive to the amateur, the artist, and the public at large. But we think it possible a collection of this kind may also have a pernicious tendency, unless rightly estimated. A legitimate origin for the sketch is to be found in the changefulness of nature, which often compels the artist to epitomise and symbolise what he sees. His disciplined eye and cultivated taste select just what is most broadly beautiful and most generally characteristic in each scene, limited, of course, by his idiosyncracy and accidental mood. The artistic feeling evinced in this selection, and the practical skill shown in devising the most compendious and rapid means of realising these fundamental facts, constitute the instructiveness and the suggestiveness of works of this description. To persons superficially acquainted with art a sketch is generally the most surprising thing in the world, because an effect perfectly satisfactory to them is attained by apparently quite inadequate means. To persons of higher artistic cultivation a sketch is still delightful, because it suggests much more than it actually contains. To the artist, however, who made the sketch, its suggestiveness is far greater, because, in language which none but himself can thoroughly understand, he reads and recalls lessons first taught him by Nature herself. Hence painters are so often loth to part with memoranda so much more valuable to themselves than to others. It is, we conceive, the duty of the conscientious critic to point out these distinctions, that visitors to this exhibition may not be unduly captivated by many specimens of a specious flimsiness and slightness too readily induced by the facile material of water-colours, but with which the whole English school is too commonly chargeable.

If we were to allow it to be supposed that sketching is the ultimate aim of art, we should be offering little short of an insult to the painters of the many painstaking studies in the present exhibition, and to all those who send their highly-elaborated pictures to this gallery in the summer. Why, it may be asked, is it we tire of a sketch so soon, but for its shallow incompleteness? It may be said, and quite correctly, that it sometimes happens, in the process of converting a sketch into a finished picture, that the essential truth of the sketch is concealed, and even falsified. But this is the fault of the artist. Let the painter constantly refer to nature, and he will go on adding truths of more and more value, and the very last touch will, not improbably, convey the most precious of all. It is a significant fact, that several of the greatest painters never sketched: they drew constantly, but always with extreme care. While, however, we attempt to indicate the shortcomings as well as merits of sketches in general, we would remind the reader that many productions of this class in this gallery were never intended for public exhibition, and therefore claim indulgent consideration. At the same time, to restrain all criticism would be to ignore the instructive lessons with which this exhibition positively teems. And this consideration induces us to remark that some of the contributions, by their balanced prettiness and showy finish, and the want of that rough directness which always distinguishes genuine studies from nature taken for the artist's own use, leave room to suspect that they were made for sale rather than improvement. Any such intentional manufacture of confessedly inferior productions, if it be possible for artists of reputation to practise it, would certainly be most deplorable. The works of no painter could more aptly illustrate the just distinctions between a sketch and a finished drawing than those of W. Hunt, one of the fathers of water-colour painting. Some of the still-life pictures of this artist have, we firmly believe, never been surpassed for true unmechanical finish and for more than mere illusive perfection of imitation. When one thinks of the patient labour, and the tension of intelligent observation which must have regulated every calculated touch to produce such effects, it would be a very poor compliment to say that the many little character-studies and "bits" of landscape effect bearing the honoured name of William Hunt in this exhibition are wholly satisfactory. Yet, *as far as they go*, nothing can be more admirable; no one could with more vigour and directness seize the broad relations of the effect or the subject proposed to be imitated in this elementary manner. The glow of sunlight in the subjects of frame 26, a chalk drawing of "Topsy;" another in water colours of a child of the broadest rustic type, humorously called "The Pet of the Village" (both in frame 177); "Mary Queen of Scots' Room" (290), and many little scraps of rustic and sea-coast scenery at once warrant our eulogies and prove the artist's versatility.

Few of the contributions illustrate what a sketch should be better, also, than those of Frederick Tayler, the president of the society. His so-called finished works are, it is true, hardly more than sketches. Everything, however, from his pencil has the charm of suggestiveness. In his horses, dogs, and cattle (30, 99, and 264), more than in his human figures, every touch is surprisingly direct and descriptive. The textures of animals and their movements are indicated by his rapidity of handling with a certainty more elaborate processes often fail to secure; and this, with the evidence likewise afforded of knowledge and skill, drawn upon far within their limits, constitute the legitimate charm and interest of these sketches. Another master of the magic of suggestiveness, and very much more varied in its application, is John Gilbert. His pencilling, also, though more or less conventional, has an art value peculiar to itself. Added to this, John Gilbert has a vigour, as well as a fertile diversity of invention, to which little would be denied if he were to concentrate his energies and aim at severer truth of form and more complete realisation of a few choice conceptions. The "Standard Bearer" (43), a cuirassed soldier of the Emperor Charles V., is a powerful, and, for him, more than usually finished drawing. The "Christian Knight" (36) fighting against paynim assailants for the possession of his red-cross flag is, however a true sketch, though of the slightest. Two cases (5 and 116) contain "first ideas," in pen and black tint, for several well-known pictures; and are highly interesting as showing the *genesis* of a work of art—the original conception in the artist's mind and the coordinate operation of the rules of composition, and the material construction of a picture. The artist's attention to composition is curiously shown in a study for a picture of Rembrant in his painting-room by the line—Hogarth's "Line of Beauty"—which intersects all the heads. Such *separate* studies and pictures in embryo are the more interesting because they present variations, some of which, like passages in the rough manuscript of the author, have been emended in the finished picture. These variations of the painter generally afford much more pleasure than those of the musician, because we know they have occurred naturally in the progress of the work, and were not superadded for display.

The studies of artists are, moreover, interesting for often revealing them at work in very different directions to those by which they are best known. This is exemplified in this exhibition by the contributions of W. S. Burton, J. J. Jenkins, and S. Read. The first of these gentlemen is represented by a drawing in his usual style—an almost lifesize head of a dark-eyed beggar girl (302), full of feeling, carefully wrought, and the most complete example of flesh-modelling in the room. But who would recognise the painter of this quiet simple head in the wild imaginativeness, the terrible vigour of action, and the extreme boldness of the cartoon (172), designed as long ago as 1849 for execution in fresco or oil, and representing Jehu driving "furiously" his two black chariot steeds full at, and like a thunderbolt overturning, the retreating chariot of King Joram; the wicked son of Ahab and Jezebel destined to be a prey for dogs, falling at the same moment transfixed by an arrow drawn on him by Jehu? Nor, again, would the same artist be suspected to be the designer of the classic gold fibula (355) presented to Miss Helen Faucit on her performance of "Antigone." The cartoon of Jehu and Joram assuredly proves a vigour of conception and power of draughtsmanship which might have rendered Mr. Burton famous as a painter of great monumental works. Its existence is, perhaps, to be attributed to the artist's residence in Germany, and the consequent influence of Kaulbach and Cornelius, painters who have executed similar subjects on a vast scale. The designing of a fibula would not be much out of the way to an artist who has habitually made studies of sculpture and ornament, as certain specimens now exhibited indicate Mr. Burton to have done. It is not the first time we have said that we almost prefer J. J. Jenkins in landscape, though he is known principally as a figure-painter. His "Mill End on the Thames" (35), a charmingly fresh and natural landscape, is certainly calculated to strengthen the preference. Samuel Read, known chiefly for his elaborate architectural interiors—e.g., the finished study (188) for a large drawing of Milan Cathedral, exhibited some years since—surprises us also with a study, out of his usual track, of a clump of almost leafless oaks (224) on a small knoll. This careful and sound study is very true to the sentiment of the season, and more happily realises outdoor effect than anything we have seen by the artist. Mr. Read has also an effective study of "Genoa" (308).

Carl Haag's studies of single figures are only unfinished in that they have no background. The various contributions of this artist are unequal in merit. A tinted pencil drawing of "Sir Isaac Newton" (69) has the quite unusual faults of being weak and too merely pretty; "A Syrian Gowass," on the other hand, seems somewhat melodramatic; but his "Copt Girl" (259) and "Fellah Boy" (267), his "Ciocciara" or female donkey-driver (69), his sturdy "Tyrolese Carrier" (86), and sweetly earnest and ingenuous "Tyrolese Bride" (187), kneeling in her picturesque costume and bridal bravery of silver embroidered headdress, are admirable for character, force of effect, and richness of colour. The "Interior of a Copt House, Cairo" (144), has also a very noteworthy effect of light mellowed by a sun-screen. F. Smallfield's studies of still-life have not the magic relief of W. Hunt's work, with which they seem to court comparison, but they are very commendably painstaking. A large study of an "Italian of Alvito" (55), a head of a classic type still often found in Italy, with flowing raven black hair growing low on the forehead, yet with light grey eyes; together with a study of a Genoese market woman (89) are also noteworthy. "A Wreck at St. Leonards" (12), and other studies by W. C. Smith, indicate the advances in his art this painter has made within the last few years. There are certain artists of much popularity and universally acknowledged skill, yet whose finished works are rarely free from an appearance of false prettiness or finish. When these drawbacks are discoverable in sketches, as we must say they are in several contributions by T. M. Richardson and Birket Foster, they are not easily excusable. A pair of small sketches (374) by the latter, suggest, however, by their singular simplicity and truth, not only that they were done direct from nature with no *arrière pensée*, but also that the exception proves the rule.

In the process of converting a sketch into a picture, form and character are to be gained with comparative ease, but purity and brilliancy of colour are apt to be lost. There are, for example, sketches by Davidson, Andrews, G. A. Fripp, A. D. Fripp, Glennie, and Dodgson, which, though less complete in definition, are purer in colour than the finished works of these artists. Of the pleasant cosmopolitan life led by some painters, the titles only of the contributions by the second of those last named abundantly prove. What adventures must have befallen Mr. Andrews in his search for the picturesque in company with North Sea fishers, "Trawling by Night;" in journeying through Holland and Italy, by Scylla and Charybdis, away to the Plains of Troy, and thence to Niagara—exploring *behind* the cataract (266)—and beyond to the Wilderness of North America (82), where the timber is felled and floated down rivers whose course measures two thousand miles, this gentleman alone could tell. Of these the Italian "Pozzuoli" (129) has, in particular, the freshness that, as we have said, is easy to lose. Mr. A. D. Fripp's Italian landscape studies are all admirable; but we would direct special attention to the extreme delicacy and truth of the figure-drawing in his "Grotto at Galeva" (162) and "The Four Sisters—Capri, Naples" (272). Mr. Dodgson's studies bear evidence of having been carried as far as possible face to face with Nature, or "on the spot," to employ the phrase used to distinguish genuine sketches from studio manufacture. Most of them are studies of the noble trees in Knowle Park, and all have the high qualities of luminousness, truth, and feeling. Two, in particular, are worthy of all praise. The first (100) seems literally steeped in golden sunlight, glowing on the grass and trembling in the foliage, accompanied with the always strange silence of summer noon. Yet the brilliancy is not got by vulgar glitter, but by simple opposition of the true colour of passages in light and shade—broken very cunningly in the latter. The painter's material would not allow relatively exalted brightness in the sky, yet the shimmer of light on the fleecy cirro-cumuli is no less remarkable. The second drawing (180) shows a singularly tender variety of touch, totally free from conventionality, in the thin, sparse, autumnal foliage, relieved dark against a bright sky. In James Holland's numerous sketches, chiefly of architectural subjects in Spain, Italy, and the Tyrol, we must not ignore their extreme slightness in our admiration of facility and the evidence of a fine eye for colour. One cannot well understand the use of such hasty memoranda of architectural detail, even from the painter's (not the builder's) point of view. In the study of "Hulks in Hamoaze," the means are indicated by which E. Duncan acquired his varied knowledge of naval matters and marine effects; while in the gloomy effect of a rainy sky in the "Study on Coniston Fells" (24), and in other contributions by this artist, evidence is afforded of a thoroughly honest and able landscape-painter. Joseph Nash reappears as an exhibitor after a rather prolonged absence, occasioned it is understood by the painter's dissatisfaction with the mode of conducting the elections. Mr. Nash's contributions appear to us to be all finished drawings, and comprise a figure-subject, "The Murder of Rizzio" (378), and many of those representations of old baronial halls, galleries, and drawing-rooms, collegiate chapels, and libraries by which the artist is best known. The most elaborate architectural drawing in the exhibition is, however, J. Burgess's pen and tinted view of the glorious old Flemish Hôtel de Ville, of Oudenarde (268). By Brittan Willis there are excellent studies of a mare (98), a brindled cow (311), &c., besides several almost lifesize studies of calves, which, though remarkable as *tours-de-force*, fail necessarily, we think, to some extent, from the water-colour painter's materials not having the body and rich viscidity requisite to give the necessary texture and relief. S. P. Jackson—always careful, conscientious, and true to nature—has several studies from Cornwall scenery. Edward A. Goodall sends a view of the church—so interesting in the history of Christian art—of San Francesco, at Assisi (118), and a well-painted Brittany interior (125). His brother, Walter Goodall, has a study for the drawing of "Le Reliquaire" (151), which we engraved not long since. A. P. Newton is represented by comparatively unimportant views on the Adriatic, near Venice (136), of a Highland shieling (247), &c. A small drawing of "Barnard Castle" (332), by A. W. Hunt, has all this artist's frequently-surprising variety and refinement of colour on a scale which secures unity of effect. Paul Naftel's "Ruins of Pæstum" (48); three or four poetical but mannered compositions by S. Palmer; several Welsh studies, truthful though unpretending, by J. Whittaker; a sketch of shipping by J. Wichelo; and a study of a piece of Norwegian glacier by J. Rosenburg, are also worthy of attention.

"THE OLD CONNOISSEUR."

An old connoisseur, or rather, generally, an old pretender to connaissance, examining a picture, has always been a favourite subject with artists, especially those of the French school. Our English painters generally select the simpler and more direct incidents of domestic life; while the polite comedy and subtle satire often concealed under the subject—so well treated, nevertheless, by Mr. Campbell in the picture engraved on page 565—seems exactly suited to the finesse of conception and finish of execution of French painters. Very often, however, the subject is not made the vehicle of either humour or sentiment, but merely a peg on which to hang picturesque costumes and artistic properties, as in many pictures by Meissonier, Chavet, &c. The theme, notwithstanding, presents an opportunity too favourable to be often resisted, for displaying the telling opposition of pretentious ignorance and purse-proud insolence on the one hand, and humble genius and the subserviency enforced by poverty on the other. Something of this kind seems intended in the picture before us. The artist seems to slily intimate in he old connoisseur's adherence to the fashions of his youth that he is also probably as obstinate in his real or pretended admiration of the "old masters," which was the fashion with the young "bucks" of fifty, and even thirty, years ago; and that therefore he is little likely to bring an intelligent or kindly appreciativeness to the work of a living artist. The reader will notice also that the ancient dandy peers very closely at the picture with his eye-glass, intent, probably, not upon its general effect and truth to nature, but on textures, handling, and things to which a true artist scarcely gives a passing thought, but that are found out for him by clever critics who never handled a brush, and dillettanti who derive all their knowledge from such sagacious authorities. When some one pried in this way into a picture of Rembrandt, the sturdy Dutchman exclaimed, in a rage, "Stand off! The picture was not made to be smelt at; the smell of paint is very unwholesome." The painter before us, however, appears too anxious to provide for wife and family to speak his mind in this style. Mr. Campbell has very properly represented the artist a plain, homely, unpretending, good-natured looking fellow, and not the melodramatic personage he is often supposed to be. Another popular assumption that is, sometimes, but not very often well founded, this picture may, however, seem to favour—namely, that the artist's calling is miserably ill paid. Now, so far from this being the fact, we believe, and we speak from tolerably sufficient data, that in consequence of the demand for art having so greatly extended, the artistic profession will compare not much, if anything, to its disadvantage with either of the "regular professions." Let any artist of average natural ability have devoted as much time and study (the expense will be comparatively trifling) to the acquisition of his art that the average lawyer, doctor, or clergyman has expended to qualify him for his calling, and we believe the balance of income will be found not much against, if not actually in favour of, the artist. We think it quite time that the popular prejudices against the emoluments of the artist should be dissipated. It is these prejudices which have tended to prevent artists having that social consideration given them in England which makes the intelligence and taste of English society compare so far disadvantageously with those of some continental circles, where honour is paid the artist, or at least professed to be rendered to him, even above great wealth and high titles.

We have already said, in our notice of the Winter Exhibition, that this picture is an advance in completeness and roundness upon anything we had previously seen by this artist. The head of "The Old Connoisseur" is, in particular, an admirably solid and lifelike study.

THE FARM.

The cynics declared that racing had passed into the leaden age when the 1½ lb. lump was nailed to the bottom of the scale after the Cambridgeshire, and their annual diatribes against the "tallow age" have begun, once more, with the woodcut of the fat bullock on the walls and omnibuses. At Oakham the Cottesmore pastures again held their own for the best ox or steer under five years old. Lord Berners's (1), Colonel Lowther's (2), Earl of Gainsborough's (3), was the order of the longwool fat wether pens, and the Colonel won every other first prize with his Leicesters. Long Clawson, Caldecott, and Croxton were the parishes which had the honour of producing the three best four-year-old hunters, and "the best mare that shall be a good and quiet worker for the general purposes of agriculture" was from Glendon Lodge, near Kettering. Birmingham has held a good fifteenth anniversary, and beyond the complaint that no catalogues were allowed during the open judging, and that there was no Scotch judge, we hear, as yet, of none of those curious hitches and misunderstandings which have caused so much controversy in other years. The prima donna of the hall was a shorthorn heifer (bred and fed in Kent), which was declared to be, not only the best shorthorn but the best animal in the cattle classes. The Hereford classes numbered thirty-one, as in 1862; the steers and heifers were "generally commended;" and the extra £25 for the best of the breed fell to a new man, Mr. Groves, of Walk Mills, near Shrewsbury, with a three years six months' heifer, bred by himself. Mr. G. Pitt's first-prize cow was first at Hereford, and Mr. Draper's second-prize one first at Ludlow, but they had never met before. The Royal farms were third in this class with old Superb (the dam of their prize bull Maximus); and Mr. G. Pitt was also the breeder of Mr. Phillips's first ox, and the breeder and exhibitor of the second steer, which was beaten by one belonging to that well-known Christmas champion, Mr. R. Shirley. The mottle-face interest was remarkably strong this year. The Cottesmore ox fairly beat the Rugby ox in his class, and completed the shorthorn triumph by taking the gold medal as the best ox or steer in the yard; but, as he was bred by Mr. W. H. Baker's late father, the President's cup did not accompany it, and was awarded to the Rev. E. Staniforth's steer, which had one of Mr. W. H. Baker's own breeding next to it. More than half the cow entry had a judicial mention, and here Mr. Lynn was first, Earl Howe second with one of the Sarsden herd, and the Cottesmore blood completed its 1, 2, 3. The shorthorn entries were forty-five, or six more than last year; and the Devons were seventeen, or one in excess.

Devon or Somerset sent most of the entries, but a steer bred by his Royal Highness the late Prince Consort beat them all. The Royal Flemish Farm was also third in the Devon cow class; Mr. Farthing had a first and a second, with purchases from Sir A. A. Hood, M.P.; and Mr. William Heath, the great Norfolk feeder, took a second with his Devon, as he had done with his Hereford ox and polled steer. Messrs. Chapman and Burbery held their wonted place with longhorns, whose five of last year swelled to ten; and the addition to the Scotch prize-money brought thirty, or eighteen more. The West Highland class was better filled than any; but the first honours remained on this side the border, with Mr. Ralph Sneed's six-year-old red. Seventeen were in it, and besides the winners there were three H. C.s and two C.s. The winner's age was against him, and the immense M'Combie black beat him for the £25, and was voted "a rough 'un," as he certainly is. Mr. Allen Pollok was behind Messrs. Martin, the great Aberdeen butchers, in two cross classes, and took another second in the West Highland. Mr. Foljambe's Leicesters, Lord Walsingham's Southdowns, Lord Wenlock's and Mr. W. O. Foster's Shropshires, the Duke of Marlborough's Oxford Downs, Mr. Overman's Southdown-Leicesters, and Mr. J. Lynn's Lincoln-Leicesters were all first and foremost. In the pig classes, which had ninety-three entries, against seventy last year, the Royal Home Farm recovered its old prestige with a first and two seconds. White was the winning colour this year, and Mr. Wainman had Messrs. Stearn and Mangles next to him in the fat class, and won with breeding pigs as well. There were four disqualifications, and Mr. Gamgee's stroke descended on Messrs. J. Perrin, D. Long, J. K. Tombs, and J. Lynn. In the poultry department the silver-grey Dorking classes were abolished, and new ones opened for black Hamburghs, Crève Cœurs, and Buenos Ayrean ducks. The Rouen ducks showed a great advance, and one pen of three weighed 23 lb., or within 2¼ lb. of the heaviest Aylesburys. The best pen of mottled geese weighed 77 lb., Toulouse geese (only seven months old), 63 lb.; and three turkeys, only two weeks younger, 58 lb. Pigeons, roots, and implements were also well represented.

The London programme for next week is a very full one, and "Leeds Smithfield Club," Darlington, and Liverpool all act as local counter attractions. On Monday the five shilling visitors will be admitted to the Agricultural Hall soon after two o'clock, and for the four next days the admittance will be a shilling. On Wednesday the Royal Agricultural Society holds its general meeting in the morning, and the Smithfield Club dine at the Freemasons' Tavern at six.

The Queen has approved of Mr. Edward Redman as Consul in London, and of Mr. Thomas B. Job as Consul at Liverpool, for the United States of Colombia.

The Lord Chancellor has sanctioned twenty rules and orders, with a number of forms, for regulating the practice of the County Courts. They will take effect on the 1st of January next.

On Saturday the money subscribed by the shareholders towards realising the £60,000 required to repair and set the Great Ship afloat again was returned to the shareholders, and henceforth all the affairs connected with this vessel will have to pass through the Court of Chancery.

MEMBERS OUT OF PARLIAMENT.

A COBDEN-BRIGHT demonstration in the north of England is a thing of itself. Other public meetings may be enthusiastic, may be crowded, may be unanimous, but nowhere could be found such a concentration of interest by a vast assembly on individuals for themselves alone. In these quiet times at home it is not easy to get together, or, having got together, to stir up two or three thousand persons by means of speeches which are not ostensibly directed to a particular end or object. One can well understand that such orators as Messrs. Cobden and Bright, when they came with a tangible and palpable grievance which spoke to the most sensitive part of men's systems, could carry audiences along with them as far as ever they liked to go. Wherever the corn laws went this specific source of strength in the orators of the northmen went with them. It augurs well, therefore, for the good feeling of the population of the north that they have not forgotten the men who fought and won a great battle for them; that they welcome them heartily, and their gratitude is not alloyed by any hope of favours to come. They greet Mr. Cobden and Mr. Bright as affectionately and confidingly now, when those gentlemen come to them, in a manner, as speculative talkers—as arguers in something like abstractions, who can present before them grievances which are, we do not say imaginative, but which require the exercise of a certain liveliness of faculty to be comprehended and appreciated by those who needed little time to consider the broad facts and the patent advantages of cheap bread and free trade. Perhaps, under no circumstances have Mr. Cobden and Mr. Bright shown the fertility and extent of their resources as popular orators as on the recent occasion of their meeting with their Rochdale friends. Owing to many causes, which it is not necessary to particularise, they had to steer clear of that breadth and freedom of argument which in them has always been a great force. They had to deal with social problems of great nicety, and to enforce and illustrate as they best could (some of their most favoured examples having of late failed them) their political doctrines in such a manner as to avoid apparent self-contradiction as well as the danger of seeming to tend towards ideas of social, moral, and political regeneration, which have come to grief under the auspices of Fergus O'Connor and Robert Owen. Very ably, very effectively, and judiciously did they acquit themselves in what seems to us to approach a difficult position. We have had a recent opportunity of bearing our testimony to the geniality, the sympathetic heartiness of Mr. Cobden's nature, with which circumstances had previously prevented our becoming acquainted; and any notions of his being a mere political economist of the severest school were, in our case, effectually dissipated. Of the warmth, combined with tenderness, of Mr. Bright's disposition any one may acquire a knowledge from any one of his speeches, and, therefore, it is not surprising that when they are both, as it were, at home—as at Rochdale—where their inner life is familiar to the audience which crowded around them the other day, they should make such a sensation and such an impression. Of the impression on the country generally we will say nothing here; but what we will say is, that, no matter who is the listener, let him be ever so speech-beaten and speech-wearied, he will confess that addresses from Cobden and Bright are still great and enjoyable features in the public life of England.

It is curious that, scarcely had the echoes of the philosophical radicalism of these gentlemen ceased to reverberate through Rochdale, than the puny voices of certain Conservative members and others of South Lancashire were raised in the same place. On the day after the Cobden-Bright demonstration, Mr. Algernon Egerton, Mr. W. J. Legh, and Mr. Charles Turner, the three members for South Lancashire, met the Conservative Association of Rochdale. It is odd that there should be such an association there, but there is no doubt that there is a strong Conservative leaven in this division of the county; and it was evidenced by the fact of Mr. Charles Turner, formerly member for Liverpool, winning the third seat which was given to the division by a Liberal Government when the disfranchised seats for Sudbury and St. Albans were distributed. In a manner, Mr. Turner, although a Conservative, represents the democratic element in South Lancashire, because he is the representative of the mercantile, as contradistinguished to the aristocratic, class, which finds its oracles in Mr. Algernon Egerton and Mr. Legh. Mr. Egerton (who is a son of the first Earl of Ellesmere) as a product of the election of 1859, and Mr. Disraeli must have had some faith in his hereditary right to be considered a man of ability, for his maiden speech was the moving of the address to the Crown at the meeting of the new Parliament—a circumstance, as we believe, unprecedented. He acquitted himself on that occasion remarkably well; and we have reason to know that he takes to the business of the House, and has in him the making of a good member. Mr. Legh was also first returned for South Lancashire at the last general election, and has not, to our knowledge, as yet emerged from the chrysalis condition of young memberdom.

The members for Taunton are well known in the House of Commons. One of them, a grave, somewhat sententious, and rather philosophical politician, is, in his special way, a reformer—albeit he professes abstract Toryism. By the steady but unostentatious course which Mr. Arthur Mills has taken in Parliament he has gained a good, and almost an influential, position, while there can be no doubt that he is respected by men of all parties. Without exactly being able to say why, we fancy that if the Conservatives came into power he would have a fair chance of office suited to his calibre. No one supposes that Mr. Bentinck, his colleague, cares about being respected; his object evidently is to be well known by the House; so he is, for they often laugh with him and as often at him. Having the misfortune—as, *pro hâc vice*, he must esteem it—to bear the same name as a decidedly prominent member of the house, it is necessary to designate him by his initials, G. A. F. C., standing for George Augustus Frederick Cavendish. Supposing the possessor of this imposing list of appellations to be called on to answer to them personally, the bystanders would be surprised to see how very small a person they envelop. Certain comic illustrations of the origin of species which have lately appeared have traced singular likenesses between men and birds and beasts; and, when one comes to think of it, it is remarkable how many men are like birds. There may be therefore good reasons why one always thinks of a tomtit when one sees this honourable member for Taunton in full action before the House. If one was to be compelled to illustrate his style and manner in a word, one would refer the querist to his boyish recollections of that small but particularly bounceable firework called a cracker. In simple justice, however, it ought to be said that Mr. Bentinck is always very amusing, and sometimes gives hard hits; and, if he would only tone himself down a little, and not ruffle his feathers and waggle so violently, he would make more way, and he has made a good deal, in the House. At Taunton both members came out characteristically, Mr. Bentinck especially.

It has been our duty, and, of course, our pleasure, to have this autumn a great deal to say about Essex members, and on the last occasion we invoked the sole Liberal member of that county to put in his annual appearance and not to let the Tories have it all their own way. Surely we thought so compact and so assured a body as the Essex Liberal Club would not allow to pass unheeded threats of crushing out the one Liberal plant which they had produced and nourished in the uncongenial ground of Essex until they had become proud of it, not only for what it represented but for itself. Maldon is known as the political cockpit of Essex, and it was there, only the other day, that the Tories in conclave boasted that they had their man ready to supplant Mr. Western at the next election, and thus restore the broken continuity of conservatism in the county. Our expectations have been fulfilled, and the Liberals have come out in greater force than ever at Maldon. By a turn of luck for him and for them, Mr. Chichester Fortescue, Under-Secretary for the Colonies, has become connected with Essex, and the Liberals came out this time with a member of the Ministry in their front rank. Recollecting, as we do, the *verve* and the enthusiasm which characterise the meeting of the Liberal Club, we wonder what they thought of the somewhat austere and hard, cold oratory of Mr. Fortescue. Perhaps they do not understand how much of a model Under-Secretary he is. Representing his department in the House of Commons, it is singularly safe in his hands. Always ready with the minutest details, at once simple and courteous in his manner, he is, yet, never turned aside from the current of his assertions; knowing the advantage in a Ministerial explanation on matters just doubtful, of appearing to go into their discussion at considerable length; never really yielding a point against his department, and yet seeming to slip out bits of frank and candid admission—slow, measured, monotonous in his utterance—so that it is difficult to catch a salient point with the ear if he should present one, which he never does; he has the happy art—for an official—of making people think that he has given the fullest explanation that is possible, and yet, when he has concluded, nobody knows exactly what he has said, or what there is to rejoin to. The consequence is, he almost invariably has the last word, and there remains on the minds of his hearers a vague consciousness that whatever is right is all right, and whatever is wrong remains as it is, but that it is not so very wrong after all. At this particular gathering at Maldon, Mr. Charles Buxton holds an honoured place. However anxious the audience may be to hear, and how much soever they may applaud, Mr. Western's generally spirited speeches, they look to Mr. Buxton for a philosophical summing-up of politics in general. For a time they emerge with him from Maldon and survey political mankind; they forget that they are Essex men fighting a local battle, and remember that they are constituent parts of a nation, in the general welfare of which they have an interest which each in his particular sphere can do something to serve. It is something gained when at a meeting of this kind a larger and wider scope is given to its influence than that which, perhaps, is intended, and is certainly hardly comprehended in its special object.

THE COURT-MARTIAL ON CAPTAIN CRAWLEY.

Nearly the whole of yesterday week was occupied by the cross-examination of Surgeon Turnbull, of the Inniskillings, but nothing particular was elicited. He had made an addendum to his summary of the predisposing causes of death, that the deceased was in the habit of drinking large quantities of brandy, but this was because Colonel Crawley and the Assistant Surgeon told him so. He had no evidence of the fact himself. A letter from Captain the Hon. E. Bourke, of the 6th Dragoons, was read, stating that the writer knew Sergeant-Major Lilley as a sober, worthy non-commissioned officer, for whom he had the greatest respect. He had known him from 1858 to 1862. The Court, at its rising, adjourned till Monday.

On Monday Dr. Turnbull underwent a further cross-examination by the prisoner, with a view of showing that no blame could be thrown upon Colonel Crawley in regard to Lilley's death. Colonel Shute, who commanded the regiment previous to the Colonel, identified a letter which he wrote in testimony of the good character of Sergeant-Major Lilley; and some other testimony was given to the same effect. These witnesses were especially precise in speaking of his great sobriety.

Tuesday was chiefly occupied with the evidence of the non-commissioned officers and privates who had acted as sentries on Sergeant-Major Lilley during his arrest. Their testimony was of one tone throughout; they were inside the house, but not close to the bedroom, and could not see into it. The Sergeant-Major was a sober, steady man. He never made any complaints of suffering inconvenience from the way in which the sentries were posted.

The proceedings on Wednesday were pretty much like those of the day before, the evidence given being almost entirely that of the sentries. Some of them deposed to having seen Mrs. Lilley in her bedroom; others said they had not done so; and one or two expressed an opinion that as the sentries were posted they could not annoy Mrs. Lilley.

The examination of the sentries on guard over Sergeant-Major Lilley was continued on Thursday. They did not think the position of the sentries caused any annoyance to Mrs. Lilley. Neither the Sergeant-Major nor Mrs. Lilley had made any complaint. The sentries were ordered not to inconvenience Mrs. Lilley in any way whatever. Several of the witnesses deposed to Sergeant-Major Lilley drinking brandy. On one occasion, according to the evidence of Private Dribble, Lilley drank several glasses of brandy. Another sentry deposed that the Sergeant-Major invited him to drink brandy, which he had in a bottle in a long boot placed under the couch; and that, when Lilley had finished the brandy, he gave witness the bottle to throw away. A servant of the Sergeant-Major stated that Lilley was in the habit of drinking spirits, but not to excess. He would take half a dram of arrack in a cup of coffee the first thing in the morning. Further evidence of a similar character was given.

A serious fire has occurred at St. John's, Antigua, destroying considerable property.

A rumour is current in Constantinople to the effect that Abd-el-Kader has died at Mecca.

The Empress of Russia has returned to St. Petersburg, from the Crimea, and has taken up her residence at Tzarsko-Zelo.

The annual full-dress ball in aid of the funds of the Royal Dramatic College is to be held at Willis's Rooms on Wednesday next.

Jubilee services have been held in Hull, in connection with the Wesleyan Methodist Missionary Society. About £2000 was realised by the services, and the total jubilee fund now exceeds £75,000.

A nurse-girl and two young children at Lockwood, near Huddersfield, have been seriously injured from having eaten portions of a "sugarstick," which seems to have been coloured with some poisonous matter.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

CONSIDERABLE excitement has prevailed in the Money Market this week. Although about £500,000 in bullion has arrived from various quarters, and although very little silver has been forwarded to the East by the present steamer, the directors of the Bank of England have advanced their minimum quotation for money to 8 per cent, and have declined making advances to the various discount establishments under 8 per cent. A higher range in money having been pretty generally anticipated, the demand for accommodation has been very active, and even the present rate has not had the effect of checking it. Obviously, the directors have acted upon a sound principle in the effort to check the outflow of bullion from this country. This week £200,000 has been withdrawn from the Bank for transmission to Egypt, in part payment of a loan recently contracted with one of our leading companies; a very large amount has been secured for transmission to the Brazils on Monday next; heavy advances are being made to the Austrian Government; and both France and Russia are likely to appear in the Money Market in a few weeks as large borrowers. The state of the Continental exchanges, and the moderate profit on gold imports from America, have no doubt had considerable influence upon the Bank directors. There is a fair average supply of money on offer in the general discount market.

The discount houses have advanced their rates for money at "call" to 5, and for deposits at short notice to 5 and 5½ per cent.

A sale of £500,000 in bills on India has taken place. No change took place in the minimum price, and the tenders within the limits amounted to £1,720,000.

The Continental Money Markets have continued excited, and for the most part they are badly supplied with capital.

The forthcoming dividend of the London Chartered Bank of Australia will be at the rate of 8 per cent per annum.

Notwithstanding the advance in the rate for money, the decline in the value of National Securities has been comparatively trifling. The market, however, has been very inactive, and the supply of money stock has increased.

On Thursday the market opened flatly, but subsequently recovered. Consols, for Money, closed at 90½ ¾ ex div.; for Account, 90¾ ex div.; Reduced and New Three per Cents, 89¾ to 90. Exchequer Bills marked 10s. to 5s. dis.

A decline of about 1 per cent has taken place in the value of American Securities. Illinois Central have been done at 82; Erie Shares, 63¼; and Virginia Six per Cents, 33.

The market for all Foreign Securities has continued heavy, and a general fall has taken in the quotations.

There has been less firmness in the market for Joint-Stock Bank Shares, and the quotations have given way.

The dealings in Colonial Government Securities have been much restricted:—Canada Six per Cents have realised 104; Ditto Five per Cents, 92; Mauritius Six per Cents, 1883, 109½; New Brunswick Six per Cents, 105; New South Wales Five per Cents, 102½; South Australian Six per Cents, 113½; and Victoria Six per Cents, 110¼.

About an average business has been transacted in Miscellaneous Securities.

The Railway Share Market has been in a depressed state, and prices, almost generally, have given way.

THE MARKETS.

CORN EXCHANGE, Nov. 30.—There was a very poor show of English wheat in our market to-day, and nearly all kinds moved off freely, at an advance in the quotations of from 1s. to 2s. per quarter. Fine foreign wheats improved 2s., other kinds 1s. per quarter, with a good consumptive inquiry. Floating cargoes of grain produced rather more money. Malting barley moved off freely, at extreme currencies. Grinding and distilling sorts were inactive, at late rates. The malt trade was firm, at very full prices. Fine oats were scarce, and 6d. per quarter dearer; but damp parcels were somewhat neglected. Both beans and peas advanced 1s. per quarter, with an improved inquiry. The flour trade was steady, and, in some instances, the quotations had an upward tendency.

Dec. 2.—The supplies of produce were only moderate. Generally speaking, the trade ruled firm, at prices fully equal to Monday.

English.—Wheat, Essex and Kent, red, 41s. to 44s.; ditto, white, 42s. to 50s.; Norfolk and Suffolk, red, 41s. to 44s.; rye, 32s. to 33s.; grinding barley, 25s. to 27s.; distilling ditto, 28s. to 31s.; malting ditto, 36s. to 39s.; Lincoln and Norfolk malt, 60s. to 64s.; brown ditto, 50s. to 55s.; Kingston and Ware, 60s. to 64s.; Chevalier, 66s to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 23s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 20s.; ditto, white, 15s. to 23s.; tick beans, 29s. to 31s.; grey peas, 33s. to 35s.; maple, 36s. to 38s.; white, 35s. to 37s.; boilers, 36s to 38s. per quarter. Town-made flour, 37s. to 40s.; town households, 33s. to 35s.; country marks, 28s. to 31s. per 280lb. French, 35s. to 38s. per sack. American, 19s. to 27s. per barrel.

Arrivals this Week.—English: Wheat, 570; barley, 1030; malt, 540; oats, 100; flour, 1720. Irish: Oats, 500. Foreign: Wheat, 4860; barley, 2040; oats, 16,850; flour, 600 sacks, 4260 barrels.

Seeds.—There is a fair average business doing in clover seed, at full prices. In other seeds, as well as cakes, the transactions are on a very moderate scale, at late rates.

Linseed, English, crushing, 66s. to 70s.; Calcutta, 60s. to 65s.; hempseed, 40s. to 42s. per quarter; coriander, 10s. to 14s. per cwt.; brown mustard seed, 10s. to 13s.; white ditto, 8s. to 11s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed 62s. to 65s. per quarter. Linseed cakes, English, £9 15s. to £10; ditto, foreign, £9 2s. 6d. to £10; rape cakes, £5 to £5 15s. per ton; canary, 50s. to 60s. per quarter; red clover seed, 38s. to 72s.; white ditto, 54s. to 74s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 6½d. to 7d.; of household ditto, 5d. to 6d. per 4lb. loaf.

Imperial Weekly Averages.—Wheat, 40s. 3d.; barley, 33s. 7d.; oats, 19s. 7d.; rye, 34s 9d.; beans, 36s. 1d.; peas, 31s. 1d.

The Six Weeks' Averages.—Wheat, 40s.; barley, 33s. 11d.; oats, 19s. 1d.; rye, 29s. 1d.; beans, 36s.; peas, 34s. 8d.

English Grain Sold Last Week.—Wheat, 121,825; barley, 125,511; oats, 14,019; rye, 19; beans, 4196; peas, 2409 quarters.

Hay and Straw.—Meadow hay, £3 to £4 12s. 6d.; clover, £4 to £5 10s.; and straw, £1 6s to £1 10s. per load.

Coals.—Best house coals, 18s. to 19s.; seconds, 16s. 3d. to 17s. 3d.; Hartley's, 14s. to 15s. 3d.; and manufacturers', 14s. to 15s. 6d. per ton.

Hops.—The demand is steady, and prices are well supported. English qualities may be quoted at from 90s. to 160s.; and foreign, 70s. to 160s. per cwt.

Metropolitan Cattle Market (Thursday, Dec. 3.)—The supply of beasts on offer in our market to-day was limited, and the demand for all breeds ruled steady, at fully Monday's advance in the quotations. The best Scots sold at 5s. 2d. per 8lb. We were again scantily supplied with sheep, and the mutton trade was firm, at extreme currencies. The best Downs were worth fully 5s. 10d. per 8lb. Calves—the show of which was limited—moved off freely, at 2d. per 8lb. more money. Prices ranged from 4s. to 5s. per 8lb. There was an improved sale for pigs, and the quotations had an upward tendency. Milch cows were quite as dear as last week. Per 8lb. to sink the offal:—Coarse and inferior beasts, 3s. 6d. to 3s. 10d.; second quality ditto, 4s. to 4s. 6d.; prime large oxen, 4s. 8d. to 5s.; prime Scots, &c., 5s. to 5s. 2d.; coarse and inferior sheep, 3s. 10d. to 4s. 4d.; second quality ditto, 4s. 6d. to 4s. 10d.; prime coarse-woolled sheep, 5s. 2d. to 5s. 6d.; prime Southdown ditto, 5s. 8d. to 5s. 10d.; large coarse calves, 4s. to 4s. 8d.; prime small ditto, 4s. 10d. to 5s.; large hogs, 3s. 6d. to 4s.; neat small porkers, 4s. 2d. to 4s. 6d.; suckling calves, 14s. to 21s.; and quarter-old store pigs, 20s. to 26s. each. Total supply:—Beasts, 882; cows, 130; sheep, 3300; calves, 90; pigs, 370. Foreign: Beasts, 120; sheep, 700; calves, 40.

Newgate and Leadenhall.—The supplies of meat are limited, and the trade rules firm, as follows:—Beef, from 2s. 10d. to 4s. 4d.; mutton, 3s. 10d. to 4s. 8d.; veal, 4s. to 4s. 8d.; and pork, 3s. 8d. to 4s. 8d. per 8 lb. by the carcass.

ROBERT HERBERT.

ARRIVAL OF KING GEORGE AT ATHENS.

(From our own Correspondent.)

SINCE my last communication there has been no public ceremony at Athens, and a certain amount of sadness has spread over the Court of King George in consequence of the news of the death of the King of Denmark, which has caused the solemnity of the administration of the oath of allegiance to the troops and to the National Guard on the Champ de Mars to be momentarily deferred. In the mean time, the Greeks appear to be contented and confident in the future; there is, however, much to be done, as the whole system of Government is to be reorganised on a Liberal footing. When Otho was called to reign over Greece (there was a cry uttered by his subjects which made an excellent French calembour—"Qu'Othon soit philhellène!" (*Coton, soie, fil, et laine*; cotton, silk, thread, and wool.) The same demand, deprived altogether of its dynastic signification, might now be urged with still greater reason, so as to give productive occupation, at any rate, to a portion of the Greek population. Unfortunately, the majority of the men of talent are tormented by the desire of becoming Ministers or, at least, Deputies. The Greek savans in general require schooling in social and political matters, and ought to pass some years in France and England in the study of English and French society. Assuredly there are, among the swarm of enthusiastic orators, many clever individuals full of devotion to the interests of their fatherland, and capable of understanding the first necessities of a country which possesses a university established on a grand scale, but no roads; an academy, but no water fit to drink. The kingdom produces olive oil and excellent wine in abundance; but fi railways should be established in Greece, and thus offer inducements for the exportation of these useful natural products before the introduction of commercial and manufacturing habits among the people shall have rendered them somewhat independent, the poor Hellenes will be compelled to live upon badly-seasoned vegetables and to drink stagnant water to digest them. But matters do not go on so rapidly in this beautiful country; a railway concession passes as an inheritance from uncle to nephew; the nephew takes a long time to reflect on the importance of his acquisition, and, fearful of a bankruptcy, hesitates, and continues to hesitate; so that, unless the Hellenic Government take the affair in hand, the execution of the railways will in all probability be deferred to the Greek calends. In this case neither the oils nor the wines will rise in price, and there will be no revolution in the culinary arrangements of the Hellenes, which are rather eccentric. I remember hearing of a certain English Lord, who once said to his cook, "I will allow you sixty pounds a month; but, should I ever be able to guess what it is you give me to eat, I shall immediately discharge you." The milord in question would have no difficulty in being satisfactorily accommodated in Greece, where it is impossible to guess the composition of the different dishes. As a general rule, the "comfortable" is wanting in Athens; but then there is consolation to be had in the splendour of the scenery and the beauty of the climate. One of the greatest existing inconveniences is the irregularity of postal communication: the state of things, however, in this respect, as in all others, will no doubt be promptly ameliorated, and thus justify the universal confidence in the reawakening of Greek prosperity under the mild and just government which it is evidently the desire of King George to inaugurate.

In the absence of public ceremonies to fill the pages of his album, our Special Artist busied himself with the preparation of the four interesting Illustrations engraved in our present Number, to the explanation of which I at once proceed, relying rather upon M. Mariani's pencil than upon my pen for their easy comprehension.

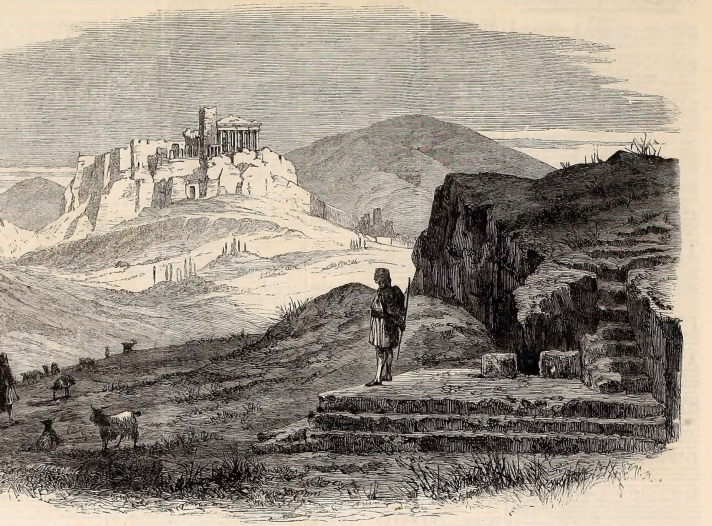
FEMALE TYPES AND COSTUMES.

During the late fêtes, our Artist made a collection of sketches of the most attractive costumes met with in the streets and environs of Athens. One of the Engravings at page 568 represents the principal female types and costumes of the people, the Grecian ladies having for the most part adopted the Parisian modes. Amongst the bourgeoisie a few women wearing the fez are still encountered, with which the velvet corsage, embroidered with silver or gold, is occasionally worn, together with a certain amount of crinoline. On the other hand, the bulk of the women have remained faithful to the vestments of their ancestors. The figure to the left of our group is a woman of Attica. The cloak, embroidered round the bottom, is usually of white cloth, the remainder of the costume being composed of cotton material. The women of a considerable portion of the Greek continent are dressed in like manner. Next to her, in the front, stands a woman of Hydra. The waistband is generally worn very wide by the common people, with whom it serves as a sort of pocket for holding the handkerchief, &c. Both men and women usually carry a chaplet in the hand. Between this and the first figure is caught a glimpse of an Athenian woman, having the fez for headdress, and a velvet corsage richly embroidered. The fourth figure (in the background) represents the headdress of the girls. The kerchief on the head is attached by means of their hair-plaits, which they roll in the form of a turban; the tresses come from behind the ears. The woman with her hands under her apron is a native of Chalcis, and to her left stands a woman of the wealthy classes of Hydra. Between these two may be discerned the headdress of a peasant-woman from Ipsara, the remainder of her attire resembling that of the Hydra female. The next figure to the right, in the background, is a woman of Marathon; she wears a small silk apron over a woollen costume, and a cotton veil. The seated figure is an Athenian woman: in common with most of the women who live in the old streets in the neighbourhood of the Acropolis, she wears a dark-coloured veil. The dress of the woman filling her pitcher differs but little from that of the first-named figure at the extreme left, and is met with at every step in Athens. The form of the pitcher is accurately depicted, and the manner in which it is carried is also shown.

MALE TYPES AND COSTUMES.

It is affirmed on very good authority that King George does not intend to wear the Greek costume habitually; and for this reason most of the authorities are preparing to abandon the national costume. But this change cannot be expected to extend beyond a limited circle; and, besides, it is to be feared that Greece might become less Grecian if the national attire were to undergo any serious modification; for, after all, "nationality" depends, to a certain extent at least, upon dress; and the Greeks could not well afford to undergo the loss of the insignia around which so much prestige has been thrown in the songs of the poets of all times.

Our Engraving at page 568 comprises the principal characteristic dresses of the male population of Greece, as well as some of its most remarkable types. The seated figure wears the costume of an Athenian citizen, which is that worn by the majority of the well-to-do inhabitants of the Greek continent. The one at his left hand represents a military chief with the rank of a General, whilst behind him is a military peasant of Etolia. At the right of the Engraving are two poor peasants, serving as National Guards. Near them stands, with his back to the spectator, a military peasant of Attica. At the extreme left is a youth from the workshops. Most of the working men in Greece wear this kind of trousers, which is of Turkish origin and always blue. The vest is usually of black or blue cloth. Next to him is a shepherd, holding in his left hand a most primitive crook.



THE ARRIVAL OF KING GEORGE AT ATHENS.

GREEK MALE TYPES AND COSTUMES—FROM A SKETCH BY OUR SPECIAL ARTIST.

GREEK FEMALE TYPES AND COSTUMES.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PREVIOUS PAGE.

VIEW FROM THE HILL OF THE PNYX, ATHENS.—FROM A SKETCH BY OUR SPECIAL ARTIST.

The figure behind him is a peasant serving as a National Guard, his headdress, like that of his fellow-peasants at the right of the Engraving, being a kerchief worn in the style of Salvator Rosa's bandits.

VIEW TAKEN FROM THE HILL OF THE PNYX.

The great interest attaching to this point of view arises from the circumstance that from the hill of the Pnyx most of the venerable monuments of Athens are visible. In the background, on the right, is Mount Hymettus, still famous for its excellent honey. Below it are the ruins of the Odeon of Herod Atticus, built under the Antonines; and above, the Acropolis, with the Parthenon. The rocky hill on the left is the site of the Areopagus, or Hill of Mars; the steps, and the seats of the judges, cut in the rock, may still be seen. Here the famous tribunal that dated from the time of Cecrops, and before which Orestes appeared to justify the assassination of his mother, held its sittings. The judges of the Areopagus assembled only at night. It was in front of this famous spot that St. Paul pronounced his discourse on the Unknown God.

Between the Hill of Mars, the Acropolis, and the Hill of the Pnyx formerly passed the Ceramicus, which was the richest quarter of ancient Athens. Of that nothing now remains; the site even is arid, and particularly the little valley covered with rubbish formed by the detritus of houses fallen to decay and dissolution. Upon the rock itself a few tufts of thorny herbs sometimes sprout forth, to be speedily devoured by skinny flocks of adventurous goats under the surveillance of a fierce-looking herdsman.

On the foreground of our Illustration is the Hill of the Pnyx itself, where the popular assembly used to be held. The tribune is drawn exactly as it remains at present. It is infelicitous in its position for having suffered less than most of the other celebrated monuments during the frequent bombardments with which Athens has been favoured. The Pnyx is simply the rock itself carved for the purpose of a tribune. The orator placed himself on the top of the block, to which access was given by six steps on each side. The ensemble was always very majestic and inspiring on account of the grandeur of the buildings within the view of the speaker and his auditory. Below the orator, on the third step, the clerks used to take their places, and were occupied in taking notes on their tablets, or in looking through the public records for proofs required by their master. Demosthenes, it will be remembered, discoursed from this rocky tribune, to the delight of the assembled multitude.

MR. SASSOON.

MR. DAVID SASSOON, Justice of the Peace for the Town of Bombay, was born, in the year 1792, in the renowned and once opulent city of Bagdad, where his father filled the responsible office of State Treasurer to the Provincial Government. Early in life Mr. Sassoon entered a banking firm, in which he remained until he was about thirty years old, when that frightful scourge of Persia—the plague—broke out, and, simultaneously, the administration of the Government became so insecure for life and property that he left Bagdad for Bushire, the seat of the British Residency, and after a short stay there a commercial engagement required him to visit Bombay. That visit made him determine upon removing his family to the capital of Western India, where he soon established himself as one of the most enterprising and respected merchants of the city; and in Shanghai, Canton, and Japan branch houses were also established and carried on by members of his family. From the commencement of his sojourn in Bombay to the present period he has never forgotten to aid those in needy circumstances; and it is a remarkable fact that a beggar of his tribe is rarely or ever seen asking alms in the streets, as they know they have only to seek relief at the hands of Mr. Sassoon to find it. This gentleman has for years identified himself with the British Government; and, as a proof of his stanch loyalty, it may be mentioned that when the news of the mutiny in the North-west Provinces reached Bombay, Mr. Sassoon, long regarded as the head of his community, addressed the Governor, proffering the services of the whole of the Hebrew community in a military capacity, which had the immediate effect of silencing many others, who had been wavering and speaking of the success of the rebels in a tone of exultation, to tender their services; and, at a public entertainment given by Mr. Sassoon on the occasion of her Majesty assuming the direct government of her Indian dominions, Lord Elphinstone, in proposing the health of his worthy host, said, "he should never forget that, when threatened with danger and whilst some were panic-struck, Mr. Sassoon and his family were the first to come forward in support of the British Government."

DAVID SASSOON, ESQ., ONE OF THE MERCHANT PRINCES OF BOMBAY.

In various acts of philanthropy he has devoted upwards of £100,000. Amongst the most notable of his public benefactions are the following:—The foundation and endowment of the Reformatory and Industrial Institution in Bombay; schools for boys and girls, with an annual allowance of £500; a synagogue at Bombay, and one at Poonah, with an annual allowance of £500 each; cemeteries at Bombay, Poonah, Shanghai, and Hong-Kong. Mr. Sassoon has also subscribed largely to the Sailors' Homes in Bombay and Hong-Kong; to the Famine Fund; to the Fund for Widows and Orphans of Officers Killed during the Mutiny; and to the Lancashire Relief Fund. His recent gifts consist of £1000 for an illuminated clock-tower in the Victoria and Albert Museum; £2500 towards an asylum for the relief of destitute invalids and other paupers in Poonah; and £15,000 for a general hospital in Poonah, the first stone of which was laid by the Governor, Sir Bartle Frere, on the 8th of October last, when his Excellency touched upon several appropriate topics, and took occasion to say—"You have shown, Sir, the sense you entertain of the blessings you receive under the British Government by training your children after the fashion of those classes to which her Most Gracious Majesty and the British nation habitually look for the men to be trusted in public as well as in private affairs. It is not every one of the native gentlemen of Bombay, even in these days of general prosperity, who can follow your example by purchasing an English estate [Ashley Park, at Walton-on-Thames, bought for Mr. Sassoon's eldest son] and enrolling himself among the landowners of England; but there are many who can do as you have done, in sending a son to an English school and college, there to learn not only what English gentlemen know, but what they feel and think on subjects of more permanent interest and importance than how the wealth of modern commerce is accumulated and distributed. I must apologise for touching on a subject so personal. I could not refrain from noticing the prominent and prevailing feeling of sympathy which you have ever manifested with the British Government and British people—a feeling which enhances manifold the interest which English people feel in all that you do. I will only add an expression of the feeling—in which every one here present will join me—that you may be permitted to see this building suitably completed, and fulfilling all your benevolent intentions as a permanent relief to suffering humanity; and that you may long be a living example of that blessing which the Royal poet of your own people has declared shall ever attend him who provides for the sick and needy."

*** *The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTH.

On the 1st inst., at Low Elswick, Newcastle-upon-Tyne, the wife of Henry Parker, Esq., of a daughter.

MARRIAGES.

On the 8th of October, at Victoria, Vancouver Island, by the Rev. William Sheldon Reece, M.A., Henry Reynolds Luard, Captain Royal Engineers, and third son of the late Peter Francis Luard, Esq., M.D., of Warwick, to Caroline Mary, eldest daughter of the late George Leggatt, Esq., of Guildford. No cards sent.

On the 28th ult., at St. Luke's, Chelsea, by the Rev. G. S. Drew, M.A., Incumbent of St. Barnabas, South Kennington, William Challis, jun., of 3, Lansdowne-terrace, Acre-lane, Brixton, to Georgiana, youngest daughter of William Vincent, of Durham-place, Chelsea, late of H.M. War Department, Pall-mall.

On Oct. 27, at St. John's Church, Christiansted, in St. Croix (Danish West Indies), by the Rev. Mr. Almon, Mr. Christian Battensen, planter, born in Denmark, to Miss Ellen Lang, daughter of the late Mr. Gilbert Lang, of Glasgow, and granddaughter of Major Lang, an old resident of St. Croix.

DEATHS.

On the 23rd of October, suddenly, at Lima, Peru, Mr. William Allpress, aged 33 years, third son of the late Mr. Joseph Allpress, of Canonbury, Islington.

On the 26th ult., at Otterwood Cottage, Hythe, Hants, after a long and painful illness endured with Christian piety and resignation, Mary, the second daughter of the late Thomas Figgins Medhurst, Esq., C.E., of Soho, London.

THE PLANETS and DOUBLE STARS seen distinctly by a new Telescope for £5, which will also distinguish the face of a sheep and features of a man four miles, the sign of a public-house five miles, shot marks upon a target two miles, and time by a church clock ten miles. This instrument is guaranteed in writing to perform the whole of the above, and to be equal in the most important respects to telescopes costing £70. It has a 3-in. superior achromatic object-glass, two eyepieces, &c., with portable metal tripod stand with jointed claw feet.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Persons are invited to apply for a diagram with full particulars, sent free. Powerful small pocket telescopes, opera, field, and general outdoor glasses.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free.—S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

SPECTACLES.—THE PATENT TINTED SPECTACLES are patronised by the majority of the Nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision. The adaptation of spectacles to imperfect vision by experienced persons is, indeed, of vital importance. One of the Firm who has had great experience and practice attends to this branch only.—S. and B. SOLOMONS, 39, Albemarle street, Piccadilly. Opposite the York Hotel.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

MAGIC LANTERNS and DISSOLVING-VIEWS on a recently-improved construction. A large assortment of slides, comprising the newest subjects, at greatly-reduced prices. Illustrated catalogue free by post for two stamps.—KEYZOR and BENDON, Wholesale Opticians, 50, High Holborn.

SLUGG'S ASTRONOMICAL TELESCOPES and Parallactic Stands, best object glasses.
Warranted to show Saturn's Ring, Jupiter's Belts and Moons, Nebulæ, Double Stars, &c., £3 10s.;
3¼ in., £12 10s.; 6¼ in., £85.
Full Particulars for One Stamp.
J. T. Slugg, 214 Stretford-road, Manchester.

SLUGG'S MICROSCOPES, the cheapest made.
New Giant size, £10 10s.; New Binocular, £5 5s.
Model Microscopes, 2 and 4 guineas.
Full Particulars for One Stamp.
214, Stretford-road, Manchester.

STEWARD'S NEW BINOCULAR FIELD-GLASS for INDIA.—The attention of military and naval officers proceeding abroad is especially drawn to this glass, which J. H. S. has constructed specially for use in extreme hot or cold climates, and with a view to stand rough usage on foreign service; the power, brilliancy of definition, and large field of view are unequalled. Price 3½ and 6 guineas. Catalogues post-free. Address—406, Strand, London. Sole appointed Optician to the National Rifle Association and Long-range Club.

BURROWS' BINOCULARS. These Field Glasses are noted throughout the world for their matchless quality. The highest authorities pronounce them
THE BEST.
Mounted specially for India, China, and all stations in the Tropics.

Also in Fancy Boxes in great variety.
DELICIOUS, ECONOMICAL, AND NUTRITIOUS.

HORNIMAN'S PURE TEA is choice and strong, moderate in price, and wholesome to use. These advantages have secured for this Tea a general preference. It is sold in Packets by 2280 Agents.

OSWEGO
PREPARED CORN,
for
Puddings, Custards, Blancmanges, &c.
Manufactured and Perfected by
T. KINGSFORD and SON,
of Oswego, State of New York.
It is the original preparation from the farina of maize, established 1848, commands the highest price from the trade, and offers the best value to the consumer.
It is a quarter stronger than any of the imitations, has a finer grain, and is more delicate.
The Oswego has the natural golden tinge, and not the chalk white produced by artificial process.
KEEN, ROBINSON, BELLVILLE, and CO.,
Garlick-hill, London.

KEEN'S GENUINE MUSTARD.
There are many qualities of Mustard sold.
Obtain Keen's Genuine Mustard and full approval is guaranteed.
FIRST MANUFACTURED 1742.
Sold by most Grocers from the Cask, and in 1lb. and ½lb. Canisters.
KEEN, ROBINSON, BELLVILLE, and CO.,
London.

LETTERS PATENT 1823. PRIZE MEDAL 1862.

ROBINSON'S PATENT GROATS is the most valuable preparation for making pure and delicate gruel. Modern chemistry has shown that this food is easy of digestion and rich in nutriment.
ROBINSON'S PATENT BARLEY makes a delicious custard pudding, directions for which have been given by Mons. C. E. Francatelli. It is appreciated as a non-inflammatory drink, is excellent for mothers nursing, and has long been used with great success for rearing children by hand.
KEEN, ROBINSON, BELLVILLE, and CO., London.

ALL Good Cooks and Careful Housewives use Symington's
PATENT PREPARED PEA FLOUR,
perfectly wholesome, and requires no boiling. Packets, 1d., 2d., and 4d.; Tins, 1s., 1s. 6d., and 3s. All Grocers, &c.—Works, W. SYMINGTON and CO., Bowden Steam Mills, Market Harborough.

CHEESE—STILTON in perfection.
HAMS—Small, first class.
BUTTER—Aylesbury, Fresh Daily.
CRAFT, Cheesemonger, Knightsbridge.

PRICE'S CHILD'S NIGHT LIGHTS are perfectly safe, and burn their time. The quality of these Night Lights can now be relied on.

SHERWOOD BED LIGHTS, Sixpence and Eighteenpence a Box. These candles are made to supply a want very generally expressed—a cheap, really good chamber candle. They will be found inferior only to "Price's Candles, which will not drop grease when carried," which are sold in Boxes, One Shilling and Three Shillings each.

GLYCERINE, which very simple tests show to be impure, is being sold on the statement that it is "in every respect equal to Price's." Most medical men prescribe PRICE'S GLYCERINE. Where purity is of importance, patients can ensure it by desiring to have their Glycerine in 1lb., 8oz., 4oz., or 2oz. bottles, with capsules over the stopper, marked "Price's Patent." Belmont, Vauxhall.

FOR THE HANDS, FACE, and LIPS, WYLDE'S ALMOND TABLET superior to Cold Cream, Glycerine, &c., price 6d. and 1s., of all Chemists and Perfumers; by post, two stamps extra.—LOWE and WYLDE, Chemists, Chelsea.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.
GLENFIELD PATENT STARCH,
awarded the Prize Medal, 1862.
This unrivalled Starch is
used in the Royal Laundry,
and pronounced by her Majesty's Laundress to be
the Finest Starch she ever used.
Her Majesty's Lace-dresser
declares it to be
the best she has tried,
and the above award by some of the most eminent
scientific men of the age
confirms its superiority.
WOTHERSPOON and CO., Glasgow and London.

COALS.—COCKERELL'S COALS, price 25s., cash. Central Office, No. 13, Cornhill, E.C.

DR. DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD-LIVER OIL,
prescribed by the most eminent Medical Men throughout
the world as the safest, speediest, and most effectual
remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S.,
President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES,
ANSAR HARFORD and CO., 77, STRAND LONDON W.C.

By the Composer of the "Harum-Scarum Quadrille."
S. BLACK, 351, Oxford-street, W.

CRAMER'S PIANOFORTE GALLERY, 207 and 209, Regent-street (the largest in Europe). The most varied selection of Pianofortes are to be found in this Gallery.
The quality of every instrument may be relied upon as at least equal to representation. Pianofortes of the very inferior class are carefully excluded from the stock. Every facility is afforded to exchange, without loss to the buyer, any time within six months, should an instrument of a higher class, or by a different maker, be thought desirable.
Pianofortes by every maker of eminence will be found in the Gallery.

CRAMER'S ENGLISH PIANETTE, 22 guineas.—Cramer, Wood, and Co. manufacture this capital small instrument. It has all the requisites of the best Pianoforte—check action, solid touch, agreeable and powerful tone. The case is of polished ash. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose in the key and worn in the hammer. In rosewood, 25 guineas; in walnut, 26 guineas.
Purchasers are particularly requested to observe that this instrument has not the common or single action, but the double or check action; and that Cramer, Wood, and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

CRAMER'S INDIAN PIANOFORTE. Cramer, Wood, and Co. manufacture for India a superior COTTAGE PIANOFORTE, in solid Mahogany, with metallic bracings and all other appliances necessary to resist the effect of extreme climates. Nothing has been left solely to the glueing. The mechanism of the Instrument as well as the Case has been secured throughout by screws. Unusual skill and attention have therefore been bestowed upon the manufacture, and they have obtained the highest commendations for their excellent quality of tone and durability.
Cramer, Wood, and Co. deliver these Instruments f.o.b., packed in cases lined with zinc, at any home port, for 50 guineas. Size:—Height, 3 feet 11½ inches; width, 4 feet 4½ inches; depth, 2 feet 1½ inch.—Pianoforte Gallery, 207 and 209, Regent-street, London.

THE NEW PIANOFORTE.—CRAMER'S Seven-Octave Semi-Oblique Pianoforte, 45 guineas in Rosewood and 50 in Walnut.
Advantages to the Pianiste.—Power and refinement of tone; susceptibility of touch; full scale of seven octaves.
Advantages to the Vocalist.—Height diminished to 4 ft. 8 in.; freeing the voice from interruption; width enlarged to 4 ft. 6 in.; affording increased convenience to the accompanyist, together with greater elegance of position.
In introducing this instrument prominently to the notice of the public, Cramer, Wood, and Co. may be permitted to observe that it is alike remarkable as regards power and quality of tone, firmness and elasticity of touch, durability of tuning, and the capacity to develop its resources. The tone may be forced by the powerful finger of the artist or drawn out by the less accustomed hand of the amateur. In the one case there is no harshness, and in the other its charmingly vocal qualities are called forth with little effort. The action, or mechanism, is of the very best description, being somewhat similar in its principle of construction to that of the semi-grand. The stringing is complete, there being three wires to each note, like the full grand. Cramer, Wood, and Co. guarantee these instruments for any reasonable length of time, and forward them to all parts of the country without risk to the purchaser, and at a very trifling cost.
Pianoforte Gallery, 207 and 209, Regent-street
(the largest in Europe).

PIANOFORTES by Broadwood, Collard, or Erard, for SALE or HIRE—At CRAMER'S PIANOFORTE GALLERY (the largest in Europe), 207 and 209, Regent-street.

SECOND-HAND PIANOFORTES. CRAMER, WOOD, and CO. have a number of INSTRUMENTS, by Broadwood, Collard, and Erard, at greatly-reduced prices.
It is often difficult for a purchaser to ascertain the precise state of a secondhand instrument, whether or not the hammers have been renewed, &c. Cramer, Wood, and Co. give this information without the slightest reserve, and warrant every instrument they sell.
207 and 209, Regent-street.

REPAIRING PIANOFORTES. CRAMER, WOOD, and CO. give great attention to this Department of the Business. The most skilful workmen only are employed. Every care is taken to renew defective or worn mechanism.
207 and 209, Regent-street.

TUNE YOUR PIANOFORTES by the YEAR: 15s., 20s., 25s., according to instrument. CRAMER, WOOD, and CO.'S staff of experienced TUNERS are well known to the Musical Public.
207 and 209, Regent-street.

HIRE of PIANOFORTES.—CRAMER, WOOD, and CO. Hire Pianofortes by the Night, Week, or Month, and take Yearly Contracts on very reasonable terms. A very large number of entirely new Instruments now ready to be sent out.
207 and 209, Regent-street.

PIANO MÉCANIQUE.—CRAMER, WOOD, and CO. supply Debain's Piano Mécanique. Any one can play upon it. Price 55 guineas. If with a keyboard, enabling it to be used by a Pianist like an ordinary pianoforte, 90 guineas. The instrument is very strongly made, and warranted to stand any change of climate.—201, Regent-street.

SIX-GUINEA HARMONIUMS.—CRAMER, WOOD, and CO. supply the best of this size that is manufactured. Unlike the ordinary Paris Instrument, it is put together in a substantial manner. The tone is charming in quality, and of remarkable power. Polished oak case.—201, Regent-street.

CRAMER, WOOD, and CO.'S GENERAL STOCK of HARMONIUMS is one of the most extensive and varied to be found in London. Prices from 6 to 100 guineas.
Secondhand Instruments of all kinds.
201, Regent-street.

CRAMER'S ARTIST'S CONCERTINA, manufactured under the immediate superintendence of Mr. Richard Blagrove. In purity of tone, delicacy of touch, noiseless rapidity of articulation, and general perfection of mechanism, these instruments are unrivalled. The vibrators are of tempered steel, and retain their perfect tuning in any climate. Price 12 guineas, including case.—Cramer, Wood, and Co., 201, Regent-street.

SECONDHAND PIANOFORTES. CHAPPELL and CO., have a large Stock of SECONDHAND PIANOFORTES for SALE, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, New Instruments of every description.
Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to Small Rooms, Yachts, Boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action and all the latest improvements.
Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

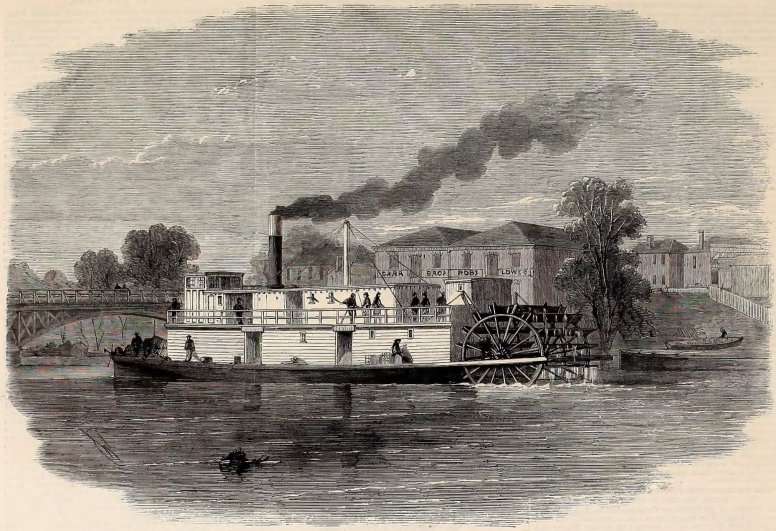
CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood or Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to many of the tuners. In elegant rosewood case, with full fret, similar in every respect to other instruments at 50 guineas, price 35 guineas; in walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut 60 guineas. This instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich; and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase) at the new Showrooms of
CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 60 guineas; other varieties at 25 and 35 guineas. Illustrated Catalogues of Pianofortes and Harmoniums upon application to
CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM, by ALEXANDRE, with five octaves, two footboards, and in oak case. These instruments are lower in price and superior to all other cheap Harmoniums. Descriptive lists on application to
CHAPPELL and CO., 50, New Bond-street.



SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 13 stops, 4 rows of vibrators, and Venetian swell, worked by the heel of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

THE SICCAMA FLUTE.—Old System of Fingering, with important improvements. These celebrated instruments are now solely manufactured, at prices varying from 6 to 18 guineas, by S. ARTHUR CHAPPELL, 214, Regent-street, from whom detailed price-lists may be obtained.

PRATTEN'S SEVEN-GUINEA PERFECTED CYLINDER FLUTE, old system of Fingering. This Instrument, the result of many years' experiments, possesses all the reputed advantages of the Cylinder Flute on Boehm's and other principles, without changing the familiar Fingering of the old 8-keyed Flute, in addition to which, through Mr. Pratten's ingenious improvements in its construction, the manufacturers are enabled to produce this instrument at one third of the expense of any cylinder flute hitherto sold.
An Illustrated Prospectus may be had on application to the manufacturers, BOOSEY and SONS, 24, Holles-street, London, W.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in walnut, French polished:—"We have had occasion to examine a new description of Pianoforte manufactured by Boosey and Sons, which combines quality and cheapness in a degree which has not previously been ever attempted. When heard it creates such surprise as would be caused by a child 'discoursing most eloquent' music with the voice of a full-grown man. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room; and the whole mechanism of the instrument seems to be firm and durable. No piano at so small a price has ever before been presented to the public."—Vide ILLUSTRATED LONDON NEWS, Feb. 28, 1863. This Piano is well adapted for the cabin of a ship or an extreme climate.—Boosey and Sons, 24, Holles-street, London.

THE LADY DALY, AN AUSTRALIAN RIVER STEAMER.

THIS vessel—of which we give an Engraving, from a photograph taken by Mr. Arthur Kipling—runs on the river Murray, Australia. She is the first steamer that has visited the port of the district for some years. The Centaur sailed from Melbourne on the 18th of July last, and arrived on the 24th at Port Elliott, where her cargo was transhipped to the Lady Daly, which completed her voyage up the Murray in less than six weeks. Especial interest attaches to this event, as it is looked upon as the beginning of a great inland trade in Australia by the navigation of its rivers.

THE WAR IN NEW ZEALAND: THE ALEXANDRA REDOUBT AT TUAKAU, ON THE WAIKATO RIVER, CONSTRUCTED BY A DETACHMENT OF THE 65TH REGIMENT.—SEE NEXT PAGE.

ILLUSTRATIONS OF THE WAR IN AMERICA.

BY OUR SPECIAL ARTIST.

MUCH of our information respecting the war unhappily raging in America comes from Northern sources, and is, consequently, more or less tinged with the particular views, not to say prejudices, of the writers. The accounts from the Southern section are, for the same reason, equally fallible. Yet they serve as correctives, and enable us to make a nearer approximation to the truth. Besides looking at events from a different standpoint, the writers are able to see much that to those of the other side must needs be blank, thus completing the picture and making clear what would otherwise be obscure. By their help we see both sides of the shield. It is, therefore, with peculiar pleasure we have received a batch of sketches, with accompanying details, from our Special Artist and Correspondent in the South—a pleasure heightened by its rarity. In a letter received by the mail-steamer only fourteen days ago, and full of numerous drawings which he has forwarded, but which we have not received. Among others he particularizes a sketch of the Battle of Chickamauga, the position of the Federal and Confederate armies in the Valley of Chickamauga, and two large views of encampments of Blockade-running has, of course, its failures. Some of our Correspondent's packages are doomed to the fate of the Confederate fall into the hands of the Federal cruisers, whence his sketches find their way occasionally into the pages of the illustrated journals of New York. In the latter case we must satisfy ourselves with the conviction that, though lost to us specially, our Artist's labours are not lost to the world.

Four of our Special Artist's illustrations appear in the present Number, and, in the accompanying descriptions, we borrow from his pen, in the order in which the Engravings they refer to stand in our pages. Three of them, it will be seen, have reference to the siege of Charleston.

SCENE ON THE TENNESSEE RIVER.—CONFEDERATE SHARP-SHOOTERS FIRING AT A FEDERAL TRANSPORT-STEAMER.

Since the Federal army has sought refuge in the entrenchments at Chattanooga the object of the Confederates has been to distrain its communications, and, if possible, to break up its line of supplies. With a view to this, a small force of picked men from General Longstreet's corps, under Colonel Wilcox, took up a telescope rifle, very suitable to the crags of Raccoon Mountain, overlooking a road on the other side of the Tennessee river, in use by the Federals. The position chosen was twelve miles in front of the enemy's lines, and, notwithstanding the risk, was not guarded. At the invitation of Captain Gorree, who was to take command of the party accompanied by Lieutenant Colonel Venable, they way of reaching the place and avoiding the Federal scouts was by taking the Indian trail through the forest heights. Some difficulty was at once at our destination and got the men hidden behind the rocks, when, fair up the gorge, could be heard distinctly the rumbling of approaching wheels. Presently emerged the leading file of the enemy's escort, followed by the first waggon. The order was not to fire until the open space in front of the last mule of the fifth team. At last came the word, and a score of sharp cracks leapt in deafening echoes from crag to crag, and a score of mules, with their teams, were thrown down, creating the most dire confusion. Then came such a stampede as was never before seen. The teams in front endeavoured to gallop on, but were prevented by one or more mules being dead in the traces, and the men had made an effort to turn, but got blocked by those in the rear. Crack! crack! still went the rifles with their two-to-one shooting, and all was in wild confusion, and overturned waggons. The escort, after firing a few shots in return, fled in confusion, followed by the exulting shouts of the Confederate riflemen.

THE FEDERALS SHELLING THE CITY OF CHARLESTON—SHELLS BURSTING IN THE STREETS.

The Federals as yet (writes our Correspondent on Aug. 21) have accomplished little or nothing as far as dash is concerned. In fact, General Gillmore, himself in his attempts on Battery Wagner and smarting at his frequent repulses, has demanded the surrender of the last-named work or has threatened to shell the city; and, in violation of all rules of warfare, he has turned his guns on unoffending women and children. The firing commenced at midnight, but, fortunately, did little harm beyond terrifying the ladies left in the city. One house only was set on fire. I send you a sketch of a scene I witnessed on the night-time of my own quarters. A fireman is running through the streets giving the alarm, and a watchman, thoroughly awakened, is taking both in a serious and his staff in the foreground. Fortunately, the gun burst after a few discharges. The distance was only 1,200 yards.

THE FIGHT FOR THE RIFLE-PITS IN FRONT OF BATTERY WAGNER, CHARLESTON.

During the last days of August the enemy made a great struggle for the possession of the Confederate rifle-pits in front of their own works. In their first attempt they were successfully repulsed; but on their renewal, the night after, they succeeded, according to the last conduct of some North Carolina troops, who were on picket. My sketch illustrates the first effort made to dislodge our troops, in which the Federals were defeated, with great loss. The entire garrison of Wagner, which is only a sandwork, never exceeded 1500, and this brave band defied the combined attacks of the Federal army and navy and an army of twelve thousand men.

THE INTERIOR OF FORT SUMTER AFTER A CONTINUED BOMBARDMENT BY THE SHORE-BATTERIES OF THE FEDERALS.

The Federal commander, General Gilmore, having succeeded in erecting batteries on Morris Island some time since, commenced the bombardment of Fort Sumter with 200 lb. parrotts at over a range of two miles and a half. The grand old work which did such good service on the 7th of April last was unable to reply, and the brave garrison was compelled to be silent spectators of the gradual demolition of its walls. I have frequently paid visits to the work since the bombardment commenced, and the inclosed Illustration will give you an idea of the severity of the shelling concentrated upon it. Every gun is dismounted, and nearly the whole of the parapet is swept away. The gorge-face is one mass of ruins, and the casemates scarcely afford shelter to the garrison. The fort will be held, however, as long as a brick remains; by the bayonet, if necessary. Such is the determination of General Beauregard.

HOLDING OUT AMONG "THE RUINS" OF FORT SUMTER.

In a letter published in the *New York Tribune* we find the following description of Fort Sumter, as it stood a few weeks ago :—

Who of those could recognize it in that forlorn-looking mass of rubbish to which the guns of a justly-incensed fatherland have now reduced it? On the extreme west corner, nearest to Charleston, are some faint indications of what it once was. A few square yards of masonry remain comparatively unhurt. Yet even here the parapet is knocked clearly away for a space of fifteen feet to the level of the floor on a lower stratum of brick. The casemates and upper shingles were visible a few days ago, and now the cloud of every description of shell, showering you more or less from every point of the compass, is rapidly diminished in height. The shots and shells pound away at the ruins with unabated fury, and in such full force that the entire day. All night long the northern in our two advanced works go on with their pulverizing practice. Now it is a couple of 13-inch or seven-inch mortars, so large are the projectiles, or the east face, or sea-wall, of Sumter that destruction has done its work. A considerable portion of the eastern wall, Fort Sumter—the Westminster, the Patapsco, the Catskill, and the Lehigh—have since Tuesday kept up the work of the 13-inch shells. Some of these fall short. Some of them go over, but they do their mark. But when and where they strike the effects are noticeable in the masses of granite which they hurl from the face of the wall and from the top of the work. A breach has been effected over which a storming-party could pass in a few minutes by daylight or darkness. The fort, though not gone by the fitting of a bag of powder, whose fault is a stamp to the city that the garrison will hold it, is dropping the ragged remnant of the flag round its frail staff in the only salute that can be given to the declining orb of day. The woods-de-sharpshooters are displaced, and no more crack their rifles visibly at the gunners in our works. The peeping pickets on the base, near the Charleston side of the fort, no longer pass inquisitively and lambly at us. They prevail gone into the vaults and embrasures of the fort, to undergo a process of slow incrimination, by the crumbling rubble falling over ground and upon them from above. All the awful and futile duty is there—to remain on this memorial of desolation, to suffer day but certain death, as the exemplars of a fortitude and tenacity unsurpassable by the cause that evokes and exacts from these men the sacrifice of their lives. About 30 lb. it is estimated, have been taken from the average height of Fort Sumter, except upon the east or "sea face," where not more than a half of the original structure remains. The flagstaff has been thrice shot away. The flag is pierced and mutilated almost beyond recognition, and the fold of white is no one, only portion of the starry cross remaining. Still do our patient, impassive gunners pound away.

SLAVES AT WORSHIP ON A PLANTATION IN SOUTH CAROLINA.

LINKED with our Special Artist's Illustrations of the War in America are, from another quarter, a set of sketches of rural scenes (see page 561), in which the owner of a cotton plantation, South Carolina, is, with his wife and children, engaged in Divine worship, surrounded by his slaves, in a state of almost patriarchal simplicity. In the character of the negro as developed in the Slave States of America the two most striking features are his capacity for moral detachment and fidelity to his master when kindly treated and his susceptibility to religious influences. This latter quality is carried in many cases into the region of fanaticism; but a deep, simple, and fervent piety characterizes a large portion of the slave population, especially those advanced in years.

The Illustration bearing the above title is from a sketch made in a rude chapel erected for the slaves on a cotton plantation near Port Royal (South Carolina), now in the possession of the Federal forces. The "plantation" was an old-fashioned, old Southern servant, a slave. He could read, but not write; and his extempore sermons, although sometimes marred by his profession for high-sounding phrases and long words (not always appropriate), were characterized by strong good sense and at certain rude native eloquence, often rising to the dignity of pathos, and admirably adapted to the comprehension and temperament of his audience. The Methodist persuasion is the one which finds most favour among the slaves in the Southern as well as among the free negroes in the Northern States.

NEW GRAND CROSS OF THE GREEK ORDER OF OUR SAVIOUR.

THE design of the new Grand Cross of the Order of Our Saviour (recently sent from Athens to her Majesty Queen Victoria) was kindly communicated to our Artist by M. Rota, the Italian painter, charged by the Hellenic Government with the execution. The cross is accompanied by a silver badge, similar to that of the French Legion of Honour, but with six portraits of our Saviour in the

NEW GRAND CROSS OF THE GREEK ORDER OF OUR SAVIOUR, RECENTLY SENT TO QUEEN VICTORIA.

middle. The Byzantine characters surrounding the portrait signify, "Thy right hand has saved us from the abyss." The fingers of the hand in the portrait are arranged so as to form the Byzantine letters placed above it, and which are an abbreviation of "Jesus Christ."

The insignia of this order (founded by the fourth National Hellenic Assembly, at Argos, in 1829) were modified by King Otho, who replaced the image of our Saviour by his own, thus depriving the sign characteristic of the order. On the other side, on which is the cross, is the following inscription, engraved in Byzantine characters :—"Fourth National Hellenic Assembly, 1824."

THE ALEXANDRA REDOUBT ON THE WAIKATO RIVER, NEW ZEALAND.

THIS redoubt, situated at Tuakau, on the Waikato river, is the first position which has been occupied by British forces on native land in the Waikato country. The high cliff on which it stands was seized on the 12th of July last by a detachment of the 65th Regiment, 300 strong, who at once set about constructing a redoubt on this commanding position. The Waikato at this place is 800 yards wide. The canoes on the river, shown in our Engraving, are manned by forty of the 65th, and were organised by Captain Swift, the Commandant, to keep the river clear of the enemy.

ECHOES OF THE WEEK.

AMONGST important sayings of celebrated men Earl Russell's "Rest and be thankful" will take prominent place. It fairly eclipses Lord Chatham's "Sugar, Sir Robert Peel's "What is a pound?" Lord Denman's "Mockery, delusion, and snare;" or Napoleon III.'s remark to the Austrian Ambassador, "There is a time when silence is an error"—which "error" was fully explained at Magenta and Solferino. But Earl Russell's confession of faith has peculiar interest, because it exactly illustrates the idea publicly formed of him years ago. Not that he has been idle, but that he has done nothing. His declamations are equal to any action, but in both he never advances an event. There are people who will diligently grind and polish away at their music or their pen for each to-morrow of the week, keeping them in the best possible order, whilst all their friends can see that they are fully prepared and accomplished. His Lordship is like them. He is a type of those men, in working trim, who never work to achieve. From such the blow may come at length; but when it comes it is usually quite ineffective. French authors used to have a system of announcing a book and producing it at their leisure. Last week, for instance, a popular advertiser thirty years since was the light, and no wonder that it fell somewhat flat. Just so do statesmen with the benefits of long experience to a long and promising career. And yet, of late, Lord Russell has been talked about as much as M. Nadar, who must be held to have soared far beyond the point of merely threatening an attempt. He has flung himself into the cause of Denmark, armed with a revolver, pointing a barrel at every member of the Germanic Confederation. Then, receiving a caution as to prudence, he resigned; but, resuming his position, announced that he was showing up the hate, half-sister to delay," and a hint that he could not be spared in the present crisis, he resumed his contented seat. At least, all this is said by the French journals, which probably have better sense than our own of judging of English affairs—the difficulty of seeing things immediately under our noses from being notorious; maybe, the more exiguous the nasal organ the more far-sighted the politician.

Thomas Moore's singular line—

The dry leaves quivering o'er my head,
Like man, unquiet even when dead—

is not so far removed from the common-sense as prosaic persons might suppose. Very frequently people—dead, at least, to all intents and purposes—become very unquiet; although, almost as often, they prove to be alive after all. Some time since, in this same vein, for purposes, it appears that Madagascar's King Radama II., who was duly killed some few months ago, was reported to be alive. Now he is dead in taking advice, has "come to life again," or, say he may have the benefit of the doubt, is dead. Probably the Madagascar news has been credited with a banquet which they have never enjoyed. After six months' rest, combined or not with thankfulness nobody can say, Radama is actually reported to have addressed a letter of congratulation to the Emperor of the French. What notice may be taken of this presumed document is not known, but probably none from, but it is natural to glance at the probability of the truth of the rumour. The late Archbishop of Dublin was reported to have left off all theological study when there was no proof of the existence of Napoleon Bonaparte; and surely the existence of a man so unknown, in comparison, as King Radama may be decked with the same properties. If, then, the existence of a man be doubtful, the fact of his death must be nearly incredible; and it must, therefore, be most appropriate to believe that he is human life after there has already been no proof of either birth or death. But something stronger than logic induced the Paris years since to sing a requiem over Lord Brougham. Nana Sahib is well known to have suffered in cold fresh at least as often as the Rani of Sirmoor, Scindia, or Dowlah. Even Mr. Lyall of Scotland was reported to have made an early flight from Flodden, with his pet chicken under him, having a sentimental link for every year of his life, and to have indulged in a pious journey to the Holy Land and a possible laugh at the Inns of Tunstall and Marmion. And people meet John Sadleir daily, and Fauntleroy suffered in effigy only, and many more distinguished felons have put in a lively motion, and their looks, when the street pipes down their throats, and escaped. Clearly, nobody of note is dead—not even Charlotte Corday, whose chest, indeed, at the assistant executioner's post-mortem insult. All good citizens will do well to their own private interests by homage, as soon as the Heralds, Dragons, Crosses, and Garters take up their positions there to proclaim her late insensate Majesty Queen Anne.

During the remainder of the recess it would be well for some legal or literary, or legal and literary M.P. to frame a new and comprehensive—and complete—if possible—copyright bill. Nothing can be worse than the present confusion, which is thrice confounded every week. The case of Longman *v.* Delahaid shows that an English dramatist can have no copyright in his own country for a piece originally produced in America, unless he has complied with a provision of an Act of Parliament which he cannot pretend to understand, and which must necessarily be inexplicable to most play-writers. This, of course, touches upon international law; but the whole subject is well understood by candidates for Parliamentary seats, because such candidates assume that their constituents understand something like laws, are competent to assist in framing others. No amateur suggestions are due here. It is sufficient to say that, on such a subject, a few Judges are likely to rule alike, and that, for example, Judges probably object to rule at all, but recommend that the matter shall be settled "out of court," as did Mr. Baron Bramwell in the case of Lord Byron *v.* Maxwell *v.* Mayhew. Apropos, Mr. Howard Staunton, whose celebrated chess experiences will not allow him to fight to be considered one of the pieces of elucidation, complains that a new edition of his Shakspeare is being produced by the publishers of his old edition with the title which makes it appear to be an entirely new work, and that his own new title is appended to the new edition, which contains no fresh emendation from his pen; his former publishers, we may mention, bearing the colour of his later and more elaborate labour. Lovers of books will agree that books should be called what they are, and that good-natured editors should have unrestrained advantage over their later inventions and descriptions. Literature is well represented in both Houses, and should find patrons and protectors.

Another equally new phase of the shortcomings of the copyright law has recently thrust itself at home, in a manner too slight to make strong resistance advisable; whilst at the same time several personal interests are strongly at stake. Two years since two new journals, published at the price of from a sixpence down to a halfpenny, and professing to be entirely original—published weekly, has sought five a pair of exceedingly clever "Cockney enigmas," in one of which the letter "e" is always made to take the place of "o," and in the other the letter "a" is made to enter itself in exact inverse ratio to the requisitions of the English language. These "Cockney enigmas" are taken from Cruikshank's Comic Almanac of a quarter, or thirteen years back. Not worth an Act of Parliament in themselves, they are sufficiently valuable to show how copyright laws are set at defiance. It need not be said that the editor of a journal is in no way bound to remember everything that has gone before his time; but, in respect to the culprits who copy and profess originality, it would be as well to make some punishment for them sharp in proportion to the ease with which they can commit their favourite offence—just as, years since, the law was severe in the case of sheep-stealing.

Rich gold mines are said to have been discovered near Coolgoolie, Cassia Road.

CURRENT LITERATURE.

History of England, from the Fall of Wolsey to the Death of Elizabeth. By James Anthony Froude, M.A. (Vols. vii and viii. Longmans.) The reading world will hail with delight the appearance before them of two more volumes of Mr. Froude's great work. Of novels, sensational and unsensational, they must have had enough, and more than enough; and they will find it refreshing to turn for a while from fiction to fact, from fancy to history. They need not fear a dearth of romance, for many are the romantic features of history, and the expressiveness of those features suffers no detriment from so powerful a limner as Mr. Froude. It is to the second of the two volumes which have been lately issued that most readers will turn with the keenest interest; for there they will find the well-known names which, above all others, romance and mystery have invested with a charm that never fades and shrouded in a darkness that will ever be impenetrable. They will read once more of Mary Stuart; her loves, her sorrows, and, alas! her guilt: they will ponder once more upon the fate of Darnley, and they will mourn once more the sweet singer, though they have no pity for the intriguer, David Rizzio. And these are themes which never tire—themes upon which one could harp for ever. The spirit of mischief and folly, with ruin, and insurrection, and murder in its train, never more plainly guided the councils of Princes than during that fatal July, 1565, on the evening of the 28th of which it was announced by flourish of trumpet and public proclamation that, "the Queen of Scots having determined to take to herself as her husband Henry, Earl of Ross and Albany, the said Henry was thenceforth to be designated King of Scotland, and in all acts and deeds his name would be associated with her own." The silence which fell upon the listening crowd was ominous, and the single voice—the voice of Darnley's father—which cried "God save his Grace!" added mockery to the omen. The offspring born of that marriage were—

> sword and fire,
> Red ruin, and the breaking up of laws—

offspring whose legitimacy is enveloped in less doubt than that of James VI. Well might the Queen, in the spirit of unconscious prophecy, appear at the bridal altar "in a mourning dress of black velvet." First came the uprising of the Protestants; but this her energy speedily put down. Then followed the memorable 9th of March, 1566, when Holyrood Palace was the scene of a tragedy, in which nobles were assassins and a "misknown knave" their victim. Mr. Froude tells graphically the often-repeated story. We see the unsuspecting little supper-party—the Queen on the sofa, the minstrel in a chair opposite to her, and the loose Countess of Argyll on one side. Suddenly the curtain which hung before the boudoir is raised, Darnley enters, seats himself close by his wife, and salutes her with a traitor kiss. Again the curtain rises, and, fit forerunner of a bloody deed, a ghastly figure stands out in relief; a corslet glimmers through the folds of a crimson sash, a steel cap flashes fitfully, and beneath the cap, pale as a ghost, frowns the death-stamped face of Ruthven. He points his finger at the scared Italian, and, in a voice as hollow as the grave which yawned for him, answers Mary's question, "What means this intrusion?" with the simple but doubt-inspiring words, "Let yon man come forth; he has been here over long." A few moments elapse, and the victim is in his murderers' clutches; the voice of Orpheus could not save him then; even Mary Stuart sues for him in vain; in vain he clings to his mistress's robe, the rough hands of Douglas and Falconside are upon him, the dark followers of Morton pour into the room, and in a little space a mangled corpse, pierced through and through with sixty wounds, lying unheeded at the foot of the staircase, is recognised by a servant as David Rizzio. But a darker deed was to follow this, in which Mary Stuart should play the part of traitress. So, at least, it has been whispered, and so Mr. Froude undoubtedly believes. She had certainly threatened to be revenged on Darnley for his share in the murder of David Rizzio; and from the date of that murder the disgust and contempt which she had already conceived for her dastard husband had certainly been reinforced by a deadly hatred. Had the crime by which Darnley came to his end been perpetrated exactly twelve, instead of eleven, months after the death of Rizzio, there would have been exhibited a neatness, propriety, and affectionate remembrance so peculiarly feminine, that no impartial person could have resisted such testimony. Mr. Froude relies, to a considerable extent, upon the evidence of what are called the "casket-letters," which are the letters of Mary Stuart to Bothwell. The authenticity of these letters has been doubted; but Mr. Froude, for weighty reasons, assumes at this period of his history their genuineness, reserving discussion thereon to "a future volume, in connection with their discovery." To some minds this course may seem objectionable; but, as Mr. Froude gives due warning, one is disposed to acquiesce in his arrangement, which is more favourable than any other would be to chronological order and uninterrupted succession of events. The tender sentiment with which the subsequent sorrows of Mary Stuart have caused her memory to be associated has, in former times, pleaded powerfully in her favour against very damning evidence; but it is just possible that the style of novel which has been lately in vogue may, in obedience to that extraordinary process of Providence which extracts good even from evil, contribute to the establishment of a truth by familiarising the public mind with the idea of a woman at once most fair and most foul, who could caress and wheedle a husband to his doom, though it sickened her to touch, to sit by, to see him; and who could all the while write letters to her lover describing the loathsomeness of her husband's disease. That lover, of course, was Bothwell; and the recollection of him has led Mr. Froude to make these remarks:—"Courage, strength, and a readiness to face danger and dare crime for their sakes attract some women more than intellect, however keen, or grace, however refined. The affection of the Queen of Scots for Bothwell is the best evidence of her innocence with Rizzio." One would be inclined to say that, if it be so, the best is bad, as will appear from a note (at p. 254) alluding to the possible parentage of James VI. Nor is the fact insignificant that the intimacy with Rizzio preceded those days when Bothwell and danger were ever with her; that woman in the hour of ease differs from woman in the hour of peril; and that there may be sufficient inclination without love. There is a saying, "Quand on n'a pas ce qu'on aime, il faut aimer ce qu'on a;" and Mary Stuart believed in French. The second of the two volumes, moreover, is especially interesting, inasmuch as the last chapter is devoted to a subject which has a fascination for every Englishman. The purpose of the chapter is "to trace the first movements of the struggle which transferred from Spain to England the sovereignty of the seas; the first beginning of that proud power which, rising out of the heart of the people, has planted the saplings of the English race in every quarter of the globe, has covered the ocean with its merchant fleets, and flaunts its flag in easy supremacy among the nations of the earth." There, too, will be read an account of the first slaving voyage of John Hawkins, to which may be traced back through three centuries of spreading Christianity, of advancing civilisation, and of African slavery, during which the negro has not ceased to be deprived of that personal liberty which is his birthright, the rending asunder, at any rate for a time, of a mighty Republic.

Life: Its Nature, Varieties, and Phenomena. By Leo H. Grindon. (1 vol. F. Pitman.) There is a modest spirit pervading the preface of this book which recommends it strongly to the philosophical reader. He will find in it much thought and much reading: there is plenty to think upon, plenty to study, plenty to entertain. Physiology and psychology are its subjects, and they are treated in a manner, if not perfectly satisfactory, certainly unobjectionable. There is in it no offence, so far as we have seen, against any moral or religious feeling, and offences of that kind are the chief stumbling blocks in all physiological and psychological publications; and the fact that it has reached a third edition is sufficient proof that its merits are not unappreciated. We cannot, however, let pass without protest the rendering of the words "te loquor absentem," which are translated "thee I talk *to* far away," whereas they mean, according to all the rules of construing impressed upon us in early days by the cane and in later years by comparison of passages, "thy absence is my constant theme," or, "thee I talk *of* absent," to be baldly literal.

Diary of a Pedestrian in Cashmere and Thibet. By Captain Knight. (1 vol. Richard Bentley.) Thomas Moore, whom M. Jaquemont, in a fit of disappointment fatal to French politeness, calls "a liar and a perfumer," has described the Vale of Cashmere as a garden of the brightest roses that ever grew in terrestrial soil, with temples, and grottoes, and fountains "as clear as the love-lighted eyes that hang over their waves." All these delights, therefore, Captain Knight and a comrade, having obtained six months' leave of absence from the heat and dust of India, started in May, 1860, to explore. They seem to have considered that there was some ground for the Irish poet's extravagancies; but with respect to the "love-lighted eyes," Captain Knight compromises by presenting a portrait of Gûlabie, a Cashmerean woman, that readers may draw upon their fancies for an idea of what the living reality must be. The book is written in a pleasant, easy style, and is illustrated by several engravings of different degrees of excellence, some coloured and some uncoloured.

My Miscellanies. By Wilkie Collins. (2 vols. Sampson Low, Son, and Marston.) The author of "The Woman in White" and of "No Name" has had reprinted and published in two volumes a collection of articles contributed by him to *Household Words*, and perhaps to other periodicals. The two papers which will attract most attention are probably those entitled respectively, "To Think, or Be Thought For," and "Dramatic Grub-street," inasmuch as upon their first appearance they provoked both private and public remonstrance, and they are now reprinted because Mr. Collins has seen no reason to abandon the convictions the expression of which called down upon him the aforesaid remonstrances. It is hardly to be supposed that the present publication should add much lustre to the author's brilliant fame, but it is useful as a sort of meter by which one may measure his prodigious growth.

INDOOR AMUSEMENTS.

WHISK—WHIST AND SWABBERS—RUFF AND HONOURS—SLAM AND TRUMP.

THE array of names that stands at the head of this article shows through what changes the best of card games—whist—has passed to its present perfection. The simplest and earliest form of the game was trump, also called ruff. Even now "to trump" and "to ruff" are used as convertible terms. In the old play of "Gammer Gurton's Needle" (1550) occurs an early mention of the game of trump. "We be fast set at trump, man, hard by the fyre." In Decker's "Belman" trump is included among the games at which "deceipts (are) practised, even in the fayrest and most civill companies." The method of play at trump is lost. Antiquaries are of opinion that it was very like whist, the modern game being only improved from it. Mr. Douce, in his "Illustrations," says it was played by two against two, and sometimes by three against three. Cotton, one of the earliest writers on card games, says that "Ruff and honours (alias slamm) and whist are games so commonly known in England, in all parts thereof, that every child almost of eight years old (!) hath a competent knowledge in that recreation, and therefore I am unwilling to speak anything more of them than this, that there may be a great deal of art used in dealing (!) and playing at these games, which differ very little one from the other." Whist and swabbers seems to have been only an alias for ruff and honours.

Numerous as were the games at cards in vogue from the era of primero, the first card game of which we have any account, down to that of whist—that is, from about 1490 to 1630—whist only has survived to us. The dates given are those of the earliest occurrence in documents of the names of the two games. Primero, trump, post-and-pair, noddy, poor and rich, maw, sant, gleek, lanterloo, codam, bassett, and many others have all fallen into disuse. From this we may infer the vast superiority of whist to all these games. Whist is now very much played, both at Court and elsewhere, and that especially during the winter months. The modern game is, no doubt, much more refined, and consequently more enjoyable than any of its prototypes. The vitality of the game is, no doubt, due to its intrinsic merits; though we shall not be far wrong in ascribing a portion of the impulse lately given to the game to the appearance of "Cavendish" on whist (Bancks Brothers, 12, Glasshouse-street, Regent-street, W.). Cavendish is unquestionably the most remarkable whist-book since Hoyle. It brings us face to face with the modern game, and teaches it so far as it can be taught. The laws, too, being now added, the book may be regarded as the standard authority. Both laws and principles are handled with the same concise and perspicuous vigour. The aim of the writer seems to have been to bring into closer relation the disjointed directions for play, hitherto scattered confusedly in treatises on whist. He has reduced the "principles" to a "harmonious whole," and has succeeded in vindicating more than ever the scientific claims of whist. It may be observed, that many writers on whist have been content to take the authorities preceding them as the basis of their superstructure, merely altering the arrangement and introducing new examples, but not originating fresh *methods* of instruction. It is here that the peculiar ability of Cavendish is displayed; this is his distinctive feature. He argues from principles to cases, whereas his predecessors, including even the immortal Hoyle, have all argued from cases only, and have left the principles to take care of themselves. By way of illustration of cases, Cavendish carries out the very original idea of recording hands as they have occurred in actual play, just as is done with chess games. Brevity has been studied, but not in such degree as to prevent the principles from being easily intelligible. The high character of whist is enhanced by the fact that it has no capricious rules, it is simplicity itself; yet, to be well played, it requires a greater exercise of judgment than any other game. We commend Cavendish heartily to whist players.

Return we now to some of the more ancient card games. Primero, fashionable in the time of Elizabeth, was probably of Spanish origin, and was perhaps introduced into England by Catherine, the wife of Henry VIII., who was a Spanish princess, or more probably by her retinue; for she herself seems to have preferred gleek, if we are to place credence in a manuscript preserved in the Royal library.

Primero, in French *prime*, is described by Barrington in the *Archæologia*. Each player had four cards dealt to him; the seven was the highest, and counted for twenty-one; the six for eighteen; the five and ace each fifteen; but the two, three, and four for their respective points only. The knave of diamonds was commonly fixed upon for *quinola*, which the player might make what card he thought proper. If the cards were of different suits, the highest number was the primero or prime; but, if they were all of one colour, he that held them won the flush. Sir J. Harrington says in one of his epigrams of a player at primero that

> At first he thought himself half way to heav'n
> If in his hand he had but got a sev'n.

The game was in high fashion. Gardiner says that he left Henry VIII. "at primero with the Duke of Suffolk." It was reckoned a gambling game. In Greene's "Tu Quoque" this passage occurs, "Primero, why, I thought thou had'st not been so much gamester as to play at it." In J. Florio's "Second Frutes," a very rare book, published in 1591, the following description of the game occurs:—"S. Go to, let us play at primero then. . . .' A. 'What, be these French cardes?' S. 'Yea, Sir, doo not you see they have clubbs, spades, dyamonds, and hearts?' A. 'Let us agree of our game. What shall we plaie for?' S. One shilling stake and three rest.' A. 'Agreede, goe to, discarde.' S. 'I vye it; will you hould it?' A. 'Yea, Sir, I hold it and revie it; but dispatch.' S. 'Faire and softly, I praie you. 'Tis a great matter. I cannot have a chiefe carde.' A. 'And I have none but coate (court) cardes.' S. 'Will you put it to me?' A. 'You bid me to losse.' S. 'Will you swigg?' (probably yield, or throw up.) A. ''Tis the least part of my thought.' S. 'Let my rest goe, then, if you please.' A. 'I hould it. What is your rest?' S. 'Three crownes and one third, showe. What are you?' A. 'I am four and fiftie; and you?' S. 'Oh, filthie luck; I have lost it one ace.'"

Gleek was played by three persons. The deuces and trays were thrown out of the pack. Each hand consisted of twelve cards, dealt by fours at a time, the remaining eight being left for stock. Seven of the stock might be purchased by the players, the eighth was turned up and belonged to the dealer. The common stakes were farthing, halfpenny, or penny gleek, "which in play will amount considerably." In Greene's old comedy, previously quoted, one of the characters is a spendthrift, who will not condescend to play lower than half-crown gleeks. The cards had curious nicknames. The ace was called tib; the knave, tom; the four of trumps, tiddy; the five of trumps, towser; the six, tumbler. The player who held tib, tom, or tiddy was paid a prize of so many times the stake or gleek. There were other prizes for a quatorze (called a mournival) of kings, queens, or knaves, and for three of any of those cards (called a gleek). The following not very clear directions for play are given in "The Compleat Gamester":—"Here note that twenty-two are your cards (i.e., that you are to endeavour to score to twenty-two); if you win nothing but the cards that were dealt you, you lose ten; if you have neither tib, tom, tiddy, king, queen, mournival nor gleek, you lose, because you count as many cards as you had in tricks, which must be few, by reason of the badness of your hand. If you have tib, tom, king, and queen of trumps in your hand you have thirty by honours—that is, eight above your own cards, besides the cards you win by them in play. If you have tom only, which is nine, and the king of trumps, which is three, then you reckon from twelve, thirteen, fourteen, fifteen, till you come to two-and-twenty; and then (?after which) every card wins so many halfpence, pence, &c., as you play'd for. If you are under two-and-twenty, you lose as many." The laws of gleek are given at large in "Wits' Interpreter," which was published in 1662 and enlarged in 1670, with directions for playing the courtly games of l'hombre, picquet, gleek, and cribbage. The account is too long for insertion. It is cited here because games for three are rather scarce. The forgotten game of gleek might easily be recovered from existing treatises.

Maw was a fashionable game in the time of the Stuarts. It seems to have followed primero. In a pamphlet, preserved in the British Museum, entitled "Tom Telltroath (tell-truth); or, a Free Discourse touching the Manners of the Time," James I. is satirised for his indolent fondness for maw:—"In the very gaming ordinaries, where men have scarce time to say grace, yet they take a time to censure your Majestie's actions. They say you have lost the fairest game at maw that ever King had for want of making the best advantage of the five finger (five of trumps, the highest card at the game). That your owne card holders play bootie, and give the signe out of your owne hande." A very similar game is still played in Ireland, under the name of spoil-five.

Later than any of these came ombre, a game very like tredille. A political work, called "The Royal Game at Ombre," was published in 1660, and "Wits' Interpreter" in 1662. This was the time of the arrival of Catherine of Portugal, the Queen of Charles II. The game is of Spanish origin, and no doubt an impulse was given to it by the event of the Queen's arrival. Waller has a poem "On a card torn at ombre by the Queen." Ombre means *El Hombre*, or the man. Seymour says, "It is an improvement of a game called primero, formerly in great vogue among the Spaniards."

Ombre was afterwards displaced by quadrille, and that in its turn by whist and its congeners, the names of which we have placed at the commencement of this account. Whist has remained *the* game for a hundred and twenty years, and it seems likely to continue in undisturbed possession of modern cardrooms.

TRINITY CHURCH, KNARESBOROUGH.

THIS church is a substantial and beautiful building, well designed in what is called the First Middle Pointed style of architecture, and is calculated to accommodate 800 persons. About seven years ago it was so far completed as to be consecrated and opened for Divine service; but, additional funds having been obtained, a beautiful tower and spire have just been added.

The church consists of a nave of six bays, with side aisles and north porch, and a fine chancel with vestry and organ chapel on the north side. The east window has recently been filled with beautiful stained glass by Hardman, in memory of the late Prince Consort. The chancel is separated from the nave by a lofty arch, and the slender columns between the nave and aisles are little or no obstruction to the sight; but, with the clerestory above them, the arcades are exceedingly effective in appearance. Throughout the interior, the fine proportions of the building and the good arrangements of the several parts are very attractive features; and, the church being particularly constructed for sound, the congregation can hear very well with comparatively little exertion to the clergyman officiating.

The tower, which has just been completed, stands engaged at the west end of the north aisle, the lower part forming a baptistery, opening by large arches into the church. The upper part of the tower, forming the ringing-loft and belfry, is very effective, having large couplet windows on every side, with shafted jambs and mullions, and filled with good tracery. At the top of the tower there is a deep moulded cornice, with carved corbels underneath, immediately above which springs a lofty and beautiful spire, with high broaches at the angles, and four traceried spire-lights. A moulded band with pierced quatrefoils relieves the surface of the spire about mid-height, without at all interfering with the beauty of the outline. There is also a richly-gilt ornamental cross surmounting it, at the height of 160 ft. from the ground, and the whole forms a conspicuous and ornamental object to the country round.

Mr. George Wilson, of Knaresborough, builder, undertook the contract for completing the tower and spire at about £700—making the total cost of the church about £3800. Mr. Jos. Fawcett, of Sheffield, is the architect.

At a sale in Paris, last week, two old china vases fetched £320.

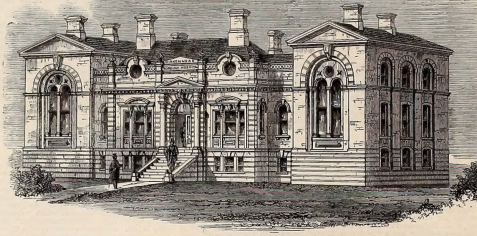
The Queen, upon hearing of the retirement of Mr. Charles A. Saunders from the offices which he had so long filled on the Great Western Railway, has marked her satisfaction with his arrangements for the comfort and convenience of the Royal family, both in his capacity of secretary and of general superintendent, by the presentation of a handsome testimonial, inscribed, "From the Queen." This Royal gift, consisting of an épergne of silver, bearing an appropriate inscription, was accompanied by a letter from Sir Charles B. Phipps, expressing, by her Majesty's command, entire approval of the company's arrangements for her comfort, and her regret for the loss of Mr. Saunders's services.

THE BIRKENHEAD BOROUGH HOSPITAL.

THE want of a hospital in Birkenhead having been demonstrated by the frequency of accidents in the numerous shipbuilding yards and other works, and the inadequacy of the house in Hamilton-street hitherto used for the purpose, Mr. Laird, M.P., determined, about two years ago, to present the borough with an institution adapted in every respect to the requirements of the district. The cost was estimated, exclusive of the land, at £5000, and this sum Mr. Laird placed at the disposal of the committee. The site was purchased from the Town Commissioners for £500, by Mr. Brassey, the railway contractor. Mr. W. Scott was selected as the architect, and that gentleman, resolving to render the edifice as perfect as possible, not only studied the works of Miss Nightingale and other authorities on hospital management, but personally inspected the principal hospitals in the United Kingdom and on the Continent. The result is a building combining the most approved sanitary requirements with economy of construction and the greatest facilities for efficient management. The first stone was laid on the 24th of November, 1862, by the Marquis of Westminster, and on Saturday week Mr. Laird formally handed over the building to the trustees and committee.

The hospital is situated in Livingstone-street, close to the main entrance to the public park. The style of architecture is Italian, and the materials brick and Stourton stone. As much importance is attached by the best authorities in the construction of hospitals to the use of non-absorbent ingredients for the walls, ceilings, and floors, the walls and ceilings of the wards and the operating-room are covered with Parian cement, and the floors laid with polished oak. The stairs are of stone. The wards, of which there are five, have windows on each side, and at the end another, which, if required, can be opened at night for ventilation without causing a draught upon the patients. The nurses' rooms are at the entrance end of each ward, so that no one can enter or leave the ward without being seen, while the nurses themselves are readily overlooked by the matron. There are bath-rooms, lavatories, and other rooms for the patients at the opposite end of each ward, quite isolated, and thoroughly ventilated. There is also a scullery attached to each ward. The four sick wards are in the wings, two on each floor, so that there is a complete separation between the hospital proper and the offices; the boardroom, the apartments of the matron and the house-surgeon, porter's room, kitchens, &c., being in the central portion of the building. Here, also, contiguous to the house-surgeon's parlour and conveniently near the entrance, are the accident-ward and operating-room. Lifts are provided for raising coals, &c., from the lower to the upper stories; and hot and cold water are laid on in all the wards, kitchens, sculleries, &c.

The building is so planned as readily to admit of such future



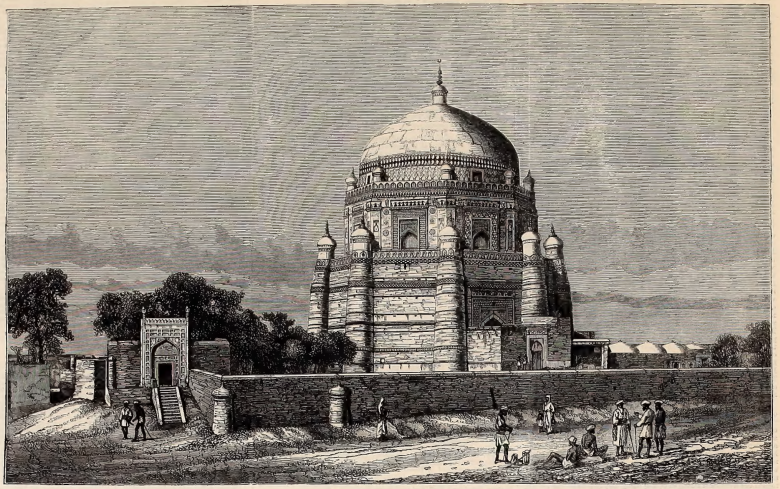
extension of the wards so to double or treble the number of patients who may be accommodated, the administrative portion of the hospital being so arranged as to be readily adapted for a much larger number than it is now requisite to provide for. There is a spacious airing-ground for patients in the rear of the building, and a still larger area in front, while the southern windows of the hospital overlook the public park, embracing an extent of 180 acres. There is a wide road between the hospital and the park, and a spacious street on each side, so that the essential requirements of air and light are amply provided for. It will be seen from this description that Mr. Laird has done much more for the institution than is implied in the mere gift of the money for the erection. His instructions to Mr. Scott were to make the building as perfect as possible for its size; and this aim has been realised in the completest manner. The value of the gift, munificent as it is, has thus been greatly enhanced by the steps taken, in the selection of the site, and the plan and construction of the fabric,

TRINITY CHURCH, KNARESBOROUGH.—SEE PRECEDING PAGE.

to secure the best possible arrangements for the suffering poor of Birkenhead and its neighbourhood. Mr. Laird has been one of the most liberal benefactors of the borough; but no other of his numerous acts of beneficence will do so much to "keep his memory green" as the gift of the new borough hospital.

The inhabitants of Birkenhead, wishing to express in some public way their appreciation of Mr. Laird's munificence, entertained him at

NEW HOSPITAL AT BIRKENHEAD, BUILT AT THE COST OF MR. LAIRD, M.P. FOR THE BOROUGH.



the Music-hall, on Monday week, when 150 gentlemen sat down to dinner. Lord Richard Grosvenor, who has been a liberal contributor to the furnishing of the hospital, was among the guests.

MIDDLE-CLASS SCHOOL AT CRANLEY, SURREY.

On Wednesday week the Archbishop of Canterbury, assisted by the Bishop of Winchester, laid the foundation-stone of the Surrey County Middle-class School at Cranley, near Guildford. The object of the institution, as stated in the prospectus, is to supply a want long felt in the county—that of "a sound and plain education, based on the principles of the Church of England and on the public-school system, for the sons of farmers and others engaged in commercial pursuits." The building is to be erected near a proposed station of the Guildford and Horsham Railway, where eight acres of land have been secured. It will accommodate 100 boarders, and will be so built as to be capable of enlargement if necessary. The sum of £4000 has already been raised towards the erection of the building; but £9000 are required to complete the work. After the ceremony had been concluded the Archbishop addressed those present. He said that about fifty years ago there had been a great movement for the improvement of the education of the labouring classes. At that time the National Society was founded, and the result had been that 12,000 elementary schools aided by that society are now in existence. Some few years afterwards our public schools adopted various improvements, though the ancient classics remain still the standard and staple of instruction. Then the number of those who were desirous of profiting by the increase of public-school education became so great that it was found necessary to open other seminaries. The consequence was that Marlborough and Wellington Colleges and Rossall School were founded, all of which carried on their operations on the public-schools principle—a principle, he might venture to say, which tended to stamp the character with those qualities which enable and fit a man for taking a lead in the higher walks of life. It seemed well that institutions conducted upon such principles should be multiplied. Meanwhile, it was found that there was no provision made for a wide stratum of society, between those who are profiting by the public schools and those who avail themselves of the assistance afforded by our national-school system. To provide for the wants of this class, institutions similar to that of which the foundation-stone had just been laid had been founded in various parts of the country. It was his good fortune not long since to be present at the anniversary of one in the west of England. There he distributed the prizes, and there he had the pleasure of seeing, in a county thinly inhabited, eighty youths who are being benefited by the soundest education, with respect to the moral and religious element, that he could well conceive. What interested him most particularly was to see the fathers and mothers of the boys assembled there taking the liveliest interest in all that took place, and to find, on conversing with them, that they most thoroughly appreciated the advantages which the forethought of their neighbours had provided for their children. That institution, as well as others, had been successful, and contained as many as 300 scholars. He hoped that their efforts in Surrey might be attended with similar success. Scholars would be assembled there to receive a sound education, and a moral and religious teaching in conformity with the doctrines of the Church of England. He earnestly hoped that secular and religious learning would never be disintegrated, and that the scholars of that school would never suffer from such a calamity.

THE ARCHBISHOP OF CANTERBURY LAYING THE FOUNDATION-STONE OF THE SURREY COUNTY SCHOOL AT CRANLEY, NEAR GUILDFORD: HIS GRACE ADDRESSING THE ASSEMBLY.

THE ROOKUM ALUM MOOLTAN.

THE ROOKUM ALUM, MOOLTAN.

THE Rookum Alum is a large pagoda, or mosque, in one of the angles of the fort at Mooltan. It is a handsome structure, and beautifully inlaid with various coloured stones and porcelain. It is supposed to be a thousand years old, and contains the graves of Rookum Alum (over which there is a large canopy) and of his descendants, amounting in all to many hundreds. The building is considered sacred by the natives, and thousands of pilgrims resort thither—so much so, that certain restrictions are imposed to prevent too many having access to the interior of the fort at a time, for fear of any attempt at a surprise. The fort is garrisoned by two companies of British soldiers from the regiment quartered in the cantonment, which is about two miles distant. The chief object of interest inside the fort is the monument erected over the grave of Vans, Agnew, and Anderson, who were so foully murdered by Moolraj. The accompanying Illustration is taken from a photograph, by Captain Hickey, 101st Regiment, who has brought home numerous negatives of the Punjaub, among which is one of the "Red gah," the building in which Vans, Agnew, and Anderson were massacred; the "old colours" of the 1st Bengal Fusiliers; and portraits of many officers of his own and other regiments in India, all of which are being published by Messrs. M'Lean and Hoey, of the Haymarket.

DANCING BEGGARS OF SOUTHERN INDIA.

A COUNTRY where mendicancy is a religious rite is the natural hotbed of beggary, and in India the evil may be witnessed in the most diversified forms. The profession there, as here, is a popular one; for, although it has some drawbacks, it possesses the advantages of being

DANCING BEGGARS OF SOUTHERN INDIA

easily learnt and easily practised, and is, upon the whole, a profitable one. What further inducements to practise it can laziness require? There are in India beggars riding, walking, and crawling; beggars on one leg and beggars with an arm uplifted; crying, laughing, praying, cursing, and dancing beggars. We give an Illustration of the kind last mentioned. The woman is the chief performer; her slow, monotonous dance being occasionally joined in by her companions—one of whom beats a tom-tom, whilst the other performs on mimic cymbals. Their voices are occasionally heard accompanying the performance, which, notwithstanding its close resemblance to a street entertainment, is strictly begging, the performers being professed and unmitigated beggars. The thin legs and attenuated arms proclaim the lazy vagabond who would rather starve than work. A profusion of common ornaments covers the head and neck of the woman, and the whole party is of the lowest caste. Our Engraving is partly taken from a photograph by Captain Allan Scott, of the Madras Artillery.

MUSIC.

Musically speaking, the past week has been more than usually barren, even at this barren season. "Blanche de Nevers" has continued to be given nightly at the Royal English Opera, drawing decent houses, though it has been found necessary to help its waning attraction by the addition of an act of the previous novelty, Wallace's "Desert Flower." The next opera to be produced at this theatre, we hear, is from the pen of Mr. Macfarren. But before it will come the Christmas pantomime, "St. George and the Dragon." There was, as usual, the Popular Concert on Monday last, which derived an especial interest from the appearance of our great English pianist, Arabella Goddard (Mrs. J. W. Davison). The fair artist had not been heard in public since she played last spring at one of the Philharmonic Society's concerts; and she must have perceived, from the warmth of her reception on Monday, how much she had been missed during her long absence. She played Mendelssohn's sonata in E major, one of those works of his precocious boyhood which evince such a marvellous amount of genius, though they betray, in some degree, the unpruned luxuriance of a youthful imagination. Her exquisite execution developed all its beauties, and excited the enthusiasm of the audience. She afterwards played, with Mr. Lazarus, Weber's sonata in E flat for the piano and clarinet—an exquisite work, perfectly executed by both performers. The other great features of the concert were Beethoven's septet in E flat (op. 20), the most beautiful piece of concerted instrumental music in existence; and Haydn's quartet in B flat, No. 78. In both these charming compositions the principal part was played by M. Lotto, accompanied by the admirable performers who appear habitually at these concerts, the only change being the substitution of M. Paque for Signor Piatti, who has taken his departure from England. Moreover, Jullien's Promenade Concerts have been going on nightly at Her Majesty's Theatre with undiminished success; but the series is drawing to a close, as it is to terminate before Christmas. The above have been all the notable musical entertainments of the week.

The fourth season of the National Choral Society began on Wednesday, last week, with an excellent performance of Handel's "Judas Maccabeus," at Exeter Hall. This society—which owes its existence to the enterprise, and its prosperity to the judgment and activity, of Mr. G. W. Martin, its founder and manager—has now gained a high place in public favour, as was shown by the crowded state of the hall on this occasion. The performances are on a scale of as great magnitude as those of the Sacred Harmonic. The instrumental band and the chorus are equal in numerical strength, and the solo performers are of equal eminence. We must observe, however, that we do not regard the numerical strength of the band and chorus as one of Mr. Martin's titles to approbation. We think that he has fallen into what we have always deemed the prevailing mistake of the day—the notion that grandeur in music demands multitudes of performers. Because the Sacred Harmonic Society announces as a boast that its band and chorus amount to seven hundred performers, Mr. Martin thinks it incumbent on him to do the same, though so well-informed a musician must be well aware that equal power and grandeur of effect can be obtained by means of half that number. Everybody knows that no choral performances are grander than those of the Birmingham and Norwich festivals; and yet at those places the whole vocal and instrumental strength never exceeds four hundred. Mr. Martin's chorus, considering that it consists of amateurs, and that it has been so recently formed, is surprisingly good, and sings with laudable precision and vigour; but the voices have not yet acquired that softness, smoothness, and subdued tone which are necessary to produce all the delicate shades of effect and precision. With this qualification, we have nothing but high approbation to bestow on Mr. Martin's exertions. As a whole, the performance of Wednesday was worthy of admiration. The solo parts were sung by Mdlle. Parepa, Miss Palmer, Mr. Cummings, and Mr. Santley. Mr. Sims Reeves was announced as the principal tenor, but one of those attacks of hoarseness to which this great artist (unfortunately for himself as well as the public) is so liable prevented him from appearing; and his place was taken, at short notice, by Mr. Cummings, who acquitted himself in such a manner as to obtain a most favourable reception. Mr. Cummings is a member of the choir of Westminster Abbey, and is consequently a sound musician—has a voice of uncommon power and sweetness, and sings with energy and feeling. His great air, "Sound an alarm," was loudly and unanimously encored. We have no doubt that, during the season, the performances of the National Choral Society will share the public favour with those of the Sacred Harmonic Society itself.

The Sacred Harmonic Society's second concert of the season was given yesterday week, when Mendelssohn's chef-d'œuvre, "Elijah," was performed. It attracted, as usual, an overflowing audience; and in the performance the sublimity and beauty of this immortal work were fully displayed. The tenor part was to have been sustained by Mr. Sims Reeves; but he was still unable to appear, and his place was ably supplied by Mr. Montem Smith. The other solo singers were Mr. Santley, Mdme. Rudersdorff, Mdme Sainton-Dolby, Miss Julia Elton, Miss A. Hirst, and Mr. Camplin Henry. Mdme. Rudersdorff displayed her vocal powers to great advantage, especially in the great air, "Hear ye, Israel!" to which she imparted much grandeur. Mr. Santley's reading of the character of the prophet has never been excelled. Mdme. Sainton gave her usual charm to the beautiful contralto air, "Oh, rest in the Lord!" and Miss Elton, a young and rising singer, gave the pathetic air, "Woe unto them," with much beauty and truth of expression.

THE THEATRES.

Strand.—A new burlesque, slight in structure, was produced last week, founded on a French piece entitled "Le Retour d'Ulysse," and called "Patient Penelope." The principal characters are supported by Miss Ada Swanborough, Miss Maria Simpson, Mr. George Honey, and Mr. Charles Fenton. To the last gentleman we are indebted for the scene, an "attic story" in Penelope's house, cleverly painted and set. Ulysses is supposed to return just at the moment when Penelope's patience is exhausted, and she is about to yield to the entreaties of Eurymachus. His first approach is made in torn and travelling costume, reminding one of Jem Bags; but he is soon divested of this, and displays his Royal robes. Medon, his faithful servant, recognises the returned monarch, and determines to save the character of his mistress. Ulysses's own approaches, too, are very cautious—insomuch that he appears to her as a Shade upon the window-blind before introducing himself in bodily consistence. Both decree a punishment to Eurymachus; but, in the dark, Ulysses mistakes Medon for the suitor, and throws him out of the window. However, he falls on Eurymachus, who is lurking beneath, and afterwards enters with his head broken and bandaged. There is much sparkling writing in this little piece, and a duet between Penelope and her suitor, which was remarkably effective. It could not have been better acted or placed on the boards.

A theatre at Alexandria, with accommodation for 1500 persons, and with two tiers of boxes, is to be opened in December with Italian opera.

NAVAL AND MILITARY INTELLIGENCE.

WAR OFFICE.

7th Dragoons: Paymaster W. F. Wheble to be Paymaster.
3rd Hussars: Lieut. H. F. Dent to be Lieutenant. 7th: Lieut. H. O. Johnes to be Captain; Cornet A. Jones to be Lieutenant; H. C. Bevill to be Cornet.
16th Lancers: W. C. Bovill to be Cornet.
Royal Engineers: Lieut.-Col. J. B. Becher, C. B., to be Colonel; Capt. G. Sim to be Lieutenant-Colonel; Second Capt. E. C. S. Williams, to be Captain; Lieut. R. C. B. Pemberton to be Second Captain.
Scots Fusilier Guards: Ensign and Lieut. the Hon. C. J. Shore to be Lieutenant and Captain; the Hon. J. C. Vanneck to be Ensign and Lieutenant.
7th Foot: Major H. R. Hibbert to be Lieutenant-Colonel; Capt. J. F. Hickie to be Major; Lieut. M. Watson to be Captain; Ensigns G. B. Meares, R. H. Maude, and F. J. Murray to be Lieutenants; G. B. Stevens, W. H. Wilson, and W. J. Squire to be Ensigns. 12th: D. Papillon to be Ensign. 17th: Lieut. A. Strother to be Lieutenant. 24th: Lieut. F Hibbert to be Lieutenant. 54th: Lieut. J. G. Jebb to be Captain; Ensign C. F. Colvile to be Lieutenant: Ensign H. Skey, and W. N. Darnell to be Ensigns. 76th: Major and Brevet-Col. H. C. Brewster to be Lieutenant-Colonel; Capt. and Brevet-Major T. Tydd to be Major; Lieut. L. E. O'Connor to be Captain; Ensign G. Alexander to be Lieutenant. 83rd: M. S. Brownrigg to be Ensign.
3rd West India Regiment.—Ensign J. F. Cousins to be Instructor of Musketry.
Medical Department.—Assist. Surg. C. G. Irwin to be Staff Surgeon.
Brevet.—Col. A. G. Goodwyn to have the honorary rank of Major-General; Lieut.-Cols. R. P. Radcliffe, T. Knox, C. W. Younghusband, E. B. Hamley, and the Hon. E. T. Gage to be Colonels.

The launch of the iron-clad screw ram-vessel Minotaur, being built for the Admiralty at the works of the Thames Iron and Shipbuilding Company, Blackwall, has been fixed to take place on Saturday, Dec. 12.

Lieutenant-Colonel William Francis Drummond Jervois, of the Royal Engineers, Deputy Director of Works in the War Department, has been made a Companion of the Order of the Bath.

The names of the officers and men of the Household Brigade who fell in the Crimea have recently been inscribed on the panels of the galleries of the Windsor Military Church. The memorial was inaugurated on Sunday afternoon. The Bishop of Oxford preached an appropriate sermon.

A large amount of war stores of every description has been prepared for shipment to China, Japan, and New Zealand; and several transport-vessels have been chartered by the War Department to proceed to those stations.

A silver tankard, on which is engraved a suitable inscription, has just been presented to Mr. S. R. Graves, Commodore of the Royal Mersey Yacht Club, by the crew of the maindeck of her Majesty's ship Emerald, in acknowledgment of the kindness they had received on the occasion of the Channel Fleet's recent visit to Liverpool. The tankard was accompanied by an address expressive of gratitude on the part of the donors.

The annual official inspection of military stores in reserve at Woolwich was, yesterday week, made by the officials of the War Office. Earl De Grey expressed himself well satisfied with the amount of the stores in readiness for the forthcoming year, and also with the orderly and correct statement with which he had been supplied, and which, he said, his inspection had fully borne out.

One of the large Blakely rifled guns, weighing twenty tons, and said to have been manufactured for the Russian Government, was on Monday proved at the Woolwich Government practice range. The gun was fired twice with a charge of 50lb. of powder and a 600-pounder cylinder. Three similar guns, which have been manufactured at the Lowmoor works, are at the Royal Arsenal for proof.

The War Department has determined to construct a new moat and other works of defence at Sheerness. The moat, which will be two miles long, 40ft. broad, and 10ft. deep, will extend about midway between Scraps Gate and Cheyney Rock. At each extremity of the moat a large fort will be erected for defence of the sea approaches, besides two land batteries mounting about six guns each, for the purpose of sweeping the ditch from the flank to the centre. A contract for the cutting has been taken by Messrs. Knight and Smith, of London, at £16,000.

The transport Caroline Coventry, Captain Overberry, belonging to the Hon. Mr. Coventry, of London, which sailed from Shanghai on the 12th of July, arrived in Plymouth Sound on Sunday. She brings the head-quarters of the 31st Regiment of Infantry, 826 non-commissioned officers and men, under command of Lieutenant-Colonel Eager, Captains Cassidy and Hamilton; Lieutenants Deane, Dayall, Wood, Jebb, Gow, and Butler; and Ensigns Stannier, Majendie, and Deverell; and in medical charge of Assistant Surgeon Grant and Staff Assistant Surgeon Ginaud. Nine soldiers died on the passage before reaching the Cape. The Caroline Coventry brings over 400 tons of tea.——Dunbar and Co.'s ship the Alumbagh arrived at Masulipatam on the 30th of October, with the head-quarters and troops of the second battalion of the 31st Regiment, from Ireland.

THE VOLUNTEER MOVEMENT.

Prizes were distributed on Saturday last to the successful competitors of several of the metropolitan corps. The distribution of prizes to those of the London Rifle Brigade took place in the central transept of the Crystal Palace, in the presence of a numerous and fashionable auditory. Lady Harriet Warde presented the prizes. It was announced in the course of the proceedings that since last year 222 new members of the brigade had been enrolled.——The London Scottish Rifles assembled on Saturday evening, in Westminster Hall, for the purpose of witnessing the presentation of prizes by Lady Elcho, who made a spirited address. There was a large and fashionable crowd of spectators, and the proceedings passed off most satisfactorily. Lord Elcho stated that Sir Hope Grant had consented to become the Colonel of the Scottish Rifles, in place of the late Lord Clyde. In both cases the prizes were presented by the wives of the Lieutenant-Colonels of the regiments, and in both the Lieutenant-Colonels congratulated their corps on their healthy and efficient state. Saturday also witnessed the presentation of prizes to the 40th Middlesex, at the Freemasons' Tavern; and to the South Middlesex, at their head-quarters, Beaufort House. The young Lady Eardley presented the prizes to the North-East London on Thursday se'nnight, at the head-quarters of the corps, in Shaftesbury-street. A silver tankard, value fifty guineas, was presented last Saturday by the West-end company of the Irish Rifles to their Captain, A. Blennerhassett Leech, as a token of their regard for him and their appreciation of his untiring exertions in behalf of the regiment since its formation.

The London Artillery Brigade was inspected in Westminster Hall on Thursday se'nnight by Captain and Adjutant Adams (1st Middlesex Artillery Volunteers). There was a good muster, and Captain Adams expressed himself quite satisfied with the manœuvres, and his intention to recommend those present as entitled to the capitation grant.

The eleventh company of the Queen's Westminster competed for their prize at Wormwood Scrubbs on Monday. The Captain's prize was won by Corporal Watts, the Lieutenant's prize by Private Milward, the Ensign's prize by Private Laye, Mr. Barringer's prize by Private Clark, Mr. Bocking's prize by Private Thomas, the ladies' prize by Sergeant Bocking, and the consolation prize by Private Stephenson.

Last Saturday afternoon the Inns of Court Volunteers, under the command of Lieutenant-Colonel Brewster, underwent inspection by Colonel M'Murdo in Richmond Park. About 400 of the members mustered and went through their evolutions in the most satisfactory manner. In the evening the regimental dinner took place in the Inner Temple Hall, at which the gallant Inspector of Volunteers was present.

The competition of the Windsor Rifles (2nd Berks) for the prizes given by Colonel R. H. Vyse and W. Vansittart, Esq. (the borough members), took place on Tuesday at the butts of the range at Dedworth. The first prize, a cup, value £10, was won by Private Kent; second prize, a cup, value £5, by Corporal Holles; third prize, £3, by Private Bransome; fourth prize, £2, by Private Terry.

On Friday week the Surrey Light Horse, Captain Meller commanding, were inspected by Lieutenant and Adjutant Broun, 12th Lancers, who expressed himself much pleased with the evolutions performed. Subsequently, the members present were hospitably entertained by Sir C. Forbes (late 17th Lancers), senior Lieutenant in the regiment, at his residence, Broomwood, Clapham-common.

The Oxford University Rifles had a field-day at Blenheim yesterday week, under the command of Lieutenant-Colonel Bowyer, assisted by the Adjutant, Captain W. Foxcroft Jones.

On Saturday evening a meeting was held in the large room of the Salford Townhall, to witness the presentation of prizes to those members of the 56th Lancashire Rifle Volunteers who had distinguished themselves in drill, shooting, and by general efficiency during the past year. There was a very numerous attendance, the greater proportion being ladies. W. Pearson, Esq., the Mayor of the borough, presided.

In connection with the 18th West York Rifle Volunteers, a soirée, followed by a distribution of prizes, took place in Pontefract Townhall on Monday evening. The Mayor (Mr. John Moxon) was in the chair, and Lord Houghton opened the proceedings with some appropriate observations. Speeches were also made by the High Sheriff of Yorkshire (Mr. J. H. Barton) and the Right Hon. J. Parker, after which Lady Houghton distributed the prizes.——The distribution of prizes to successful competitors in the 4th (Halifax) West York Rifle Corps took place last week, at the New Assembly-rooms. The evening's festivities commenced, at half-past six, with a conversazione. About 250 ladies and gentlemen were present. At eight o'clock the chair was taken by the Colonel, Mr. E. Akroyd. The platform, at the south end of the room, was occupied by a number of ladies and the chaplain and officers of the regiment. After some remarks by Colonel Akroyd, the prizes were distributed by him, Major Houldsworth, Mrs. Bury, and Mrs. Akroyd.——During last week the Bedale and Castle Howard volunteers held prize contests. The Bedale (8th North Yorkshire) competed for the Sedgwick challenge-cup, which has been held for two years by Colour-Sergeant Mickle. The shooting resulted in a victory for Private Dale. Another contest was shot for Lord Bury's prizes, which were won by Private Battensby and Colour-Sergeant Mickle. The Castle Howard volunteers (3rd North York, Castle Howard squad), competed for a ten-guinea silver cup, and five other prizes of plate, given by tradesmen of York and Malton. The cup was won by Private Ware, after a tie with Corporal Bedale; and the other prizes were taken by Privates Atkinson and Hudson, Sergeant Sutherland, and Private J. Elliott, after a tie with Sergeant Kirby.——About 200 members of the North Riding Volunteer Corps were entertained at dinner at Richmond on Tuesday week. The Earl of Zetland, in returning thanks for the toast of the Lord Lieutenant of the county, said that if ever there was a time when the volunteer movement was likely to be useful, it was now; for in his experience—the experience of a long life—he had never known Europe in so threatening a condition as at present. He would say to the volunteers that their services were more than ever essential and necessary to the safety and well-being of the country; and on that account he would ask them to drill, and make themselves competent to defend in the best manner their Queen and country. That he took the greatest interest in the movement they would know from the fact that he belonged to certainly not less than ten corps. Earl Cathcart also addressed the meeting, remarking on the effect of a good understanding between the officers and the men.

The members of the 7th Durham (the City) assembled in the New Markets, Durham, yesterday week, for the purpose of receiving the prizes won at the late annual contest. The Mayor presided. The head prize, a claret jug, valued at 50 guineas, with £5 added, was won by Corporal Caldcleugh, who must, however, win it twice before it becomes his absolute property. Five other silver cups of large size were also given away, together with very valuable prizes in money. After the distribution the several companies, headed by the band, marched to the Palace Green for battalion drill. In the evening the whole sat down to a dinner, provided at the expense of the officers, in the New Townhall.

THE DISTRESS IN THE NORTH.

A further increase of 863 has taken place in the number of persons receiving parochial relief in the cotton-manufacturing districts; and it is greatly to be feared that, as the winter advances, we must be prepared to meet a still larger amount of destitution. Much benefit has been anticipated from the Public Works Act; but Mr. Farnall stated at the meeting of the Central Relief Committee, on Monday, that, owing to the length of time required for completing the plans and making "other necessary preparations," the Act could not, in his opinion, come fully into operation until spring. Several members of the committee commented strongly upon this mischievous delay and also upon the large expense attending applications for loans; and it was resolved to call the attention of the Home Secretary to the matter, and to submit to his consideration a suggestion made to the committee that "the balance accruing to Government in raising money under the provisions of that Act affords a means of relieving parties borrowing from the expenses complained of." Grants were made, including £2000 to Stalybridge, £800 to Dukinfield, £2000 to Blackburn, £400 to Mossley, and £2000 to Preston.

The Mansion-House Committee held its fortnightly meeting yesterday week. The Lord Mayor took the chair. Mr. Pickering, the cashier, reported that the total sum received up to Thursday was £512,629, of which £454,060 had been remitted to Lancashire for distribution amongst the distressed districts. The sum received during the past fortnight amounted to £213, of which £115 was from colonial resources. The following grants, besides several minor ones, were made:—Stalybridge, £100 for clothing; Ashton-under-Lyne, £1200; Hurst, £125; Oldham, £150; Bolton, £150; Stockport, £200.

THE LITERARY PROFESSION IN ENGLAND AND WALES.

According to the Census of 1851 there were 1504 male and 109 female "authors, editors, and writers" in England and Wales. The Census returns for 1861 reveal but a very slight increase—namely, 1528 male and 145 female "authors, editors, and writers." Thus male authorship, as a distinct profession, appears to be stationary, while the only augmentation of the literary profession is due to the introduction of an increasing number of ladies into its ranks. The islands of the British seas contained a few more atoms of the brain of the country. In April, 1861, there were twenty-six males and one female under the head of authors, editors, and writers. In 1851 there were twenty-two males and one female in the same category. This solitary female representative of literature in the islands contiguous to our coasts resides in Jersey, and gives her age as between thirty-five and forty-five. Under a miscellaneous head of "others engaged in literature" are registered in the returns of 1861 5 males and 27 females. Among the five males are an "expert" and an "orator." Among the twenty-seven females are found six reporters and shorthand-writers, and five translators and interpreters. The male reporters and shorthand-writers are recorded as numbering 636.

Of the 1528 male authors, editors, and writers, recorded in 1861, the metropolitan district contains more than half—namely, 795. Surrey (extra metropolitan) contains 26; Kent (ditto), 28; Sussex, 32; Hants, 35; Berkshire, 7; Middlesex (extra metropolitan), 28; Hertfordshire, 10; Buckinghamshire, 6; Oxfordshire, 3; Northamptonshire, 4; Huntingdonshire, 3; Bedfordshire; 3; Cambridgeshire, 11; Essex, 14; Suffolk, 17; Norfolk, 10; Wiltshire, 4, Dorsetshire, 8; Devonshire, 29; Cornwall, 6; Somersetshire, 22; Gloucestershire, 26; Herefordshire, 6; Shropshire, 4; Staffordshire, 20; Worcester, 12; Warwickshire, 11; Leicestershire, 8; Rutlandshire, 0; Lincolnshire, 10; Nottinghamshire, 14; Derbyshire, 8; Cheshire, 19; Lancashire, 126; Yorkshire, 68; Durham, 25; Northumberland, 19; Cumberland, 7; Westmoreland, 2; Monmouthshire, 3; South Wales, 23; North Wales, 11.

The tables which relate to the occupations of females do not separate the authoresses, editresses, and writers from others "engaged in literature," which class includes secretaries, shorthand-writers, &c. So understood, we find "engaged in literature," in England (we cannot say Wales, for the Principality is destitute of women "engaged in literature") 187 women. Of these 187, 110 resided in London on the Census night. Sussex, with eight literary women, is next favoured to the metropolis; the extra-metropolitan part of Kent contained 7; the extra-metropolitan parts of Surrey and Middlesex, and Norfolk contained 6 each; Essex, Lancashire, and Yorkshire, 5 each; while 16 English counties had no female votary of the Muses within their borders; the remaining shires varying from a single specimen up to three each.

Turning to the section on "ages," we find that no English authors resident in England on the Census night had reached the age of Landor, Humboldt, or Rogers—in other words, were above 85; but three are set down as between 80 and 85; but there was one translator between 90 and 95. There were two authoresses between 80 and 85. From these figures one would not infer that the literary profession was favourable to longevity. The age at which there are the largest number of male "authors, editors, and writers" is between 30 and 35; but the authoresses are most numerous between the ages of 45 and 50.

The Russian Government has purchased a number of Bray's traction engines, as stated, for the transmission of heavy ordnance from St. Petersburg for the defence of their coast stations.

Some observations have been made on the influence exercised by the climate of Paris on the Arab troops brought over from Algeria seven months ago. Of 200 Spahis and 800 Turcos, not a single death has occurred among the former, while the only man lost by the latter was a drummer, who expired suddenly from a fit of apoplexy while on duty at the Tuileries.

Her Majesty's Emigration Commissioners have chartered the ship Queen of the East, 1226 tons, Captain Belton, belonging to Messrs. Henry Moore and Co., Liverpool, for the conveyance of Government emigrants to Sydney, New South Wales, at £13 19s. 9d. per statute adult. The Queen of the East is appointed to receive her passengers at Birkenhead, and to sail about the 11th of January next.——The Government emigrant-ship Shackamaxon, which sailed from the Mersey on the 12th of May last, arrived at Sydney, New South Wales, on the 3rd of September, having on board 81 married people, 109 single men, 98 single women, 46 boys and 36 girls between one and twelve years of age, and 11 infants—in all, 381 souls. Three births and eight deaths took place on the voyage.——The Southern Ocean, which sailed from Liverpool on the 19th of May, arrived at Melbourne, Victoria, on the 22nd of August with a number of Lancashire operatives, comprising 53 married couples, 4 single men, 3 single women, 44 children between one and twelve years of age, and 8 infants—in all, 175 souls. Five infants died on the passage.——The Government emigrant-ship Spitfire, which sailed from Plymouth on the 30th of May last, arrived at Sydney, New South Wales, on Aug. 24, with 426 Government emigrants, comprising 57 married people, 149 single men, 147 single women, 27 boys and 34 girls between one and twelve years of age, and 13 infants. Two births and two deaths occurred on the voyage.——The Adamant, which sailed from Plymouth on July 4, arrived at Port Adelaide, South Australia, on Sept. 25, having on board 81 married people, 101 single women, 106 single men, 40 boys and 41 girls between the ages of one and twelve, and 8 infants—in all, 377 souls. Four births and four deaths took place on board.

The Pitmen's Strike.—This unfortunate disturbance in the labour market of the north is yet far from an amicable settlement. It appears to have settled down into a demand for increased wages on the part of the men—a demand not by any means well received by the majority of the men. The strike has rather spread than contracted its dimensions. The unionists have carried the torch of contention from colliery to colliery, and have aroused a fire which, feeding on very combustible material, seems hard to extinguish. The ejections of the workmen from their dwellings have, of course, continued; and, in some cases, the violence of the unionists against the non-unionists has rendered necessary the posting of extra police at the pits. On the whole, however, great order has prevailed, and there is some talk of filling up the vacant cottages by the unemployed operatives from Lancashire. We receive some intelligence of disturbance in the Lancashire coal field; and, though the men are backed up by a strong union, that body is not favourable to a strike; and we should imagine, after the late distress, their funds are not large enough to support one. In our Impression of the 21st of last month it was stated that Messrs. Straker and Love made an unjust gain upon the tubs which are set out or forfeited, which amounted to a considerable sum weekly. This, it appears, is incorrect. In the first place, they send us a letter from the coal-viewer, who states that, for the last twelve years, he has received from them, on Lord Boyne's behalf, the royalty rent upon the set-out tubs, together with the others; and, in the second place, they state that they have received no benefit from the forfeited tubs, but have expended every fraction of the price of the work withheld in the education of their workmen's children and the relief of the sick. We have great pleasure in giving publicity to this statement.

OBITUARY OF EMINENT PERSONS.

SIR FRANCIS EDWARD SCOTT, BART.

Sir Francis Edward Scott, third Baronet, of Great Barr, in the county of Stafford, and second Baronet, of Hartingston, in the county of Derby, was the eldest son of Sir Edward Dolman Scott, second Baronet, of Great Barr, M.P. for Lichfield, by his wife, Catherine Juliana, eldest daughter and coheir of Sir Hugh Bateman, first Baron Bateman, of Hartington. He was born on the 24th of February, 1824; and, pursuant to the special limitation, succeeded as his birth to the baronetcy of Hartington, of his maternal grandfather, Sir Hugh Bateman, on the 1st of previous January. He was educated at Eton, and Christ Church, Oxford, where he graduated M.A. 1845. He succeeded his father in his baronetcy of Great Barr 2nd May, 1851. As a landowner Sir Francis Scott was a distinguished virtuoso: he was a member of the Archæological Institute, a liberal patron of the fine arts, and a skilful amateur in the sciences. He was a liberal contributor to the Royal Society, and was elected a Fellow of that learned body in 1854. Sir Francis had also acquired an honourable reputation as a practical geologist. He was subscriber to the Geological Society of London, and was a contributor to its Transactions. He was also the author of a valuable paper on the Geology of Staffordshire, published in the Journal of the Geological Society of Dublin. Sir Francis Scott was a Captain of the Staffordshire Yeomanry, and a Deputy Lieutenant of the county of Stafford. He married, 1st, in 1854, Mildred, eldest daughter of Sir William Craddock Hartopp, third Baronet, of Freathby, in the county of Leicester, by whom (who survives him) he leaves a youthful family of two sons and three daughters. Sir Francis, to the great regret of all who knew him, died at Mt. Lemarch, on the 21st ult. He is succeeded in his two baronetcies by his elder son, now Sir Edward William Dolman Scott, Bart., who is in his eighth year. The Scotts of Great Barr are an old Staffordshire family. Sir Joseph Scott, the first Baronet, so created in 1806, was High Sheriff of Staffordshire in 1793, and M.P. for Worcester from 1802 to 1806. He was grandfather of the Sir Francis just deceased. The Bateman of Hartington, the maternal ancestor of Sir Francis, whose name he inherited, are a family of considerable antiquity in the county of Derby.

THE REV. E. F. OWEN, M.A.

The Rev. Edward Floyd Owen, M.A., of Barton Hall, Montgomeryshire; Rectory House, Cheltenham; and 4, Queen Annestreet, Cavendish-square, was the son of William Owen and Rector of Eyton, Shropshire, whose death has recently occurred, was the only son of the Venerable Hugh Owen, M.A., Archdeacon of Salop, by his wife, Harriet, daughter and coheir of General Edward Jeffreys, Esq., of Shrewsbury, and was twenty-fifth in male descent from Owen Gwynedd, Prince of North Wales. He was born at Eyton, the rectory of which his father held, on the 25th of March, 1804, and was educated at Shrewsbury School, and St. John's College, Cambridge, having taken holy orders, held the living of Wellington-cum-Eyton, Shropshire, from 1831 to 1840. During the latter part of his life Mr. Owen devoted himself to the cultivation of the fine arts. He was the friend of Etty and the patron of numerous living artists. He formed, upon his own judgment, a fine, although not large, collection of ancient masters, chiefly the Italy; and he left as proofs of his own artistic talent upwards of four hundred oil paintings, which display a considerable amount of taste and brilliancy of colour, and are very varied in their subjects, including historical productions, landscapes, portraits, nature, and figures, both in drawing and chalk or designs. These really merit for him a high position among the leading professors of the present day. Mr. Owen's original name, Owen Jeffreys, was by royal licence, altered to Owen Floyd. He married, 1st, in 1831, Harriet, daughter of Thomas Burn, Esq., of Cotterstock, in the county of Northampton, by whom (who died in 1858) he has issue, with a daughter, Harriet, married to Captain Burn, of the 1st Royals, a son, Edward Floyd Owen, Esq., now of Sydney, Australia, and a numerous family of sons and daughters.

GEORGE BIRCH JERRARD, ESQ.

This gentleman, who died on the 23rd ult., at his residence, the Rev. Frederick Jerrard's Rectory, Long Street, Wilts, was the author of "Mathematical Researches," and of "An Essay on the Principles of Equations," and was the son of the late Major-General Jerrard. His mother, Birch Jerrard was born at Bedford, Cornwall, NOW HIS, Lincolnshire, the daughter of a medician of no ordinary power. Many years ago, in his "Mathematical Researches" published in 1834, he made a great step in algebra, which was acknowledged by all mathematicians—viz., the taking away of three terms from equations of any degree. In his later work on the transformation of equations he maintains that he effected the great problem of Algebra—the resolution of equations of all degrees. Mr. Jerrard was a member of many of the mathematical examiners of the University of London, and at the time of his death was engaged in writing a work on prophecy, in which he took the deepest interest.

WILLS AND BEQUESTS.

The will of Sir Samuel George Bonham, Bart., K.C.B., formerly Governor of Prince of Wales Island, Singapore, and Hong-Kong, and her Majesty's Plenipotentiary in China—was proved in London by the executors Mr. Frederick Scott Turner, Lincoln's-inn-fields, and Mr. Bonham, R.N.; James Guthrie, Esq.; and Captain C. F. Trendale, "formerly my Aide-de-Camp in China." Sir Samuel died on the 5th of August last on the Great Western Royal Hotel, Paddington, at the age of sixty, having executed his will in April, and a codicil in July, both in London, where his personal property in this country was sworn under £170,000. After making some specific bequests, he directs that his property in Hong-Kong, Singapore, China and ivory ornaments, screens, and all articles of virtù shall be retained for his only son, and in the most effective way he can. He also directs his son to hand to his trustee the whole of his property for the benefit of his son; but, in the event of his son dying without leaving children, or leaving children who die intestate, then the property is left to certain parties named, also to some hospitals in London and other charitable institutions.

The will of Berish Bottfield, Esq., M.P., F.R.S., F.S.A., M.A., Dean, of Durham, Hall, Bampton Lecturer, 1844, Preacher of Lincoln's Inn, Salop; and Grosvenor-square, London, was proved in the Northampton registry, and the personalty sworn under £200,000. The executors are the Earl of Powis and Sir Baldwin Leighton, Bart., M.P.; and the executors are Baldwyn Leighton, Esq., and Captain Herbert Corbet. The deceased was Chevalier of the Order of Albert the Brave, Knight of the Order of Leopold of Belgium, and Chief Lieutenant for Shropshire of Montgomeryshire. He succeeded to the estates in 1813, and died at the age of fifty-six. The will is dated 1861, and a codicil, 1863. It is made on numerous sheets, and there are legacies, though small in amount, to about 130 charitable institutions. The rest of the property in the offices of his trustees, and after the leaves one year's salary, and to his bailiffs and all in and out door servants one year's wages. The residuary bequest is divided between his two sons, Edward Stanley Leighton, Esq., and Captain Corbet, his trustees, all series and numbers to be continued, and, together with Mrs. Bridges, prints, pictures, ivory, arms and armour, and all other collections, to be held and enjoyed by the possessor of Norton Hall.

The will of Charles Rawlings, Esq., of Great Marlborough-street, and Chelsea, was proved in the London registry on the 4th ult., the executors appointed are the relict, together with Thomas Elliott Price and James Percy Phillips, Esqrs. The will bears date March, 1863, and contains numerous legacies to relatives and personal friends, as well as many charitable bequests. The testator has left a large amount in the funded property, and his executors are left to realise his estate and the widow of a nephew. The ultimate residue he has bequeathed to the Governors of the Royal Hospital for Incurables at £500; Jewellers' Annuity, £500; Coachmakers' Company, £100; Dramatic College, £400; Clothiers' Benevolent Annuity, £400; Gentlemen Generalist Society, £500; Artists' Benevolent Fund, £200; Chelsea Rectors' Garden School, £300; Infant School, St. Luke's, Chelsea, £200; Chelsea Dispensary, £200; Belgrave Dispensary, £100; Chelsea Cottage Hospital Day and Sunday Schools, £200; City of London Truss Society, £100; Society of Musicians, £100; Reform Annuities, £100; Blind Institution, Bottom-road, £200; and Westminster Hospital, £300. All legacies to be paid free of legacy duty.

Baron Rieseach has purchased a villa and casino on the Jardelin Hill, Rome, adjoining the magnificent villa of Prince Pamphili Doria. The Baron has paid nearly £60,000 for this property, and has written to his agent that he shall soon come to inspect it, adding, "I shall not be content to go to Rome without having a house there." He is also in treaty for the purchase of a mansion in Rome, and the residence selected by him is the Borgia Palace, in the Via del Babbuino, near the Giorgi Palace.

CHESS.

TO CORRESPONDENTS.

MATHO DE ZAMORA.—You are quite right. The same correction was made in our Notices to Chess Correspondents last week.

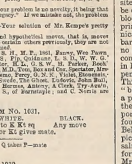
ERRATUM.—The key move of "I. E. of Bridport," (enty Enigma, No. 1359, is, 1. Q to K 4th.

W. G., of Lewisham.—The principle of the mate in your problem is no novelty, it being that of the old problem known as "The Soldier Lawyer." If we could, we should be glad to insert it, but we have often published it.

CORRECT SOLUTIONS OF PROBLEM No. 1358.—Rev. C. W. Bardsley, R.M.—Your solution of Mr. Kempe's pretty little problem is the one Knights to its correct.

T. C. D.—In a game by correspondence, if a player can hypothetical moves, that is, move on the assumption that his adversary will make suitable others previously, he may do so; but a binding contract his adversary must be informed of the move.

CORRECT SOLUTIONS OF PROBLEM No. 1359.—Rev. C. W. Bardsley, R.M., Exeter; Wm. Pears, F. B. D., Kensal; E. S. A., G. C., Wrington; R. N. T., Bridport; Q. Q. Q., Lisburn; L. J. D., W. W. G., Gosport; C. W., Monkstown, Dublin; Rev. H. K., G. R. W. H. Parker, Bath; Rev. W. Wilkinson, Ripon; Rev. J. Wayte, Cambridge; Rev. J. Hall, Sedbergh; Rev. J. Fawcett, Lancaster; J. H., Malvern; J. D., Hartlepool; Mona, Derry; A. N. T., Vicar, Ennerdale; Miles, W. E. P., Philo S., Dinah, Leo, Medina, A Scotch, Tim Orbon, Lisburn, John Bull, Ernest, C. D. A., Cadmus, Rev. J. H. Jones, Aston; A Clerk, Try-again, J. T., Hartest, St. Mark, W. G. S., Sandford; S., of Burntisland; and C. Watts are correct. All others are wrong.



SOLUTION OF PROBLEM No. 1361.

38. Kt to K 4th	Kt to K 2nd		
39. Kt to K 5th	Kt to K 3rd		
40. P to K B 6th	Kt to Q B 5th		
41. Q to K 3rd	Kt to K 3rd		
42. Q to K 2nd	Kt to Q B 5th		
43. Q to K 3rd	Kt to K 3rd		
44. Q to K 2nd	Kt to Q B 5th		
45. Q to K 3rd	Kt to K 3rd		
46. Q to K 2nd	Kt to Q B 5th		
47. Q to K 3rd	Kt to K 3rd		
48. Q to K 2nd	Kt to Q B 5th		
49. Q to K 3rd	Kt to K 3rd		
50. P takes Q P	P takes P		

Another Game between the same Opponents. Mr. S. giving, as before, the odds of Pawn and move.

(Remove White's K R Pawn from the Board.)

BLACK (Mr. B.)	WHITE (Mr. S.)	BLACK (Mr. B.)	WHITE (Mr. S.)
1. P to K 4th	P to K 4th	21. P takes P	Q to Q 2nd
2. P to Q 4th	P to Q 4th	22. Q to K B 4th	
3. P to K 5th	P to K 3rd		
4. Kt to K B 3rd	P to K Kt 4th	Intending, if not prevented, to drive away
5. B to K Kt 5th	P to K R 3rd	the Kt with K Kt Pawn, and then obtain an
6. B to Q 3rd	Q to K 2nd	irresistible attack on the King's side.
7. B to Q 2nd	B to K B 4th	22.	R to Q R 4th
8. P to K R 3rd	P to K Kt 4th	By this move White prevents Black from obtaining the command against the Kt.
9. P to K R 4th	B takes Kt	
10. P takes B	P to K R 5th	23. Q to K 3rd	Castles
11. Q to Q 2nd	B takes B	24. Kt to K 4th	
12. P takes B	P to K 5th (ch)		
13. Q takes Q R P	Q takes Q R P		
14. Kt to K 4th	Q to K 6th		
15. Q to Q 2nd	Q to K 2nd		
16. Q to Q 2nd			
17. Kt to Q B 3rd	Kt to K 2nd		
18. Kt to K 4th	Q to K 3rd		
19. Kt to K 5th	Q to K 2nd		
20. P to K B 3rd	P to Q Kt 3rd		

(Black has now a great superiority of position.)

18.	Q to Q 2nd	25.	P to K B 4th
19. P to Q B 4th	P to Q Kt 4th	26. P to K B 5th	Q to K 3rd
		27. Kt to K B 4th (ch)	K to K Kt 2nd
(It is plain that White could not prudently
take the Kt Pawn, as Black would then
all clear that he might not have captured
the Kt Pawn with impunity, as the Q B
P would be pinned.)		28. Kt takes P	Q to K 2nd
		29. P to K Kt 3rd	Q to K Kt 5th
		30. P to K Kt 4th	Q to K 2nd
		31. Q to K 3rd	Q to Q B 5th
		32. Q to K 2nd—and wins.	

CHESS ENIGMAS.

No. 1364.—By the Editor of *Sussex*.

White: K at K 6th, Q at Q 8th, Kt at K 5th, and Q B 4th.
6th and K 7th.
Black: K at K B 3rd, B at K Kt 2nd; Ps at K R 3rd and K Kt 4th.

White to play, and mate in three moves.

No. 1370.—(An End Game between a Knight and Sundry Pawns.)

White: K at Q B 5th, Kt at Q B 2nd, P at Q R 7th.
Black: K at Q B 3rd, Ps at Q Kt 3rd, K B 5th and K R 7th.

Black, having the move, won the game. What did he play first?

COLUMN FOR THE CRITICAL.

In the "railway clearance" now in progress at the foot of Ludgate-hill will disappear a few buildings associated with persons of interest and events of historical importance. The last of the Fleet Prison, the site of which has been almost useless for the last seventeen years, will be effaced: in this long interval how many persons have passed the blocked-up window of the prison without any knowledge of its appropriation! This arched opening into a square and bill-like room was technically called "the grate," from its being filled with strong crossed iron bars. Above was inscribed "Pay remember the poor prisoners, having no allowance;" a small box was placed at the window-sill to receive the contributions of passengers in the street, while a prisoner within stationed in loudly-supplant tones the above prayer. We have dropped a few pence into the box, and have received in the street, proud of the tally pertly figure, but still prouder of the resemblance of her features to more than one of the members of the Royal family—her defeated hopes, it will be remembered, were revived in the case of one visitor a few months since. At another house to be removed, No. 45, William Rider kept shop, and published his political satires, with George Cruikshank's woodcuts; and his "Everyday Book," which received the eulogium of Southey. Here sat in a second-floor back room, amid his black-letter varities, and odd, out-of-the-way literature; he was a very black *laborieux*. In house No. 7, opposite Hone's, was published another successful venture, the "Every Clergyman," contemporary with the "Everyday Book." Ludgate-street and Ludgate-hill were filled with the screens in Straw's figure. Here we must halt, though not without reflecting that on the Hill stopped the rebellion of Wyat. In the "Chronicle of the Grey Friars of London" we read —

And he (Wyat) himself came in at Temple Bar, and soo downe alle Fleetestreete, and so into Ludgate-hill. And there was he taken prisoner and led by the commaundement of the Erle of Pembroke, and sartynye of his men stayon. And when he saw that he was taken, he pulled off his gloves and sayde, "I have kept towarde," and so went (tuck) sagaye; and by the Tymbrelle-harre he was delivered to the Erle of Pembroke and so led Towre of London.

Fuller, however, states that Wyat flung himself on a bench opposite the Bull Savage inn, and there gave up his sword to the lynyard lived Grinling Gibbons, "where," Walpole tells us, "he carved a pot of flowers which he would surprisingly sell for a guinea." The coaches that passed by." Had the old carver lived here in our days he might probably have claimed compensation for the interference with his delicate art by the Fleet Railway tunnel.

We perceive that the Oxyhydrogen, or Drummond, light has been brought into practical use at the Lighthouse of Corrunna, consisting of a fitting lamp and apparatus, the difficulty in obtaining which is said to have delayed the application of the light. Here, too, is scarcely correct; for, some thirty years since, we received from Lieutenant Drummond a note stating the obstacle to be the difficulty of obtaining the services of persons sufficiently intelligent to manage the apparatus who could tolerate being shut up in a lighthouse.

Talking of Lighthouses, we have received from the Astronomer Royal, Dr. Romney Robinson, some interesting details of his recent inspection of the lighthouses. Nearly thirty-six in number—the distances, order, and discipline of which he minutely commends. Dr. Robinson, after a tour round the whole of the lighthouses, proceeded to the Eddystone and visited the new lighthouse system. As Rudder in his keepers see the Maidens, distant twenty-seven nautical miles, in moderate weather; at the Maidens they saw Rathlin—"a good strong dioptric."

Football is now the order of the day in the attention of the London of the metropolis being anxious that a certain set of rules should be adopted by all football-players, and a Football Association has been established for the purpose of settling the desired code. The great public schools have their separate rules, which is to thought desirable to assimilate; but this proposition rests, in some instances, in accordance with reticence. The metropolitan Clubs must seek open places elsewhere than in London—a matter of very serious consideration. There are excellent sites in the suburbs: the Forest Club at Leytostone, is especially well placed, and so also the Blackheath and Crystal Palace clubs. Football was played in the twelfth century by the youth of the City of London. Five centuries later we find football-players in Chesapide, Covent-garden, and the Strand—and there is an old print of the game played in Fleet-street. Moorfields and Lincoln's-inn-fields were also much frequented for the sport. In the country it is in some places a Shrove Tuesday game: it is still played in Derby, Nottingham, Dorking, Ely, Kingston-upon-Thames, and Dorchester, the people claim the ancient custom as a right won for them by the valour of Alfred the Great. Hone, therefore, triumphantly relates that the Danes, in one of their predatory incursions, were defeated by Alfred, and, the Danish General being slain, his head was cut off and kicked about the place of battle, and finally deposited on Dunstan's Steeple, whence the origin of their football on that day. The game was once thought a treat for Princes, and Henry Prince of Wales and Sir Edward Baynton, at Bromsham, in Wiltshire, the minister of Bishop's Canning's household entertained his Majesty with a football-match of his own parishioners. Sir Thomas Elyot terms it "jolly" sport, and three days since it would have challenged all England for music, football, and singing. Cricket is a game *par excellence*. Fuller styles it as cricket is of Eton; and a writer in the *Quarterly Review* pleasantly observes:—" The hardy and manly game of cricket, which is now so universal, and is waged with the individual prowess of the Homeric conflicts and with the personal skill and science of Olympic or mediæval chivalry, before villainous saltpetre had reduced the knight-errant to the musket. The play is played out by boys with that dogged determination to win that characterises the race of which they are members, and by which the adult is trained to face the common-ball with equal alacrity." Sir Walter Scott wrote to Lockhart from Abbotsford, "I am glad the football match played at Carterhaugh, in the year 1815."

Here is a curious account of very old pyrotechnics. The *Publicateur de la Vendée* announces the death, at the age of 107 years, at Essarts, in that department, of Jacques Chevillon, an old soldier of the Empire, who had enjoyed excellent health until the use of all his faculties till within a few days of his decease. The *Sydney Empire Journal* announces the death, at Parramatta, in New South Wales, two persons, husband and wife, aged respectively 111 and 112 years. They are described as hale, healthy, and bedridden, in possession of both sight and hearing. The old man arrived in the first fleet, in 1788, and has consequently, been seventy-five years in the colony of New South Wales.

A collection of beautiful Chinese enamels and porcelain, formed by a gentleman during a long residence at Canton, is at present exposed by auction, the yield being upwards of £3000. Among the more remarkable objects are—

A small globular candlestick, supported by a bird standing upon a tortoise, £38 (Richardson); a pair of candlesticks, supported by swans, in the rare white enamel, standing on tortoises, with circular plinths, perfectly unique, £64 (Durlacher); an extraordinary bottle of ancient porcelain, with pink and yellow borders, enamelled with flowers, the body with a trellis-work pendant, covering an interior bottle with gilt handles, a very rare specimen; and another equally fine and rare, on lapis-blue ground, with raised flower ornaments and medallions of landscapes on both sides, £62 (Smith); a tall rockwork of extraordinary size, with birds and flowers in relief, and a pair of vases and covers, with dragon ornaments in relief, £40 (Smith); a pair of rare, or indeed unique, specimens of ancient porcelain, with dishes in colours, the rock and four birds standing on the edges, £40 (Smith); another pair, £40 (Smith); a pair of kylins, of extraordinary size and beauty of design, decorated in various coloured enamels, with flowers, £100 (Durlacher); from the Bromley Palace at Peking: perfectly unique, 230 guineas (Wareham).

NEW BOOKS.

London: S. W. PARTRIDGE, 9, Paternoster-row

WHO SHALL ROLL AWAY THE STONE. "Who shall roll us away from the grave? Who shall roll us away the stone from the door of the sepulchre? And when they looked they saw that the stone was rolled away."—MARK xvi. 3, 4.

What poor weeping ones were saying
Explains hundred years ago.
We, the same weak faith betraying,
Say in sad and hopeless woe.
Looking at some terrible trouble,
Some dark sorrow, some dread fear,
We cry, often sad, with sighing,
"Who shall roll away the stone?"

II.
Then with tone our spirits steadying,
When that night came near to close,
Angels down from glory speeding,
Said, "Why seek ye Him with those?
He, before the way was ended,
Oft ye've had with joy to see,
Angels have been sent from heaven
And have rolled away the stone."

III.
Many a stone-clad sweeping eye us
Through the years that are to be;
Many a grief we see before us
Never comes to cause us pain.
Christian courage, Christian patience,
Christian comfort—why should fear haunt?
Ask not them in foolish sorrow,
"Who shall roll away the stone?"

IV.
Burden not thy soul with modes:
Make a wiser, better choice:
Cast it on the Lord Jehovah;
Just rest, bid Him, and "rejoice."
In to-day's bright sunlight basking,
Learn to answer's cares alone;
Spend not present joys by asking
"Who shall roll away the stone?"

The above is from a volume of Poems just published by Hatchard and Co., 187, Piccadilly, London. The volume is elegantly bound, and the contents are printed on tinted paper, with gilt edges, and most minute size. Price 3s. 6d., a charming book for a Christmas present, and for the MINISTRY OF SICK ROOMS.—HATCHARD'S.

THE ILLUSTRATED LONDON NEWS.

No. 1235.—VOL. XLIII. SATURDAY, DECEMBER 12, 1863. WITH A SUPPLEMENT, FIVEPENCE

OUR MONETARY SITUATION.

AT this particular juncture both the commercial and the meteorological barometers are subject to such disturbing influences as to excite very considerable national attention. While the quicksilver in the one is constantly going down very low, and so indicating the coming of storms and wrecks, in what may be called the physical sense, the gold in the former has gone up so high as to lead to the expectation of a monetary panic, with its accompanying crashes, in the mercantile world. The condition of the money market has been such as to bring about the most stringent action on the part of that great regulating establishment, the Bank of England; and it is evident that the powers of that institution will be used to the utmost to keep in subjection that species of commercial *dementia* which seems to come upon the manipulators of capital with a certain periodicity. This state of affairs is well worthy of consideration; and some features of the situation may be dwelt upon even by those who are not, in the strict sense of the term, immediately interested in the sayings and doings of the money market, but who are sure, in the event of its disturbance, to feel its influences in some way or other.

The stringency of the occasion may be estimated by the fact—unexampled, except in cases of actual panic—that the Bank of England made an advance of 1 per cent in its rate of discount on two successive days. A further rise has been expected, and, indeed, has practically taken place; for, whereas the official rate of the Bank was raised last week to 8 per cent, that establishment has demanded and received the rate of 9 per cent at its pleasure. It was, nevertheless, stated at the beginning of this week that money was plentiful, as the City phrase goes; but, there being a reticence on the part of the great discount houses to do business in a general way, there has been a pressure on the less opulent merchants, and those of the second class are in many cases embarrassed. For the stronger body of our great traders there has been hitherto no apprehension; and, happily, the general soundness of our commerce has warranted a belief that the present crisis will pass over without any violent dislocation of the trading community. It would seem that speculation has been temporarily stopped,

THE COURT-MARTIAL ON COLONEL CRAWLEY: A SKETCH IN COURT.—SEE PAGE 565

except in one direction, and that, it is presumed, it is beyond the capabilities of any but the well-weighted operator to follow. The chief, if not the only, disturbing element of the money market has been the large export of gold required for payment for cotton coming in from Egypt, Brazil, and India. The closing of the Southern States of America to the supply of cotton has necessarily led to the opening up of other sources; but, independently of the increased price attendant on difficulties connected with inland means of conveyance in the producing countries and the greater length of sea voyages thence to this country, we have engaged in this traffic with traders who, as yet unaccustomed to a system of barter, demand so much specie for so much cotton, and they will take nothing else. Somewhat heedless of this condition, our merchants have given large orders for cotton, and they find themselves now called upon to pay for it in bullion, which they must obtain at any rates which may be demanded of them. At the present price of cotton, it is said, that dealers in that article are willing to pay 12 per cent for money to enable them to complete their purchases, and yet hope for a large profit. This seems to be the turning point of the mania, which it is the object of the Bank of England to check. It is not necessary to go back so far as twenty years to know how the spirit of speculation will sometimes run madly in a particular direction—how a source of profit which is large is supposed to be inexhaustible. As it was with railways once, so it might be with cotton now. A sharp corrective has been required; and, judging from the course taken by the Bank of England—exercising its power within the strict limits of the law under which it exists—additional stringency will be adopted if necessary.

At the present time, whatever betides, whatever may result from the uneasy condition of the money market, there is, it may be confidently hoped, no fear of anything beyond a temporary difficulty. The trade and commerce, the settled wealth of the country, were never based on such profound resources. No exact estimate of the capital of England has, we believe, been made, although approximate statements are of course not wanting; but, on good authority, it is asserted that the yearly savings of the people amount to fifty millions sterling—the abstraction of five or six millions of specie cannot therefore work any permanent evil, although it exercises a disturbing influence on the money market—in the first place, by directly contracting the circulation to a certain extent, and still more by the insensible effect which it produces on the minds of the money dealers, inasmuch as it is a visible and tangible diminution of capital, easily exaggerated by the sensitive imaginations of those especially interested in the matter.

It seems that the question of the Bank of England have had a considerable effect on the East Indian exchanges, which will materially lessen the future exports of bullion to Bombay; and although large quantities of specie are still being sent to Brazil, it is stated that the rate of exchange is in favour from our side. Our receipts from that country have at times exceeded our exports; and it appears probable that its inhabitants will ere long demand our mercantile products much in the same way, if not exactly to the same extent, as did the United States previously to the unhappy civil war in the country. Unless some extraordinary circumstance should arise, it would seem that there is no absolute fear of a recurrence of the crises of 1847 and 1857. At present, no Order in Council relaxing the restrictions on the Bank Act looms in the early future; for all purposes the existing powers of the conclave in Threadneedle-street seem to be sufficient. The origin and cause of the monetary disturbance is known. Is being directly met, with prudence and vigour, in the only way that it can be met: and the confidence is felt in the efficacy of the proceedings which have been adopted, which goes far to ensure a favourable result. It may seem a paradoxical notion, but it is just possible that the very abundance of capital may render capitalists more timid than one which is on any but the most assured security. The word speculation carries with it a necessary terror, and even legitimate trading feels its effect. If the Bank of England can succeed in driving the word as well as the thing out of the money market, no doubt all will be well.

We have above alluded to statements which more than imply the healthy condition of our trade. Indeed, there are satisfactory proofs of the general prosperity of our commerce. The returns of the Board of Trade, which are issued so successive in their facts; and from that source we learn that our exports for the month of October reached the unprecedented amount of £15,082,332, being nearly double that of January last. Under almost every head there is a remarkable increase, especially in woollens, linens, machinery, and iron; while our imports have ranged on a comparatively high scale, wool and wine showing the chief improvement, and corn the greatest decline, So, in this latter respect, our good harvest is beginning to tell, and our supplies of wheat and flour are reduced to the minimum. There has been also a large increase of tonnage in the shipping trade, the amount for the three quarters of the present year greatly exceeding the total for the year 1862, and still further exceeding that for 1861.

It is stated that the law officers of the Crown in Scotland have decided to take legal proceedings in the case of the Pampero, a steamer launched at the Clyde, and said to be destined for the Confederate service.

A new mail contract has been entered into by the Canadian Government, with the Montreal Steam-Ship Company. The subsidy is to be £62,000 a year, and the ships will be able to go at less speed in foggy weather without incurring penalties. The contract is for five years.

Eleven Harrow members of the University of Oxford went, on Nov. 20, to play their annual match of football against their old schoolfellows of the other University. The match was played on Bullingdon Field, and the victory of Cambridge was attested by one goal.

Messrs. Marion and Co. have just published a series of litho-like carte-de-visite portraits of the Prince of Wales, the Princess of Wales, the Queen of Denmark, the King of the Greeks, and the Princess Dagmar, taken from life by Messrs. Southwell Brothers, at their studio in Sidenham, in October last.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The reading of the draught of the Address took place on Tuesday, in the Senate. It is a paraphrase of the Imperial Speech, to which it replies. The debate on the Address will begin on Monday next.

The first conference took place on Monday at the Ministry for Foreign Affairs for the conclusion of a treaty of commerce and navigation between France and Sweden.

The Council of State is occupied in considering the project for raising a loan of three hundred millions of francs, as proposed by M. Fould.

Marshal Randon is about to open to the Parisian public a library, containing 6000 volumes and 6000 maps, belonging to the War Office, which have till now been hidden in the archives of that ministry.

The license for a new musical theatre, L'Opéra Populaire, to be erected in the neighbourhood of the Rue Cadet, has been granted to the architect, Monsieur Aldrey.

The replies of the Emperor of Russia, and of the Sovereigns of Belgium, Holland, Sweden, Denmark, and Würtemberg, have been published. The answer of the Czar is cordial in terms, and professes a desire to join in the scheme on certain conditions. "I should be happy," he writes, "if your Majesty's proposition lead to a loyal understanding between the Sovereigns; but for this to be practically realised it can only proceed from the consent of the other Sovereigns. It is indispensable for your Majesty to define the questions upon which your views would have to be arrived at, and the basis upon which it would be established."

DENMARK.

It is stated from Copenhagen that the body of the late King will be buried in the church of Roskild on the 25th inst.; another account states that the funeral will take place on next Friday. The remains are now lying in state in the church of St. Saviour, Copenhagen.

Lord Wodehouse, who was sent to St. Petersburg as English Minister at the time of the Coronation, has, it is said, been held the office of Under Secretary for Foreign Affairs, has been selected to proceed to Copenhagen on a special mission to congratulate King Christian on his accession to the Danish throne, and—as it is semi-officially stated—to make his Majesty personally acquainted with the views of the British Government respecting his rights, his duties, and the spirit in which he should assert the one and perform the other." His Excellency quitted London on Monday evening, accompanied by the Hon. Henry Wodehouse as secretary, and Mr. Currie and Mr. Bonham as Attachés.

THE SCHLESWIG-HOLSTEIN QUESTION.

The great topic of discussion on the Continent is still the Danish question.

In the Austrian Parliament Count Rechberg made a formal statement on the Danish question corresponding to that delivered by Herr von Bismarck to the Prussian Chamber. Austria is not ready, without mature consideration, to countenance the Augustenburg claims. If Augustenburg will fulfil the conditions, Austria declares it is ready to maintain her share of the engagements. Meanwhile, Austria is ready to take steps for the carrying out of federal execution in Holstein.

The Emperor of Austria received on Monday a deputation from the Municipal Council of Vienna to present a petition on the Danish question. The Emperor rather snubbed the deputation. He told them it was unnecessary for them to call on him at all, as they were not a member of the Germanic Confederation, and recommended them in future to confine themselves to the settlement of municipal affairs, instead of discussing great political questions.

The Prussian Government has summoned of the Chamber of Deputies a loan of twelve million thalers to meet the expense of the proposed military execution in Holstein.

The Council of Ministers met on Monday, though only by a small majority, a resolution for "federal execution" in Holstein, but "reserved the right of Prussia to decide the question of execution." Orders were immediately issued for the entry of federal troops into Holstein; but it is supposed that the movement of Saxon troops will be immediately executed, and whether the Danes will offer forcible opposition to the occupation of the duchy by German troops.

King Christian has issued a proclamation to the Holsteiners declaring that he will put down insurrection of any kind, but will secure to the Duchies their constitution.

The Danish Government has withdrawn the Royal patent of the 30th of March, under which persons living abroad could vote the other members of the State. This step may have some effect in bringing about a conciliatory temperament and leading to a compromise. The *Dagbladet* strongly censures the Government for having yielded on this point.

The so-called Rigsraad, peasantry, and the Legislative Assembly of the Duchy of Lauenburg, held a meeting on Friday last, and passed a resolution declaring their unwillingness to separate from Denmark, and to recognise King Christian.

The Finance Minister of the Prince of Augustenburg has issued bonds for a loan bearing no interest, and the amount of which is not fixed. The bonds are for 25 thalers each. A Frankfort citizen (good, easy soul!) is said to have subscribed for 1000.

It is said that 100,000 muskets, intended for the Prince of Augustenburg, have been seized at Altona.

SWEDEN.

The Diet was closed on Tuesday with a speech from the Throne. His Majesty said that the relations with the Powers were unchanged, but they are connected with the maintenance of peace and the rights of nations in Europe. The Swedish nation feels deep sympathy and esteem for the noble and high-minded conduct of the King and people of Denmark.

THE POLISH INSURRECTION.

Several serious engagements between the Russians and the Polish have taken place in the government of Radzin. Wounded soldiers in large numbers are arriving daily into Warsaw. Executions and new deputations are taking place in that unfortunate city. The chief officers of the Polish insurgent forces have escaped to Prussia. Twenty of the railway officials were arrested and conducted to the citadel.

The *Invalide Russe* of St. Petersburg has a remarkable article demanding whether it is really an advantage for Russia to retain the kingdom of Poland, which can only be held by the constant exertion of force. The article comes to the conclusion that Russia would gain by the separation, and that Poland would be a source of strength altogether, when this can be done honourably and without the appearance of compulsion. The writer considers that Prussia as the only really the friend of his country would laid with joy the attainment of such a result.

The Austrian Government have taken a harsh step towards the well-known journal the *Czas*, of Cracow. This paper, an exempt champion of the Polish cause, has been suspended for a month, and in consequence of the policy it has advocated on the Polish question.

AMERICA.

WAR AND POLITICS.

The Confederates have sustained a severe defeat in Tennessee. With a daring confidence, General Longstreet hastened from before Chattanooga, with a portion of his army, and sent a force of about 100 miles to the north-east, by a couple-de-main. Bounds slowly retired before the advancing Federals, and on the 17th ult. was in the neighbourhood of that town, which Longstreet had by the last accounts invested, completely cutting off the Federal communications with Burnside having orders to hold out to the last extremity. Meanwhile, the heavy reinforcements under Sherman reached Chattanooga unexpectedly early, and Grant resolved at once to relieve Burnside by assailing Bragg. On the 24th ult. by a series of skilful manœuvres, and after much hard fighting, he drove the Confederates from Lookout Mountain and Missionary Ridge, which overlook Chattanooga, capturing, it is said, 4000 prisoners and thirty guns. Next day Bragg hastily retreated from the position he had taken up, abandoning stores and materials, and destroying the bridges behind him. The rest of the enemy, says General Grant, "was completely routed." Bragg retired towards Dalton, in the direction of the railway which communicates with Knoxville. Here definite information ends.

General Meade's whole army crossed the Rapidan, on the 27th ult., at Culpepper and Germania Fords, without encountering any serious resistance. The Confederate army, which was said not to exceed 50,000 men, was believed to be falling back towards Richmond. It had, however, been previously stated that a battle was imminent, as it that President Jefferson Davis had spent two days in reviewing the Confederate army.

At Charleston little progress had been made. The whole of the seawall of Fort Sumter had been battered down, but the Confederates are erecting formidable defences in the ruins. The fleet has been repulsed in a demonstration on rafts against Fort Sumter. The *Richmond Examiner* of the 9th inst. gives the following review of the several Federal attacks on Fort Sumter:—"The bombardment of Sumter, commenced on the 17th of August, up to Thursday last, 15,540 shells had been fired in it, of which 12,702 struck. Twenty-seven of the garrison have been killed and sixty-nine wounded. The fleet has lost seventy-two officers and men, the average weight of shot being 200 lb. The weight of iron, 3,110,000 lb., or 1,555 tons. Forty-one men killed, and 70 lb. of iron per man. If the charges of powder averaged 15 lb., we have 8639 lb. to each man killed, and 44,400 lb. to each casualty. Sumter in ruins laughs at her enemy, who still fears to pass her battered walls. Charleston has a valuable iron mine in the fort.

The Southern papers have a report of a defeat of the Federal General Franklin in Louisiana; but there is no confirmation of the story.

GENERAL NEWS.

The *New York Tribune* affirms that President Lincoln will announce in his message a plan for paying the Debt to union which will be in accordance with the furtherance of the emancipation proclamation. It is pretty certain that Abraham Lincoln will be the Republican candidate in the next presidential election. The Abolitionists may be said to have committed him by endorsing the speech of Mr. Wendell Phillips. "The man who had the heart to originate the emancipation proclamation," says the Abolitionist leader, "ought to remain at the helm for some time longer at least." This statement is sufficiently disproves the story which represented the President, on the authority of the *Times*, as saying that the Abolitionists were the greatest mistake of his life.

The *Times* has information that the number of negroes who have been armed and mustered into the service of the Federal Government amounts to 40,000.

No less than 5871 men are advertised in New York as not having reported themselves for service in the Federal army, although their names were drawn in the ballot-box as drafted men.

By the opening of the Atlantic and Great Western line to Cleveland, the journey between New York, for the first time, is accomplished, without change of carriage, from New York to the lakes—an unbroken distance of 618 miles.

Admiral Lavarsky has selected Hampton Roads as the winter quarters of the Russian fleet. The Brooklyn navy-yard was offered, but he declined on account of the difficulty of getting his powerful sail men on board near a large city.

The *New York Herald* estimates that 2,000,000 bales of cotton are said to be stored at Atlanta, which General Bragg will have great difficulty in removing before General Grant reaches the city.

INDIA.

By the latest telegrams we learn that the Earl of Elgin still lingers. Mr. David Sassoon, the well-known merchant in Bombay (whose portrait we gave last week), has offered to Government £6000 as contribution of Government giving an equal sum and a site on the Esplanade for the erection of a charitable building for the mechanics' institution and for public meetings.

Maharajah Sher Dun Singh, Eahadoor of Utwar, who has reached his majority, was installed with the full ceremonial of his principality, and the Regency Council dissolved by his Excellency the Viceroy and Governor-General of India in Council on Oct. 24.

The Rajah of Joypore is to have the Star of India for his services in the late campaign. He remained principally of forwarding a detachment of his troops to Agra.

CHINA AND JAPAN.

Advices received from Pekin to the 3rd of October state that the General-in-Chief of the Imperial troops received from the Emperor an order to strangle himself, and obeyed. A Shanghai telegram, of Oct. 26, reports some successes achieved by Major Gordon. It also states that advices from Japan represented affairs to be quiescent.

AUSTRALIA AND NEW ZEALAND.

A telegram has been received from Sydney announcing a change in the Government there, the new Ministry being thus formed:—Martin, Q.C., M.L.C.; G. Eager, M.L.C.; Forster, M.L.C.; Wilson, M.L.C.; and Parkes, M.P. for Sydney.

A telegram from Melbourne informs us that there was much excitement in that city on the question of the transportation system.

From New Zealand the news is that General Cameron had successfully attacked the Maories.

A subscription has been commenced among the members of the medical profession to assist Messrs. Fraser and Andrews, the defendants in the late "celebrated case of arsenic," in defraying the costs of the action.

Letters received from the Caucasus state that the insurrection is spreading ceaselessly. The Circassians have shut several Russian officers occupied in surveying the country in the mountains, and compelled them to ransom themselves.

The Alexandra correspondent of the *Times* states that the railway is in full activity, and is bringing from 4000 to 6000 bales of cotton a week into the port, which will in a few months increase the number to from 20,000 to 25,000 bales, which is comparatively little, compared with the hundred times as large as that did not use as much cotton as we long stationery. The cattle disease has, unfortunately, broken out again, and, according to the latest accounts, 30,000 head have been lost. It is now began to attack the newly-imported cattle.

M. Legrey, Minister of Agriculture, Paris, publishes the following statistics respecting the number of Europe:—Austria keeps up an army of 670,000 men, which costs 88,000,000f.; Prussia, an army of 214,000 men, which costs 288,000,000f.; Russia an army of 914,000 men, which costs 1,000,000,000f.; and Russia an army of 1,000,000 of men, which costs 820,000,000f. That is, out of the 1,000,000 of these human automata who compose the war cost—in Austria, or more than a third; 25 per cent in France; 80 in Prussia; 75 in Russia. In England, 1 in 1,000. Let us glance now at Italy, where 270,000,000f. are expended in keeping up a force of 315,000 men; Turkey, where they keep up an army of 432,000 men at a cost of 200,000f.; the first with 50,000 and the second with 67,000 men, by which their budgets are increased 17 and 15 per centum respectively. The Napoleonic Empire offers in an analogous proportion. Switzerland is the only European State that neither has a standing army nor budget. Her militia, however, is perhaps the effective of all the European armies according to estimates which in consequence have been made to compute the effective fighting army at the number of 3,815,847 men, and an outlay of 3,000,000,000f.

THE LATE FIRE ON THE *Flowery Land*.—The *Flowering Gazette* of Dec. 1 says:—"The successful accuracy of the rumour of the baby of the late King took yesterday morning, and was followed by that of the mother. Between five and six o'clock the funeral cortège, extending nearly half a mile in length and accompanied by many hundred persons, was met by a crowd of people, reached this city. The body of the deceased Monarch, after it had been removed from the temporary resting-place, was borne hither from the country by the country people. At the head and end of the procession marched detachments of the Royal Guard. The procession was preceded by the officers of the staff of the General in command and other officials on horseback. Immediately following the hearse, drawn by six horses, came the family mourners. Two coaches of state brought up the procession—the Council, the Royal bodies and dignitaries, then father, with their brethrenes, did not take part in the ceremony. As soon as the body was placed on beside the throne-chair, in a chapel richly decorated and built on a raised platform on the dock, ultimate guns were fired from the ironclad ship in harbour. A great number of tarriers sat on fire on the eastern side of the port and a memorial place over the whole country. The funeral car was drawn by four horses, and was accompanied by the troops, and soon after left the port on their way to Copenhagen."

CHURCH AND UNIVERSITIES.

The Chair of Ecclesiastical History at Oxford has been given to the Rev. W. W. Shirley, son of the late Bishop of Sodor and Man.

The parish church of Bradenham was reopened, yesterday week, after a most successful restoration under the direction of Mr. Street.

The Very Rev. Thomas Garnier, B.C.L., Dean of Lincoln, died at the deanery on Monday night, at the age of fifty-four years.

Mr. H. Fawcett has been elected to the chair of political economy in the University of Cambridge.

The Marquis of Westminster has contributed £550 to the West Connaught Church Endowment Fund.

The Church of the Holy Trinity, Stonegrave, Yorkshire, was consecrated by the Archbishop of York, after a complete restoration under the superintendence of Mr. G. Fowler Jones, of York.

A movement is on foot, and has received very influential support, for the establishment of colleges and a university for Wales on the plan of the "Queen's Colleges" and University in Ireland.

The Rev. George Shaw has received from the parishioners of Kinver a silver salver and a purse of sovereigns, on his leaving the curacy for Welbourne, Lincolnshire.

The Rev. Walter Waddington Shirley, M.A., Mathematical Tutor, has been appointed to the professorial chair of ecclesiastical history, Oxford, vacated by the promotion of Dr. Stanley.

It is proposed to commence the restoration of the abbey church at Bath, known as "the Lantern of England," at a cost of between £6000 and £7000, under the superintendence of Mr. Gilbert Scott as architect, and a local committee has been formed in furtherance of the object.

Last Saturday the Bishop of Oxford confirmed about 190 scholars attending Eton College, the Bishop delivering an appropriate address to the youthful noblemen and gentlemen present. The school closed yesterday (Friday) for the Christmas holidays.

King's College has to lament the loss of a second professor, the Rev. Algernon Sydney Thelwall, lecturer in public reading and elocution, a tutor highly respected and esteemed by the theological students of the college. Mr. Thelwall was sixty-eight years old.

A meeting of the clergy of the archdeaconry of Worcester has been held at Worcester, to consider the question of an alteration of the burial service. About 150 of the clergy were present, and Archdeacon Hone presided. After a long discussion, a motion against any alteration of the Prayer-book was carried by a large majority.

The sum of £1000 has been accepted by the University of Cambridge for the purpose of instituting a prize, to be called "Sir Peregrine Maitland's Prize," for an English essay on some subject connected with the propagation of the Gospel, through missionary exertions, in India and other parts of the heathen world; the prize to be given once in every three years, and to consist of the accruing interest of the principal sum during the preceding three years. The prize will this year be given for the best essay on the following subject:—"The proof afforded by the history of missions that Christianity is adapted to be the religion of the whole human race." Candidates for the prize must be graduates of the University, who are not of more than ten years' standing from admission to their first degree, when the exercises are sent in. The essays must be sent to the Vice-Chancellor before the division of the Easter Term 1864, each bearing some motto, and accompanied by a sealed paper, bearing the same motto, and inclosing the name of the candidate and that of his college. The prize will be adjudged by the Vice-Chancellor, Dr. Atkinson, Master of Clare College, and Mr. T. T. Perowne, of Corpus Christi College.

PREFERMENTS AND APPOINTMENTS.—The Rev. W. W. Shirley to be Canon Residentiary of Christ Church, Oxford. *Rectories:* Rev. J. H. Gandy to Stanwick, Northants; Rev. F. B. Goodacre to Wilby and Hargham, Norfolk; Rev. J. C. Jones to Shelton, Notts; Rev. R. Lloyd to Blo Norton, St. Andrew, Norfolk; Rev. E. F. St. Leger to Scotton, Lincolnshire; Rev. J. P. Tweed to Little Waltham, Essex. *Vicarages:* Rev. R. F. Follett to Winsecmbe, Somerset; Rev. W. Langstaff to Whatton, Notts; Rev. E. C. Lethbridge to West Thurrock, Essex; Rev. R. Reynolds to Markham Clinton, Notts; Rev. W. Romanis to Great Wigston, Leicestershire. *Incumbencies:* Rev. L Jones to Carmarthen; Rev. T. Lewis, to Llanavan-fawr, Breconshire. *Chaplaincy:* Rev. W. G. Cowie to the Camp of his Excellency the Viceroy and Governor-General of India. *Perpetual Curacies:* Rev. R. Davies to Brockhampton, Ross; Rev. P. H. Douglas to Thrumpton, Notts; Rev. W. H. K. Fardell, to St. Swithin, Lincoln; Rev. H. C. Seller to Trull, Somerset. *Curacies:* Rev. T. Bristow to Brattleby, Lincolnshire; Rev. M. M. Ben Oliel to St. James's, Pentonville; Rev. E. H. Flynn to St. Anne, Soho; Rev. W. B. Fry to St. Bartholomew, Gray's-inn-road; Rev. J. F. Goggin to Wigan; Rev. W. G. Green to Staplegrove, Somerset; Rev. J. Greenwood to Eston, Yorkshire; Rev. J. Hall to Gedling with Stoke-Bardolph, Notts; Rev. E. Hayes to St. Margaret's, Leicester; Rev. R. Hayes to Woodhouse Eaves, near Loughborough; Rev. F. W. Helder to St. James, Enfield, Middlesex; Rev. J. Lamphier to St. Paul, Nottingham; Rev. F. J. Leachman to Howe, Norwich; Rev. H. Macnamara to Chew Magna, Somerset; Rev. W. S. Oke to Christ Church, Nailsea; Rev. H. M. Oswald, to Witham, Essex; Rev. F. F. Ould to Berwick-on-Tweed; Rev. W. J. Pollock to Crossthwaite, Cumberland; Rev. J. J. Rew to Trinity Church, with Avon-street Chapel, Bath; Rev. T. S. Smith to Mablethorpe-cum-Stane, Lincolnshire; Rev. E. G. Wilkinson to Riseholme, Lincolnshire; Rev. E. Williams to Beckenham, Notts; Rev. J. Yolland to St. John's, Battersea, Surrey; Rev. C. Shakspeare to St. Stephen, Paddington; Rev. W. H. Woodman to Holy Trinity, Lee, Kent. Rev. T. Cochrane, M.A., of Oriel College, Oxford, to be Master of the Earl of Leicester's Hospital, Warwick.—*Guardian.*

METROPOLITAN NEWS.

The Prince of Wales has become one of the patrons of the German Hospital (in conjunction with the Queen and the King of Prussia), in the place of the late Prince Consort.

The annual full-dress ball in aid of the funds of the Royal Dramatic College took place on Wednesday night, at Willis's Rooms, and was in every respect a success.

The City officers last week condemned 4100 lb. of meat as unfit for human food: 2468 lb. were diseased, 240 lb. were putrid, and 1392 lb. were from animals that had died from natural causes.

An elegant clock has been presented to Peter Yeames Gowlland, Esq., F.R.C.S., by 191 patients of St. Mark's Hospital, "as an earnest, loving token of gratitude for his untiring care and great skill shown in the treatment of those under his charge at that institution."

Last Saturday a number of men commenced driving the first foundation-piles immediately opposite the late residence of the Duke of Buccleuch. Operations were also commenced for the embankment on the southern side, which will be carried out simultaneously with that on the Middlesex side of the river.

Another paraffin accident is recorded, proving the dangerous nature of that liquid. A woman in Bethnal-green not being able to extinguish a lamp by turning it down, attempted to blow it out, and in so doing drove the flame down into the reservoir, which immediately exploded, and she was so terribly burnt that no hopes are entertained of her recovery.

The Society of Arts has determined upon applying a considerable portion of the interest of the Cantor fund this year to the establishment of courses of lectures on the following subjects:—"The Operation of the present Laws of Naval Warfare on International Commerce," by G. W. Hastings, Esq., Barrister-at-Law; "Fine Arts applied to Industry," by W. Burges, Esq.; "Chemistry applied to the Arts," by Dr. F. Crace Calvert, F.R.S. The first lecture of Mr. Hastings's course was delivered at the Society's house, Adelphi, on Monday evening, Vice-Chancellor Sir W. P. Wood in the chair.

Mr. Locke, M.P. for Southwark, addressed his constituents on Tuesday night. In the first part of his speech he referred to local questions, and condemned the proposal to rebuild St. Thomas's Hospital beyond the borough of Southwark. In speaking of general questions, he attributed the present prosperity of the country to our free-trade policy and the operation of the French treaty. He supported the policy of non-intervention in American affairs, and expressed his belief that we would not be dragged into war by the Schleswig-Holstein question. A vote of confidence in the hon. gentleman was carried unanimously.

Operations connected with raising the iron girders for the new temporary bridge at Blackfriars, in process of construction between the old bridge and the railway bridge of the London, Chatham, and Dover Railway, were commenced on Tuesday. There will be three openings of 70 ft. span. The roadway will be 31 ft. wide, with passenger-ways on both sides, and the entire length of the structure from Albion-terrace, Blackfriars-road, to Chatham-place, Bridge-street, Blackfriars, where the approaches are to be, will be about 1000 ft. The bridge will be on a perfect level, and some 8 ft. below that of the old bridge.

Last week the births of 1795 children—941 boys and 854 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number (corrected) was 1867.——The deaths in London were above 1400 in each of the last three weeks of November; they declined to 1376 last week. The average number of deaths in ten corresponding weeks (taking the forty-ninth week in each of the years 1853-62) is, with a correction for increase of population, 1460. Smallpox was returned in 26 cases. Scarlatina was less fatal than it had been during a long period, the number recorded being 88. Sixty-four deaths are referred to the head of typhus. Bronchitis caused 155 deaths.

The agreement for the erection of the International Exhibition building in the Alexandra Park has been signed by Messrs. Kelk and Lucas.

At a meeting of the Law Amendment Society, on Monday evening, Mr. Robert Wilson read a paper on the transfer of title to land. After the paper it was stated by the secretary of the society that under the new law for the registration of titles there had been applications for registration in respect to property of the value of £2,000,000. Included in that property was one estate of the value of £700,000. The expense, under ordinary circumstances, of the registration of the title of an estate worth £20,000 would not exceed £50, which sum, however, would not include fees to solicitors. It was subsequently stated that the terms of the proposed amalgamation of the society with the Social Science Association had been agreed upon.

A meeting of the Ethnological Society of London was held on Tuesday night. Mr. J. Lubbock presided. An interesting paper respecting the Weddos—a wild tribe of Ceylon—written by a native of that island, was read by the secretary, Mr. Galton. The Weddos are supposed to be the descendants of two Royal families of Ceylon who took refuge in the deserts during the invasion of some foreign Powers, about two hundred years after the island was occupied by King Weege, with his seven hundred followers. Having increased in the jungles, and formed into a sect, they secluded themselves from others. Lately, however, the tracts of country occupied by them have been frequented by every class of men in the island for the purpose of barter. The result is that the Weddos are now more friendly and more industrious in their pursuits of killing wild animals and collecting wax and elephants' tusks. A few years ago they began to cultivate small tracts of land with fine grain and to build huts. They are a miserable-looking race, and have a revengeful disposition. A paper on the commixture of the races of man in the New World as affecting the progress of civilisation was read by Mr. John Craufurd. A discussion followed, in which the President, Mr. Dickinson, Sir Charles Nicholson, Professor Busk, Mr. Cranfurd, and others took part, and at the close of the proceedings the meeting adjourned.

LAW AND POLICE.—By an action tried before the Court of Common Pleas last Saturday, Lady Blantyre recovered against the proprietors of the St. James's Hotel the value of £584 worth of jewellery, &c., stolen from her room in that hotel one night in May last. A point of law was reserved whether a notice exhibited in all the rooms to the effect that the proprietors "would not be liable" for losses was of any avail. By a recent Act an innkeeper's liability is limited to £30, except property above that value be specially declared; but the present case occurred before the Act came into force.

A jury in the Court of Exchequer on Tuesday gave a verdict of £100 to a plaintiff, who sued the London and Provincial Turkish Bath Company for damages for injuries sustained by him in their bath in Jermyn-street. In moving from one room to another in the bath the plaintiff, Mr. Adams, fell down some steps, and, his leg coming in contact with a heated flue, he was severely burnt. It was contended for the plaintiff that proper care had not been used by the defendants in guarding against such an accident, and the jury, taking that view, gave the verdict for £100 damages.

A singular will case was heard yesterday week in the Court of Probate. A numerous family of brothers and sisters was left £14,000 by an uncle, which was to be divided among them in a rather complicated form. About twenty years ago one of the sisters died, and her will, bequeathing her share among the rest of the family, was witnessed by two of her sisters and administered by her brother John. Another brother, James, who was abroad at the time, came home lately and employed an attorney to examine into his interest in the property, giving him a mortgage over his share of the wills as compensation. The brother who had administered and the sisters who witnessed the will now came forward to declare that the will was a forgery. After hearing evidence, however, the jury found that the will was valid.

The begging-advertisement writer who was brought up last week at the Southwark Police Court was on Monday placed before Mr. Burcham for final examination. The prisoner, who had passed under various names, was charged with endeavouring to obtain money by inserting false appeals in certain publications, and the further evidence which was taken clearly established the prisoner's guilt. He was sentenced to three months' hard labour in Wandworth House of Correction.

On Monday the inquiry into the circumstances attending the deaths of the two men who unfortunately lost their lives by the falling of the Three Wheatsheaves Tavern, Islington, whilst in the course of erection, was resumed before Dr. Lankester. A great deal of evidence was taken as to the way in which the construction of the house was conducted, the nature of the materials, and the strength of various parts; but nothing very striking was elicited. The inquiry was ultimately adjourned till next Monday.

COUNTRY NEWS.

Mr. William Jackson, M.P., has given £5000 towards the erection of ragged schools at Birkenhead.

The Morecambe Bay light-ship broke adrift on Friday se'nnight, and two of the men were washed off the vessel.

On the 3rd inst. Thomas Davies, a superannuated pilot, died at Frog-street, Swansea, having attained the age of 100 years within 22 days.

The members of the Trinity Board who have inspected the estuary of the Ribble for the purpose of selecting a site on which to erect a lighthouse, have fixed upon the sandhill opposite the gut.

A monument, consisting of a column about 30 ft. high, with a suitable inscription at the base, has been erected in Darfield churchyard, in memory of the 189 persons who lost their lives in the Lundhill colliery explosion in 1857.

The Local Board at Blackpool, Lancashire, are contemplating several important improvements. It is proposed to form a promenade and carriage-drive twenty-four yards wide, and to continue a public promenade from the Gynn to the parsonage at South Shore, above two miles in length.

A son of one of the New Zealand chiefs at present in England was christened at Tottenham Church on Thursday week, and had the honour of having her Majesty as godmother. The child was named Victor Albert, by desire of the Queen. His surname is Pomare.

Mr. M'Swiney, a Roman Catholic, is the new Lord Mayor of Dublin; Mr. John Chadwick has been elected Mayor of Drogheda; Mr. John Lolar, of Waterford; Mr. Maguire, M.P., of Cork (his third year consecutively in office); Mr. Alexander Lindsey, of Londonderry; Alderman John Lytte, of Belfast; and Mr. Eugene O'Callogan, of Limerick.

The long-prepared statue of William Dargan, through whose enterprise and liberality the Exhibition was held in Dublin in 1853, was placed yesterday week upon its pedestal on the lawn of the Royal Dublin Society. It was on this conspicuous space, now occupied by the splendid buildings which will comprise the National Gallery of Ireland, that the Exhibition was built.

Some powder-mills near the Kyles of Bute were blown up last week. The explosions were two in number, with an interval of a minute or two between, which enabled several of the men to escape to shelter. In the first explosion, however, which is supposed to have been caused by lightning, seven men were killed.

A publican's daughter, living at Hunslet-lane, Leeds, very gallantly captured a burglar on Saturday night. She found him in her bedroom, seized him, and held on so firmly that the couple rolled down stairs together, when the man was secured. There was found in his possession a considerable sum of money and valuables, which he had taken from the bedroom in which he was caught.

The East Lancashire Union of Mechanics' and Literary Institutes held their annual meeting at Haslingden on Saturday last, under the presidency of Colonel Wilson Patten, M.P. The Marquis of Hartington was present, and in his speech compared the education of the New England States with that of Lancashire, adding to the educational comparisons remarks on national and local characteristics.——On the same day, Mr. Hibbert, M.P., addressed a large audience in Oldham on educational subjects, and, like the noble Lord, made Lancashire one of his special themes, and urged on his hearers the necessity of educating every faculty which God had given them.——Mr. Forster, M.P., at Bradford, had a different subject to treat. He was at the distribution of prizes to the volunteers, and he told them that he believed the volunteer movement had conferred on the country great physical, social, and political advantages.

A meeting of the manufacturers, merchants, and tradesmen of Halifax and district was held on Saturday last, for the purpose of considering the necessity of opening an Exchange at Halifax. After an address from the Mayor, it was resolved, on the motion of Colonel Akroyd, seconded by Mr. H. Ambler, to open an Exchange, for the accommodation of the merchants, manufacturers, and tradesmen of Halifax and neighbourhood. The Exchange will be in the large hall of the new Townhall. A committee was appointed to make the necessary arrangements.

An extraordinary confession has been made by one of three youths in custody at Hull, having been apprehended on a charge of committing a burglary at the office of the Electric and International Telegraphic Company, at Hull. Their names are J. W. Wrigglesworth, Richard Lord, and J. J. Reynolds. The one who has confessed says that their band, four in number, had resolved upon reading the Life of Dick Turpin and other such characters, to become burglars, highwaymen, and, to crown all, murderers. They commenced their operations by breaking into the shop of Messrs. Young and Pool, ironmongers, of Hull, a few evenings ago. They tried with crowbars and oyster knives to open the iron safe, and then followed up the attempt by using a file; but they were unsuccessful, and left their work, taking only a few electro-plated spoons, and some knives and forks. When they found the spoons were not silver they buried them. They next committed the robbery at the Telegraphic Office, where one of their number had been engaged, stealing £10. They had arranged to leave the town after this robbery for a short time by means of a dog-cart, which they hired, intending to sell it. Two of their number were accidentally left behind, but they followed in a cab, and to evade payment they had arranged between them to murder the cabman, and sell the horse and cab. But one of them, becoming afraid, told the cabman what they intended to do, and they were captured. The other boys in the dog-cart managed to break it, and, leaving the pieces on the road, endeavoured to sell the horse to a dealer at Driffield, for £5. The low price excited the dealer's suspicion, and he refused to purchase the horse, but communicated with the police. Those in custody have been committed for trial.

We regret to state that we have received a telegram from York, announcing the serious illness of Mr. Justice Wightman.

The *Western Times* states that the lady who left her fortune to Mr. Disraeli was a Mrs. Brydges Willyams, of Mount Braddon, Torquay. She was of Jewish extraction. She became acquainted with that gentleman by his answering an inquiry of hers as to whether he was descended from a Spanish family.

The colliers' strike in Durham still continues without any indications of drawing to a close. The evictions also continue, and on Tuesday forty-five families were ejected from their homes at Oakenshaw. On Wednesday evening a meeting of the men was held at Willington, but, beyond the discussion of their grievances, nothing was done.

It is stated that the Liverpool creditors of the Great Eastern held a meeting on Wednesday, at which two propositions were broached—one to form a new company, in which the total capital will be £160,000, the debts due to the present creditors being taken out in so many paid-up shares of £1 each; the other, to sell the vessel by lottery—the lottery to embrace a large number of prizes.

FATHER AND SON.—The case of a man not setting his eyes on his own son until he was fifty years old is probably without a parallel. The story is told by Leslie in his agreeable "Recollections of West," the painter's father. On his emigrating to America he left his wife in England, who died shortly after giving birth to a son, whom his father first saw on his return to his native land fifty years afterwards. The painter was one of the second wife's family, born in America.—*Notes and Queries.*

The gale of last week told more disastrously at sea than on land. On the south and west coasts the reports of wrecks are numerous. In the neighbourhood of Holyhead there was a melancholy loss of life, and the vicinity of the Goodwin Sands was only saved from similar disasters by the intervention of the life-boats. Reports of effective life-boat services have also been received from Barton Abbey (Norfolk), Southport, Skerries (Dublin), Carnarvon, Portmadoc, Penarth, Lytham, and other places. Three vessels were driven on shore on the West Hoyle-bank, near Liverpool, and went to pieces. Only one man out of the several crews was saved. In the Irish Channel numerous shipwrecks occurred, and were in several instances attended with loss of life. At Bude Haven, on the Cornish coast, a ship was wrecked about ten miles out. The terrible force of the sea on the coast rendered it impossible for any life-boat to contend with it. In vain did the noble life-boat attempt to surmount the fearful breakers. After an arduous and perilous pull it was compelled to return to the shore. Two of her crew were swept out by a tremendous sea; but, having their life-belts on, they regained the boat. All the crew of the wrecked vessel were saved. On the French coasts the storm seems to have been as disastrous as it was on the English shores. The crowning horror remains to be told. The Wilhelmsborg, a German emigrant-ship, with nearly 400 passengers, left Hamburg in the early part of last week for Australia. On getting out of the Elbe, and before she could make an offing, the gale burst upon her, driving her upon the Terschelling sandbank. Here, it is reported, she soon went to pieces, only forty-four persons out of the whole number on board being rescued.

THE COURT-MARTIAL ON COLONEL CRAWLEY.

AMONG the witnesses examined yesterday week was Troop-Sergeant Garraway, who occupied the quarters in the second bungalow before and after Lilley's confinement in them. He stated that, for accommodation and comfort, they were as good as those of any other Sergeant-Major in the regiment; indeed, they were cooler, having a canvas roof under the tiles. Whilst Lilley occupied them there were wet mats in the doors and windows to keep the room cool. He said Mr. Lilley was in the habit of taking stimulants, and that one morning he drank seven or eight glasses of brandy and soda-water. On the other hand, the highest testimony to the sobriety and general character of Sergeant-Major Lilley was borne by Lieutenant-Colonel Frederick Fitzwygram, of the 15th Hussars, a letter from whom, as follows, was given in evidence:—"I knew Sergeant-Major Lilley well from his entry into the service up to the period of my exchange with Lieutenant-Colonel Crawley. I can honestly say that during those many years, whether in the lower grades, or my Troop Sergeant-Major, or in his after more important capacity as Regimental Sergeant-Major, he was one of the best men I ever met. With regard to his sobriety, to which point I presume your inquiry is more immediately directed, I believe that my intercourse with him, from the time he became my Sergeant-Major up to the time I left the regiment, in 1860, was so constant and so continuous that it is impossible that he could have been addicted to drink without my having some knowledge, or at least suspicion, of it." The Court at its rising adjourned till Monday.

A good deal of time was consumed in the earlier part of Monday in discussing the legality of admitting as evidence certain statements made to Dr. Barnett by Mrs. Lilley as to her husband's habits of drinking. Ultimately the question was left over for the opinion of the Advocate-General. The remainder of the sitting was taken up with the cross-examination by the Court of Sergeant E. Mills and Lieutenant Fitzsimon.

The case for the prosecution closed on Tuesday. The Court was occupied for the greater part of the day in the re-examination of Drs. Turnbull and Barnett, in reference to the statement in their report of the death of Sergeant-Major Lilley that he had drunk large quantities of brandy during his illness. The statement appears to have been mainly based on information given by Colonel Crawley to Dr. Barnett. Corporal F. Holman, however, said he saw Lilley drinking brandy on the night of the 23rd of May, and heard Mrs. Lilley say to him, "My dear man, don't drink so much; it will only do you harm." Private Drabble also deposed to having heard Mrs. Lilley ask her husband to give over drinking brandy and go to bed, as he had had enough. Colonel Crawley, when the case for the prosecution was closed, said it was substantially the case for the defence. He had a few witnesses to call to supply the missing links in the evidence, and then he should ask the Court to adjourn for him to prepare his statement for the defence.

Colonel Crawley put in several letters on Wednesday as evidence in his favour. He then proceeded to call witnesses. The tenour of their evidence was that the Colonel stood well with his regiment. One of them, a native merchant, swore that he supplied Sergeant-Major Lilley with much liquor, and that the Sergeant-Major was in the habit of drinking what may fairly be called freely.

On Thursday, after some cross-examination of one of the prisoner's witnesses, in which nothing material was elicited, Colonel Crawley said that was all the evidence he had to adduce, and he should ask for an adjournment to enable him to prepare his defence. Before that he should call some witnesses as to character, and ask leave to supply any matter which had been inadvertently omitted. With those exceptions, his case had closed. The Court then adjourned until Thursday next.

OUR ILLUSTRATIONS.

We give on the next page an Engraving of the Clubhouse at Aldershott in which this memorable court-martial is being held. It is situated on the right of the road from Farnborough station to Aldershott. The building is of iron, and consists of a centre and two wings, not unlike a mission church. The grounds in the neighbourhood are kept trim, as befits the precincts of a military institution, where abundance of unpaid labour is at command; while beyond a wide tract of moor and white sand stretches to the horizon. A neat portico in front relieves the tameness of the building and shades the principal doorway which gives admittance to the main room of the club—a commodious, serviceable apartment, lighted by day by means of clerestory windows, and at night by three glass chandeliers. This room for the nonce is transformed into a court of justice. The larger portion is railed off for the purposes of the Court and the press, the tribunal occupying the centre of the reserved space, seated around a table which is garnished by an abundant supply of writing materials and a multiplicity of books. Models of the bungalows in which Sergeant-Major Lilley was confined were also exhibited. The prosecutor's table is to the right of the president, the prisoner's to the left. Behind the president's chair a few rows of seats are occupied by officers, spectators of the trial, who are balanced at the opposite portion of the railed-off space by a row of reporters, comfortably seated at tables prepared for their accommodation. Our Engraving on the first page—"A Sketch in Court"—shows this part of the room,

THE COURT-MARTIAL ON COLONEL CRAWLEY.

THE CLUBHOUSE AT ALDERSHOTT, IN WHICH THE TRIAL IS HELD.

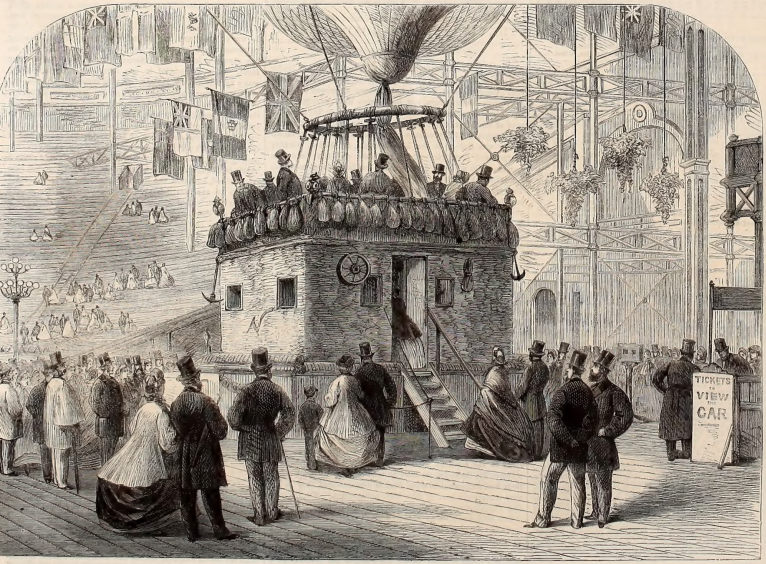
with a witness at the foot of the central table about to be sworn; the background being filled by the general public. An Illustration embracing the body of the room, and showing the general arrangement of the Court, was given in our Number for the 26th ult.

NEW BARRACKS AND OFFICERS' MESSHOUSE AT MHOW.

A number of sketches recently taken at Mhow and its neighbourhood have been courteously placed at our disposal, two of which are engraved on the following pages.

One of the Engravings is a view of the back of the new barracks at Mhow, occupied by the 72nd, or "Duke of Albany's own Highlanders," as seen from a mango-tope, about three quarters of a mile below them. To the left of this are the soldiers' gardens. In the foreground of the Engraving is seen an opium-field, showing the native mode of irrigation by means of water drawn from a well by bullocks, and emptied into a sort of sluice, which carries it to the field where the ground (as seen) is divided into square patches by small trenches, through which the water runs and conveys moisture to the whole. Mhow is in the centre of the Malwa opium district, and in the "cold weather" the fields in the neighbourhood are most beautiful, with the various-coloured poppies in full flower, fields upon fields glittering in the tropical sun with every variety of colour, from the purest white to the deepest crimson. The barracks are built of stone. They are spacious and airy, and well adapted to meet the various changes of the climate; besides the necessary accommodation, they contain library and schoolroom, and almost every kind of workshop, including a printing-office, at which nearly all the printing of the station is done. They are situated at the top of a slight eminence at the extreme south-eastern end of the station, commanding a fine view of the distant ghauts in front, with Holmar's Hill and jungle and plains behind. The ground immediately surrounding the barracks is literally covered with loose stones and boulders, and quite barren; but to the left of the Engraving, on a hill in the extreme distance, is a single tree, near which, on a comparatively smooth space, is the parade-ground of the regiment. Here also, in the "cold weather," the men may be seen playing at cricket and other games. It is known in the garrison by the name of "One Tree Hill," or "Scandal Point;" for there, as the fiery Eastern sun goes down, are assembled the whole station twice a week—a strange mixture: Highland officers, dragoon officers, officers' wives on horseback and in "gharries," soldiers' wives, "Bluff ladies" in their carriages, ayahs and children, with a thin scattering of Parsees and "half-castes"—to enjoy the cool evening breeze, talk scandal, and listen to the splendid band of the 72nd, enlivened occasionally by the national and martial (but not dulcet) strains of the "pipes," playing in the sultry Indian evening air the old home tunes that make many a gallant Scottish heart beat with thoughts of the far-off "land of brown heath and shaggy wood."

In the other Engraving we have a view of the 72nd's messhouse and the adjoining officers' quarters lately built at Mhow in the new lines, exactly opposite and about a quarter of a mile from the new barracks, a little to the right of the parade-ground. On what was about two or three years ago a barren, stony plain, there has now risen up almost a little town. There are two rows of houses built by the officers, in most cases two clubbing together to build each house. They form a sort of open street, named by the officers (no doubt in remembrance of many a pleasant English town in which they have



NEW BARRACKS AT MHOW, NOW OCCUPIED BY THE 72ND REGIMENT, OR DUKE OF ALBANY'S OWN HIGHLANDERS.

MESSHOUSE OF THE 72ND REGIMENT AND ADJOINING QUARTERS OF OFFICERS, LATELY BUILT IN THE NEW LINES, MHOW.

en quartered) "the High-street." The houses have each about lf an acre of "compound" round it, and they are built in most every variety of shape and size, according to the means and chitectural taste of the owners, subject, of course, to the Indian le of building. The messhouse is about the centre of the street he right-hand house in the Engraving); immediately in front of it is the first house built in the new lines by two enterprising officers, and named by them, in honour of the regiment, "Albany Lodge:" the next behind it, built by two junior officers, is called "Carrick Castle," no doubt after some favoured Highland home. The house on the left-hand side of the Engraving, and opposite side of the "street," was built by the Assistant Surgeon and another officer; and in the foreground are seen, on the road to Mhow, the bullock bheestie, or water-carrier, with native carts, taking away the dust and refuse of the camp. The "street" begins at the main road of the station with the Adjutant's bungalow, and terminates with the Colonel's, from which there is a fine view of the distant mountains and road to Bombay.

THE CAR OF NADAR'S BALLOON AT THE CRYSTAL PALACE.—SEE NEXT PAGE.

NADAR'S BALLOON AT THE CRYSTAL PALACE.

The giant balloon with which M. Nadar and eight companions performed their perilous voyage from Paris to Nienburg now floats, fully inflated, in the centre transept of the Crystal Palace, nearly filling the southern end. The novel car, which is, in fact, a small cottage in wicker-work, such as Robinson Crusoe would have counted almost a palace, is suspended from it, and round it are ranged the anchors, buffers, hoops, axes, and all the various rigging with which aeronauts provide themselves for the navigation of the heavens.

The car, of which we give an Engraving on the preceding page, is certainly a great curiosity in its way. In its outside appearance it is not unlike, on a small scale, one of the caravans to be met with at the outskirts of country fairs or by the side of a gipsy encampment; and its interior may remind many of those singular sojourning places which shippers facetiously advertise as commodious saloon cabins. It is about 15 ft. long by 12 ft. wide, and is partitioned off into a captain's cabin, with sleeping berth, four small cabins with berth, washing-room, and printing and photographic operating-rooms. It is fitted with wheels on movable axles, so that there may be no difficulty in the return, supposing a descent to be effected far from ordinary means of transport. There are windows and doors on each side; but, after all, there does not seem much room for nine people to turn in comfortably; and the sensation must have been something like being slung up to the top of one of Pickford's warehouses in a good-sized wine hamper. For those who prefer the open air there is the roof, which, with a strong high bulwark running round, makes a kind of airy terrace or quarter-deck. It was here that the whole party was huddled together in the last half hour of their perilous journey, in which they were whirled more than twenty miles, clinging for dear life to the cordage, bumped violently against the ground every two or three minutes, and expecting at every bound to be crushed to death.

NOW READY,
Price One Shilling, beautifully Printed in Colours,

THE ILLUSTRATED LONDON ALMANACK FOR 1864,

containing Fresh-Water Fish, from Paintings by H. L. Rolfe, with interesting descriptions, by James G. Bertram, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine-Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Headings to the Calendar, by F. W. Keyl. Its pages also include a vast amount of useful and interesting information.
Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

CALENDAR FOR THE WEEK ENDING DEC. 19.

SUNDAY, Dec. 13.—Third Sunday in Advent. The islands of New Zealand discovered by A. Jansen Tasman, 1642. The great Battle of Fredericksburg, Virginia, 1862.
MONDAY, 14.—Death of H.R.H. Albert the Prince Consort, 1861; of George Washington, 1799; and of the ingenious and eccentric Charles, Earl Stanhope, inventor of the Stanhope printing press, &c., 1816.
TUESDAY, 15.—Timoleon's victory over the Carthagenians at the Crimessus, liberating Sicily, 339 B.C. Death of Izaak Walton, author of "The Compleat Angler," 1683.
WEDNESDAY, 16.—Ember Week. Oliver Cromwell declared Lord Protector of the Commonwealth, 1653.
THURSDAY, 17.—Rome taken by the Goths, under Totila, 546. Death of Thomas Guy, founder of Guy's Hospital, 1724. Moon's first quarter, 11 h. 46 m. a.m.
FRIDAY, 18.—King James II. takes barge for Gravesend; the Prince of Orange comes to St. James's, 1688. Sir Hugh Gough's victory over the Sikhs, at Moodkee, 1845.
SATURDAY, 19.—Accession of the Plantagenets; Henry II. crowned King, 1154. Death of Joseph M. W. Turner, the great landscape-painter, 1851.

THEATRE ROYAL, DRURY LANE.—Managers, Messrs. Edmund Falconer and F. B. Chatterton.
Notice.—The public are respectfully requested to take notice that the extensive scenical preparations for the Christmas Pantomime will compel the withdrawal, on Saturday, Dec. 19, for a period extending over the holidays, of Lord Byron's "Manfred."
On MONDAY, and during the Week, her Majesty's servants will perform a new and original farce by W. Brough and A. Halliday, Esqrs., entitled MY HEART'S IN THE HIGHLANDS. Principal characters by Messrs. Belmore, G. Weston, J. Neville, Warde; Miss Harfleur, and Mrs. Neville. After which, commencing at a quarter before Eight o'clock, and concluding about Ten o'clock, Lord Byron's Choral Tragedy of MANFRED. Mortals:—Manfred, Mr. Phelps; Abbot of St. Maurice, Mr. Ryder; a Chamois Hunter, Mr. A. Rayner; Manuel (an aged Retainer), Mr. Neville; Herman (a young Domestic in the Castle of Manfred), Mr. G. Weston; Retainers, Messrs. Bedford, Weaver, Kirk, Wilson, Smith, and Edwards. Immortals:—Arimanes (Ruler of the Evil Agencies), Mr. Warde; Ariel (Spirit of the Ether), Miss Emma Heywood; Hesper (Spirit of the Stars), Miss Louisa Ritter; Undine (Spirit of the Waters), Miss Poole; Miserima (Spirit of Memory), Miss Cicely Nott; Auster (Spirit of the Storm), Mr. Swift; Astaroth (Spirit of the Earth), Mr. Meagerson; Nubes (Spirit of the Shadow of Night), Mr. Ryde; Titanos (Spirit of the Mountains), Mr. G. Spencer; Nemesis (Goddess of Vengeance), Mrs. Edmund Falconer; Clotho, Lachesis, and Atropos (the Three Destinies), Miss Emma Atkinson, Miss C. Weston, and Miss Murray; The Phantom of Astarte, Miss Rose Leclercq; the Witch of the Alps, Miss Eburne; Evil Agencies and Spirit Spectres of the Weird World, Messrs. T. Matthews, J. Morris, and J. Cormack; Miss Seymour, Miss Harfleur, Miss Green, Mrs. Melville, Mrs. Warlow, and the Ladies and Gentlemen of the Choir and the Ballet. Order and character of the Scenery:—Act I.—Scene 1. Studio and Gothic Gallery in Manfred's Castle. Scene 2. A Precipice and Glaciers nigh the summit of the Jungfrau. Act II.—Scene 1. The Chalet of the Chamois Hunter and Alpine Pass. Scene 2. The Steinbach, a Waterfall, in one of the Lower Valleys among the Alps and overhanging Cliffs, the Haunt of the Witch of the Alps.

The sunbow's rays still arch the torrent with the many hues of Heaven,
And roll the sheeted silver's waving column o'er the crag's perpendicular.

Scene 3. The Snow-capped Summit of the Jungfrau, by Moonlight. Scene 4. The Hall of Arimanes in the Nether World, painted by Mr. Danson and Son. Act III.—Scene 1. Terrace and Exterior of Castle. Scene 2. The Turret Studio, the Magian's Midnight Haunt, Shook and Illumined by a Thunderstorm, and finally Destroyed by Flashing Bolt and Crashing Avalanche. Last Scene. A Snowy Alpine Waste or Wilderness. Spectral illusions by Mr. Cox; and also Professor Pepper's adaptation of Dirck's invention, under the special superintendence of Professor Pepper. The whole of the entirely new scenery designed and principally painted by Mr. W. Telbin, assisted by his son, Mr. H. Telbin. The Hall of Arimanes painted by Mr. Danson and Sons. The increased orchestra and present arrangement of the music (originally composed by Sir Henry Bishop) under the direction of Mr. Barnard. The choir under the direction of Mr. Charles Beale. To conclude with a new and Original Farce, by John Oxenford, Esq., entitled BEAUTY OR THE BEAST; principal characters by Messrs. Addison, G. Neville, Barrett, Spencer, and G. Weston; and Mrs. Edmund Falconer and Miss R. Leclercq. Stage Manager, Mr. Phelps.
In preparation, a GRAND COMIC CHRISTMAS PANTOMIME, to ensure the scenical magnificence of which the exclusive services of the celebrated Artist Mr. William Beverley have been retained.
Private boxes, 10s. 6d., 21s., £1 11s. 6d., £2 2s., £3 3s., and £4 4s.; stalls, 6s.; dress circle, 4s.; first circle, 3s.; boxes, 2s.; pit, 2s.; lower gallery, 1s.; upper gallery, 6d. No half-price. Box-office open from Ten till Five daily. Doors open at Half-past Six; the performances commence at Seven o'clock, and terminate every evening at a Quarter-past Eleven.

THE

CHRISTMAS DOUBLE NUMBER

OF

THE ILLUSTRATED LONDON NEWS

TO BE PUBLISHED ON SATURDAY, DECEMBER 19,

WILL INCLUDE A BEAUTIFUL PICTURE (FOUR PAGES),

PRINTED IN COLOURS,

LITTLE RED RIDING HOOD,

FROM A PAINTING BY T. SANT, A.R.A.;

AND

TWO CHRISTMAS SUPPLEMENTS

(A SHEET AND A HALF),

CONTAINING THE FOLLOWING ORIGINAL

CHRISTMAS TALES AND SKETCHES:

KING HENRY VIII. KEEPING CHRISTMAS AT THE ROYAL PALACE, GREENWICH. Illustrated by JOHN GILBERT.
UNDER THE MISTLETOE. Illustrated by G. THOMAS.
THE MASTER OF ARAN GARTH. Illustrated by SAMUEL READ.
FREEMAN'S PHANTOMS. Illustrated by A. HUNT.
LILY'S BALL (Poetry). Illustrated by J. A. FITZGERALD.
THE HAIRDRESSER OF TETHERHAM. Illustrated by L. HUARD and A. HUNT.
TELL US A STORY. Illustrated by C. ROBINSON.
THE CHRISTMAS ANTHEM. Illustrated by A. HUNT.

The Letterpress by Shirley Brooks, Westland Marston, the Author of "Abel Drake's Wife," D'Arcy Thompson, E. F. Blanchard, Hain Friswell, and G. Mac Donald.

The Number will contain the following Illustrations:—

The Prince of Wales at the Smithfield Club Cattle Show.
Portrait of Lord Walsingham, President of the Smithfield Club.
Two large Illustrations of the Prize Animals at the Smithfield Club Cattle Show.
Removal of the Remains of the late King of Denmark.
The King of Greece Administering the Oath to the National Guards at Athens. From a Sketch by our Special Artist.
"The Nativity." A Pen-and-Ink Drawing by the Hon. Mrs. Boyle.
The Confederate Steamer Rappahannock (Victor) at Calais.
Portrait of Sir John Lawrence, the new Governor-General of India.
The London Irish Rifle Volunteers' Testimonial.
The South Middlesex Volunteers' Testimonial.

Price of the whole—Number, Two Supplements, and Coloured Picture—One Shilling Unstamped; Twopence Extra for Stamped Copies. 198, Strand, W.C.

NOTICE TO ADVERTISERS.—Advertisements for the Christmas Double Number, Dec. 19, should be sent in not later than the 15th, to ensure insertion. Terms, 3s. a line of ten words; lowest charge, 12s. for thirty-four words.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, DECEMBER 12, 1863.

At length the Federals have gained a General, and that leader has gained a victory, which may fairly be described as a great one. General Grant is declared to have destroyed the army of Bragg. Chicamauga has been more than avenged. The Confederate commander is described as having fled amid the rout of his forces, and to have abandoned his guns, caissons, and waggons. Fifty cannon are stated to have been taken. Bragg was flying, at the last accounts, to Dalton, burning bridges and destroying all behind him; and the victor was pursuing him with all possible speed, but had tarried to cut up the railway by which Longstreet might have come to the aid of Bragg. From the position of the antagonists it is clear that the rectification of statements of detail, or even the information that the demoralisation of the Confederate army is not so complete as has been stated, cannot alter the fact that General Grant has done a great thing for the North, and that, for the first time in the war, the Federals have won a brilliant victory. We attach no value to the statement that this success excites no enthusiasm in the North. If it be not recognised for what it is, the Federals scarcely deserve a General who can win such laurels. But we make no doubt of hearing that the North is quite aware of the greatness of the exploit. And we cannot see the wisdom of those who seek to disguise the fact that the resources of the Federals have at length begun to tell terribly upon their enemies.

The Confederates cannot afford to lose an army. They have not the means of recruiting, in the first place, and, in the second, they lose the strength and flower of their population, instead of a class which we dare say the Federal authorities think are just as well occupied in receiving the fire of the Southerns as in loafing about the streets of the Union cities. Not that we would be understood to direct this remark at the whole, or even the majority, of the Northern armies, which have in their ranks thousands of estimable citizens; but the Federal authorities have used the "dangerous classes" very plentifully, and not unwisely, and can send them to the front in almost any number to replace losses; whereas the Confederates have no such power. They put forth their best strength, and when that is overmastered they suffer very much more heavily than their antagonists. We imagine that this blow may be regarded as the beginning of the end.

It is only due both to victors and vanquished to point out that this, the most remarkable victory of the North, has been won by the very best soldiers whom it could launch upon the foe. The Federals of the West are a fine and sturdy race, not likely to quail before the rush of the Confederates, who come on like a tempest, and have so often swept the newly-raised armies of the North before them. These Western soldiers charged with a fierceness equal to that of their foes, and were probably superior to them in the stubbornness which has given so many a victory to English warriors. Then it must be remembered that, if the details already obtained be correct, the South was largely outnumbered; and, finally, it must not be forgotten that, whereas Grant was fresh at his work and had all the confidence of his soldiers, Bragg had for a long time been on such ill terms with his army, or at least with his chief officers, that the presence of Mr. Davis himself had been necessary at the camp to set matters in some kind of order. The Confederates, therefore, went into action against an enemy as good as themselves as regarded physique, and better off in numbers and in the relation of the General to the army. Take all this into account, in justice to both sides, and still General Grant remains the victor upon a glorious battle-field. English writers will not show the impartiality and fair play on which it has been, and justly, the custom to pride ourselves, if we refuse to a brilliant exploit by the North the admiration which we have always been ready to show to Confederate valour and endurance.

While Grant was defeating Bragg the Virginian army, which it was asserted that Meade was unable to move on account of the state of the country, had resumed the offensive, had crossed the Rapidan at three fords, and was advancing upon Orange Courthouse. General Lee would doubtless be prepared for the encounter; and, as he did not resist the Federal General's passage of the river, he is supposed, with probability, to be trying to lure him into a trap, or, at all events, to design to fight him on ground of Lee's own selection. If this battle should be decisive, and Lee be defeated—a result which is not to be calculated on from past events—the Confederates will have to consider whether they will give up the game or concentrate themselves in some restricted but easily-defended portion of Secessia. On the other hand, if Lee beats Meade, here is the old see-saw work over again, only that the Confederates are weaker by an army. The telegram says that rumours of an unfavourable kind were going about; but, under the circumstances, the statement seems to us to have no significance.

Longstreet had certainly got Burnside (or else Foster, in the "temporary absence" of Burnside) shut up in Knoxville, and was besieging him, although it may be true that actual investment, such as is understood from the ordinary use of the word, was impossible. But, if Longstreet had access to the only road by which the encaged General could escape, the result might be pretty much the same as a complete investment. On this point it is not easy to obtain accurate information. But one thing is certain—namely, that the Confederates can less than ever afford to lose time over Knoxville; and if Meade should be fortunate, Burnside will be even more so, without action of his own to justify his good fortune. We may expect early tidings as to this feature in the campaign.

We may repeat our belief that the Confederates have at last received a blow which will have a visible effect upon the fortunes of the war. The rule in mechanics, that when two forces come into collision one must give way, is true in war; but there are so many retarding and balancing influences which come into play in military matters that we are always a long time in ascertaining which is the superior force. It was doubtful in this American struggle. There was a vast numerical majority on the side of the North, and there was a navy, and there were all the resources of Europe at her command. The odds, no doubt, seemed very great against the South, but she contrived to reduce them so enormously by her display of military skill, by the daring of her troops, and by the unanimous sentiment of hatred for the North and of resolve to work out independence, that many observers, not usually hasty, believed that it was the latter that would soonest weary of the contest. We believe that the problem has now been solved, and that the game is beginning to be decided—that is to say, supposing no intervention take place, and the North be left to measure itself steadily and remorselessly against the South. The Federals may lose another army and send a new one to replace it. The Confederates may lose another army, but would not be able to replace it. It is as in chess—when once the balance of power is gained, every exchange does but more severely damage the chance of the weaker. The work of subjection, which Earl Russell declared, early in the war, was the work that the North had undertaken in its resolve for empire, will be done, if permitted. And if the South have a friend who intends to take her part, he will do well not to lose time. We do not hesitate to mark the news that has come this week as the most significant which we have had since Bull Run, and we shall see it so accepted as soon as the details shall have afforded the public mind some more real view of the case than is presented by the bald language of a telegram.

The English fleet has quitted Greece, leaving only two ships at the Piræus.

Nevada territory is said to be the richest silver-bearing country in the world. It is estimated that the product of this year will be £3,000,000.

Professor Sylvester, of Woolwich, has been elected corresponding member of the Institute of France for the section of geometry, in the place of the late M. Steiner.

The eleventh annual meeting of the Conservative Land Society was held on Tuesday. The report was highly satisfactory, and, after some remarks from Lord Ranelagh, it was adopted with acclamation.

Jamaica was visited by a severe earthquake on the 8th ult. The first shock lasted forty seconds, and was rapidly succeeded by a loud rumbling and a second shock.

Sir John Lawrence had an audience of the Queen on Saturday last, and did the usual homage on his appointment as Viceroy of India. On Monday he had interviews with Sir Charles Wood, at the India House, and with the Chancellor of the Exchequer. His Excellency left London on Wednesday for Marseilles, where he will embark for Alexandria en route to assume his duties at Calcutta.——Sir George Clerk, who has been twice Governor of Bombay, succeeds Sir J. Lawrence in the India Council at home.

The council of the Social Science Association have unanimously resolved to hold their meeting next year in the city of York. The executive committee was at the same time authorised to carry out a proposed union between the association and the Law Amendment Society. Arrangements are in progress calculated greatly to increase the activity and efficiency of the departments, and to secure more definite results from the discussions at the annual meetings.

THE COURT.

The Queen continues at Windsor Castle, in the enjoyment of excellent health.

On Friday se'nnight her Majesty, accompanied by Princess Louisa, walked and drove in the castle grounds. The Crown Prince and Princess of Prussia went to London, attended by Countess Hohenthal, Count Furstenstein, and Major von Schweinitz. The Earl of Malmesbury arrived at the castle. Pomari, the Maori chief, with his wife and infant son, also arrived at the castle, and had the honour of an interview with her Majesty, who has been graciously pleased to be sponsor to his child. The infant was named, by desire of the Queen, Albert Victor. Her Majesty has presented the child with a gold goblet, knife and fork, and spoon, bearing the inscription, "To Albert Victor Pomaré, from his godmother, Queen Victoria. Nov., 1863." The articles were inclosed, with a £25 note, in a morocco case.

On Saturday last the Queen, accompanied by the Crown Princess of Prussia, drove in the grounds. Sir Charles Wood and Sir John Lawrence arrived at the castle. Sir Charles Wood had an audience of the Queen, and presented Sir John Lawrence upon his appointment as Governor-General of India. Lord Wodehouse and the Right Hon. W. E. Gladstone and Mrs. Gladstone also arrived at the castle. Lord Wodehouse had an audience of the Queen. The Earl of Malmesbury left the castle.

On Sunday the Queen, the Crown Prince and Princess of Prussia, Princess Helena, Princess Louisa, Prince Leopold, and the Princess of Hohenlohe, attended Divine service in the private chapel. The Rev. C. Tarver officiated.

On Monday the Queen, attended by the Hon. Mrs. Bruce, walked and drove in the castle grounds. Princess Louisa drove out. The Crown Prince and Princess of Prussia, attended by Countess Hohenthal, Count Furstenstein, and Major von Schweinitz, went to London. The Crown Prince visited the Smithfield Club Cattle Show, at the Agricultural Hall, Islington. In the evening the Crown Prince and Princess honoured the performance at the Lyceum Theatre with their presence.

On Tuesday the Queen, accompanied by Princess Helena, Princess Louisa, Princess Beatrice, and the Princess of Hohenlohe, attended by the Hon. Caroline Cavendish, the Hon. Flora Macdonald, and Colonel the Hon. D. De Ros, drove to the New Lodge, and honoured the Belgian Minister and Mdme. Van de Weyer with a visit. The Queen held a Privy Council. In attendance were Earl Granville, the Duke of Somerset, Earl Russell, Earl De Grey and Ripon, and Viscount Palmerston. The Prince of Wales, by command of her Majesty, was introduced into the Privy Council. His Royal Highness took his place at the board. Sir William Gibson Craig, Bart., Lord Clerk Registrar and Keeper of the Signet in Scotland, by command of the Queen, was sworn of her Majesty's Most Honourable Privy Council. Mr. Helps, the clerk of the Council, attended. Earl Granville, the Duke of Somerset, and Viscount Palmerston had audiences of the Queen. Mutee Coomara Swamy, a native of Ceylon and member of the Legislative Council, was presented to the Queen at an audience by Earl Russell, to deliver a book which he had received permission to dedicate to her Majesty. The Duke of Brabant arrived at the castle on a visit to the Queen. The Lord Chancellor also arrived at the castle and had an audience of the Queen.

The Duke of Brabant left the castle on Wednesday for Frogmore House.

The Queen and the Royal family take daily walking and driving exercise in the neighbourhood of Windsor.

Mr. Ferdinand Richardt has had the honour of submitting to the Queen his collection of 800 paintings and sketches taken in Denmark, Sweden, and America.

Lord Talbot de Malahide has succeeded Lord De Tabley as Lord in Waiting, and Colonel the Hon. A. Liddell has succeeded Lieutenant-Colonel F. Cavendish as Groom in Waiting to the Queen.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales continue at Frogmore House.

On Friday se'nnight the Prince, attended by Colonel Keppel and Mr. Fisher, went out hunting with the harriers; the meet took place at Bagshot. The Princess, attended by the Hon. Mrs. F. Stonor, drove out. Their Royal Highnesses dined with the Queen at Windsor Castle.

On Sunday the Prince and Princess attended Divine service in the private chapel of Windsor Castle.

On Monday the Prince, attended by Colonel Keppel, went to London and visited the Smithfield Club Cattle Show at the Agricultural Hall, Islington. His Royal Highness afterwards went to Marlborough House. In the evening his Royal Highness honoured the performance at the Lyceum Theatre with his presence. The Princess, attended by the Hon. Mrs. F. Stonor, walked and drove in the grounds of Frogmore House.

On Tuesday the Prince attended the Privy Council at Windsor Castle. The Princess, attended by the Hon. Mrs. Stonor, drove out. Their Royal Highnesses dined with the Queen at Windsor Castle.

The Princess takes daily walks and drives in the vicinity of Frogmore House.

The Prince has been graciously pleased to become one of the protectors of the German Hospital in conjunction with the Queen and the King of Prussia.

Mr. R. Dowling, commissioned by the Tasmanian Government, has been honoured with a sitting from the Prince, at Frogmore House, for his portrait.

Mr. Morton Edwards, commissioned by the Corporation and town of Toronto, has also been honoured with a sitting for a bust of his Royal Highness.

PRINCE ALFRED.

Prince Alfred continues at Holyrood Palace.

On Wednesday se'nnight the Prince and Prince William of Hesse, attended by Major Cowell and Captain von Zangen, honoured the Countess Dowager of Morton with their company at a dinner and ball at Duddingstone House.

On Thursday se'nnight the Prince and Prince William of Hesse honoured the Lord Provost of Edinburgh with a visit. A distinguished circle was invited to meet their Royal Highnesses at a dinner and an evening party, followed by a ball.

On Sunday the Prince attended Divine service in Old Greyfriars Church, Edinburgh. The Rev. Dr. Lee officiated. Prince William of Hesse attended Divine service in the German Church, Upper Queen-street Hall.

Their Royal Highnesses the Duchess of Cambridge and Princess Mary arrived at Kew on Monday from Brighton.

His Royal Highness the Duc d'Aumale has left his seat in Worcestershire on a visit to the Earl of Abingdon, at Wytham Abbey.

His Excellency the Prussian Ambassador and Countess Bernstoff have returned to Prussia House from visiting Countess Frances Waldegrave and Mr. Chichester Fortescue, M.P., at Dudbrook House, Essex.

Señor Don Mariano José Sans, Envoy Extraordinary and Minister Plenipotentiary of Peru to the Court of St. James's, has arrived at Maurigy's Hotel.

Viscount and Viscountess Palmerston arrived in town on Monday from Brocket Hall.

The Right Hon. Sir George Grey left London on Saturday last for his seat, Fallodon, Northumberland.

The Chancellor of the Exchequer has left town for Hawarden Castle.

Approaching Marriages in High Life.—A marriage will shortly take place between Viscount Powerscourt, son of the late Viscount Powerscourt and the present Marchioness of Londonderry, and Lady Julia Coke, daughter of the Earl and Countess of Leicester.——The marriage of the Hon. J. M. Henniker with Lady Alice Cuffe will take place on the 14th of January.——The marriage of Mr. Greville and Lady Violet Graham will take place on the 15th inst.

The Mercantile Marine Association of Liverpool, it will be remembered, took up the case of Captain Stone, of the Africa, very warmly. Under the advice of the nautical assessors, who sat with the magistrate at the inquiry into the causes which led to the stranding of the Africa near Cape Race, Captain Stone's certificate was suspended for six months. The Board of Trade has been memorialised by Captain Stone and by the Mercantile Marine Association to reverse this sentence. In a letter written on Thursday week the Board has announced to the memorialists that it sees no ground for interference with the suspension of the certificate.

NAVAL AND MILITARY INTELLIGENCE.

WAR OFFICE.

ADMIRALTY.

The following promotions, dated the 30th ult., have been made in consequence of the death of Admiral of the Blue Sir J. H. Plumridge, K.C.B., on the 29th ult.:—

Vice-Admiral of the Red the Hon. Sir M. Stopford, K.C.B., to be Admiral of the Blue.

Vice-Admiral of the White the Hon. Sir F. W. Grey, K.C.B., to be Vice-Admiral of the Red.

Vice-Admiral of the Blue Sir T. S. Pasley, Bart., to be Admiral of the White.

Rear-Admirals J. B. Maxwell and J. B. Carnac, on the Reserved List, to be Vice-Admirals on the same list.

Rear-Admiral of the Red the Right Hon. Thomas Earl of Lauderdale, C.B., to be Vice-Admiral of the Blue.

Rear-Admiral of the White T. Henderson to be Rear-Admiral of the Red.

Rear-Admiral of the Blue H. Kellett, C.B., to be Rear-Admiral of the White.

Capt. J. Russell to be Rear-Admiral on the Reserved List.

Capt. the Hon. T. Baillie to be Rear-Admiral of the Blue.

Retired Vice-Admirals J. Montagu, Sir A. D. Y. Arbuthnott, Knt., and W. Hotham, K.H., to have the rank and title of Retired Admirals.

Up to the 30th ult. 19,269 applications had been received, and 16,751 volunteers enrolled in the Naval Reserve.

Captain George Gifford, C.B., is promoted to the rank of Rear-Admiral by the demise of Admiral of the Red John Ayscough; and by the gallant officer's promotion a Captain's good-service pension becomes disposable.

In order to strengthen the defences at the entrance to Chatham Harbour, Government has given directions for a deep moat, extending about two miles, to be forthwith commenced at the estuary of the river, near its confluence with the Thames at the Nore. At each end of the moat will be erected two powerful batteries, or towers, armed with guns of the heaviest calibre, whilst it will be protected on its land side by two similar forts. The excavations required to be carried out in the construction of the ditch will occupy rather more than twelve months.

Lord Nelson's coxswain on board the Victory, Mr. John Pringle, died at his residence, Newton Bushel, Devon, on Saturday last, having attained the extraordinary age of 103 years on the 19th of May last. The deceased veteran had only been ill about a month. Prior to his illness, although he was rather infirm, still his mental faculties were unimpaired, and he used to display those social qualities which so greatly distinguished him in early life. On his birthday for several years past he was in the habit of driving round the town in company with his wife, and the old and respected couple were the observed of all observers. He was by birth a Scotchman, having been born in the county of Fife, and, on attaining the age of twenty-one, he joined the Royal Navy. While in the service, he took an active part in many of our celebrated naval battles, among others, those of the Nile and Trafalgar. He had a pension granted him. At the ripe age of ninety-two he married, and his wife survives him.

The trial of guns v. plates has been prosecuted once more, the scale of victory inclining in favour of the plates. On Tuesday a target representing a section of the iron-clad ship Bellerophon, which is about to be constructed on plans prepared by the Chief Constructor of the Navy, was subjected to a severe ordeal at Shoeburyness. Armstrong and Whitworth guns were tried against it, but it would seem that the shipbuilder once more proved too much for the artillerists. The target was all but completely triumphant in resisting power, apparently equalling the Chalmers target, which was so successful some time ago.——Recent experiments, as our readers are aware, have taken place at Portsmouth to test the effects of steel shot on iron plates. The Monarch, target-ship, at Portsmouth, had on Tuesday a 5½ in. armour plate (Milwall) taken off her side for minute examination. This plate had already successfully stood a good firing from one of the old 68-pounders; and, that a fair test should be made, it was selected, in consequence of its good qualities, for another trial, but, in fairness, a different portion from that already fired at was selected. Three spherical steel shots were fired, with a charge of 20 lb. of powder each, from one of the 100-pounder Armstrong smooth-bore guns; and now that the plate is off the full effect of the firing can be seen. Two of the shots appear to have forced the plate two inches from the outside surface, whilst on the inside it not only completely splintered and scattered the ship's planking, timbers, &c., but the plate itself was cracked in every direction contiguous to where the shots struck. The third shot penetrated entirely through the armour-plate and ship's side, and was found shattered in broken pieces, with the splinters of the timber on the deck.

THE VOLUNTEER MOVEMENT.

A competition amongst the best shots of the London Rifle Brigade took place on Saturday afternoon, at their range at Plaistow, to determine the honour of holding, for the ensuing three months, the gold challenge badges given by the Brigade Rifle Association. In spite of the boisterous weather, very fair average shooting was made. In the first battalion a neck-and-neck race was run between Privates Wyatt and Tatchell and Colour-Sergeant Churchill up to the last shot, when Colour-Sergeant Churchill fell to rear with 25 marks, and the other two competitors tied with 26 marks each. In shooting off the tie, Private Tatchell made one centre to Private Wyatt's outer, the badge thus changing hands.

The London Artillery Brigade again underwent an inspection by the officer appointed by the War Office to assist the commanding officer in granting certificates of efficiency for the capitation grant, on Thursday week, in Westminster Hall, when there was a numerous attendance of the members, and the manœuvres were very well performed. The commanding officer also inspected the arms, all of which were found to be in perfect condition.

The eleventh company of the Queen's (Westminster) competed for prizes, on the 30th ult., at Wormwood Scrubbs. The Captain's prize was won by Corporal Watts; the Lieutenant's prize by Private Milward; the Ensign's prize by Private Laye; Mr. Barringer's prize by Private Clark; Mr. Becking's prize by Private Thomas; the ladies' prize by Sergeant Bocking, and the consolation prize by Private Stephenson.

The ceremony of distributing the prizes won during the past year in the annual rifle competition of the 37th Middlesex (Bloomsbury) took place on Saturday night, at the Music-hall, Store-street. Colonel M'Murdo, Inspector-General of Volunteers, who was received with flattering marks of respect, officiated.

On Monday evening the annual presentation of prizes for shooting to the successful competitors of the 39th Middlesex (Finsbury) took place at Myddleton-Hall, Upper-street, Islington, by Colonel M'Murdo, C.B., Inspector-General of Volunteers.

The distribution of the prizes for shooting to the members of the 19th Middlesex corps took place on Monday evening in Westminster Hall. Lieutenant-Colonel Bathurst, the hon. commandant of the corps, commenced the proceedings by congratulating the members on the great progress they had lately made in shooting. Last year the number of marksmen was only 25, while this year there were no less than 50. In the first, second, and third classes there had been a corresponding increase of numbers. He concluded by passing a strong eulogium on the officers of the corps for the painstaking manner in which they kept up its high state of efficiency. Mrs. Thomas Hughes, the wife of the acting-commandant of the corps, Major Hughes, then distributed the prizes, more than a hundred in number. Major Hughes announced that, next year, Mrs. Hughes intended giving a prize for combined good shooting and regular attendance at drill.
